MICROFILMED – 1975

VOL 39

INDEX

federal register

index

March 1974

Volume 39 ■ Numbers 42-62
Pages 7915-11854

The FEDERAL REGISTER INDEX is published monthly and annually. Entries are carried primarily under the names of the issuing agencies. Significant subjects are also carried.

A numerical finding aid keyed to the Code of Federal Regulations (List of CFR Sections Affected), is published monthly and is cumulated each month, coordinated with the revision dates of the Code volumes.

A list of pages and dates of publication in the FEDERAL REGISTER appears at the end of this INDEX.

INDEX

Commodity Exchange Authority.
Cooperative State Research Service.
Farmers Home Administration.
Federal Crop Insurance Corporation.
Food and Nutrition Service.
Forest Service.
Rural Electrification Administration.
ANIMALS AND PRODUCTS:
See also Meat and products; Packers and Stockyards Administration.
Diseases, areas quarantined, regulations, etc.:
Brucellosis, 8153, 11526.
Exotic Newcastle disease, psittacosis, etc., in poultry, 8194.
Foot-and-mouth disease, rinderpest, etc., 8317, 11176.
Hog cholera, 9819.
Scabies in cattle, 10236, 11254, 11526.

Page
Imports, quarantine facilities:
Feed and attendants for animals, proposed rule 11295
Fleming Key Center, Florida, proposed establishment; inquiry 7974
Indemnity payments for swine destroyed by hog cholera 10885
Overtime services. *See* Overtime services, *below.*
Swine:
See also Diseases.
Indemnity payments, destroyed 10885
Welfare:
Licensed and registered exhibitors, list 10167
Practice rules 11173
APRICOTS, standards for grades, canned, solid-pack 8903
BIOLOGICAL PRODUCTS. *See* Viruses, serums, toxins, etc., *below.*
CHEESE, import quotas 11074
COTTON:
Research and promotion, practice and procedure rules 11253
Upland cotton, program payment, limitation; proposed 7943
CRANBERRIES, marketing, certain States 8317
FEDERAL SEED ACT regulations, labeling and advertising Alta and Kentucky 31 Tall Fescue Seed 9485
FEED GRAINS:
National feed grain allotment, 1974 9446
Program payment, limitation; proposed rule 7943
GRAINS:
See also specific grains.
Standards, inspection points:
Illinois, 10167.
Iowa, A. V. Tischer & Son, Inc., 11612.
HOPS, domestic, marketing allotment percentage for 1974–75 marketing year 10425
IMPORTS:
Cheese 11074
Fleming Key Center, Florida, proposed establishment; inquiry 7974
Milk and products, proposed restrictions 8619
Onions, minimum grades and sizes 8911
Overtime services. *See* Overtime services, *below.*
Quarantine, facilities, feed and attendants for animals; proposed rule 11295
INCOME TAX RETURNS, revocation of authority to inspect (Executive Order 11773) 10881
INDEMNITY PAYMENT PROGRAM, swine destroyed 10885
LEMONS, marketing:
Arizona and California, 8153, 9195, 9972, 10684, 11524.
MEAT AND PRODUCTS:
See also Animals and products; Packers and Stockyards Administration.
Inspection regulations:
Labeling, marking, products and containers, definition, proposed rules 10598
Quality control programs for plants, proposed rules, extension of time 10914
MEETINGS, advisory councils and committees, etc.:
Child Nutrition, 10008.
Committee of Nine, 11612.
Foreign Animal and Poultry Diseases, 11124.
Shippers, 9485, 10305.
MILK IMPORTS, proposed restrictions 8619
MILK MARKETING in certain States, orders proposed or adopted:
Arizona, 8712.
Arkansas, 8271, 8452, 8938, 9837, 11526.
Colorado, 8712.
Connecticut, 11567, 11570.
Delaware, 8712, 11567, 11570.
District of Columbia, 8712, 11567, 11570.
Florida, 8609.
Georgia, 8452, 8936.
Illinois, 8218, 8230, 8261, 8271, 8936, 9053, 9837, 9918, 10426, 11526.
Indiana, 8240, 8250, 11567, 11571.
Iowa, 8165, 8938, 9044, 9053, 9075, 9106, 9113, 9123, 9180, 10568.
Kansas, 8452, 9062.
Kentucky, 8240, 8282, 8283, 8452, 8938, 10606, 11068, 11526, 11567, 11570.
Louisiana, 8452.

Virginia, 8712, 11088, 11570.
West Virginia, 11088.
Wisconsin, 8219, 8938, 9086, 9096, 9198, 10426.

NUTS. *See* Peanuts.
OLIVES, marketing:
California, 10437.
ONIONS, imports, minimum grades and sizes 8911
ORANGES, marketing:
Arizona and California:
Navel, 7924, 9196, 9971, 11074, 11426.
Valencia, 9971, 11075, 11427.
OVERTIME SERVICES, imports and exports:
Animals and products 7923, 10115
Plants and products 7923
PACKERS AND STOCKYARDS ADMINISTRATION:
Feedlots, custom, proposed rule, extension of time 9454
Posted stockyards, designation or removal 8179, 11124, 11211
Rate increase petitions 10637
Scale tickets evidencing weighing of livestock 8913
PAYMENT LIMITATION, 1974 crops, wheat, feed grains, and upland cotton; proposed rule 7943
PEACHES, marketing:
Utah, termination, 11253.
PEANUTS:
Marketing quotas, acreage allotments, etc.:
1972 crop, 10883.
Supply available for cleaning and shelling, 1974–75 marketing year; inquiry 8165
PEAS, dry, standards for grades, proposed rule 10911
PLANT QUARANTINE:
Domestic:
Citrus Blackfly, 9653, 9656.
Overtime services. *See* Overtime services, *above*.
POULTRY AND PRODUCTS:
Imports, quarantine facilities, feed and attendants for animals; proposed rule 11295
Inspection regulations:
Eviscerating facilities, sanitation 8154
Quality control programs for plants, proposed rule, extension of time 10914
QUARANTINE:
Animal diseases. *See* Animals and products.
Plants. *See* Plant quarantine.
RICE, marketing quotas, acreage allotments, etc.:
1974 crops, 9186.
SEEDS. *See* Federal Seed Act.
SOIL SAMPLES, list of approved laboratories for processing, testing, and analysis 8362, 9683
SUGAR:
Continental requirements and area quotas:
1974 crop, 11523.
Prices, sugarcane, 1973–74 crop:
Puerto Rico, 10421.
TOMATOES, marketing:
Florida, 8937, 10553.
VETERINARIANS, accredited, standards for:
Definitions, proposed rule 8938
Requirements, proposed rule 8939
VIRUSES, SERUMS, TOXINS, etc., standard requirements, technical bulletins, test methods, etc.; proposed rule 9983
WHEAT:
Marketing quotas, acreage allotments, etc.:
1975, proposed determination, 8334.
Program payment, limitation; proposed rule 7943

Air Carriers:

See Aircraft and air carriers.

AIR FORCE DEPARTMENT:

See also Defense Department.
AIRCRAFT, Air Force installations, use by other than Defense Department aircraft 10124
EDUCATION OF DEPENDENTS in overseas areas, elementary and secondary 10560
ENVIRONMENTAL STATEMENTS, availability:
Minuteman II operational base launch, proposed; hearings, 8941, 9845.
MEETINGS, advisory committees, etc.:
Academy, 11610.
Air University, 8357.
Army and Air Force Exchange and Motion Picture Services, 8357.
Scientific, 10305, 10456.

Air Pollution:

See Pollution.

Aircraft and Air Carriers:

See also Civil Aeronautics Board; Federal Aviation Administration.
ACCIDENTS. *See* National Transportation Safety Board.
AIR FORCE INSTALLATIONS. *See* Air Force Department.

Tennessee, 9667, 10274.
Contracts, grants, and loans, Federal, administration of Clean Air Act; proposed rules ---------- 11099
Stationary sources of pollution; performance standards, new sources:
Categories, certain:
Asphalt concrete plants ---------- 9314
Brass and bronze ingot production plants, secondary ---------- 9318
Iron and steel plants ---------- 9318
Lead smelters, secondary ---------- 9317
Petroleum refineries ---------- 9315
Sewage treatment plants ---------- 9319
Storage vessels for petroleum liquids ---------- 9317
Definitions, etc ---------- 9313
Determination of emissions, methods ---------- 9319
AIRCRAFT AND ENGINES, emission standards:
Fuel venting and smoke retrofit requirements; temporary exemptions from, certain operators ---------- 9696
CLAIMS against EPA, employees' personal property -- 9664
COMMITTEES:
See also Meetings, *below*.
Lake Michigan Cooling Water Studies Panel, establishment ---------- 10015
FUEL AND FUEL ADDITIVES. *See under* Aircraft and engines; Motor vehicles and engines.
GRANTS. *See under* Water pollution, *below*.
MEETINGS, advisory committees, etc.
Air Pollution Chemistry and Physics, 10650.
Air Quality, 9696, 10179, 11628.
Antimicrobial Program, 10179.
Effluent Standards and Water Quality Information, 9571.
Paint and Varnish Industry, 8955.
MOTOR VEHICLES AND ENGINES, new; control of air pollution from:
Exclusions and exemptions, proposed rules ---------- 10602
Fuel and fuel additives, regulation of:
Registration, proposed rules ---------- 8930
Light duty vehicles, new; emission regulations for:
Gasoline-fueled:
Model years affected, rules proposed or adopted, etc.:
1975 ---------- 10013
Nitrogen oxide, technological feasibility of meeting maximum permissable levels ---------- 11134
Recall regulations, proposed rules ---------- 11104
Retrofit devices, voluntary evaluation program; inquiry ---------- 11334
Sulfate emissions, automotive; inquiry ---------- 9229
Suspension requests, 1976 emission standards:
Automobiles Peugeot, 11133.
Isuzu Motors, 11133.
NOISE ABATEMENT PROGRAMS:
Citizen suits, prior notice of; proposed rules ---------- 9200
Low-noise-emission products, certification procedures; correction ---------- 7930
Motor carriers, interstate, emission standards; proposed rules, hearing ---------- 9550
OCCUPATIONAL SAFETY AND HEALTH STANDARDS, farm workers. *See under* Pesticides, *below*.
PESTICIDES used on crops and raw agricultural products:
Cancellations, applications, etc.; certain pesticide and rodenticide product registrations:
2,4-D, 8183.
DDT, 8182, 8377, 10014, 10322.
Mirex, 9231.
707-X Kills-Controls Rats-Mice and 707 Warfarin Mouse & Rat Killer, 11459.
Sodium cyanide, experimental use of M-44, correction, 10014.
Exemptions from tolerances:
Cross-linked nylon-type encapsulating polymer, 9965.
Tetrahydrofurfuryl alcohol, 11080.

Page

Federal Insecticide, Fungicide, and Rodenticide Act:
Applicators using restricted use pesticides, standards of competence certification; proposed rules, extension of time ---------- 11305
Experimental use permits, proposed rules ---------- 11308
Registration of products under Act:
See also Cancellations, *above*.
Applications, consideration of data by Administrator in support of ---------- 8182, 8381, 8656, 9231, 9572, 9697, 10179, 10321, 10650, 10933, 11459, 11626
Occupational safety and health standards for farm workers dealing with pesticides, proposed rules --- 9459
Specific and temporary tolerances; rules proposed, adopted, or withdrawn:
See also Exemptions from tolerances, *above*.
Acetic acid, 11268.
Benomyl, 9231, 9439.
Bentazon, 11333.

O,O-(Diethyl-O-(2-isopropyl-4-methyl-6-pyrimidinyl phosphorothioate, 9231.
Dimethoate, 10650.
O,O-Dimethyl *S*-[4-oxo - 1,2,3 - benzotriazin - 3(4H) - ylmethyl] phosphorodithioate, 10650.
Ethephon, 10014.
O-Ethyl *S*-phenyl ethylphosphonodithioate, 7929.
Fenthion, 10650.
N-(Mercaptomethyl)phthalimide *S*(*O,O*-dimethyl phosphorothioate), 8656.
Oxadiazon, 9177.
Phorate, 8656.
Propionic acid, 11268.
RELOCATION ASSISTANCE and real property acquisition ---------- 10362
WASTE MANAGEMENT ACTIVITIES, Savannah River plant; hearing with Atomic Energy Commission --- 8373
WATER POLLUTION:
Contracts, grants, and loans, Federal, administration of Federal Water Pollution Control Act; proposed rules ---------- 11099
Effluent limitations guidelines, standards of performance and pretreatment standards for new sources:
Categories:
Builders paper and board manufacturing; proposed rules, extension of time ---------- 7968
Chemicals, inorganic ---------- 9616
Proposed rules ---------- 9638
Electroplating ---------- 11512
Proposed rule ---------- 11516
Fruits and vegetables processing, canned or preserved ---------- 10864
Proposed rules ---------- 10870
Grain mills ---------- 10513
Proposed rules ---------- 10520
Iron and steel manufacturing; proposed rules, extension of time ---------- 11108
Seafood processing, canned and preserved; proposed rules, extension of time ---------- 7968
Steam electric power generating, proposed rules -- 8304, 9551
Sugar processing ---------- 10524
Proposed rules ---------- 10528
Grants, State and local assistance:
Program grants, maintenance, etc.; correction ---- 9439
Pollutants, toxic, effluent standards:
Hearings, public ---------- 8325
Proposed rule ---------- 10603
Thermal discharges, effluent limitations, proposed rules ---------- 11436
Waste treatment management, alternative techniques and systems, availability of report ---------- 11135
WATER QUALITY:
Interstate standards proposed or adopted for navigable waters; applicability to Oregon, correction --- 8353

FARM CREDIT ADMINISTRATION:

AUTHORITY DELEGATION by Governor to Deputy et al., credit functions, etc ---------- 10651

INDEX

FARMERS HOME ADMINISTRATION:

BENEFICIAL OWNERSHIP, certificates of; interest rates to investors ... 9561
EMERGENCY LOANS:
Designation of eligible areas, certain States:
Iowa, 11124.
South Carolina, 11317.
REAL ESTATE LOANS AND GRANTS:
Rural housing:
Farm labor housing grants, policies, procedures, and authorizations ... 9537
RURAL HOUSING LOANS AND GRANTS. *See under* Real estate loans and grants, *above*.
SECURITY SERVICING AND LIQUIDATION, insured mortgages, assignment of; revocation of Part ... 10554

FEDERAL AVIATION ADMINISTRATION:

AIR CARRIERS and commercial operators of large aircraft, certification and operations:
Airworthiness requirements, animal transportation; stowage of containers in cargo compartments, proposed rule ... 9456
Applicability, persons boarding aircraft; proposed rule ... 9672
Flight operations, prohibition against carriage of weapons; proposed rule ... 9672
AIR TRAFFIC AND GENERAL OPERATING RULES:
See also Dangerous articles; Instrument flight rules, *below*.
Flight rules, operations at airports with operating control towers; clearances required, proposed rule ... 11302
Noise requirements, proposed rules ... 11304
Parachute jumping, authorizations; proposed rules withdrawn ... 8632
AIRPORTS:
Operations at airports with operating control towers, clearances required; proposed rule ... 11302
AIRWORTHINESS DIRECTIVES:
Beech, 7926, 9649.
Bell, 11063.
Boeing, 11195.
Cessna, 7926, 9649.
DeHavilland, 9820.
Dowty rotol, 10426.
Hughes, 11063.
McDonnell Douglas, 7927.
Piper, 9649, 9650.
ANIMALS, transportation of; stowage of containers in cargo compartments, proposed rule ... 9456
DANGEROUS ARTICLES and magnetized materials, transportation of:
Medicinal and toilet articles, applicability ... 10117
Reporting certain incidents, etiologic agents ... 11087
DEFINITION, movement area; proposed rule ... 11302
FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS:
Colored Federal airways, alteration ... 10116
Continental control area, alterations ... 8176, 9929
Control areas, alteration ... 10116
Control zones, alterations ... 9430, 9837, 9987, 10116, 10117, 10162, 10427, 10438, 11085, 11086, 11177, 11432, 11529
Reporting points:
Alaska:
High altitude, alteration ... 10116
Low altitude, alteration ... 10116, 10117
Terminal control areas, alterations ... 11086, 11257
Transition areas, alterations proposed or adopted ... 7927, 7928, 8318, 8351, 8631, 8632, 9173, 9199, 9200, 9430, 9456, 9538, 9539, 9545, 9650, 9671, 9820, 9821, 9837, 9838, 9987, 10117, 10427, 10438, 11085, 11096, 11097, 11098, 11418, 11433, 11561
VOR Federal airways, domestic, alterations ... 8350, 9820, 9929, 10161, 10428, 11099, 11258, 11302, 11417, 11418
HAZARDOUS MATERIALS. *See* Dangerous articles, *above*.
INSTRUMENT FLIGHT RULES, alterations:
Altitudes, minimum en route IFR; changeover points particular routes ... 11086
Approach procedures, takeoff and landing, alterations ... 8610, 8921, 10428, 11529
JET ROUTES AND AREA HIGH ROUTES:
Area high routes, alterations proposed ... 11561
Jet routes, alterations proposed or adopted ... 10117, 10162, 11433, 11434
NOISE CONTROL:
Aircraft landing at specified airports, two-segment instrument landing system approach; inquiry ... 11193
Civil aircraft fleet noise requirements; proposed rules ... 11302
PARACHUTE JUMPING, authorizations; proposed rules withdrawn ... 8632
PROHIBITED AREAS, altitude ceilings, vertical limits: proposed rule ... 7949
QUALITY SYSTEM CERTIFICATION PROGRAM, issuance and availability ... 8180
RESTRICTED AREAS, altitude ceilings, vertical limits; proposed rule ... 7949
RESTRICTED AREAS over military installations; various States, alterations:
Louisiana, 8631, 11258.
Massachusetts, 8609, 11258.
North Carolina, 9929.
Texas, 8176.
Utah, 9930.
SECURITY:
See also Restricted areas.
Weapons carriage, prohibition against; proposed rule ... 9672
SPECIAL USE AIRSPACE. *See* Prohibited areas; Restricted areas.

FEDERAL COMMUNICATIONS COMMISSION:

AMATEUR RADIO SERVICE:
Prohibited practices, control operators of Club Station compensation ... 9444
AVIATION SERVICES:
Flight test stations, frequencies available; correction ... 10909
Operating requirements, station identification ... 11083
CABLE TELEVISION SERVICE:
Community antenna television systems, diversification of control; inquiry, time extension ... 11117
General operating requirements:
Records of subscribers ... 9443
Records to be maintained locally for public inspection, proposed rule ... 9469
Performance tests, annual; radiation standards ... 10481
CANADIAN BROADCAST STATIONS:
Standard stations, list, changes ... 10483, 11460
Television stations, list, changes ... 11628
CONTESTS, failure of broadcast licensees to conduct fairly ... 10652
DOMESTIC PUBLIC RADIO SERVICES:
Applications accepted for filing ... 8955, 9697, 10655, 11461
Land mobile radio service:
Bandwidth and emission limitations, Hawaii, proposed rule ... 8934
Frequencies;
Hawaii, proposed rule ... 8933
Houston, Dallas-Fort Worth, and Miami; proposed rule ... 11110
Multipoint distribution service; filing of amendments to pending applications, time extension ... 11422
EDUCATIONAL STATIONS. *See under* Radio broadcast services, *below*.
EXPERIMENTAL BROADCAST STATIONS:
Aural broadcast STL and intercity relay stations, remote control and unattended operation ... 10576
Television auxiliary broadcast stations, unattended operation ... 10576
FREQUENCY ALLOCATIONS:
Definitions, multipoint distribution service; filing of amendments to pending applications, time extension ... 11422
Equipment authorization procedures type acceptance, correction ... 8617

Table changes:
90–110 kHz, 10145.
76–108 MHz, 8932.
121.5 MHz, 10142.

FOOD AND DRUG ADMINISTRATION—Con.

Page

DRUGS—Continued
- Animal drugs—Continued
  - Warning statements — 9540
  - Editorial changes — 9540, 11535
- Antibiotic drugs:
  - Ampicillin, revision of Part — 9937
  - Certification fees, accountability of foreign manufacturers' agents; proposed rules — 9199
  - Editorial changes — 11535
  - Hearing notices, requests, denials, etc — 9764
  - Tests and methods of assay:
    - Ampicillin, nonaqueous titrations — 9936
    - Cephaloglycin, nonaqueous titrations — 9936
    - Editorial changes — 9829
- Bulk packages, drugs in; exemption for processing, etc., proposed rules — 11430
- Digoxin products, oral; marketing requirements — 9184, 9219
- Redesignation and republication — 11694
- Good manufacturing practice, editorial changes — 9829
- Habit-forming drugs, redesignation and republication — 11736
- Human use drugs, redesignation and republication — 11680
- Insulin:
  - Certification fees, accountability of foreign manufacturers' agents; proposed rules — 9199
  - Redesignation and republication — 11750
- Labeling:
  - Editorial changes — 11534
  - Misbranding, trade names; proposed rules — 11298
  - Prescription drugs, inquiry — 8946
- Manufacturers and distributors, etc., registration of producers, and listing of commercial drugs; editorial changes — 9829, 11535
- New drugs:
  - Editorial changes — 9828
  - Hearing notices, requests, denials, etc — 9761, 9764
  - Redesignation and republication — 11680
- Over-the-counter preparations:
  - Redesignation and republication — 11741
  - Review panel reports, public comments procedure — 9659
- Prescription drugs. *See under* Labeling, *above*.
- Residues in food. *See* Residues, *below*.
- Veterinary drugs. *See under* Animal drugs, *above*.

EDITORIAL CHANGES — 9541, 9828, 9931, 11534

EMERGENCY PERMIT CONTROL, thermally processed low-acid foods in sealed containers; correction — 10123

FISH. *See* Seafood, *below*.

FLOUR, cereal, and related products:
- Enriched and enriched self-rising flour, nutrient levels; prehearing conference — 10172

FOOD ADDITIVES:
- GRAS (generally recognized as safe) substance:
  - Sodium hypochlorite, 11215.
- Specific food additives, rules proposed or adopted:
  - Amprolium combination, 9658.
  - Antioxidants and/or stabilizers for polymers, 11215.
  - Bacitracin methylene disalicylate combination, 9658.
  - Benomyl, 9431.
  - Diallfor, 9932.
  - Diethystilbestrol, 11299.
  - Disodium EDTA, 9828.
  - Ethopabate combination, 9658.
  - Ethoxylated mono- and diglycerides, use as emulsifier in foods, 9658.
  - Lipid and protein constituents of ruminant feed supplements, formaldehyde treated, 9565.
  - Mineral oil, 9828.
  - 3-Nitro-4-hydroxphenylarsonic acid and combination, 9658, 9932.
  - Paper and paperboard components, 9829, 10461.
  - Polyethylene glycol (MMW: 200–9500), 9828.
  - Sanitizing solutions, 10460.
  - Selenium, 9540.
  - Slimicides, 11324.

FOOD STANDARDS, conformity to definitions and identity standards; editorial change — 9828

FRUITS:
- Applesauce, canned, identity and fill-of-container standards — 8322, 9658
- Label declaration of drained weight; inquiry, extension of time — 9850
- Plums, canned, identity standard; proposed rules, correction — 11094

GOOD MANUFACTURING PRACTICE, drugs, editorial changes — 9829

LABELING, DRUGS. *See under* Drugs, *above*.

LABELING, FOOD:
- Fruits and vegetables, processed, label declaration of drained weight; inquiry, extension of time — 9850
- Nutrition labeling:
  - Less than one gram, proposed rules — 8620
  - Meaningful sources of nutrients, foods which are not; proposed rules — 8623
  - Medical foods, clarification — 8610

MEETINGS, certain committees, review panels, etc.:
- Antiperspirant Drug Products, 11612.
- Bacterial Vaccines and Toxoids, 10925.
- Cardiovascular and Renal, 11612.
- Dentifrices and Dental Care Agents, 10924.
- Drug, 10924.
- Gastroenterology and Urological Devices, 10925.
- Internal Analgesic Including Antirheumatic Drugs, 11612.
- Laxative, Antidiarrheal, Emetic, and Anti-emetic Drugs, 10925.
- Obstetrical and Gynecology Devices, 10924.
- Ophthalmic Drugs, 10925.
- Oral Cavity Drug Products, 10925.
- Sedative, Tranquilizer, and Sleep Aid Drugs, 10924.
- Topical Analgesics, 10925.
- Toxicological Research, Science, 10925.
- Viral Vaccines and Rickettsial Vaccines, 10924.
- Vitamin, Mineral, and Hematinic Drug Products; 10925.

ORGANIZATION AND FUNCTIONS:
- Assistant General Counsel for Food and Drugs, Health, Education, and Welfare Department — 9184
- Washington headquarters:
  - Commissioner Office — 9184
  - FDA Information Center, new address — 9431
  - Medical Devices and Diagnostic Products Bureau — 9184

OVER-THE-COUNTER PREPARATIONS. *See under* Drugs, *above; and* Specific drug preparations *at end of this agency*.

PEAS. *See under* Vegetables, *below*.

PLUMS. *See under* Fruits, *above*.

RESIDUES of new animal drugs in food, tolerances for:
- Diethylstilbestrol:
  - Supplementary new drug applications — 11323
  - Test methods revocation, proposed rules — 11299

SEAFOOD; fish, shellfish, and seafood products, editorial changes — 9828

SWEETENERS, nutritive; identity standards — 8158

TEA IMPORTS, standards — 9945

THERMALLY PROCESSED FOODS, LOW-ACID, in sealed containers; emergency permit control, correction — 10123

TOMATO JUICE. *See under* Vegetables, *below*.

VEGETABLES:
- Beans, canned, green and wax, identity, quality, and fill-of-container standards; proposed rules, correction — 9992
- Label declaration of drained weight; inquiry, extension of time — 9850
- Peas, frozen; identity and quality standards, definitions; correction — 10429
- Tomato juice, identity standard; proposed rules — 11095

SPECIFIC DRUG PREPARATIONS:

ANTIBIOTIC DRUGS:
- Ampicillin, 9937.
- Carbenicillin, 9829.
- Cephalosporin, 9937.
- Chlortetracycline, 9829.
- Neomycin sulfate, 9829.
- Penicillin, 9937.
- Polymyxin, 9829.
- Rolitetracycline, 9829.
- Streptomycin (or dihydrostreptomycin), 9829.

Federal Regulations

CODE

List of CFR Sections Affected

MARCH 1974

Includes U.S.C.–C.F.R.
Table of Authorities

Announcing—
Format and Coverage Changes

Changes in coverage began January 1974. These changes coordinate the List with the revision date of the Code books so that users can determine quickly and easily the changes that have occurred since the revision date of the Code books they are using. Coverage for March 1974 is as follows:

March 1974:

- Titles 1–16: Changes published January–March 1974.
- Titles 17–27: Changes published April 1973 through March 1974.
- Titles 28–41: Changes published July 1973 through March 1974.
- Titles 42–50: Changes published October 1973 through March 1974.

Note: Changes published during 1974 for Titles 17–50 are identified by an asterisk (*).

LIST OF SECTIONS AFFECTED

WHAT IT IS

The List of Sections Affected is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. It should be shelved with current Code volumes. Entries indicate the nature of the changes. Certain terms used are defined in the glossary below. Proposed rules are listed at the end of appropriate titles.

HOW TO USE THIS FINDING AID

The Code of Federal Regulations may be brought up to immediate date by the following steps:

1. Consult this List of Sections Affected for any changes, deletions, or additions published after the revision date of the volume you are using.
2. Check the "Cumulative List of Parts Affected" appearing at the end of the latest issue of the Federal Register for changes published after the last date covered by this issue of the List of Sections Affected.
3. If the latest edition of the Code of Federal Regulations is not yet available, use the previous year's edition and consult the 1973 Annual List of Sections Affected before beginning with step 1 above.

For an explanation of the structure and numbering of the Code, see 1 CFR Part 21.

GLOSSARY

Amended—A typographical unit of the CFR was partially set forth.
Recodified—Major portions of CFR were restructured or rearranged, or both.
Redesignated—A typographical unit or larger was renumbered and transferred from one place to another place in the CFR with no change in text.
Removed—A typographical unit was removed from the CFR.
Revised—A typographical unit of the CFR was set forth in full.
Superseded—An existing CFR unit was replaced by regulations appearing under another CFR unit.
Suspended—The entire CFR unit was not in effect for the period of time indicated.
Suspended in part—A portion of the CFR unit was not in effect for the period of time indicated.
Technical amendment—General amendment that may have no substantive effect on regulations.

PARALLEL TABLE OF STATUTORY AUTHORITIES AND RULES

A table is included at the end of this List. It contains references to the U.S. Code sections cited as authority for regulations added during the year.

TABLE OF FEDERAL REGISTER ISSUE PAGES AND DATES

A finding aid has been included at the end of this issue which identifies the page numbers in each Federal Register.

INQUIRIES AND SUGGESTIONS

Inquiries concerning this and other publications of the office and suggestions for improvements will be welcomed by the Director, Office of the Federal Register, National Archives and Records Service, Washington, D.C. 20408.

SUBJECT INDEX

A subject index to the daily Federal Register is published monthly and annually for the calendar year.

1–1.708–2 (d) revised; (e) added	26913
1–1.708–3 Revised	26913
1–1.1003–3 (b), (c), and (d) revised	33594
1–1.1003–7 (b)(9) revised	33594
1–2.201 (a)(31) added	26913
1–2.303–3 Revised	26914
1–2.303–4 Revised	26914
1–2.303–6 Revised	26914
1–2.404–2 (h) added	32808
1–3.802 (c) revised	26914
1–3.802–1 Added	26914
1–3.802–2 Added	26915
1–3.807–3 *(a)(2), (b), (d), (e), and (g) revised; (i) added	1752
1–3.807–5 *(a) introductory text. (a)(1) and (3), (d), and (e) revised; (f) added	1753
1–3.814 *Revised	1754
1–3.814–1 *(a) and (b) revised	1754
1–3.814–2 *Revised	1755
1–3.814–3 *(a) and (b) amended	1755
1–4.1000—1–4.1007 (Subpart 1–4.10) Revised	33594
1–7.103–23 Revised	26916
1–7.200—1–7.204–4 (Subpart 1–7.2) *Added	1756
1–7.602–1 Revised	26916
1–9 Added	23782
1–9 *Effective date suspended	7925
1–12.400—1–12.404–13 (Subpart 1–12.4) Removed	21404
1–12.804–1 (d) revised	28818
1–12.810 (a) revised	28818
1–12.1201—1–12.1202 (Subpart 1–12.12) Added	21404
1–16.101 (b) revised	26916
1–16.401 (b) revised	21405
(f) revised	26916
1–16.401 *(a) and (b) revised	11268
1–16.901–19 *Revised	11268
1–16.901–19–A *Revised	11268
1–18.113 Revised	33596
1–18.310 Added	17441
1–18.310–1 Added	17441
1–18.310–2 Added	17442
1–18.310–3 Added	17442
1–18.310–4 Added	17442
1–18.310–5 Added	17443
1–18.700—1–18.706 (Subpart 1–18.7) Added	21405
1–18.703–1 (b) corrected	23791
1–26 Added	32808
1–30.710 Revised	32810

Chapter 3—Department of Health, Education, and Welfare

	Page
3–1.5100—3–1.5105–4 (Subpart 3–1.51) *Removed	11081

CODE

PARALLEL TABLE OF STATUTORY AUTHORITIES AND RULES

(Additions to CFR Finding Aids Volume, Table 1; January–March 1974)

This table lists the sections of the U.S. Code which were added to the CFR Finding Aids Volume, Table I as a result of new citations of authority carried in the *Federal Register* during 1974. Recent legislation not yet assigned within the U.S. Code is carried by public law number at the end of the list.

In order to determine the *Federal Register* page numbers of the parallel CFR citations, users should consult the List of CFR Sections Affected, above.

PART I

HIGHLIGHTS OF THIS ISSUE

This listing does not affect the legal status of any document published in this issue. Detailed table of contents appears inside.

PETROLEUM ALLOCATION—FEO rule concerning adjustment of wholesale purchaser's base period volumes..... 10153

FOREIGN ASSISTANCE—Presidential determination authorizing grant to Egyptian charity organization..... 10113

(BCG) VACCINE—FDA proposes additional standards; comments by 5–17–74..... 10158

PHASE IV PRICE RULING—CLC decision regarding export exemptions for sales of products to U.S. Government Citizens and/or military personnel..... 10152

PASSENGER CAR TIRES—DoT proposal regarding replacement size markings; comments by 5–17–74..... 10165

INSURED MAIL CLAIMS—Postal Service revises regulations; effective immediately..... 10132

UNSAFE VOYAGES—Coast Guard authorizes District Commanders to prevent unfeasible use of boats; effective 4–17–74..... 10130

LIFESAVING EQUIPMENT—Coast Guard proposes changes in specification for type IV personal floatation devices; comments by 5–2–74..... 10160

SECURITIES ACCOUNTING—SEC adopts general regulations regarding life insurance companies; effective with respect to statements filed after 6–30–74..... 10118

MEDICINAL AND TOILET ARTICLES—FAA amends regulations to increase amounts permitted in passenger baggage; effective 4–17–74..... 10117

ENDANGERED SPECIES—Interior Department adopts modified regulations; effective 3–18–74..... 10158

WOOL TEXTILES—Committee for the Implementation of Textile Agreements adjusts import levels for products from the Republic of Korea..... 10178

(Continued inside)

PART II:

PROFESSIONAL STANDARDS REVIEW—HEW designates organization areas; effective 3–18–74..... 10203

PART III:

CONSTRUCTION SAFETY AND HEALTH—Labor Department proposed revision of standards; comments by 5–17–74..... 10215

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $45 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

List of CFR Parts Affected

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, appears following the Notices section of each issue beginning with the second issue of the month. In the last issue of the month the cumulative list will appear at the end of the issue.

A cumulative guide is published separately at the end of each month. The guide lists the parts and sections affected by documents published since January 1, 1974, and specifies how they are affected.

Title 3—The President

MEMORANDUM OF MARCH 7, 1974

[Presidential Determination No. 74–15]

Presidential Determination Under Section 614(a) of the Foreign Assistance Act of 1961, as Amended—Egypt

Memorandum for the Secretary of State

THE WHITE HOUSE, *Washington, March 7, 1974.*

Pursuant to the authority vested in me by Section 614(a) of the Foreign Assistance Act of 1961, as amended (hereinafter "the Act"), I hereby:

A. Determine that a grant in fiscal year 1974 of not to exceed $10 million in United States-owned excess Egyptian pounds to the Wafaa wa'l Amal (Loyalty and Hope Society), without regard to the prohibitions contained in section 620 of the Act, and without regard to any law relating to the receipts or credits accruing to the United States, is important to the security of the United States; and

B. Authorize the use of up to $10 million equivalent of such Egyptian pounds for a grant to the above-named Egyptian charitable organization.

This determination shall be published in the FEDERAL REGISTER.

Richard Nixon

[FR Doc.74–6300 Filed 3–14–74;3:51 pm]

V 39 53 MAR 18 74 XUM

Rules and Regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 4—Accounts

CHAPTER III—COST ACCOUNTING STANDARDS BOARD

PART 406—COST ACCOUNTING STANDARD—COST ACCOUNTING PERIOD

Effective Date

On November 7, 1973 a Cost Accounting Standard entitled Cost Accounting Standard—Cost Accounting Period was published in the FEDERAL REGISTER (38 FR 30730 et seq.).

As shown in the following § 406.80(a) the effective date of the Standard which was reserved in the November 7 publication is July 1, 1974.

• • • • •

§ 406.80 Effective date.

(a) The effective date of this Standard is July 1, 1974.

(84 Stat. 796, sec. 103; (50 U.S.C. App. 2168))

ARTHUR SCHOENHAUT,
Executive Secretary.

[FR Doc.74-6113 Filed 3-15-74;8:45 am]

Title 9—Animals and Animal Products

CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER D—EXPORTATION AND IMPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS

PART 97—OVERTIME SERVICES RELATING TO IMPORTS AND EXPORTS

Commuted Traveltime Allowances

The purpose of this amendment is to establish commuted traveltime periods as nearly as may be practicable to cover the time necessarily spent in reporting to and returning from the place at which an employee of Veterinary Services performs overtime or holiday duty when such travel is performed solely on account of overtime or holiday duty. Such establishment depends upon facts within the knowledge of the Animal and Plant Health Inspection Service.

Therefore, pursuant to the authority conferred upon the Deputy Administrator, Veterinary Services, Animal and Plant Health Inspection Service by § 97.1 of the regulations concerning overtime services relating to imports and exports (9 CFR 97.1), administrative instructions 9 CFR 97.2 (1974 ed.), as amended January 4, 1974 (39 FR 999) and January 18, 1974 (39 FR 2265), prescribing the commuted traveltime that shall be included in each period of overtime or holiday duty, are hereby amended by adding to or deleting from the lists therein as follows:

§ 97.2 [Amended]

Under the heading WITHIN METROPOLITAN AREA, ONE HOUR; delete "Eastport, Idaho"; under OUTSIDE METROPOLITAN AREA, ONE HOUR; delete "Porthill, Idaho (served from Eastport, Idaho)"; under TWO HOURS; delete "Porthill, Idaho (served from Eastport, Idaho)"; under THREE HOURS; add "Eastport and Porthill, Idaho (served from Sandpoint, Idaho)."

(84 Stat. 561 (7 U.S.C. 2260))

Effective date. The foregoing amendment shall become effective March 18, 1974.

It is to the benefit of the public that these instructions be made effective at the earliest practicable date. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

Accordingly, pursuant to 5 U.S.C. 553, it is found upon good cause that notice and public procedure on these instructions are impracticable, unnecessary, and contrary to the public interest, and good cause is found for making them effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 13th day of March 1974.

J. M. HEJL,
Acting Deputy Administrator, Veterinary Services, Animal and Plant Health Inspection Service.

[FR Doc.74-6201 Filed 3-15-74;8:45 am]

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 213—EXCEPTED SERVICE

Department of the Air Force

Section 213.3309 is amended to show that one position of Private Secretary to the Secretary is excepted under Schedule C.

Effective March 18, 1974, § 213.3309(a)(1) is amended as set out below.

• • • • •

§ 213.3309 Department of the Air Force.

(a) *Office of the Secretary.* • • •

(1) Two Private Secretaries to the Secretary, one Private Secretary to the Undersecretary, and one Private Secretary each to each of the four Assistant Secretaries of the Air Force.

• • • • •

((5 U.S.C. secs. 3301, 3302); E.O. 10577, 3 CFR 1954–58 Comp. p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,
[SEAL] JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.74-6129 Filed 3-15-74;8:45 am]

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Airspace Docket No. 74-AL-1]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Colored Airways, Controlled Airspace and Reporting Points

The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to make editorial changes in the descriptions of certain airways, controlled airspace, and reporting points as a result of the conversion and renaming of the following navigational aids:

1. Cold Bay, Alaska, RR to Fort Randall, Alaska, RBN.
2. From Kodiak, Alaska, RR to Woody Island, Alaska, RBN.
3. From King Salmon, Alaska, RR to Naknek River, Alaska, RBN.
4. From Sandspit, British Columbia, Canada, RR to Sandspit, British Columbia, Canada, RBN.
5. From Vancouver, British Columbia, Canada, RR to Vancouver, British Columbia, Canada, RBN.
6. From Abbotsford, British Columbia, Canada, RR to Abbotsford, British Columbia, Canada, RBN.
7. From Princeton, British Columbia, Canada, RR to Princeton, British Columbia, Canada, RBN.

A plan for the conversion of all low frequency four course radio ranges to nondirectional radio beacons in the State of Alaska was circulated January 14, 1972, with a request for comment. No objections were received.

The four specified Canadian navaids have been converted and renamed by the Canadian Government. Editorial changes are required when an airway is based on a facility which has been converted and renamed, whether that facility is in Canada or the United States.

Since this action simply redescribes airways, controlled airspace and reporting points with no substantive alteration to any route structure or airspace dimension, it is minor in nature and notice and public procedure thereon are

V 39 | 53 MAR 18 74 XUM

unnecessary. This amendment could be made effective on March 18, 1974, however, in order to provide sufficient time for changes to be depicted on appropriate aeronautical charts, this amendment will be made effective more than 30 days after publication in the FEDERAL REGISTER.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., June 20, 1974, as hereinafter set forth.

1. Section 71.103 (39 FR 305, 3670) is amended as follows:

a. In G–8 "20 AGL INT Cold Bay, Alaska, RR, 255° and Cape Sarichef, Alaska, RBN, 344° bearings; 20 AGL Cold Bay, RR; 20 AGL King Salmon, AK., RR;" is deleted and "20 AGL INT Fort Randall, Alaska, RBN 255° and Cape Sarichef, Alaska, RBN, 344° bearings; 20 AGL Fort Randall RBN; 20 AGL Naknek River, Alaska, RBN;" is substituted therefor.

b. G–11 is revised to read as follows:

From INT Fort Randall, Alaska, RBN 041° and Port Moller, Alaska, RBN 313° bearings, 20 AGL via Port Heiden, Alaska, RBN; 174 miles 85 MSL, 37 miles 20 AGL, to Woody Island, Alaska, RBN.

2. Section 71.105 (39 FR 305, 3670) is amended as follows:

a. In A–1 "From Sandspit, British Columbia, Canada, RR;" is deleted and "From Sandspit, British Columbia, Canada, RBN;" is substituted therefor.

3. Section 71.107 (39 FR 306) is amended as follows:

a. In R–40 "From Kodiak, Alaska, RR;" is deleted and "From Woody Island, Alaska, RBN;" is substituted therefor.

b. In R–75 "From Vancouver, British Columbia, Canada, RR" is deleted and "From Vancouver, British Columbia, Canada, RBN" is substituted therefor; "Abbotsford, British Columbia, Canada, RR;" is deleted and "Abbotsford, British Columbia, Canada, RBN;" is substituted therefor; "to Princeton, British Columbia, Canada, RR," is deleted and "to Princeton, British Columbia, Canada, RBN," is substituted therefor.

4. Section 71.109 (39 FR 306, 1272) is amended as follows:

a. In B–27 "From Kodiak, Alaska, RR, 45 miles, 68 miles, 95 MSL, King Salmon, Alaska; RR;" is deleted and "From Woody Island, Alaska, RBN, 45 miles 12 AGL, 68 miles 95 MSL, Naknek River, Alaska, RBN;" is substituted therefor.

b. In B–79 "From Sandspit, British Columbia, Canada, RR;" is deleted and "From Sandspit, British Columbia, Canada, RBN;" is substituted therefor.

5. Section 71.163 (39 FR 346) is amended as follows:

a. In Control 1217 "centered on the Kodiak, Alaska, RR" is deleted and "centered on the Woody Island, Alaska, RBN" is substituted therefor. Also "from the Kodiak RR" is deleted and "from the Woody Island, RBN" is substituted therefor.

b. In Control 1400 "from the King Salmon, Alaska, RR extending from the RR" is deleted and "from the Naknek River, Alaska, RBN extending from the RBN" is substituted therefor. Also "5° from the King Salmon RR" is deleted and "5° from the Naknek River RBN" is substituted therefor.

c. In Control 1401 "248° bearing from the King Salmon, Alaska, RR extending from the RR" is deleted and "248° bearing from the Naknek River, Alaska, RBN extending from the RBN" is substituted therefor. Also "an angle of 5° from the King Salmon 248° bearing extending from the RR" is deleted and "an angle of 5° from the Naknek River 248° bearing, extending from the RBN" is substituted therefor.

6. Section 71.171 (39 FR 354) is amended as follows:

a. In Cold Bay, Alaska "Cold Bay RR, extending from the 5-mile radius zone to 13.5 miles north of the RR," is deleted and "Fort Randall, Alaska, RBN, extending from the 5-mile radius zone to 13.5 miles north of the RBN," is substituted therefor.

7. Section 71.211 (39 FR 632) is amended as follows:

a. In Carp INT: "Sandspit, British Columbia, Canada, RR," is deleted and "Sandspit, British Columbia, Canada, RBN," is substituted therefor.

b. In Crab INT: "King Salmon, Alaska, RR," is deleted and "Naknek River, Alaska, RBN," is substituted therefor.

c. In Gar INT: "King Salmon, Alaska, RR," is deleted and "Naknek River, Alaska, RBN," is substituted therefor.

d. In Halibut INT: "Sandspit, British Columbia, Canada, RR," is deleted and "Sandspit, British Columbia, Canada, RBN," is substituted therefor.

e. In Herring INT: "King Salmon, Alaska, RR," is deleted and "Naknek River, Alaska, RBN," is substituted therefor.

f. "King Salmon, Alaska, RR" is deleted and "Naknek River, REN" is added.

g. "Kodiak, Alaska, RR" is deleted and "Woody Island, Alaska, RBN" is added.

h. In Marlin INT: "Cold Bay, Alaska, RR," is deleted and "Fort Randall, Alaska, RBN," is substituted therefor.

i. In Mordvinoff INT: "Cold Bay, Alaska, RR," is deleted and "Fort Randall, Alaska, RBN," is substituted therefor.

j. In Muzon LF INT: "Sandspit, British Columbia, Canada, RR," is deleted and "Sandspit, British Columbia, Canada, RBN," is substituted therefor.

k. In Wide Bay INT: "King Salmon, Alaska, RR," is deleted and "Naknek River, Alaska, RBN," is substituted therefor.

8. Section 71.213 (39 FR 634) is amended as follows:

a. In Carp INT: "Sandspit, British Columbia, Canada, RR," is deleted and "Sandspit, British Columbia, Canada, RBN," is substituted therefor.

b. In Gar INT: "King Salmon, Alaska, RR," is deleted and "Naknek River, Alaska, RBN," is substituted therefor.

c. In Herring INT: "King Salmon, Alaska, RR," is deleted and "Naknek River, Alaska, RBN," is substituted therefor.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act, (49 U.S.C. 1655(c)))

Issued in Washington, D.C., on March 12, 1974.

GORDON E. KEWER,
Acting Chief, Airspace and Air Traffic Rules Division.

[FR Doc.74–6103 Filed 3–15–74;8:45 am]

[Airspace Docket No. 74–AL–2]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Colored Airways, Controlled Airspace and Reporting Points

The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to make editorial changes in the descriptions of certain airways, controlled airspace, and reporting points as a result of the conversion and renaming of the Homer, Alaska, LFR to the Kachemak, Alaska, RBN and the Kenai, Alaska, LFR to the Wildwood, Alaska, RBN.

A plan for the conversion of all low frequency four course radio ranges to nondirectional radio beacons, in the State of Alaska, was circulated January 14, 1972, with a request for comment. No objections were received.

Since this action simply redescribes airways, controlled airspace and reporting points with no substantive alteration to any route structure or airspace dimension, it is minor in nature and notice and public procedure thereon are unnecessary.

This amendment could be made effective upon publication in the FEDERAL REGISTER, however, in order to provide sufficient time for changes to be depicted on appropriate aeronautical charts, this amendment will be made effective more than 30 days after publication in the FEDERAL REGISTER.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., June 20, 1974, as hereinafter set forth.

a. Section 71.103 (39 FR 305 and 3670) is amended as follows:

In G–8 "Homer, AK, RR; Kenai, AK, RR; INT northeast course Kenai" is deleted and "Kachemak, Alaska, RBN; Wildwood, Alaska, RBN; INT of a bearing of 034° from Wildwood RBN" is substituted therefor.

b. Section 71.107 (39 FR 306) is amended as follows:

In R–40 "Homer, Alaska, RR;" is deleted and "Kachemak, Alaska, RBN;" is substituted therefor.

In R–103 "From Kenai, Alaska, RR; INT southeast course Kenai RR and" is deleted and "From Wildwood, Alaska, RBN; INT of a bearing of 112° from Wildwood RBN and the" is substituted therefor.

c. Section 71.163 (39 FR 346) is amended as follows:

In Control 1218 "centered on the Homer, Alaska, RR" is deleted and "centered on the Kachemak, Alaska, RBN" is substituted therefor. Also, "118° bearing from the Homer RR" is deleted and "118° bearing from the Kachemak RBN" is substituted therefor.

d. Section 71.181 (39 FR 440) is amended as follows:

In Homer, Alaska, "from the Homer RR, extending from 17.5 miles west to 7 miles east of the RR;" is deleted and "from the Kachemak, Alaska, RBN, extending from 17.5 miles west to 7 miles east of the RBN;" is substituted therefor.

e. Section 71.211 (39 FR 632) is amended as follows:

"Homer, Alaska, RR" and "Kenai, Alaska, RR" are deleted and "Kachemak, Alaska, RBN" and "Wildwood, Alaska, RBN" are added.

In Granite INT: "Homer, Alaska, RR," is deleted and "Kachemak, Alaska, RBN," is substituted therefor.

(Sec. 307(a), Federal Aviation Act of 1958, (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act, (49 U.S.C. 1655(c))

Issued in Washington, D.C., on March 12, 1974.

GORDON E. KEWER,
Acting Chief, Airspace and Air Traffic Rules Division.

[FR Doc.74–6102 Filed 3–15–74;8:45 am]

[Airspace Docket No. 74–SW–8]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Revocation and Designation of Control Zones

The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to revoke the Waco, Tex. (Municipal Airport) and (James Connally Airport) control zones and designate the Waco, Tex., control zone.

On March 9, 1973, a notice of proposed rulemaking in Airspace Docket No. 73–SW–13 was published in the FEDERAL REGISTER (38 FR 6397) stating that the Federal Aviation Administration proposed to designate the Waco, Tex. (James Connally Airport), control zone; rename the Waco, Tex., control zone; and alter the Waco, Tex., transition area. On July 9, 1973, the rule was published in the FEDERAL REGISTER (38 FR 18245) making the alterations to FAR Part 71 effective September 13, 1973.

Subsequent to the effective date of the rule, it was determined that it will be necessary to include the James Connally Airport and the Waco, Tex., Municipal Airport within a single control zone. The necessary weather observations required for a separate control zone at James Connally Airport are not being taken at the present time.

Since these amendments will impose no undue burden on any person, notice and public procedure hereon are unnecessary and they may be made effective upon publication in the FEDERAL REGISTER.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended effective on March 18, 1974, as hereinafter set forth.

(1) In § 71.171 (39 FR 354), the following control zones are revoked:

WACO, TEX. (JAMES CONNALLY AIRPORT)
WACO, TEX. (MUNICIPAL AIRPORT)

(2) In § 71.171 (39 FR 354), the following control zone is added:

WACO, TEX.

That airspace within a 5-mile radius of Waco Municipal Airport (latitude 31°38'40" N., longitude 97°13'40" W.), within 2 miles each side of the Waco VORTAC 330° radial extending from the 5-mile radius zone to 8 miles northwest of the VORTAC, within 2 miles each side of the Waco ILS localizer north course extending from the 5-mile radius zone to the OM, and within a 5-mile radius of James Connally Airport (latitude 31°38'00" N., longitude 97°04'00" W.).

(Sec. 307(a), Federal Aviation Act of 1958, (49 U.S.C. 1348); sec. 6(c), Department of Transportation Act, (49 U.S.C. 1655(c))

Issued in Fort Worth, Tex., on March 6, 1974.

ALBERT H. THURBURN,
Acting Director, Southwest Region.

[FR Doc.74–6104 Filed 3–15–74;8:45 am]

[Airspace Docket No. 73–GL–58]

PART 75—ESTABLISHMENT OF JET ROUTES AND AREA HIGH ROUTES

Alteration of Jet Route

On January 11, 1974, a notice of proposed rulemaking (NPRM) was published in the FEDERAL REGISTER (39 FR 1640) stating that the Federal Aviation Administration (FAA) was considering an amendment to Part 75 of the Federal Aviation Regulations that would extend Jet Route No. 554, between South Bend, Ind., and Carleton, Mich.

Interested persons were afforded an opportunity to participate in the proposed rulemaking through the submission of comments. All comments received were favorable.

In consideration of the foregoing, Part 75 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., May 23, 1974, as hereinafter set forth.

In § 75.100 (39 FR 699), J–554 is revised to read as follows:

"Jet Route No. 554. From South Bend, Ind., via Carleton, Mich.; to Jamestown, N.Y., excluding the portion within Canada."

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a); sec. 6(c), Department of Transporattion Act (49 U.S.C. 1655(c))

Issued in Washington, D.C., on March 12, 1974.

GORDON E. KEWER,
Acting Chief, Airspace and Air Traffic Rules Division.

[FR Doc.74–6106 Filed 3–15–74;8:45 am]

[Docket No. 10270, Amdt. 103–20]

PART 103—TRANSPORTATION OF DANGEROUS ARTICLES AND MAGNETIZED MATERIALS

Medicinal and Toilet Articles

The purpose of this amendment to Part 103 of the Federal Aviation Regulations is to clarify and expand the amounts of medicinal and toilet articles in small quantities that can be carried in passenger baggage pursuant to the express exclusion in § 103.1(c)(5).

This amendment is based on a notice of proposed rulemaking (Notice No. 73–13) published by the FEDERAL REGISTER on April 25, 1973 (38 FR 10157). Interested persons have been afforded an opportunity to participate in the making of this amendment and due consideration has been given to the comments received in response to that notice. This amendment and the reasons therefor are the same as those contained in Notice 73–17.

The five public comments that were received in response to the Notice generally concurred in it. One commentator requested that the term "medicinal and toilet articles" be clarified to include only articles that are included in the definition in § 103.1(b) and, thereby, classified as dangerous articles. The FAA believes, however, that the exceptions set forth in § 103.1(c)(1) through (5) are clearly exceptions to the applicability of the part as set out in § 103.1(a). Accordingly, the medicinal and toilet articles for which § 103.1(c)(5) provides an exception are only those articles that are classed as dangerous articles by reason of the fact that they are defined as such in the applicable regulations of the Department of Transportation as explained in § 103.1(b).

This amendment is issued under the authority of sections 313(a) and 601 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a) and 1421), and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

In consideration of the foregoing, Part 103 of the Federal Aviation Regulations is amended, effective April 17, 1974, by amending paragraph (c)(5) in § 103.1 to read as follows:

§ 103.1 Applicability.

• • • • • •

(c) • • •

(5) Medicinal and toilet articles carried by a crewmember or passenger in his baggage (including carry-on baggage) when—

(i) The total capacity of all the containers used by a crewmember or passenger for the carriage of those articles does not exceed 75 ounces (net weight ounces and fluid ounces); and

(ii) The capacity of each container other than an aerosol container does not exceed 16 fluid ounces or 1 pound of material.

Issued in Washington, D.C., on March 7, 1974.

ALEXANDER P. BUTTERFIELD,
Administrator.

Title 17—Commodity and Securities Exchange

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Release Nos. 33-5456, 34-10642, 35-18284, IC-8232, AS-152]

PART 210—FORM AND CONTENT OF FINANCIAL STATEMENTS, SECURITIES ACT OF 1933, SECURITIES EXCHANGE ACT OF 1934, PUBLIC UTILITY HOLDING COMPANY ACT OF 1935, AND INVESTMENT COMPANY ACT OF 1940

PART 249—FORMS, SECURITIES EXCHANGE ACT OF 1934

Revision of Forms, Content and Certification Requirements

The Commission today adopted a general revision of its requirements as to form and content of financial statements of life insurance companies and also eliminated the exemption from the certification requirements applicable to these companies. These changes were proposed on September 12, 1973 and involve Article 7A [17 CFR 210.7A-01—7A-06] and related schedules in Article 12 [17 CFR 210.12-01—12-43] of Regulation S-X [17 CFR 210] and Instructions 13 and 7 of Instructions as to Financial Statement of Forms 10 [17 CFR 249.210] and 10-K [17 CFR 249.310], respectively.[1] Letters commenting on the proposal have been given consideration in determining the form of the revision of Article 7A and the timing of its adoption and of the elimination of the certification exemption.

The revision reflects developments in accounting practice during the past ten years including the publication in 1972 of an Audit Guide for life insurance companies by the American Institute of Certified Public Accountants. This publication contains guidelines for the preparation of life insurance company financial statements in accordance with generally accepted accounting principles (GAAP) in place of the prescribed statutory accounting requirements followed by these companies up to this time.

As issued for comment the proposal would have applied GAAP accounting to both stock and mutual life insurance companies. A number of comments were received from mutual companies concerning the need for and applicability of GAAP to their financial statements. The mutual companies stated that because they have no stock ownership interest their operations were basically different from those of stock companies. They pointed out that the American Institute of Certified Public Accountants did not make the GAAP requirements in its life insurance company Audit Guide applicable to mutual companies. Filings by mutual companies with the Commission are generally in the capacity of co-issuers of variable annuity contracts and are included in prospectuses because of the guarantee of certain liabilities of the related variable annuity account. In consideration of the nature of the filings by mutual companies and the absence of a body of established generally accepted accounting principles for them, an exemption from the requirement for GAAP financial statements has been provided in Article 7A. In addition, a similar exemption has been provided for wholly owned stock life insurance subsidiaries of mutual life insurance companies.

In response to a number of comments concerning the problems of meeting the new requirements, the revised Article 7A and related schedules have been made effective for financial statements filed after June 30, 1974, since it may not be possible for some companies to prepare financial statements using GAAP by March 30, 1974, the due date for filing annual reports for calendar year 1973. However, it should be recognized that the establishment of standards for reporting on a GAAP basis makes the disclosure of results of operations on that basis very important and it is urged that companies should make every effort to follow the new requirements in reporting for the year 1973. Those that cannot do this because of time pressures should consider filing amended 10-K [17 CFR 249.310] or 8-K [17 CFR 249.308] reports to disclose the effect of using GAAP as soon as they are in a position to do so. Financial statements prepared on a statutory basis should include a note indicating the reasons why the GAAP basis was not adopted for 1973 and advising users that the 1974 financial statements will be prepared differently. The requirements for certification by independent accountants of financial statements filed under the Securities Exchange Act of 1934 will be applicable to statements for periods ending after November 30, 1974.

In addition to the new general requirement that the financial statements be prepared in accordance with generally accepted accounting principles, the following are the more significant specific changes from the requirements of the existing Article 7A:

1. Where appropriate, captions and instructions have been conformed with corresponding captions of Article 5 of Regulation S-X [17 CFR 210.5-01—5-04] which applies to commercial and industrial companies. It is also made clear that the general rules in Articles 1, 2, 3 and 4 of Regulation S-X [17 CFR 210.1-01—1-02; 210.2-01—2-05; 210.3-01—3-16; 210.4-01—4-09] are applicable to life insurance financial statements to the extent they are pertinent (7A-02-1).

2. It is intended that, in preparing consolidated financial statements for an insurance holding company whose consolidated subsidiaries are primarily life insurance companies, consideration shall be given to utilization of the format of the financial statements, notes and schedules in Article 7A (7A-01).

3. A requirement for a statement as to accounting principles (7A-05-1).

4. Provision is made that a company may follow statutory accounting requirements only if the statutes of its state of domicile prohibit publication of its primary financial statements on a basis other than in accordance with such requirements; however, in such event the statutory financial statements shall be accompanied by supplemental GAAP statements (7A-02-2, 3 and 5).

5. The name of any person in which the investment exceeds two percent of total investment. As originally proposed this provision would have required reporting of an investment exceeding one percent (7A-03-1).

6. In recognition of comments concerning the difficulty of ascertaining market quotations for certain types of security investments, particularly bonds and notes, the requirement has been changed so as to call for disclosure of "value." Problems related to the determination of value are discussed in Accounting Series Release No. 118 [35 FR 19986], issued in December 1970 (7A-03-1, 7A-05-4 and 12-27).

7. Information as to policy, nature and changes in deferred policy acquisition costs (7A-03-6, 7A-04-7, 7A-05-1 and 12-31A).

8. Reporting of aggregate amounts in separate accounts as single items of assets and liabilities (7A-03-9 and 19).

9. A requirement that considerations for supplementary contracts shall be reduced by the related amounts of death and other benefits and increase in future policy benefits (7A-04-1).

10. Elimination from the income statement of details of sources of investment income. Such information may now be stated separately in a note (7A-04-2).

11. Details of restrictions on stockholders' equity (7A-05-2).

12. Revision of requirement relating to income tax disclosure. In addition to specific requirements related to life insurance companies, the general requirements of recently amended Rule 3-16(o) [17 CFR 210.3-16(o)] are referred to (7A-05-3).

13. An analysis of investment gains for the period consisting of a statement comparing realized and unrealized gains or losses on investments in bonds and notes and stocks (7A-05-4).

14. Information concerning the significance of reinsurance ceded and assumed (7A-05-6).

15. Detailed schedules of bonds, stocks, mortgage loans and real estate, and a summary of realized gains or losses on sale of investments will no longer be required. The schedules requiring a summary of investments (12-27) and details of future policy benefits and insurance in force (12-31) have been completely revised. A schedule has been added to provide details of deferred policy acquisition costs (12-31A)

Registrants with life insurance subsidiaries whose financial statements for 1973 will follow statutory accounting requirements may have special problems if they have any significant nonlife insurance activities. Under those conditions

[1] Notice of these proposed amendments was made in Securities Act Release No. 5420, Securities Exchange Act Release No. 10381, Public Utility Holding Company Act Release No. 18089 and Investment Company Act Release No. 7988 (September 12, 1973) [38 FR 27090].

the life subsidiaries should not be consolidated and the registrant's equity in their stockholders' equity and net income or loss should be based on GAAP. Separate statements (or group statements) of the life subsidiaries should accompany the parent's statements.

These amendments are adopted pursuant to authority conferred on the Securities and Exchange Commission by the Securities Act of 1933, particularly sections 6, 7, 8, 10 and 19(a) thereof; the Securities Exchange Act of 1934, particularly sections 12, 13, 15(d) and 23(a) thereof; the Public Utility Holding Company Act of 1935, particularly sections 5(b), 14 and 20(a) thereof; and the Investment Company Act of 1940, particularly sections 8, 30, 31(c) and 38(a) thereof.

Commission action. The Commission hereby adopts a revision to an instruction in §§ 249.210 and 249.310; revised §§ 210.7A-01—7A-06, 210.12-27 and 12-31; and a new § 210.12-31A of Title 17 of the Code of Federal Regulations, and as so amended they read as shown in the attached text of the amendments.

These amendments shall be effective with respect to financial statements filed after June 30, 1974, although they may be used in statements filed prior to that time.

By the Commission.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

FEBRUARY 14, 1974.

I. In Part 210 of this chapter (Regulation S-X), §§ 210.7A-01—7A-06, 210.12-27 and 12-31 are revised, and § 210.12-31A is added to read as follows:

§ 210.7a-01 Application of §§ 210.7a-01—7a-06.

This article shall be applicable to financial statements filed for life insurance companies.

(a) If consolidated financial statements are prepared for an insurance holding company whose consolidated subsidiaries are primarily life insurance companies, consideration shall be given to utilization of the format of the financial statements, notes and schedules prescribed in this article.

§ 210.7a-02 General requirement.

(a) Financial statement filed for a person to which this article is applicable shall be prepared in accordance with generally accepted accounting principles except as otherwise provided in this article. The general rules in §§ 210.1-01—1-02, 210.2-01—2-05, 210.3-01—3-16, and 210.4-01—4-09 shall be applicable except where they differ from those prescribed in the special rules comprising this article.

(b) A person subject to this article may follow the rules and instructions governing the definition and computation of items in Annual Statements to the regulatory authority of its state of domicile (statutory accounting requirements) only if the statutes of that state prohibit the presentation of financial statements other than in accordance with such requirements. Financial statements which follow statutory accounting requirements shall be accompanied by corresponding financial statements prepared in accordance with generally accepted accounting principles.

(c) All financial statements prepared for persons to which this article is applicable shall include reconciliations of material differences between (1) total capital and surplus as reported on the corresponding Annual Statement and total stockholders' equity as determined in accordance with generally accepted accounting principles and (2) net gain from operations as reported on the corresponding Annual Statement and net income or loss as determined in accordance with generally accepted accounting principles. The reconciliations shall be in tabular form in a note or in supplemental statements and accompanied by appropriate explanations.

(d) Notwithstanding the foregoing requirements, financial statements filed for mutual life insurance companies and wholly owned stock life insurance company subsidiaries of mutual life insurance companies may be prepared in accordance with statutory accounting requirements without furnishing corresponding financial statements prepared in accordance with generally accepted accounting principles or supplemental reconciling statements.

(e) Financial statements prepared in accordance with statutory accounting requirements may be reasonably condensed as appropriate, but the amounts to be reported for net gain from operations and total capital and surplus shall be the same as those reported on the corresponding Annual Statement.

§ 210.7a-03. Balance sheets.

(a) Balance sheets filed for life insurance companies shall comply with the following provisions:

ASSETS AND OTHER DEBITS

(1) *Investments—other than investment in affiliates.*
(a) *Bonds and notes.*
(b) *Preferred stocks.*
(c) *Common stocks.*
(d) *Mortgage loans on real estate.*
(e) *Real estate.*
(f) *Policy loans.*
(g) *Other loans and investments.*
(h) *Invested cash.*
(i) *Total investments.*

NOTES. (1) State the basis of determining the amounts shown in the balance sheet.

(2) State parenthetically for bonds and notes and preferred and common stocks either aggregate cost or aggregate value at the balance sheet date, whichever is the alternate to the amounts at which shown in the balance sheet. Consideration shall be given to the discussion of "Valuation of Securities" in Accounting Series Release No. 118 [35 FR 19986].

(3) State parenthetically accumulated depreciation and amortization deducted from investment real estate.

(4) Include under subcaption (h) share accounts in savings and loan associations, savings accounts, time deposits, certificates of deposit and other cash accounts and cash equivalents earning interest. State in a note any amounts subject to withdrawal or usage restrictions (see §§ 210.7A-03-2 and 210.5-02-1).

(5) State separately any class of investments included in subcaption (g) exceeding five percent of total assets; however, if an amount to be reported under subcaption (f), (g) or (h) is less than five percent of total assets it may be included under subcaption (g).

(6) State in a note the name of any person in which the total amount invested in the person and its affiliates, included in the above subcaptions, exceeded two percent of total investments. For the purpose of this disclosure consider as an investment, indebtedness and stock included in the several subcaptions above and the amount of any real estate included in subcaption (e) which was purchased or acquired during the five years preceding the date of the balance sheet. Indicate the amount included in each subcaption. An investment in bonds and notes of the United States Government, or of a government agency or authority, or of a state, municipality or political subdivision which exceeds two percent of total investments need not be reported.

(7) Investments in unconsolidated subsidiaries and 50 percent or less owned persons (including partnerships) which are held for investment purposes may be included under an appropriate subcaption above. The related equity in earnings shall be included under § 210.7A-04-2 and the amount of dividends or other distributions stated separately. Investments in unconsolidated entities held for operating purposes may not be so reported.

(8) State in a note any amounts included under subcaptions (a), (b), (d), (e), (g) and (h) which have been nonincome producing for the six months preceding the balance sheet date.

2. Cash and cash items. State separately (a) cash on hand and unrestricted demand deposits; (b) restricted deposits held as compensating balances against short-term borrowing arrangements; (c) funds subject to repayment on call or immediately after the date of the balance sheet required to be filed; and (d) other funds, the amounts of which are known to be subject to withdrawal or usage restrictions, e.g., special purpose funds. The general terms and nature of such repayment provisions in (c) and withdrawal or usage restrictions in (d) shall be described in a note referred to herein (see § 210.5-02-1).

3. Investments and indebtedness of affiliates and other persons. (a) *Investments.* State separately amounts representing investments in affiliates and investments in other persons which are accounted for by the equity method, and state the basis of determining these amounts. State separately in the registrant's balance sheet the amounts which in the related consolidated balance sheet are (1) eliminated and (2) not eliminated.

(b) *Indebtedness.* Include under this caption amounts representing indebtedness of affiliates and indebtedness of other persons the investments in which are accounted for by the equity method. State separately in the registrant's balance sheet the amounts which in the related consolidated balance sheet are (1) eliminated and (2) not eliminated.

V 39 I 53 MAR 18 74 XUM

4. Accounts receivable. Include under this caption (a) amounts receivable from agents, (b) uncollected premiums, and (c) other receivables stating separately any category which is in excess of five percent of total assets. State separately the balance of the allowance for doubtful accounts which was deducted. That portion of deferred and uncollected premiums which represents adjustment of future policy benefits should be deducted from the liability for future policy benefits, and that portion which represents adjustment of acquisition cost should be added to deferred acquisition costs.

5. Accrued investment income.

6. Deferred policy acquisition costs. This amount shall not be deducted from future policy benefits. See §§ 210.7A–04–7 and 210.7A–05–1.

7. Property and equipment. Include under this caption the cost of real estate, furniture, fixtures and equipment used in the conduct of the insurance business and not considered as an investment. State parenthetically the accumulated depreciation and amortization deducted. The amount of any encumbrances shall be shown separately as a liability.

8. Other assets. State separately any other item not properly classed in one of the preceding asset captions which is in excess of five percent of total assets. Include deposits held as compensating balances against long-term borrowing arrangements.

9. Assets held in separate accounts. Include under this caption the aggregate amount of assets funding the liabilities related to variable annuities, pension funds and similar activities. The corresponding aggregate liability shall be included under caption 19.

10. Total assets and, when appropriate, other debits.

FUTURE POLICY BENEFITS, LIABILITIES AND OTHER CREDITS

11. Future policy benefits. State separately liabilities for (a) life insurance and (b) accident and health insurance.

12. Policy and contract claims.

13. Other policyholders' funds. Include supplementary contracts without life contingencies, policyholders' dividend accumulations, premiums paid in advance, premium deposit funds and dividends to policyholders declared and unpaid and amounts estimated for payment in the following year. State separately any material amounts.

14. Notes payable. State here or in a note the information required under § 210.5–02–29. Show separately any amount owed to affiliates.

15. Indebtedness to affiliates and other persons. Include under this caption amounts representing indebtedness to affiliates and indebtedness to other persons the investments in which are accounted for by the equity method. State separately in the registrant's balance sheet the amounts which in the related consolidated balance sheet are (a) eliminated and (b) not eliminated.

16. Accrued income taxes. State separately the amount of (a) income taxes payable and (b) deferred income taxes. State separately the amount of deferred income taxes applicable to unrealized appreciation of investments.

17. Other liabilities. State separately any other item not properly classed in one of the preceding liability captions which is in excess of five percent of total liabilities.

18. Undistributed earnings on participating business. State the amount of earnings allocated to policyholders. Exclude dividends included above under caption 13.

19. Liabilities related to separate accounts.

20. Commitments and contingent liabilities. See §§ 210.3–16(i) and 210.7A–05–6.

STOCKHOLDERS' EQUITY

21. Capital shares. State for each class of shares the title of issue, the number of shares authorized, the number of shares issued or outstanding, as appropriate (see §§ 210.3–14 and 210.3–15), and the dollar amount thereof, and, if convertible, the basis of conversion [see also § 210.3–16(f)(3)]. Show also the dollar amount, if any, of capital shares subscribed but unissued, and show the deduction of subscriptions receivable therefrom. Show here, or in a note or statement referred to herein, the changes in each class of capital shares for each period for which an income statement is required to be filed.

22. Other stockholders' equity. (a) Separate captions shall be shown for:

(1) Paid-in additional capital.

(2) Other additional capital.

(3) Unrealized appreciation or depreciation of investments.

(4) Retained earnings.

(i) Appropriated.

(ii) Unappropriated.

(b) If undistributed earnings of unconsolidated subsidiaries and 50 percent or less owned persons are included, state the amount in each category parenthetically or in a note referred to herein.

(c) Include in subcaption (a)(4)(i) above or in a note, the purpose for which retained earnings have been appropriated.

(d) Exclude deferred income taxes from subcaption (a)(3) (see caption 16).

(e) For a period of at least 10 years subsequent to the effective date of a quasi-reorganization, any description of retained earnings shall indicate the point in time from which the new retained earnings dates and for a period of at least three years shall indicate the total amount of the deficit eliminated.

(f) See § 210.7A–05–2.

(g) A summary of each account under this caption setting forth the information prescribed in § 210.11–02 shall be given for each period for which an income statement is required to be filed.

23. Total future policy benefits, liabilities, other credits and stockholders' equity.

§ 210.7A–04. Income statements.

(a) Income statements filed for life insurance companies shall comply with the following provisions:

PREMIUMS AND OTHER REVENUE

1. *Premiums.* State separately the amount arising from (i) life insurance; (ii) accident and health insurance; (iii) considerations for supplementary contracts; and (iv) other. Considerations for supplementary contracts shall be reduced by the related amounts of death and other benefits and increase in future policy benefits and such amounts shall be excluded from subcaptions 4 and 5 below.

2. *Net investment income.* (i) State parenthetically expenses deducted from investment income.

(ii) State separately in a note in tabular form (*a*) investment income from each category of investments listed in the subcaptions of § 210.7A–03–1 which exceeds five percent of total investment income; (*b*) total investment income; (c) applicable expenses; and (*d*) net investment income.

3. *Other income.* State separately any material amounts indicating clearly the nature of the transactions out of which the items arose.

BENEFITS AND EXPENSES

4. *Death and other benefits.* State separately benefits for (i) life insurance; (ii) accident and health insurance; and (iii) other contracts.

5. *Increase in future policy benefits.* State separately provision for liabilities for (i) life insurance; (ii) accident and health insurance; and (iii) other contracts.

6. Provision for policyholders' share of earnings on participating policies. This caption is applicable only when the provision for policyholders' share of earnings on participating policies is not included as a benefit under death and other benefits.

7. *Amortization of deferred policy acquisition costs.* (i) Include under this caption only the amount of deferred policy acquisition costs amortized to income during the period.

(ii) State in tabular form in a note for (*a*) life insurance and (*b*) accident and health insurance, the nature of the costs deferred, the method and term of amortization and the amounts of (*1*) acquisition costs deferred, (*2*) amortization charged to income, (*3*) first year premiums written, and (*4*) renewal premiums. State separately any amount which is in excess of 15 percent of the total amount deferred during each period covered by an income statement indicating the nature of the amount, e.g., commissions, salesmen's salaries, direct mail selling expenses and issue expenses (see § 210.7A–05–1).

8. *Other operating costs and expenses.* Include all selling, general and administrative expenses not deferred as policy acquisition costs. State separately any material amounts. Do not include income taxes under this caption.

9. *Income or loss before income tax expense and appropriate items below.*

10. *Income tax expense.* Include under this caption only taxes based on income. Taxes applicable to profits or losses on securities and extraordinary items shall not be included under this caption [see § 210.3–16(o)].

11. *Equity in earnings of unconsolidated subsidiaries and 50 percent or less owned persons.* The amount reported under this caption shall be stated net of any applicable tax provisions and shall exclude profits or losses on investments. State parenthetically or in a note referred to herein the amount of dividends received from such persons.

12. *Minority interest in income of consolidated subsidiaries.*

13. *Income or loss before realized profits or losses on investments and extraordinary items.*

14. *Realized profits or losses on investments, less applicable tax.* State separately (i) net realized investment profits or losses of the insurance company and (ii) equity in net realized investment profits or losses of (*a*) unconsolidated subsidiaries and (*b*) 50 percent or less owned persons for which the equity in earnings was reported under caption 11 disclosing parenthetically or otherwise the tax applicable to such amounts. No profits or losses on the insurance company's own equity securities, or equity in profits or losses of its affiliates on their own equity securities, shall be included under this caption. State, here or in a note referred to herein, the method followed in determining the cost of investments sold by the insurance company, e.g., "average cost," "first-in, first-out," or "identified certificate." Consideration should be given to reporting transactions of the insurance company under caption 16, when appropriate. (See § 210.7A–05–4.)

15. *Income or loss before extraordinary items.*

16. *Extraordinary items, less applicable tax.* State separately (i) extraordinary items of the person and (ii) equity in extraordinary items of (*a*) unconsolidated subsidiaries and (*b*) 50 percent or less owned persons for which the equity in earnings was reported under caption 11, disclosing parenthetically or otherwise the tax applicable to such amounts.

17. *Net income or loss.* See § 210.7A–03–22(g).

18. *Earnings per share data.* Refer to the pertinent requirements in the appropriate filing form. No per share figures shall be based on net income or loss determined in accordance with statutory accounting requirements. (See § 210.7A–02–2.)

§ 210.7A–05. Special notes to financial statements.

1. *Accounting principles and practices.* Information shall be given in a note as to accounting principles and practices reflected in the financial statements concerning the following matters. (See also § 210.3–08.)

(a) Consolidation of subsidiaries.

(b) Valuation of investments and recognition and reporting of unrealized appreciation or depreciation and profits or losses on investments.

(c) Recognition of premium revenue and related expenses.

(d) The nature of deferred policy acquisition costs and the method and period of amortization.

(e) The range of interest rates, mortality and withdrawal assumptions and the methods employed in calculating policy reserves.

2. *Restrictions on stockholders' equity.* (a) The nature of any restriction on stockholders' equity created by statutory accounting requirements shall be explained in a note. See also § 210.3–16(h).

(b) Explain in a note any deficiency or imminent deficiency in the statutory requirements for capital surplus and the possible effect of such deficiency on the financial statements.

3. *Income taxes.* Information and appropriate explanations shall be given on the general nature of the provisions of the Internal Revenue Code applicable to life insurance companies. In addition to the general requirements of § 210.3–16(o), the following specific information shall be furnished.

(a) The bases and assumptions upon which current and deferred income taxes have been or have not been provided. Disclose in a note the amount of income upon which neither current nor deferred taxes have been provided for each period for which an income statement is filed and the accumulated amount as of the date of the related balance sheet.

(b) The nature of "policyholders' surplus" as defined in the Internal Revenue Code, the additions to "policyholders' surplus" for each period for which an income statement is filed, and the accumulated amount as of the date of the related balance sheet.

(c) The amount of accumulated net operating loss carryforwards, if any, at the date of the latest balance sheet and the years in which such carryforwards will expire.

4. *Analysis of investment gain.* For each period for which an income statement is filed state separately for (a) bonds and notes [see § 210.7A–03–1(a)] and (b) stocks [see §§ 210.7A–03–1 (b) and (c)] the following information: (1) the portion of the realized profits or losses on investments, less applicable tax, included in § 210.7A–04–14 which relates to each of the above categories; (2) the change during the reporting period in the difference between value and cost for each of the above categories; and (3) the total or net balance, as appropriate, for each category.

5. *Participating insurance.* State in a note the relative significance of participating insurance expressed as percentages of insurance in force, number of policies in force and premium income; and the method by which earnings and dividends allocable to such insurance is determined.

6. *Reinsurance.* Information and appropriate explanations shall be given on the general nature of reinsurance contracts. The following specific information shall be furnished:

(a) The amount of life insurance in force ceded to other companies and the amount of accident and health insurance premiums ceded to other companies and the method of accounting for such reinsurance.

(b) The relative significance of reinsurance assumed expressed for life insurance as percentages of life insurance in force and premium income, and for accident and health insurance as a percentage of accident and health premium income.

(c) The nature of the contingent liability in connection with insurance ceded, and the maximum amount of life insurance retained on any one life.

(d) The nature and effect of any material nonrecurring reinsurance transactions.

§ 210.7A–06. What schedules are to be filed.

(a) Except as expressly provided otherwise in the applicable form—

(1) The schedules specified below in this rule as Schedules I, VII, IX, X, XI and XII shall be filed as of the dates of the most recent audited balance sheet and any subsequent unaudited balance sheet being filed for each person or group: *Provided*, That any such schedule (other than Schedules I and IX) may be omitted if both of the following conditions exist:

(i) The financial statements are being filed as part of an annual or other periodic report; and

(ii) The information that would be shown in the respective columns of such schedule would reflect no changes in any issue of securities of the registrant or any significant subsidiary in excess of five percent of the outstanding securities of such issue as shown in the most recently filed annual report containing the schedule.

(2) Schedule IX, Capital Shares, may also be omitted if the above two conditions exist and any information required by column G of the schedule is shown in the related balance sheet or in a note thereto.

(3) All other schedules specified below in this rule as Schedules II, III, IV, V, VI and VIII shall be filed for each period for which an income statement is required to be filed for each person or group.

(b) When information is required in schedules for both the registrant and the registrant and its consolidated subsidiaries it may be presented in the form of a single schedule: *Provided*, That items pertaining to the registrant are separately shown and that such single schedule affords a properly summarized presentation of the facts. If the information required by any schedule (including the notes thereto) may be shown in the related financial statement or in a note thereto without making such statement unclear or confusing, that procedure may be followed and the schedule omitted.

(c) The schedules shall support the financial statements prepared in accordance with generally accepted accounting principles except for statements prepared in accordance with § 210.7A–02–4. Reference to the schedules shall be made in the appropriate captions of the financial statements. Where, pursuant to the applicable instructions, the supporting schedules do not accompany the financial statements, references to such schedules shall not be made.

(d) The schedules shall be examined by the independent accountant if the related financial statements are so examined.

Schedule I.—Summary of Investments—Other than Investments in Affiliates. The schedule prescribed by § 210.12–27 shall be filed in support of caption 1 of each balance sheet.

Schedule II.—Investments in, Equity in Earnings of, and Dividends Received from Affiliates and Other Persons. The schedule prescribed by § 210.12–04 shall be filed in support of caption 3(a) of each balance sheet. This schedule may be omitted if neither the sum of captions 3(a) and 3(b) in the related balance sheet nor the amount of caption 15 in such balance sheet exceeds five percent of total assets as shown by the related balance sheet at either the beginning or end of the period.

Schedule III.—Indebtedness of Affiliates and Other Persons. The schedule prescribed by § 210.12–05 shall be filed in support of caption 3(b) of each balance sheet; however, the required information may be presented separately on Schedule II or Schedule IX. This schedule may be omitted if neither the sum of captions 3(a) and 3(b) in the related balance sheet nor the amount of caption 15 in such balance sheet exceeds five percent of total assets as shown by the related balance sheet at either the beginning or end of the period.

Schedule IV.—Deferred Policy Acquisition Costs. The schedule prescribed by § 210.12–31A shall be filed in support of caption 6 of each balance sheet provided that this schedule may be omitted if the total shown by caption 6 does not exceed five percent of total assets as shown by the related balance sheet at both the beginning and end of the period and if neither the additions nor the deductions during the period exceeded five percent of total assets as shown by the related balance sheet at either the beginning or end of the period.

Schedule V.—Amounts Receivable from Underwriters, Promoters, Directors, Officers, Employees, and Principal Holders (other than Affiliates) of Equity Securities of the Person and its Affiliates. The schedule prescribed by § 210.12–03 shall be filed with respect to each person among the underwriters, promoters, directors, officers, employees, and principal holders (other than affiliates) of equity securities of the person and its affiliates from whom an aggregate indebtedness of more than $20,000 or one percent of total assets, whichever is less, is owed or, at any time during the period for which related income statements are required to be filed, was owed. For the purposes of this schedule exclude in the determination of the amount of indebtedness all amounts receivable from such persons for purchases subject to usual trade

V 39 53 MAR 18 74 XUM

terms, for ordinary travel and expense advances, and for other such items arising in the ordinary course of business.

Schedule VI.—Valuation and Qualifying Accounts and Reserves. The schedule prescribed by § 210.12–13 shall be filed in support of asset valuation and qualifying accounts and reserves included in each balance sheet (see § 210.3–02).

Schedule VII.—Future Policy Benefits and Insurance in Force. The schedule prescribed by § 210.12–31 shall be filed in support of caption 11 of each balance sheet. The schedule prescribed by § 210.12–29 shall be used insofar as it may more appropriately support the liability for future policy benefits of accident and health insurance at caption 11(b) which are based on unearned premiums.

Schedule VIII.—Indebtedness to Affiliates and Other Persons. The schedule prescribed by § 210.12–11 shall be filed in support of caption 15 of each balance sheet; however, the required information may be presented separately on Schedule II or Schedule III. This schedule may be omitted if neither the sum of captions 3(a) and 3(b) in the related balance sheet nor the amount of caption 15 in such balance sheet exceeds five percent of total assets as shown by the related balance sheet at either the beginning or end of the period.

Schedule IX.—Capital Shares. The schedule prescribed by § 210.12–14 shall be filed in support of caption 21 of a balance sheet.

Schedule X.—Warrants of Rights. The schedule prescribed by § 210.12–15 shall be filed with respect to warrants or rights granted by the person for which the statement is being filed to subscribe to or purchase securities to be issued by such person.

Schedule XI.—Guarantees of Securities of Other Issuers. The schedule prescribed by § 210.12–12 shall be filed with respect to any guarantees of securities of other issuers by the person for which the statement is being filed.

Schedule XII.—Other Securities. If there are any classes of securities not included in Schedules IX, X, and XI, set forth in this schedule information concerning such securities corresponding to that required for the securities included in such schedules. Information need not be set forth, however, as to notes, drafts, bills of exchange, or bankers' acceptances, having a maturity at the time of issuance of not exceeding one year.

§ 210.12–27. Summary of investments—other than investments in affiliates.

[For insurance companies]

Column A	Column B	Column C	Column D
Type of investment [1]	Cost [2]	Value	Amount at which shown in the balance sheet [3]

II. Section 249.210 [Form 10]. Instruction 13 of the Instructions as to Financial Statements is amended to read as follows:

13. Statements of Banks and Insurance Companies.

Notwithstanding the requirements of the foregoing instructions, financial statements filed for banks for periods ending on or before November 30, 1971 and for life insurance companies for periods ending on or before November 30, 1974 need not be certified.

III. Section 249.310 [Form 10–K]. Instruction 7 of the Instructions as to Financial Statements is amended to read as follows:

7. Statements of Banks and Insurance Companies.

Notwithstanding the requirements of the foregoing instructions, financial statements filed for banks for periods ending on or before November 30, 1971 and for life insurance companies for periods ending on or before November 30, 1974 need not be certified.

PART 503—GENERAL RULES OF PROCEDURE

Attorney's Fees and Expenses

Amendment of § 503.34b adding a time limitation for the filing of applications for allowance of attorney's fees and reimbursement of attorney's expenses.

1. In § 503.34b the first sentence of paragraph (a) is revised to read as follows:

§ 503.34b Attorney's fees and expenses.

(a) All applications of attorneys for Indian claimants for allowance of fees and reimbursement of expenses shall be by petition prepared in clear typewritten or reproduced form and shall be filed with the Clerk of the Commission within 60 days from the date of the certification by the Commission of the final award from which allowance of fees and reimbursement of expenses are sought. * * *

Effective date. This amendment shall be effective on March 18, 1974.

(Sec. 9, 60 Stat. 1051; (25 U.S.C. 70h))

Dated at Washington, D.C., this 13th day of March 1974.

Title 29—Labor

CHAPTER XIV—EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

PART 1601—PROCEDURAL REGULATIONS

Notice of Right-to-Sue

By virtue of the authority vested in it by section 713(a) of Title VII of the Civil Rights Act of 1964, as amended, 42 U.S.C. 2000e–12(a), 78 Stat. 265, the Equal Employment Opportunity Commission hereby amends Title 29, Chapter XIV, § 1601.25 of the Code of Federal Regulations.

Because of an apparent misunderstanding, on the part of a number of respondents, with respect to the authority of the District Directors to issue Notices of Right-To-Sue, § 1601.25 is revised to read as follows:

§ 1601.25 Notice to respondent, person filing a charge on behalf of the aggrieved person and aggrieved person.

(a) In any instance in which the Commission is unable to obtain voluntary compliance as provided by Title VII, as amended, it shall so notify the respondent, the person filing a charge on behalf of the aggrieved person, the aggrieved person or persons, and any State or local agency to which the charge has been previously deferred pursuant to § 1601.12 or § 1601.10. Notification to the aggrieved person shall include:

(1) A copy of the charge.

(2) A copy of the Commission's reasonable cause or no reasonable cause determination as appropriate.

(3) Advice concerning his or her rights to proceed in court under Section 709(f)(1) of Title VII.

(b) The Commission hereby delegates to its District Directors, Deputy District Directors, and the Dierctor of Compliance, the authority to issue Notices of Right-To-Sue on behalf of the Commission in all cases except those in which a government, governmental agency or political subdivision is named in the charge, pursuant to the procedures set forth in paragraph (a) (2) and (3) of this section.

These amendments shall become effective March 18, 1974.

Signed at Washington, D.C., the 13th day of March 1974.

JOHN H. POWELL, Jr.,
Chairman.

[FR Doc.74–6160 Filed 3–15–74;8:45 am]

PART 1606—GUIDELINES ON DISCRIMINATION BECAUSE OF NATIONAL ORIGIN

Relationship of Citizenship Discrimination to National Origin Discrimination

By virtue of the authority vested in it by section 713(b) of Title VII of the Civil Rights Act of 1964 (42 U.S.C. 2000e–12, 78 Stat. 265), the Equal Employment Opportunity Commission (hereinafter referred to as the Commission) hereby amends Part 1606 of Chapter XIV, Title 29 of the Code of Federal Regulations.

The purpose of this amendment is to conform Part 1606 to the Supreme Court decision in *Espinoza* v. *Farah Manufacturing Co., Inc.*, No. 72–671, issued November 19, 1973, which held that discrimination on the basis of citizenship is not per se national origin discrimination. Changes in section 1601(d) reflecting the now conditional nature of Title VII citizenship discrimination are as follows: the word "because" is replaced by the word "where"; the phrase "purpose or" is inserted prior to the word "effect." Comparable changes are made in section 1601(e) as follows. The provision that state laws "prohibiting the employment of noncitizens" are in "conflict with and are, therefore, superseded by Title VII" is qualified by the clause "where such laws have the purpose or effect of discriminating on the basis of national origin."

The Commission published Part 1606, Chapter XIV in the FEDERAL REGISTER (35 FR 421) on January 13, 1970. Because the material herein is interpretive in nature, the exemption of the Administrative Procedure Act (5 U.S.C. 553) authorizing publication in final form without notice for public comments is applicable.

In view of the foregoing, Part 1606 is amended by revising § 1606.1 (d) and (e), to read as follows below.

§ 1606.1 Guidelines on discrimination because of national origin.

* * * * *

(d) Where discrimination on the basis of citizenship against a lawfully immigrated alien residing in the United States has the purpose or effect of discriminating against persons of a particular national origin, such person may not be discriminated against on the basis of citizenship, except that it is not an unlawful employment practice for an employer pursuant to section 703(g), to

V 39 I 53
MAR 18 74
XUM

refuse to employ any person who does not fulfill the requirements imposed in the interests of national security pursuant to any statute of the United States or any Executive Order of the President respecting the particular position or the particular premises in question.

(e) In addition, some states have enacted laws prohibiting the employment of noncitizens. Where such laws have the purpose or effect of discriminating on the basis of national origin, they are in conflict with and are, therefore, superseded by Title VII of the Civil Rights Act of 1964, as amended.

(Sec. 713(b), 78 Stat. 265 (42 U.S.C. sec. 2000(e)-12(b))

Effective date. This revision shall become effective March 18, 1974.

Signed at Washington, D.C., this the 13th day of March 1974.

JOHN H. POWELL, JR.,
Chairman.

Title 32—National Defense

CHAPTER V—DEPARTMENT OF THE ARMY

SUBCHAPTER J—REAL PROPERTY

[Engineer Reg. No. 405-1-663]

PART 641—UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION POLICIES

Basic Policy and Procedural Requirements

On 23 May 1973, final regulations implementing the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 for the Department of the Army were adopted and published in the FEDERAL REGISTER (38 FR 14239). The foregoing regulations are hereby amended to clarify § 641.4(h).

The nature of this revision is such as not to require advance public notice.

This amendment becomes effective upon issuance.

For the Chief of Engineers.

WOODROW BERGE,
Director of Real Estate.

MARCH 12, 1974.

Subpart A of Part 641 of Chapter V of Title 32 of the Code of Federal Regulations is amended as follows:

Section 641.4(h) is revised to read as follows:

§ 641.4 Basic policy and procedural requirements.

* * * * *

(h) The availability of relocation benefits in leasehold cases under Title II of the Act depends upon the circumstances under which the leasing action takes place. Persons vacating as the result of a Government order to vacate, a lease construction project, or the condemnation of a leasehold interest are entitled to benefits under Title II. The provisions of Title II do not apply to leasehold cases under any other circumstances.

[FR Doc.74-6157 Filed 3-15-74;8:45 am]

CHAPTER VII—DEPARTMENT OF THE AIR FORCE

SUBCHAPTER F—AIRCRAFT

PART 855—USE OF UNITED STATES AIR FORCE INSTALLATIONS BY OTHER THAN UNITED STATES DEPARTMENT OF DEFENSE AIRCRAFT

In this revision, airfield certification under Federal Aviation Regulation (FAR) Part 139 is cited and required when applicable; an exemption from Part 855 requirements is made to Civil Air Patrol aircraft operating on an authorized Air Force mission when directed by competent Air Force orders; relief is provided from the administrative requirements of this part where a contractual agreement to any United States, State or local Government agency exists in support of operations involving safety of life or property or a result of a natural disaster; unauthorized landings are defined as inadvertent or intentional; procedures are updated for handling aircraft of major political party candidates; the Commander, Alaskan Air Command is given authority to act as the agent for the Commander, Air Defense Command for approving use of Alaskan air strips; commands are required to make machine printouts of approved landing permits for base use.

Part 855, Subchapter F of Chapter VII of Title 32 of the Code of Federal Regulations is revised to read as follows:

Sec.

855.1 Purpose.

Subpart A—General Provisions

855.10 Policy.
855.11 Definitions.
855.12 Aircraft exempt from this part.

Subpart B—Unapproved Landings

855.20 Unapproved landings.
855.21 Emergency landings.
855.22 Unauthorized landings.

Subpart C—Civil Aircraft Use

855.30 Conditions for use of USAF installations.
855.31 Types of civil use.
855.32 Approving authority.
855.33 Civil aircraft user requests.
855.34 Processing procedures of the approving authority.
855.35 Insurance requirements.
855.36 Landing, parking, and storage fees.
855.37 Purchase of aviation fuel and oil.
855.38 Supply and service charges.

Subpart D—Foreign Government Aircraft

855.40 General information.
855.41 Actions required by foreign government aircraft users.
855.42 Processing procedures of the approving authority.
855.43 Aviation fuel and oil purchases.
855.44 Supply and service charges.

Subpart E—Joint Use of a USAF Installation

855.50 Requests for joint use.

AUTHORITY: 10 U.S.C. 8012, 49 U.S.C. 1507 (a) and 1508.

§ 855.1 Purpose.

This part establishes the responsibilities and describes the procedures for the use of United States Air Force (USAF) installations by aircraft other than United States Department of Defense aircraft pursuant to sections 1107 and 1108 of the Federal Aviation Act of 1958 (sections 1507(a) and 1508, Title 49, United States Code; Pub. L. 85-726).

Subpart A—General Provisions

§ 855.10 Policy.

USAF installations are established to support the USAF mission for national defense. This part carries the force of law, and exceptions are not authorized without prior approval of HQ USAF/PRPO.

(a) *The Air Force.* (1) Determines whether use of its installations is compatible with current and programmed military activities.

(2) Normally authorizes use of its installations for aircraft operated for official Government business only. However, if exceptional substantiated reasons exist, other types of use may be authorized. When applicable, the requested airfield must be certified under Part 139 of the Federal Aviation Regulation (FAR). Certification is required for USAF airfields before use by the Civil Aeronautics Board (CAB) certified air carriers with commercially ticketed passengers aboard. Exceptions to the certification requirement are (i) emergencies, (ii) weather alternate, (iii) air taxi operations, and (iv) air carrier operations using USAF airfields in performance of contract work exclusively for the military.

(3) Subject to the laws and regulations of the United States or the country in which the USAF installation is located, acts as clearing authority for its installations where international civil aviation operations are authorized under International Civil Aviation Organization (ICAO) agreements.

(4) Reserves the right to suspend any operation inconsistent with national defense interests or any other requirement when deemed in the best interest of the Air Force.

(5) Terminates any authorization to use a USAF installation where the liability insurance is canceled or the user is reported as operating for other than the approved purposes.

(6) Will not authorize civil use of USAF installations in competition with civil airports for transportation purposes, for the convenience of passengers or aircraft operator, transient aircraft servicing, for commercial enterprises, for procuring government business or contracts, or for customs handling purposes.

(b) *All operators must.* (1) Obtain prior authorization to land at USAF installations except bases specifically exempted by joint-use or international agreements or in an emergency.

(2) Have aircraft equipped with operating two-way radio equipment.

(3) Not assume that landing clearance granted by a control tower constitutes prior approval.

(4) Obtain their own diplomatic or overflight clearance.

(5) Pay applicable costs.

(c) The installation commander:

(1) Exercises administrative and security control over both the aircraft and passengers while on his installation.

(2) Suspends or changes flight plans of civil aircraft including landing or takeoff times when necessary to preclude interference with military activities.

(3) Cooperates with customs, immigration, health, and other public authorities, as necessary, in connection with aircraft arrival and departure.

§ 855.11 Definitions.

(a) *Installation.* A defined area of real property for which the U.S. Air Force has operational jurisdiction of the airfield facility either by ownership, lease, or diplomatic agreement.

(b) *Installation Commander.* The Commander of the USAF installation or his designated representative.

(c) *Joint-use installation.* A USAF installation where a specific written agreement exists between the Air Force and a local community or foreign government for civil aviation use of the runways and taxiways.

(d) *Official government business.* Activity associated with operations or functions of United States or foreign governmental agencies at or in the immediate vicinity of a USAF installation.

(e) *Civil aircraft.* Any United States or foreign-registered aircraft owned by private individuals or corporations and foreign government-owned aircraft which are operated for commercial aviation purposes.

(f) *Civil aviation.* All flying activity by civil aircraft of any national registry, including:

(1) *Commercial aviation.* All civil aviation involving the transportation of passengers or cargo for hire.

(2) *General aviation.* All civil aviation not involving transportation of passengers or cargo for hire.

(g) *User.* An individual or corporation operating civil aircraft.

(h) *Government aircraft.* Aircraft owned, operated by or on behalf of, or controlled by any department or agency of either the United States or a foreign government. Also, aircraft owned by any State of the United States operating solely on official Government business.

(1) *Bailed aircraft.* United States Government-owned aircraft delivered to a Government contractor for a specific purpose directly related to a contract.

(2) *Loaned aircraft.* United States Government-owned aircraft delivered gratuitously to another United States Government agency or to a USAF Aero Club.

(3) *Military aircraft.* Aircraft used in the military services of any government.

(i) *Regular airport.* A USAF installation used by commercial aviation on a scheduled basis when the CAB or its foreign government equivalent certifies passenger and cargo service to a community.

(j) *Weather alternate airport.* A USAF installation used as a weather alternate airport as prescribed by Federal Aviation Administration (FAA) or other regulations.

(k) *AF Form 180, Hold Harmless Agreement.* An agreement, executed by the user, which releases the U.S. Government from all liabilities incurred in connection with civil aircraft use of USAF installations.

(l) *AF Form 181, Civil Aircraft Landing Permit.* An application which, when validated by an Air Force approving authority, authorizes the civil operator to use the installation(s) under the terms of this part.

(m) *AF Form 203, Certificate of Insurance.* A certificate which evidences the amount of third-party minimum liability insurance carried by the user is as required by this part.

(n) *Authorized buyer letter.* A letter of agreement which qualified operators must file with the Air Force in order to purchase Air Force aviation fuel and oil on a credit basis under the provisions of AFR 144-9, Aviation Fuel and Oil Sales to Contract, Charter, and Civil Aircraft. (See Part 819a of this chapter.)

§ 855.12 Aircraft exempt from this part.

(a) Any aircraft owned and operated by:

(1) A U.S. Government agency outside the Department of Defense.

(2) U.S. Air Force Aero Clubs established in accordance with Air Force Regulation 215-8, Air Force Aero Clubs. (See Part 861 of this chapter.)

(3) Aero Clubs of other U.S. military services.

(4) Any U.S. State owned or operated aircraft when operated in connection with official business.

(b) Any civil aircraft under:

(1) Lease or contractual agreement to the U.S. Government and operated on official business by a U.S. Government agency such as the FAA, Department of the Interior, etc.

(2) Lease or contractual agreement to the Civil Air Patrol (CAP) and operated by a USAF-CAP liaison officer on official Air Force business.

(3) CAP control for an authorized Air Force mission when directed by competent Air Force orders.

(4) Bailment contract: *Provided,* The U.S. Government is the insurer for liability.

(5) Humanitarian flights transporting critically ill or injured personnel to or from a USAF installation.

(6) Contractual agreement to any U.S., State, or local Government agency in support of operations involving safety of life or property as a result of a natural disaster.

Subpart B—Unapproved Landings

§ 855.20 Unapproved landings.

A civil aircraft operator who lands at a USAF installation without prior approval and without experiencing an inflight emergency violates this part. There are three types of unapproved landings—an emergency landing, an inadvertent landing, and an intentional landing. On all unapproved landings, the installation commander:

(a) Briefs the operator on this part and the FAA requirement for reporting the incident.

(b) Have the operator prepare a circumstantial report, sign an AF Form 180, and pay applicable charges.

(c) On compliance with the above and a minimum of ground time, allows the operator to depart the installation.

(d) Notifies the local General Aviation District Officer of the FAA region in the U.S. or its possessions.

(e) Notifies appropriate U.S. Defense Attache Office (USDAO) authority in the country of aircraft registration when landing is at a USAF installation within a foreign country. Provides an information copy of the report to the civil aviation authority of the country concerned.

(f) Prepares a report on the landing and submits the report with supporting documentation through channels to HQ USAF/PRPO, Washington, D.C. 20330.

§ 855.21 Emergency landings.

Any aircraft operator who experiences an inflight emergency may land at any USAF installation without prior approval. An inflight emergency is a developed situation which makes continuous flight hazardous.

(a) The Air Force will use any method or means to clear an aircraft or wreckage from the runway. Removal efforts should minimize damage to the aircraft or wreckage; however, military and other operational factors may be overriding.

(b) The user:

(1) Is not charged a landing fee.

(2) Pays all costs for labor, material, parts, use of equipment, tools, etc., to include, but not limited to:

(i) Spreading foam on the runway.

(ii) Damage to runway, lighting, navigation aids.

(iii) Rescue, crash, and fire control.

(iv) Movement and storage of aircraft.

(v) Performance of minor maintenance.

(vi) Fuel.

(3) Files a circumstantial landing report with the installation commander and completes an AF Form 180.

(c) The installation commander:

(1) Documents total cost incurred by U.S. Government. (AFR 177-8, User Charges and User Charges Report (Part 812 of this chapter), will be used for cost determination.)

(2) Collects payment of all charges incurred.

(3) Where there are no survivors, prepares an emergency landing report.

(4) Forwards the report with all related documentation to HQ USAF/PRPO.

(5) Handles an emergency landing by a foreign military or foreign government aircraft in the same manner as for a U.S. Government aircraft.

§ 855.22 Unauthorized landings.

(a) Inadvertent landing. If the installation commander determines that an aircraft operator may have landed due to flight disorientation, mistaken the USAF installation for a civil airport, or had no official interest in being on the

V 39 53 MAR 18 74 XUM

installation, the landing may be assessd an inadvertent one. Charges will be the normal landing fees.

(b) International landing. An intentional landing is one where the aircraft operator, either with or without knowledge of the provisions of this part, files a flight plan to and lands at a USAF installation without obtaining prior approval.

(1) The installation commander may categorize a landing as unauthorized wher. the civil aircraft operator has:

(i) Landed without an approved AF Form 181 on board the aircraft.

(ii) Landed for a purpose not approved on the AF Form 181.

(iii) Operated an aircraft not of a model or registration number on the approved AF Form 181.

(iv) Not requested or obtained the required 24-hour final clearance from the installation commander.

(v) No official Government business purpose for his landing.

(vi) Landed with expired documents.

(2) The installation commander, based on the above information, makes the determination that the landing was intentional and unapproved and assesses both the normal and unauthorized landing fees.

(c) Any repeated inadvertent landing is assessed and processed as an intentional landing. Any operator who makes a repeated intentional landing may be detained at the installation until the unapproved landing report has been reviewed and/or determination made that other requirements have been met before departure. Repeated intentional landings prejudice an operator's existing authority and jeopardize future use of any USAF installation.

Subpart C—Civil Aircraft Use

§ 855.30 Conditions for use of USAF installations.

All users are expected to submit their application at least 30 days in advance of intended use. When authorizing use of its installation, the Air Force does so for a specific type of use by a named individual or company (not transferable to a second or third party) and does not extend to other types of civil aviation use. The operator is limited to use of the landing, taxiing, and normal parking facilities, and is not necessarily entitled to receive aviation fuel, oil, or other services from the U.S. Government. Personnel on board are only authorized activities at the installation directly related to the type of use granted.

§ 855.31 Types of civil use.

Listed in this section are specific types of civil use the Air Force may consider. Others may be considered if sufficient justification is provided. Application must be made for each type of use, except that commercial air carriers may apply for both regular and weather alternate use on the same request.

(a) *Non-government personnel (M).* A U.S. or foreign Government contractor, operating his own aircraft, who uses a USAF installation to fulfill the terms of the contract or to display aircraft equipment to official representatives of the U.S. or a foreign government. Verification: The contractor must provide the current contract numbers, the USAF installation required for each contract, a brief description of the work to be performed, and the name, telephone number, and address of the Government contracting officer. Representatives of the U.S. or a foreign Government must have requested or invited the demonstration of aircraft or equipment at a USAF installation.

(b) *Nonscheduled air carrier (P).*—(1) *Air taxi operator.* An operator who uses a USAF installation for the official transportation of military and civilian Government employees. Verification: Written agreement between the air taxi operator and the major command or an installation commander (AFM 75-2, Military Traffic Management Regulation, paragraph 304010).

(2) *Charter operator.* An operator who uses a USAF installation for the transport of a U.S. or foreign Government contractor's personnel or cargo in support of a current U.S. or foreign Government contract. Verification: The U.S. or foreign Government contracter must provide written validation that the charter operator is operating on his behalf, to include current contract numbers, and the USAF installations which are required for each contact; a brief description of the contracted work; the name, telephone number, and address of the Government contracting officer; and the contract period.

(c) *Government personnel (J).*—(1) *Active duty U.S. military.* Authorizes active duty U.S. military personnel, operating their own or leased aircraft, to use any USAF installation for official duty transportation (temporary duty, permanent change of station, etc.) or for private nonrevenue flights. (This authorization is extended to all installations where there is an approved USAF Aero Club operating.) Verification: Active duty Air Force serial number, and for personnel of the other Services, provide proof of active duty status.

(2) *Air National Guard, Reserve and Air Force Reserve Officer Training Corps.* Permits ANG, Reserve, and AFROTC personnel, operating their own or leased aircraft, to use a specific USAF installation at which their assigned unit is located or when on official orders for temporary duty at other installations. Verification: Request routed through component command for indorsement.

(3) *Civilian employees of the U.S. Government.* Permits civilian employees of the U.S. Government, operating their own or leased aircraft, to use a USAF installation only for official Government business travel purposes. Verification: Copy of current travel orders or additional documentation certifying requirement.

(4) *Retired U.S. military (includes retired regular and reserves that are entitled to retired pay).* Permits retired U.S. military personnel, operating their own or leased aircraft, to use a USAF installation to participate in the activities authorized U.S. retired military by statute. Use of USAF installations for other purposes is not authorized and may result in revocation of the landing permit. Verification: Copy of retirement orders.

(d) *Commercial aviation (N).*—(1) *Regular airport (R).* Permits scheduled air carrier service to a community or area for on-or-off loading passengers and cargo when no suitable civil airfield exists. Verification: CAB certified service to the community.

(2) *Weather alternate airport (A).* Permits a scheduled air carrier to divert to a specified USAF installation when unforecast weather conditions require a change from the original destination to the alternate destination while in flight. Aircraft may not be dispatched from a point of departure to an approved weather alternate. Verification: Actual use is predicated on weather conditions at a destination.

(e) *U.S. Government contract charter (H).*—(1) *Military Airlift Command contract operator.* Permits an air carrier to use a USAF installation under the terms of a Military Airlift Command (MAC) contract. Verification: The air carrier must have a MAC Form 8 or other issued Government document on the aircraft to substantiate that he is operating on an official MAC contract flight.

(2) *U.S. Government contract/charter operator.* Permits an air carrier to use a USAF installation under the terms of U.S. Government contract/charter awarded by U.S. Government department or agency. Verification: The air carrier must have an official Government document on the aircraft to substantiate that he is operating on a bona fide flight for a U.S. Government department or agency.

(3) *On-call air taxi operator.* Permits an on-call air taxi operator to use a USAF installation at the specific request of any echelon of a U.S. Government department or agency. Verification: The on-call air taxi operator must have an official Government document on the aircraft to substantiate that he is operating on a bona fide flight for a U.S. Government department or agency.

(f) *Civil Air Patrol (K).* Permits aircraft owned and operated by the CAP or a CAP member to use designated USAF installation for official CAP activities. Verification: Indorsement of the application by HQ CAP-USAF, Maxwell Air Force Base, Alabama 36112.

(g) *Other.* Under certain circumstances and based on the justification provided or as may be requested, use of USAF installations may be authorized for:

(1) FAA certification testing (W).

(2) Commercial developmental testing (subject to compliance with Air Force Regulation 80-19, Support of Non-government Test and Evaluation) (W).

(3) Commercial charter operation (S).

(4) Commercial aircrew training flights (W).

(5) Private nonrevenue-type flights (R).

(6) Major political party candidates (for security reasons only). Aircraft either owned or chartered explicitly for a Presidential or Vice Presidential candidate, including not more than one accompanying overflow aircraft. Candidate must be the post-convention major political party's nominee. Aircraft clearance is predicated on the Presidential or Vice Presidential candidate being aboard one of the aircraft. The major political party headquarters must notify HQ USAF/PRPO of all requests for flight schedules involving USAF installations. After normal duty hours, flight schedule changes must be reported to the USAF Operations Center, Washington, D.C. Immediately refer any contacts made outside these channels to HQ USAF/PRPO. Normal landing fees will be charged. Fuel may be sold on a credit basis in accordance with Air Force Regulation 144-9. (See Part 819a of this chapter).

NOTE: To reduce conflict with U.S. statutes and Air Force operational requirements, and to provide expeditious handling of aircraft and passengers, the following guidance applies for the installation commander: Minimum official (base officials) welcoming party, no special facilities need be provided, no plans should be approved for on-base political rallies or speeches, and no official transportation should be provided for unauthorized personnel (press, local populace, etc.).

§ 855.32 Approving authority.

The authority to approve or disapprove civil aircraft use of USAF installations is vested in:

(a) *Directorate of Programs, HQ USAF.* HQ USAF/PRPO may act on any request for any type of civil aviation use predicated on justification for such use and for the types outlined in § 855.31; however, it reserves the exclusive approval authority on the following:

(1) Commercial air carriers.

(2) Use of multiple USAF installations.

(3) U.S. Government contract/charter operators.

(4) On-call air taxi operators.

(5) Flights operating over international boundaries where landing is to be made at a USAF installation.

(6) Other types, including those not specifically delegated to other competent authority.

(7) Joint civil aviation type use as prescribed under § 855.50.

(8) Any unusual or unique use not specifically authorized by this part.

(b) *Major command or an installation commander.* A major command or an installation commander may approve or disapprove use of an installation(s) under his jurisdiction for the following types of civil aviation:

(1) Civil Air Patrol.

(2) Government personnel.

(3) Nonscheduled air carrier.

(4) Non-Government personnel.

(5) Humanitarian flights in conjunction with evacuation of critically ill or injured personnel.

(6) For flights by aircraft either owned or personally chartered for transportation of the President, Vice President, or a past President of the United States; the head of any U.S. Federal department or agency; or a member of Congress.

NOTE: If time does not permit processing of the request before landing, AF Form 180 and 181 will be completed immediately after aircraft arrival. Collection will be made for landing, parking, and storage fees when use is not for official business purposes. Any request by or for members of Congress will be reported to the Director of Legislative Liaison (SAF/LL) in accordance with Air Force Regulation 11-7, Air Force Relations with Congress.

(c) *Commander, Alaskan Air Command.* In addition to paragraph (b) of this section, the Commander AAC may approve and disapprove landing permits for Alaskan air strips under the control of the Commander, Air Defense Command, without restriction as to type of use. Air Defense Command will be furnished a copy of each AF Form 181 approved under this section. The Air Force mission takes precedence over this type of use, and an approved permit does not obligate use of Air Force supplies, equipment, or facilities other than the landing strip.

(d) *Commander, Military Airlift Command.* In addition to paragraph (b) of this section, the Commander, Military Airlift Command, may approve use of USAF installations worldwide, as required, for flights in support of MAC contracts.

(e) *U.S. Defense Attache.* The U.S. Defense Attache (USDAO), acting on behalf of HQ USAF/PRPO, may approve a request for a one-time landing at a USAF installation as follows:

(1) For official Government business purposes of either the U.S. or the country to which he is accredited.

(2) If the USAF installation is located within the country to which he is accredited.

(3) If the installation commander concurs.

§ 855.33 Civil aircraft user requests.

The prospective user should obtain a copy of this part and the required forms from any USAF installation or approving authority, and review them before submitting the required documents to the approving authority. The appropriate approving authorities are reflected in § 855.32. The type use can be found in § 855.31. To allow time for processing, all documents should be submitted at least 30 days before the date of the first intended landing. The name of the "user" must be the same on all forms. Actual signatures, not facsimile elements, are required on all forms. Prospective civil users of a USAF installation must apply for authorization as follows:

(a) Actions required by civil aircraft users:

(1) Complete, sign, and forward original AF Form 180 to the approving authority. When the user is a corporation, the "Certificate" of acknowledgement on AF Form 180 must be completed and signed by a second corporate officer (other than the officer executing the AF Form 180) to certify the signature of the first officer. As necessary, the Air Force also may require that the "Certificate" of acknowledgement be authenticated by an appropriately designated third official. Once the completed and signed AF Form 180 has been accepted by an approving authority, and unless rescinded for cause, it is valid until obsolete, and need not be resubmitted with future requests to the same approving authority.

(2) Prepare and sign a separate set of AF Forms 181 for each type of use requested. Except for scheduled and weather alternate use, which may be requested on the same form, a separate set of AF Forms 181 is required for each type of use. Complete AF Form 181 in an original and one copy for HQ USAF/PRPO and an original and four copies for other approving authorities. The user should ensure that all entries conform to the requirements of this part.

(i) Type of use stated must correspond with § 855.31. Other types may be considered if sufficient justification is provided.

(ii) Provide, in alphabetical order, the name and location of each USAF installation requested for use. Scheduled airline will designate each listed installation as a regular or weather alternate by placing a (R) or an (A) after the installation name. (The statement "All Major USAF Installations Worldwide," or "All Major USAF Installations Within the Continental United States," generally is acceptable only from those users on official Government business.)

(iii) Provide a brief explanation of the activities, to include the purpose, contract numbers, period of use, and detailed justification for use of each installation requested. Period of use requested must be stated, but will not exceed 18 months. If insurance is the limiting factor, the landing permit expiration date is one day before the insurance coverage expiration date indicated on AF Form 203. If the frequency of use is not precisely known, provide an estimated frequency of use.

(iv) Registration numbers are required, however, they need not be provided if the insurance coverage states "any aircraft of the listed model(s) owned and/or operated" (see § 855.35). Provide all other aircraft information.

(3) Have the insurer or his authorized agent complete, sign, and forward the original AF Form 203 to HQ USAF/PRPO. All coverages must be stated in U.S. dollars (see § 855.35 for required minimum coverages) and must be adequate for the type of use requested and for the passenger capacity and Maximum Gross Take Off Weight (MGTOW) of the aircraft being operated. When the approving authority is other than HQ

V 39 53 MAR 18 74 XUM

USAF, submit a signed carbon copy of the original AF Form 203 with the AF Forms 181 to the approving authority. The AF Form 203 is valid until insurance expiration date, and may be used as a basis for actions on any later AF Forms 181 submitted for approval.

(b) Once the AF Form 181 has been approved and distributed, users may make no further entries or amendments. New requirements must be submitted on a new set of AF Forms 181, but may include the old listing.

§ 855.34 Processing procedure of the approving authority.

On receiving a request for the use of a USAF installation, the approving authority:

(a) Determines the availability of the installation and its capacity to accommodate the type of use requested.

(b) Ensures the prospective civil aircraft user has a valid AF Form 180 and AF Form 203 on file at his approving level.

(c) Determines the validity of the request and ensures all entries on the AF Form 181 are in conformance with this part.

(d) Approve the AF Form 181 (with conditions or limitations listed as appropriate) by completing all items in the approving authority section. Assign a permit number comprised of the letter identifiers of the approving authority, the last two digits of the calendar year, a serial number, and a letter suffix indicating the type of use (see § 855.31). Major Commands and USDAO's use a three position abbreviation and bases use the ICAO Code as the letter identifier of the approving authority.

(e) Disapproves the request if it does not comply with the requirements of this part; for example, if:

(1) Use interferes with current operations, security, or ground safety.

(2) Adequate civil facilities are available in the proximity of the requested USAF installation.

(3) Civil user has not fully complied with this part.

(f) Distributes the approved AF Form 181 before the first intended landing, when possible, and as follows:

(1) Original to HQ USAF/PRPO.

(2) Return two copies to the user.

(3) Retain one copy for file.

(4) HQ USAF/PRPO provides one data punch card for each AF Form 181 to the appropriate major commands. Landing permit information in data punch card format is distributed weekly to major commands, who make further distribution via machine printout to their appropriate installations every two weeks.

§ 855.35 Insurance requirements.

Each user who applies for permission to land at a USAF installation presents proof of third-party liability insurance on an AF Form 203, with the amounts stated in U.S. dollars. The policy number, effective date, and expiration date are required. The geographical area of coverage must include the area where USAF installation(s) of proposed use is (are) located. Where several aircraft or aircraft types are included under the same policy, a statement such as "all aircraft owned," "all aircraft owned and operated," "all aircraft owned or operated, "all aircraft operated," etc., may be listed under aircraft registration number(s) in lieu of aircraft registration numbers. To meet the insurance requirements, either individual coverages for "Bodily Injury," "Property Damage," and "Passengers" or a "Single Limit" coverage is required. The coverage carried will be at the expense of the user with an insurance company acceptable to the Air Force, and must be current during the period the USAF installation is to be used. The liability required is determined by the MGTOW of the aircraft, whether passengers are carried, and will not be less than the minimum in the following table:

TABLE.—*Aircraft liability coverage requirements* [Stated in U.S. dollars]

	Bodily injury	Property damage	Passenger
	(a) Commercially operated without passengers		
12,500 pounds and under:			
Each person	$100,000		
Each accident	300,000	$100,000	
Over 12,500 pounds:			
Each person	100,000		
Each accident	1,000,000	1,000,000	
	(b) Commercially operated and privately owned noncommercial with passengers		
12,500 pounds and under:			
Each person	$100,000		$100,000
Each accident	300,000	$100,000	$100,000 × number of passenger seats.
Over 12,500 pounds:			
Each person	100,000		$100,000
Each accident	1,000,000	1,000,000	$100,000 × 75% × number of passenger seats.

(a) Any insurance presented as a single limit of liability or a combination of primary and excess coverage will be an amount equal to or greater than the minimums required for Bodily Injury, Property Damage, or Passengers as indicated in the table in this section.

(b) Each user's policy will specifically provide that:

(1) The insurer waives any right of subrogation the insurer may have against the United States by reason of any payment made under the policy for injury, death, or property damage that might arise out of or in connection with the insured's use of any USAF installation.

(2) The insurance afforded by the policy applies to the liability assumed by the insured under the AF Form 180.

(3) If the insurer or the insured cancels or reduces the amount of insurance afforded under the listed policy, the insurer sends written notice of the cancellation or reduction to HQ USAF/PRPO by registered mail at least 30 days in advance of the effective date of the cancellation or reduction. (The policy must state that any cancellation or reduction will not be effective until at least 30 days after such notice is sent.)

§ 855.36 Landing, parking, and storage fees.

All fees are due and collectable at time of use of any active or inactive USAF installation and are deposited with the Accounting and Finance Officer using DD Form 1131, Cash Collection Voucher. As necessary, guidance and assistance may be obtained from the Installation Accounting and Finance Officer. The landing, parking, and storage fees are based on the aircraft Maximum Gross Take Off Weight (MGTOW). The time that an aircraft spends on an installation is at the discretion of the installation commander. He may permit parking and storage on a nonexclusive, temporary, or intermittent basis consistent with military requirements.

(a) *Normal landing fee.* (1) U.S., U.S. Territories and Possessions. .20/1,000 pounds MGTOW or any portion thereof, minimum $5.00.

(2) Other overseas. .30/1,000 pounds MGTOW or any portion thereof, minimum $7.50.

(b) *Unauthorized landing fee.* (1) Aircraft 12,500 pounds MGTOW and under, $100.00.

(2) Aircraft over 12,500 pounds up to and including 40,000 MGTOW, $300.00.

(3) Aircraft above 40,000 pounds MGTOW, $600.00.

(c) *Parking and storage fee.* (1) Outside a hangar. Charge begins 6 hours after aircraft landing. The rate is .$10/1,000 pounds MGTOW for each 24-hour period or fraction thereof, with a minimum of $1.50 per aircraft.

(2) Inside a hangar. Charge begins at time aircraft is placed in the hangar. The rate is .20/1,000 pounds MGTOW for each 24-hour period or fraction thereof with a minimum of $5.00 per aircraft.

(d) *Exceptions.* The landing, parking, and storage fees are not applicable for civil aircraft which are:

(1) Privately owned, or leased, and operated by active duty and retired U.S. military and auxiliary personnel of the CAP, U.S. Air Force Reserve, ANG, and AFROTC.

(2) Operated in support of official Government business, including those

operated under a U.S. or foreign Government contract or charter.

(3) Produced under a contract of the U.S. Government.

(4) Exempted from this part.

§ 855.37 Purchase of aviation fuel and oil.

Conditions for sale of aviation fuel and oil are specified in AFR 144–9 (Part 819a of this chapter). A user may purchase Air Force fuel and oil on a credit basis after establishment of the "Authorized Buyer Letter". The Authorized Buyer Letter must be submitted to and accepted by HQ USAF/PRPO before products can be purchased on a credit basis.

§ 855.38 Supply and service charges.

Supplies and services furnished to a user are charged for as prescribed in Air Force Manual 67–1, USAF Supply Manual, volume I, part one, chapter 10, section N, subsection 2. Cash, personal check with appropriate identification, cashier check or money orders are acceptable means of payment.

Subpart D—Foreign Government Aircraft

§ 855.40 General information.

All foreign military or foreign government-owned noncommercially operated aircraft must have authorization before using USAF installations. Where agreements do not exist—between the United States and a foreign government or between the U.S. Air Force and a foreign air force for reciprocal use by military aircraft—foreign government must specifically request permission for its aircraft to land at USAF installations.

NOTE: Permission to land at USAF installations in the United States or foreign countries does not constitute nor take the place of diplomatic overflight clearance.

§ 855.41 Actions required by foreign government aircraft users.

Foreign government aircraft are not required to submit AF Forms 180, 181 and 203 for permission to land at a USAF installation. Instead, the foreign government must:

(a) Complete and forward a written request in an original and two copies through its air attache to HQ USAF/CVAFI, Washington, D.C. 20330, at least a minimum of 72 hours, excluding Saturday, Sunday and U.S. holidays, before first intended landing. (All Latin American countries are authorized to submit their requests, a minimum of 48 hours or 2 workdays in advance of use of a USAF installation in the Canal Zone or the Continental United States, direct to USAFSO, APO New York 09825.)

(b) Submit a request for diplomatic clearance to the Department of State, where flight to United States territory is desired, unless flight in U.S. airspace is already authorized by an appropriate agreement.

(c) Submit a request for diplomatic clearance to each appropriate foreign country which is to be overflown or in which a landing is to be made (where use of a USAF installation in a foreign country is desired).

§ 855.42 Processing procedures of the approving authority.

On receiving a request, the approving authority:

(a) Determines the availability of the installation and its capability to accommodate the use.

(b) Ensures that the prospective foreign government user has a valid requirement.

(1) Assistant Vice Chief of Staff, Foreign Liaison Division (HQ USAF/CVAFI). HQ USAF/CVAFI acts on all requests for use of a USAF installation by a foreign government aircraft except the Commander, USAF Southern Command, has authority to approve certain requests from Latin American countries. An aircraft landing number (ALAN) is assigned each request approved for foreign government aircraft and notifies USAF installations, major commands, Air Staff offices, and HQ USAF/PRPO by message.

(2) Commander, USAF Southern Command (USAFSO) may act on requests from any Latin American country for its military aircraft or other Government-owned aircraft not engaged in commercial operations, to use USAF installations under his control, and in the Continental United States. Prior clearance for use of Continental United States installations must be obtained, either formally or informally, from the installation commander concerned before issuing the landing authorization. Concurrent with obtaining clearance from the installation commander, informal notification of period of use and petroleum, oil and lubricants billing instructions may be furnished; this information is repeated in the landing authorization message. USAFSO ensures that all authorizations are consistent with current directives.

§ 855.43 Aviation fuel and oil purchases.

Air Force aviation fuel and oil may be purchased by the foreign government aircraft users of USAF installations as authorized by separate agreement or as stated in the approved landing request.

§ 855.44 Supply and service charges.

Charges for supplies and services furnished are prescribed in AFM 67–1, volume I, part one, chapter 10, section N, subsection 2. For official business, communications service may be provided at no cost to the U.S. Government or on a reimbursable basis where additional charges accrue to the U.S. Government for such service. Communications service normally is not provided for other than official business.

Subpart E—Joint Use of a USAF Installation

§ 855.50 Requests for joint use.

Joint civil aviation use of a USAF installation is considered only when requested by authorized governmental representatives of a community. Such requests are considered and evaluated on an individual basis by all reviewing levels.

(a) To initiate consideration for joint use of a USAF installation, submit a request to the installation commander, and include the following:

(1) Type and number of aircraft to be located on the installation.

(2) If applicable, an estimate of the number of commercial operations annually over a 5-year period.

(b) The installation commander, on receipt of the request, without precommitment or comment, forwards the documents to the Air Force representative at the FAA regional office within the geographical area of installation location.

(c) The USAF is responsible for the preparation of the environmental statement. Any costs associated with the preparation of the statement are borne by the requester.

(d) The Air Force representative at the FAA regional office comments on the request regarding airspace, air traffic control, and any other related areas, and returns the request with his comments to the installation commander.

(e) The installation commander comments on the request and forwards his comments and all related documents through channels to HQ USAF/PRPO.

(f) HQ USAF/PRPO, when evaluating the request, considers all of the following factors:

(1) The current and programmed military activities at the installation, dual runway and taxiway facilities, security, availability of supplies and maintenance service, volume and type of military traffic, crash protection, etc., and the extent to which the proposed use might detract from the installation capability to meet national defense needs.

(2) Availability of public airports to accommodate the current and future civil aviation requirements of the community and the practicality of constructing or expanding a public airport.

(3) Availability of sufficient land for civil facilities in an area separate from the Air Force facilities. If the community does not already own the land needed, the necessary land must be acquired either by purchase at no expense to the U.S. Government or from land that is excess to Air Force needs. The availability of excess USAF installation land may be requested through the FAA and the General Services Administration (see 50 App. U.S.C. 1622(g)). The Air Force considers temporary use of real property under Air Force Regulation 87–3, Granting Temporary Use of Real Property (see Part 838 of this chapter).

(4) Whether the community would acquire, construct, and maintain all necessary facilities for civil aviation operations; for example, a terminal building, parking ramp, taxiways, and, if appropriate, a civil runway.

(5) Whether the community would reimburse the U.S. Government a proportionate share of the costs for maintenance and operation of the runway and other utilized facilities.

V 39 N 53 MAR 18 74 XUM

(g) If HQ USAF/PRPO approves the request for joint use, an agreement will be negotiated and concluded on behalf of the Air Force. The joint-use agreement will state the extent to which the provisions of this part will apply to all civil aviation use authorized.

By order of the Secretary of the Air Force.

STANLEY L. ROBERTS,
Colonel, USAF, Chief, Legislative Division, Office of The Judge Advocate General.

Title 33—Navigation and Navigable Waters

CHAPTER I—COAST GUARD, DEPARTMENT OF TRANSPORTATION

SUBCHAPTER A—GENERAL

[CGD 73-40R]

PART 1—GENERAL PROVISIONS

SUBCHAPTER S—BOATING SAFETY

PART 177—ESPECIALLY HAZARDOUS CONDITIONS

Manifestly Unsafe Voyages

The purpose of this amendment is to provide each Coast Guard District Commander with the authority to designate a specific boat as being manifestly unsafe for a specific voyage on a specific body of water.

A notice of proposed rulemaking was published in the March 14, 1973 issue of the FEDERAL REGISTER (38 FR 6900) proposing to establish, in Part 177 of Title 33, Code of Federal Regulations, certain additional unsafe conditions under which a specific boat would be considered manifestly unsafe for a specific voyage. In the notice, these additional unsafe conditions were contained in § 177.07(f). In this amendment, § 177.07 (f) has been redesignated § 177.07(g).

The notice of proposed rulemaking also proposed to amend Part 1 of Title 33, Code of Federal Regulations, by adding a new paragraph, § 1.05–1(d), to the general rulemaking procedures prescribed in that part. The new paragraph would redelegate, from the Commandant to each Coast Guard District Commander, the authority to issue the regulations provided for by § 177.07(g).

On May 8, 1973, a public hearing was held at U.S. Coast Guard Headquarters in Washington, D.C. to receive the views of interested persons on the proposed regulations. In addition, written comments were received on the proposed regulations during the period March 14, 1973, to May 14, 1973. The Coast Guard has considered these oral and written comments in preparing the final rule.

Several comments stated that the Coast Guard has failed to demonstrate or show the need for the proposed rule; one comment pointing out that when proposing a rule, sec. 6(1) of the Federal Boat Safety Act of 1971 requires the Coast Guard to consider the extent to which the rule will contribute to boating safety. Based on search and rescue (SAR) case studies, the Coast Guard anticipates that approximately four manifestly unsafe voyages will be attempted each year. This number may seem relatively insignificant when compared to the much larger number of boating accidents that occur in other phases of recreational boating. However, the need for preventing manifestly unsafe voyages becomes evident when one considers the disproportionately large commitment of Coast Guard boating safety and SAR resources that inevitably takes place when the voyages occur. This enormous and protracted expenditure of resources can perhaps be best appreciated by examining a recent case in point: A 22 foot Grand Banks dory which was to be rowed and carried by current from Washington to Mexico and thence to Hawaii. The boat carried approximately 100 days provisions for the two man crew. The crew also carried an emergency position indicating radio beacon (EPIRB). After a series of difficulties involving swamping of the boat as sea and sickness of the crew, the dory departed the west coast for Hawaii. Five days out, one of the crew developed a kidney ailment and the EPIRB was activated. In response to the EPIRB, a Coast Guard cutter was dispatched to evacuate the stricken crewman. The remaining crewman continued on alone. Approximately two months later, the dory was sighted and hailed by a merchant vessel. Based on a report from this vessel, a Coast Guard cutter on ocean patrol began a search for the dory with negative results. Approximately one week later, another merchant vessel encountered the dory. The Coast Guard cutter (long since diverted from its primary mission of plane guard and navigation aid on commercial air lanes) continued its search in that area for another three days with negative results. Due to a low fuel state, the cutter was forced to terminate the search and head for home port. That same day an EPIRB signal was detected by the cutter which put about and began the search again. A SAR aircraft was launched and located the dory. The cutter was vectored to the dory which was taken aboard the cutter along with the crewman. The cutter then returned to Seattle.

This chain of events occurred over a period of more than seven months. During this time, almost constant attention and concern was shown by the Coast Guard in an attempt to discourage the voyage, and then when those efforts proved fruitless, to monitor the progress of the voyage and stand ready to provide SAR service. The level of attention and concern ranged from assistance and advice provided at the Coast Guard Station, LaPush, Washington, where the voyage originated, to continuous monitoring of the voyage at the Coast Guard Rescue Coordination Center in San Francisco, to a personal visit by the Commander of the Twelfth Coast Guard District in San Francisco.

Other manifestly unsafe voyages have involved small canoes and small inflatable boats in which the boat operator intended to cross huge expanses of open ocean, making voyages as far as to Japan. These manifestly unsafe voyages inevitably claim a disproportionately large share of the Coast Guard's boating safety and SAR resources. The Commander of the Twelfth Coast Guard District estimates that in the last year, his district has expended nearly 75,000 man hours in handling only four such manifestly unsafe voyages. The commitment of SAR resources is even more remarkable. In one case, SAR aircraft flew a total of 125 hours and searched more than 270,000 square miles of ocean in a period of only three days. The Coast Guard is concerned that these boating safety and SAR resources should be applied to other more pressing and universal needs of the boating community. In view of this, the Coast Guard asserts that there is a definite and reasonable need for a regulation that can prevent manifestly unsafe voyages which, by any reasonable standard of judgment, lack any chance of successful completion.

A number of comments stated that the proposed rule is an encroachment on the constitutional right of Americans to have free access to the high seas. Other comments stated that the rule will result in the Coast Guard issuing trip permits to all seaward bound boats. The Coast Guard feels that these comments indicate a misunderstanding of the purpose and intent of the proposed rule. First, it is patently impossible for the Coast Guard to use the proposed rule to scrutinize or inspect all seaward bound boats since the District Commander must personally implement the rule. Briefly stated, the proposed rule is intended to prevent the use of boats on voyages (for the most part, extended ocean crossings) for which they are manifestly unsafe because of clearly unsuitable design or configuration, or because of inadequate or improper construction, or because of inadequate or improper operational or safety equipment. The Coast Guard's concept of a manifestly unsafe voyage is perhaps best typified by a recent case in which an operator proposed to sail and paddle a 16 foot canoe across the Atlantic to Portugal. The purpose of the voyage was to focus attention on the financial needs of a senior citizens' home in the Midwest. The operator had admittedly very limited boating experience in open ocean waters. In fact, the operator had determined the suitability of the canoe for the intended voyage by sailing and testing it on an inland lake. This is the type of voyage which the Coast Guard intends to regulate through careful and selective application of the proposed rule. Except in these extreme and unusual circumstances, the Coast Guard would not use the rule to limit an individual's free access to the high seas.

In administering the rule, the Coast Guard expects from past experience that it will learn of most manifestly unsafe voyages through publicity in the news media. Such endeavors are generally given wide publicity precisely because of the bizarre and sensational aspects of the manifestly unsafe voyage. The Coast Guard would also expect to learn of these voyages through correspondence from concerned friends, relatives, and other interested parties. When and if the Coast Guard learns of such a doubtful voyage, the District Commander will conduct an investigation to determine if the unsafe conditions in § 177.07(g) do exist.

A large percentage of comments objected that the unsafe conditions in proposed § 177.07(g) are too vague and general in their wording. This will result, the comments stated, in arbitrary and purely subjective interpretations of the rule, which in turn, will result in arbitrary and inequitable enforcement. In this connection, several comments specifically objected that competence of the operator, as listed in the proposed rule, is a condition particularly difficult to judge and it should therefore be deleted. The Coast Guard recognizes that the language in the rule is general. However, the Coast Guard feels that this is necessary. No narrow class definition or description of the type of boats involved, or of the type of voyages, or of the multiplicity of other variables in design and equipment, is possible. It is precisely for this reason that interpretation and enforcement of the rule is limited to the Coast Guard District Commander (generally, a Rear Admiral or Vice Admiral) with the explicit restriction that this responsibility and authority cannot be delegated further. This means that the District Commander will be required to give the matter of manifestly unsafe voyages his personal attention and supervision. The Coast Guard believes that the District Commander's breadth of experience and mature judgment will prevent unreasonable and over-zealous enforcement of the rule. After careful consideration of the comments, however, the Coast Guard recognizes that while boat design, material condition, and equipment are sufficiently tangible conditions to be judged with some objectivity, the operators' competence is not. Because the quality and extent of the operator's training and experience are difficult to document or otherwise establish, and very difficult, therefore, for the District Commander to accurately judge, the condition of operator competency has been deleted from the final rule. With regard to the remaining conditions in § 177.07(g), it should be kept in mind that the District Commander will not be making fine hairline judgments, seeking to define some subtle nuance between what constitutes suitability of design or appropriate naval architecture. Rather, the District Commander will be looking for blatant, extreme, and manifest deficiences.

The written and oral comments, nevertheless, do reveal that the language of the notice preamble was not clear in some respects and that the wording of the unsafe conditions in § 177.07(g) might be clearer. First, the use of the word "unique" in the notice preamble (to describe the type of boat for which the rule is intended) caused some confusion and adverse reaction. One comment made at the public hearing quite correctly stated that a boat could be unique in that the innovation of its design or construction makes it safer and more seaworthy than any other boat of its type. This uniqueness is certainly not cause for termination of a voyage. The sense that should have been conveyed by the notice preamble is that one factor the Coast Guard would consider as unsafe would be the gross unsuitability of a boat for the type of voyage intended. In this regard, the Coast Guard believes that the intent of the rule could be better reflected in the language of § 177.07 (g) by adding qualifiers such as "manifest", "inadequate", "unsuitable", and "improper". The wording of § 177.07(g) is, therefore, revised accordingly.

Several comments objected that the proposed rule had no provision for the operator to appeal a District Commander's regulation issued under proposed § 1.05–1(d). The right to petition for the issuance, amendment, or repeal of a rule (including a particular and specific rule or regulation issued to and served on a named individual, as envisioned by § 1.05–1(d)) is guaranteed by the Administrative Procedure Act (Pub. L. 89–554). The Coast Guard recognizes, however, that the methods for filing and processing such petitions should be established in a procedural regulation. Two additional paragraphs have, therefore, been added to the proposed amendment to the procedural rules in Part 1 of Title 33, Code of Federal Regulations. The revised amendment to 33 CFR 1.05 will ensure that: (1) Each rule issued by a Coast Guard District Commander will contain clear notice that the person upon whom it is served has the right to petition for repeal of the rule; (2) The person on whom the rule is served knows how to submit the petition; and (3) The District Commander will either repeal the rule or provide prompt written notice of denial to the petitioner.

Several comments suggested that, rather than issue the proposed rule, the Coast Guard avoid the expenditure of boating safety and SAR resources by having the operator who is about to embark on a manifestly unsafe voyage sign a release or waiver. Under this scheme, the Coast Guard District Commander would first warn the operator of the potential hazards involved in the planned voyage and advise him of the unsafe conditions. If the operator still insists on making the voyage, the Coast Guard would then require the operator to sign a release which would exonerate the Coast Guard of all responsibility for his safety and for conduct of search and rescue. The Coast Guard considers that the waiver of release suggested in these comments has no legal validity. The responsibility for search and rescue and for safety of life on the high seas is charged to the Coast Guard by section 2 (Primary Duties) of Title 14 (Coast Guard), United States Code. The operator has no authority or power to release the Coast Guard from this responsibility.

Several written comments stated that the proposed amendment is necessary and should be adopted.

In consideration of the foregoing, Title 33 of the Code of Federal Regulations is amended as follows:

1. Part 1 is amended by adding new § 1.05 (d), (e), and (f) to read as follows:

§ 1.05–1 General.

* * * * * *

(d) Subject to the provisions of paragraphs (e) and (f) of this section, the Commandant redelegates to each Coast Guard District Commander, with the reservation that this authority shall not be further redelegated, the authority, under section 13 of the Federal Board Safety Act of 1971, to issue regulations applicable to a specific boat within his jurisdiction designating that boat unsafe for a specific voyage on a specific body of water when it is determined, under the provisions of § 177.07(g) of this chapter, that an unsafe condition exists.

(e) Each regulation issued by a Coast Guard District Commander under the provisions of paragraph (d) of this section shall contain—

(1) Notice that the person upon whom the rule is served has the right, under the Administrative Procedure Act (5 U.S.C. 553(e)), to petition for reconsideration and repeal of the rule;

(2) Full title and address of the Coast Guard District Commander to whom the petition is to be submitted; and

(3) Notice that the petition should contain—

(i) The text or substance of the rule which the petitioner seeks to have reconsidered and repealed;

(ii) A statement of the action sought by the petitioner;

(iii) Whatever arguments or data that are available to the petitioner to support the action sought; and

(iv) If the petitioner desires reconsideration and repeal of the rule before a specific date, the petition should so state and give reasons why action by that date is necessary.

(f) If a Coast Guard District Commander determines that a petition submitted under the provisions of paragraph (e) of this section contains adequate justification, he shall initiate prompt rulemaking action to repeal the rule. If the Coast Guard District Commander determines that repeal of the rule is not justified, he shall issue prompt written notice of denial to the petitioner.

((46 U.S.C. 1488), 49 CFR 1.46(o)(1), 49 CFR 1.45(b))

2. Part 177 is amended by adding a new § 177.07(g) to read as follows:

§ 177.07 Other unsafe conditions.

* * * * * *

(g) Designated manifestly unsafe for a specific voyage on a specific body of water due to:

(1) Unsuitable design or configuration, or

(2) Improper construction or inadequate material condition, or

(3) Improper or inadequate operational or safety equipment, and set forth

V 39 53 MAR 18 74 XUM

in a regulation issued by a District Commander under the authority of 33 CFR 1.05–1(d).

(Sec. 39, 85 Stat. 228; (46 U.S.C. 1488), 49 CFR 1.46(o)(1))

Effective date. This amendment shall be effective April 17, 1974.

Dated: March 8, 1974.

C. R. BENDER,
Admiral, U.S. Coast Guard,
Commandant.

Title 34—Government Management

CHAPTER II—OFFICE OF FEDERAL MANAGEMENT POLICY, GENERAL SERVICES ADMINISTRATION

SUBCHAPTER C—PROPERTY MANAGEMENT

PART 232—FEDERAL ENERGY CONSERVATION (FMC 74–1, SUPP. 1)

Federal Energy Conservation Policies

This document revises the Federal energy conservation policies and procedures to give agencies greater flexibility in assigning parking spaces to handicapped employees and in achieving the prescribed lighting standards. These revisions are being made as a result of comments from various Federal agencies and private groups.

APPENDIX B—FEDERAL EMPLOYEE PARKING

. . . . . .

4. *Agency plans and procedures.*

. . . . . .

b. The agency parking arrangements will provide that on or before March 9, 1974, not more than 10 percent of the parking spaces available for employee parking at Federal agencies may be assigned to executive personnel and persons who are assigned unusual hours. Assignment of the remaining parking spaces for employee parking will be based on the number of persons in a carpool. Where practical, the 10/90 ratio will be accomplished at each Federal facility. Parking spaces assigned on the basis of a severe physical handicap shall not be considered part of employee parking for purposes of achieving the 10/90 ratio. Each agency will give full credit, for the purpose of allocation of parking spaces for carpools, to any full time carpool member regardless of the employer, except that at least one member must be a full time employee of the agency. In those instances where there are insufficient parking facilities to meet the needs of all carpools, ties will be resolved in accordance with criteria to be published by the Administrator of General Services. Areas within parking facilities will be reserved for the use of two-wheeled vehicles with special consideration being given to bicycles. The amount of space allocated for this purpose will be reevaluated every six months.

c. To facilitate the formation of carpools, the Administrator of General Services, with the cooperation of the agencies involved, will provide assistance through the use of such aids as computerized carpool matching, carpool boards, etc. He will also develop reciprocal agreements with private sector employers through State or local government agencies or other organizations operating computer-aided carpool matching programs for the public and/or private sectors.

5. *Responsibilities.* All agencies will reassign parking spaces to Federal employees in accordance with the policies contained in this appendix on or before March 7, 1974.

6. *Exceptions.* Exceptions to the policies set forth in this appendix must be submitted by the head of the agency to the Administrator of GSA who will recommend approval or disapproval to the Administrator, Federal Energy Office.

. . . . . .

APPENDIX C—HEATING, COOLING, AND LIGHTING OF BUILDINGS

. . . . . .

4. *Policies and procedures.*

a. *Lighting.* Energy consumed for lighting shall be reduced by removing nonessential lamps and fixtures and by applying nonuniform lighting standards to existing lighting systems.

(1) *Working hours.* During working hours, overhead lighting will be reduced to 50 foot candles at work stations, 30 foot candles in work areas, and 10 (but not less than 1) foot candles in nonworking areas. Reductions in overhead lighting shall be accomplished with minimum practicable deviation from the specified levels. These standards will be maintained in all space except where "heat of light" technology is utilized. Where the "heat of light" technology is used, the savings to be achieved by decreasing the lighting shall be compared to the costs to be incurred for increased use of heating energy before a determination regarding delamping is made.

. . . . . .

(Federal Energy Office memorandum dated January 17, 1974, and Executive Order 11717 (38 FR 12315, May 11, 1973))

Effective date. This regulation is effective when issued.

Dated: March 12, 1974

ARTHUR F. SAMPSON,
Administrator of General Services.

[FR Doc.74–6244 Filed 3–15–74;8:45 am]

Title 39—Postal Service

CHAPTER I—U.S. POSTAL SERVICE

PART 164—INDEMNITY CLAIMS

Filing Insured (Including C.O.D.) Mail Claims

This doucment constitutes a complete revision of the regulations of the Postal Service on insured (including C.O.D.) mail claims, presently found in §§ 164.1–164.5 of Title 39, Code of Federal Regulations.

The principal changes are as follows: In § 164.1 paragraph (a) is amended to allow only the mailer to file a claim for complete loss; paragraph (c) is amended to allow a mailer to file a claim for loss 15 days after the date of mailing, instead of the existing 30 days, except for APO and FPO surface mailings; and a new paragraph (f) is added listing payable and nonpayable claims.

Minor and technical changes are also made to §§ 164.2–164.5. However, these sections constitute directions to postal employees concerning the filling out and disposition of claim forms, plus other postal responsibilities, and need not be described here. All changes are effective immediately.

(39 U.S.C. 401)

ROGER P. CRAIG,
Deputy General Counsel.

Accordingly, §§ 164.1–164.5 of Part 164 of Title 39, Code of Federal Regulations, are revised to read as follows:

Sec.
164.1 General instructions on filing an insured (including C.O.D.) mail claim.
164.2 Preparation of insured and C.O.D. mail claims.
164.3 Disposition of the damaged article.
164.4 Disposition of the claim.
164.5 Additional post office responsibilities.

§ 164.1 General instructions on filing an insured (including C.O.D.) mail claim.

(a) *Who may file.* (1) A claim for complete loss (including c.o.d.) may be filed only by the mailer.

(2) A claim for partial loss (including c.o.d.) may be filed by the mailer or addressee.

(3) A claim for damage (including c.o.d.) may be filed either by the mailer or addressee.

(b) *How to file*—(1) *Domestic claims.* A customer may file a claim at any post office, classified branch, or station. Form 3812, Request for Payment of Domestic Postal Insurance, dated Nov. 1971 or later, is used to request payment for the loss or damage of insured mail. The form is a four-part snap-out set which includes two copies of Form 1510–A, Inquiry for the Loss or Rifling of Mail Matter, and one copy of Form 3841, Post Office Record of Claim. DO NOT COMPLETE A SEPARATE FORM 1510 or FORM 3841 FOR INSURED OR C.O.D. CLAIMS.

(2) *International claims.* Claims for international insured mail are to be handled in accordance with Chapter 7, Postal Service Publication 42—International Mail.

(c) *When to file*—(1) *Loss Claims.* Mailer may not file a claim for loss until 15 days after the date of mailing. EXCEPTION: UNTIL 75 DAYS FOR APO and FPO SURFACE MAILINGS.

(2) *Damage Claims.* Customers should file damage or partial loss claims immediately.

(3) *Insurance (including C.O.D.) Claims.* Indemnity claims must be filed within one year from the date the article was mailed.

(d) *Information required*—(1) *Evidence of Insurance.* The customer must submit evidence that the package was insured. Acceptable evidence includes either:

(i) The original insurance receipt issued at time of mailing. Post offices may annotate the appropriate line(s) in firm mailing books Claim filed on (date), and submit a photocopy with the claim form.

(ii) The wrapper, if it has the name and address of both the mailer and the addressee and the appropriate insurance endorsement.

(2) *Evidence of value.* The customer (including Government agencies which have insured official mail) must submit evidence of value. The Postal Service will not undertake to obtain estimates of value. Acceptable evidence may include any one of the following:

(i) Sales receipt.

(ii) Invoice.

(iii) Statement of value from a reputable dealer.

(iv) Catalog value of a similar article.

(v) Statement describing the articles lost or damaged, including where purchased, date, amount, and whether the articles were new or used. If handmade, price of material used and labor. Describe the items in sufficient detail for the postal data center to determine that the value claimed is not excessive.

(vi) Paid repair bills, estimate of repair cost, or appraisals may be used in lieu of estimate of value in the case of claims for partial damage. When a question exists whether cost of repair exceeds actual value, other evidence of value may be required.

(3) *Replacement shipments.* If a replacement shipment has been sent to a customer to replace original article(s) lost, indicate Replacement Shipment on claim (Form 3812) and obtain a copy of the invoice evidencing the replacement and attach to claim form.

(e) *Assignment of responsibilities.* (1) Post offices, classified stations and branches will:

(i) Accept claims when evidence of insurance, statement of value (including proper documentation), and required signatures are furnished.

(ii) Assist customers in preparation of Form 3812.

(iii) Complete post office portion of Forms 3812.

(iv) Route completed Forms 3812 in accordance with § 164.4.

(2) The St. Louis Postal Data Center will adjudicate and pay or disallow all domestic insured and c.o.d. mail claims.

(f) *Payable and nonpayable claims.* (1) Subject to paragraph (f)(2) of this section, insurance for loss or damage to registered, insured or c.o.d. mail within the amount covered by the fee paid is payable for:

(i) Actual value of lost articles, less depreciation for used items.

(ii) Cost of repairing a damaged article or replacing a totally damaged article, not exceeding actual value of the article.

(iii) A c.o.d. parcel for which no remittance has been received by the mailer.

(iv) Death of baby poultry due to physical damage to the package or delay for which the Postal Service is responsible. In the absence of definite evidence showing responsibility for death of baby poultry, the Postal Service will be presumed to be at fault if 10 percent or more are dead on delivery, and indemnity will be paid for all dead poultry; otherwise the Postal Service will not be presumed to be at fault (see paragraph (f)(2)(v) of this section and § 124.3(c)) of this chapter.

(v) Costs incurred in duplicating or obtaining documents, or their original cost if they cannot be duplicated. The fee paid to an attorney to obtain duplication of valuable papers and other actual, direct and necessary expenses may be included.

(vi) The extra cost of gift wrapping if the gift wrapped article was enclosed in another container for handling in the mail.

(vii) Cost of outer container if specially designed and constructed for goods sent as registered, insured, or c.o.d. mail.

(viii) The established market value, as determined by a recognized dealer selected by the claimant, of numismatic coins or stamps having philatelic value.

(ix) Federal, State or city sales tax paid on articles which are lost or totally damaged.

(x) Postage (not fee) paid for sending damaged articles for repair. The Postal Service must be used for this purpose. Other reasonable transportation charges may be included if postal service is not available.

(2) Nonpayable Claims. Payment will not be made in excess of the actual value of the article or in excess of the maximum amount covered by the fee paid. Further examples where indemnity may not be paid are as follows:

(i) The article was not rightfully in the mail. This includes c.o.d. articles sent to addressees without their consent for purposes of sale or on approval.

(ii) Claim is filed more than one year from the date the article was mailed.

(iii) Evidence of insurance coverage has not been presented.

(iv) The mailer failed to state at time of mailing the full value of a registered article (see § 161.2(d) of this chapter).

(v) Loss, rifling, or damage occurred after delivery by the Postal Service.

(vi) Claim is based on sentimental loss rather than actual value.

(vii) The loss resulted from delay of the mail, except as in paragraph (f)(1)(iv) of this section.

(viii) The claim is for consequential loss rather than for the article itself.

(ix) Contents froze, melted, spoiled or deteriorated.

(x) The parcel was packaged in such a way that it would not have reached the addressee in good condition in the ordinary course of the mail.

(xi) The damage consisted of abrasion, scarring, or scraping of suitcases, handbags, and similar articles which were not properly wrapped for protection.

(xii) The death of baby poultry was due to shipment to points where delivery could not be made within 72 hours from the time of hatch.

(xiii) Death of honeybees and harmless live animals which was not the fault of the Postal Service (see § 124.3(c)(2) of this chapter).

(xiv) Failure on the part of the second party (the addressee if claim is filed by the mailer, or the mailer if the claim is filed by the addressee) to cooperate in the completion of the claim.

(g) *Used article(s) lost or damaged.* The St. Louis Postal Data Center depreciates used articles lost or damaged based on the following:

(1) Used articles with a life expectancy of ten (10) years are depreciated at ten percent (10%) per year.

(2) Used articles with a life expectancy of twenty (20) years are depreciated at five percent (5%) per year.

§ 164.2 Preparation of insured and C.O.D. mail claims.

(a) The accepting postal employee will enter a nine-digit claim number (see § 164.4(b)(1)), and complete items 1 through 10 on Form 3812. Type or print legibly with a ballpoint pen.

Press hard.

Item 1. Check appropriate block indicating reason for claim. If claim is for Complete Loss of Contents add: *CONT* after the block for Complete Loss. *No. c.o.d.* remittance claims should be initiated as Complete Loss.

Item 2. Indicate use of airmail, if applicable.

Item 3. Check the appropriate block to indicate category of the claim.

Item 4. Indicate special delivery service, if applicable.

Item 5. Enter city, State and ZIP Code of mailing post office (not necessarily the post office where the claim is being filed). If the package was mailed at a station or branch, use the appropriate ZIP Code.

Item 6. Enter the date the package was mailed.

Item 7. Enter the date the claim is being filed.

Item 8. Enter city, State and ZIP Code of post office of address.

Item 9. Enter amount of postage paid, including special fees such as special delivery or special handling.

Item 10. Enter amount of insurance fee paid.

(b) Assist the claimant in completing items 11 through 14 and items 17, 18 or 19 of Form 3812 to the extent possible as follows:

Items 11 and 12. Names and addresses of mailer and addressee. The mailer should indicate the payee by checking the payee block in either item 11 or 12. The name of the payee indicated in items 11 or 12 must agree with the payee shown in the Mail Check To portion of the identification slip.

Item 13. Describe the articles lost or damaged; indicate the purchase price, the approximate year of purchase, whether the article was new or used, or the price of materials used and labor, if handmade. Describe the items in sufficient detail for the postal data center to determine that the value claimed is not excessive. Attach a supplementary sheet of paper to the claim form if necessary.

Item 14. Enter the total amount claimed excluding postage.

Item 15. MUST BE COMPLETED BY ADDRESSEE ONLY.

Item 16. Complete for COD mailings only.

Item 17. Complete if package was commercially insured. Include policy number, name and address of insurance company and amount of deductible, if appropriate.

Item 18. Have the mailer sign, date, and enter his telephone number in appropriate block. If the claim is being filed by a business firm, the firm name should be entered in the signature block and the firm's representative should sign the block labeled *BY*.

Item 19. Have the addressee sign, date, and enter his telephone number in appropriate block. If the claim is being filed by a business firm, the firm name should be entered in the signature block and the firm's representative should sign the block labeled *BY*.

(c) The accepting postal employee will complete items 20, 21 and 22 (if applicable) of Form 3812.

V 39 53 MAR 18 74 XUM

Item 20. Date stamp and initial.

Item 21. Check the appropriate block to indicate evidence of insurance. Endorse the insurance receipt and wrapper *Claim Filed,* date stamp and initial it. Return it to the customer and instruct him to keep it until the claim is settled.

Item 22. Location of the damaged article:

(1) If the customer has possession of the damaged article, he must display it to the accepting postal employee to verify actual damage.

(2) If the claim is for partial damage, check the appropriate block to indicate that the customer will retain possession of the article.

NOTE: Under no circumstances should the accepting postal employee arrange to have the article repaired.

(3) If the claim is for total damage, disposition of the article will be at the option of the Postal Service. If the totally damaged article will have little or no salvage value, the article may be returned to the customer if he so desires. If the totally damaged article will have salvage value, dispose of it in accordance with § 164.3.

(d) Enter the following information on lower portion of Form 3812, Postal Insurance Claim Identification.

Mailer's name and address.
Addressee's name and address.
Other identification (invoice numbers, etc.).
Name and address of payee as designated by claimant.

(e) Review the claim form before the claimant leaves the post office to assure that:

(1) The mailer has designated the payee; (Exception: See § 164.4(c)(3)(ii)) signed the claim form; and completed the postal insurance claim identification portion of the form; and

(2) All necessary available supporting documents (bill of sale, invoice, repair bill or estimate of repairs) are attached to the back of claim form.

(f) For loss of numbered insured and c.o.d. parcels, check the post office records for parcels returned to the matter and check parcels on hand, awaiting return.

§ 164.3 Disposition of the damaged article.

(a) For a totally damaged article that will have little or no salvage value, such as smashed glassware, allow the customer to retain the article if he so desires, otherwise destroy it. If the totally damaged article will have salvage value retain it for 60 days then forward it to your dead parcel post branch on the next weekly dispatch. Use Form 3831 Receipt for Article(s) Damaged in Mails. If customer's claim is denied, article is to be returned upon request.

(b) For partially damaged articles, return the article to the customer.

§ 164.4 Disposition of the claim.

(a) The accepting clerk should forward the partially completed claim form, with the available supporting documentation attached to:

(1) The claims and inquiry section, if one exists, or

(2) The employee within the post office who has been designated to handle insurance claims.

(b) Final preparation of the claim form at the accepting post office (except APO/FPO claims and Canal Zone claims—See § 164.4(d)) is completed as follows:

(1) The claim number is composed of the six digit post office finance number and a three digit sequential number beginning with 001 and continuing through 999. When the total of claims initiated reaches 999, begin again with 001.

(2) *Forward to block:* Check the appropriate box to indicate to whom the claim form will be forwarded.

(3) Detach and file copy 4 of the claim form set (Form 3841, Post Office Record of Claims) alphabetically by mailer's name.

(4) See § 164.5(c) for disposition of Form 1510–A's.

(5) Select the appropriate form letter of instructions and attach it to the front of the claim form set as follows:

(i) Loss Claim Filed by Mailer, Form Letter 3861.

(ii) Damage Claim Filed by Mailer, Form Letter 3862.

(iii) Damage Claim Filed by Addressee, Form Letter 3863.

(6) Prepare a pre-addressed penalty reply envelope as follows:

Postal Data Center
P.O. Box 14677
St. Louis, MO 63181

Attach the envelope to the claim form set.

(c) Send the claim form set with the appropriate form letter indicating items to be completed and pre-addressed postal data center envelope as follows:

(1) Loss or c.o.d.—to the addressee.

(2) Damage claim—to the second customer (either mailer or addressee). See exceptions in paragraph (c)(3) of this section.

(3) Exceptional damage claims.

(i) If the claimant has possession of the damaged article and submits proof that it was received by the addressee in a damaged condition, or that it was returned from the office of address as undeliverable, do not send the claim form to the addressee. Forward it directly to the St. Louis Postal Data Center for payment.

(ii) If repairs to a partially damaged article have been paid for by the addressee, forward the claim directly to the St. Louis Postal Data Center without the statement or signature of the mailer, provided you can determine from the insurance endorsement on the wrapper that the insurance fee paid was sufficient to have purchased insurance to cover the cost of repairs. Otherwise forward to the mailer for his evidence of insurance in accordance with paragraphs (b)(5)(iii) and (c)(2) of this section.

(d) When preparing and forwarding APO/FPO and Canal Zone Claims:

(1) Determine whether or not the mailer is still in an overseas area. Frequently APO/FPO and Canal Zone claims can be settled locally without contacting the port post office and the claim form set can be forwarded directly to the St. Louis Postal Data Center.

(2) If the claim cannot be settled locally, prepare the claim form set as you would for ordinary domestic claims except do not enter a claim number and do not detach copy 4 (Form 3841). You may, however, make a copy of the 3841 for your records.

(3) Select and attach the appropriate form letter and forward as follows:

(i) Overseas Military Mail—to the postmaster at the port post office identified in the mailer's or addressee's address.

(A) Postmaster San Francisco, CA 94101.

(B) Postmaster New York, NY 10001.

(ii) Canal Zone Mail—to the Postmaster, New Orleans, LA 70113.

(e) Port post office responsibilities are:

(1) Upon receipt of an APO/FPO or Canal Zone claim initiated by another post office, take the following action:

(i) Enter your own claim number.

(ii) Detach and file copy 4 (Form 3841) of the claim form set.

(iii) Forward the claim form set on to the next contact point.

(2) When the claim form set is returned to your office:

(i) Annotate the Form 3841 appropriately.

(ii) Forward the claim form set to the St. Louis Postal Data Center for adjudication and payment.

§ 164.5 Additional Post Office responsibilities.

(a) *General assistance to customers.* (1) Completion of a claim form initiated at another post office.

If a customer comes into your office with any one of the form letters mentioned in § 164.4(b)(5) and a partially completed Form 3812, comply with the following procedures:

(i) Read carefully the form letter which transmitted directions to the customer.

(ii) Assist the customer in completing his portion of the Form 3812 in accordance with the directions in the form letter.

(iii) Place the completed Form 3812 and all other material which the customer has received into the pre-addressed postal data center envelope and mail.

(2) *Verification of Insurance Receipt.* When the addressee has filed a damage claim and the amount of indemnity claimed exceeds $50, the mailer must present his insurance receipt for verification at any post office, classified station, or branch. Accept the insurance receipt, the partially completed Form 3812, and the form letter of instructions from the mailer. Comply with the following procedures:

(i) Read carefully the form letter which transmitted directions to the customer.

(ii) Complete items 9 and 10 on Form 3812.

(iii) Assist the customer in completing his portion of the Form 3812 in accordance with the directions in the form letter.

(iv) Endorse the insurance receipt *Claim Filed,* date stamp and initial it. Return the receipt to the customer and instruct him to keep it until the claim is settled.

(v) Place the completed Form 3812 and all other material which the customer has received into the pre-addressed postal data center envelope and mail.

(b) *Inquiries and duplicate claims.* (1) Provided at least 30 days (75 days for surface APO/FPO and Canal Zone mail) has elapsed since the claim was initiated, the initiating post office will prepare and process a duplicate claim as follows:

(i) Use the information on the original Form 3841 to complete as much of the duplicate Form 3812 as possible. Enter the same claim number that appeared on the original Form 3812. Obtain the signature of the customer who initiated the claim and a statement that the parcel has not been returned nor payment received. For loss of numbered insured and c.o.d. parcels, check the post office record of parcels returned to the mailer and check parcels on-hand awaiting return.

(ii) Mark the top of the Form 3812 Duplicate.

(iii) Annotate the original Form 3841 to indicate that a duplicate claim has been initiated. Do not detach the Forms 1510–A or 3841 from the duplicate claim form set.

(iv) Complete Form Letter 3866, Duplicate Insurance Claim, and attach it to the front of the claim form set.

(v) Forward the entire package to the post office which serves the second customer.

(2) Upon receipt of a duplicate claim form set, the post office which serves the second customer will within 5 days:

(i) For loss of numbered insured and c.o.d. claims: Verify delivery records, make a positive effort to contact the addressee to verify delivery or nondelivery (phone call is acceptable). Check post office records of parcels returned to the mailer. Annotate the findings in item 23 of Form 3812, detach Form 3841 and file, and send claim to the St. Louis Postal Data Center, P.O. Box 14677, St. Louis, MO 63181 for adjudication.

(ii) For Damage and Unnumbered Loss Claims: Forward entire claim file to the second customer using the appropriate form letter (Form 3861—Loss Claim Field by Mailer, Form 3862—Damage Claim Filed by Mailer, or Form 3863—Damage Claim Filed by Addressee). Include a penalty envelope preaddressed to the postal data center at the address in paragraph (b)(2)(i) of this section.

(c) *Verification of delivery.* (1) Verification of delivery record will be made on numbered insured and c.o.d. claims (exception—APO/FPO, unnumbered loss, damage and duplicate claims) by the following method:

(i) Detach the first copy of Form 1510–A, Inquiry for the Loss or Rifling of Mail Matter, from the claim set Form 3812, Request for Payment of Domestic Postal Insurance; write at top of form. Please verify delivery, affix the office dating stamp and mail it to the postmaster at the office of address.

(ii) Mail the remainder of the claim set to the addressee as prescribed in § 164.4(c)(1).

(d) *Action by postmaster.* Upon receipt of a Form 1510–A from the accepting postmaster, postmasters at the office of address will within 5 days:

(1) Check delivery record, Form 3849, Notice of Mail Arrival or Attempted Delivery, or Form 3883, Firm Delivery Book, to ascertain whether or not the article was delivered. When c.o.d. claims are received, search the tag file; if no record is found, search the file of Forms 3814 at main office or station or branch involved.

(i) If there is no record of delivery, annotate the right hand blank portion of the Form 1510–A No Record, initial, affix the office dating stamp, and mail the Form 1510–A to the data center at the address in paragraph (d)(2) of this section.

(ii) If there is a record of delivery, affix the office dating stamp, write the date of delivery and indicate any unusual delivery conditions on the right hand blank portion of the Form 1510–A. For c.o.d.'s write the date of delivery, indicate any unusual delivery conditions, and furnish the money order number(s).

(iii) If the parcel (insured or c.o.d.) was returned to sender or refused, so indicate on the right side blank portion of the Form 1510–A, affix the office dating stamp and return it to the accepting postmaster for verification of return. The accepting postmaster is then to indicate whether or not he has a record of return also on the right side blank portion of Form 1510–A. Provide the date returned, initial, affix the office dating stamp, and mail it to the address in paragraph (d)(2) of this section.

(2) Batch and return Forms 1510–A daily to the address below:

Director, Postal Data Center
PO. Box 14677
St. Louis, MO 63181

The Postal Data Center, St. Louis, will retain the Form 3812 claim set or 1510–A, whichever arrives first, until the two can be matched and adjudication accomplished.

(e) *APO/FPO, unnumbered loss, damage and duplicate claims.* (1) APO/FPO Claims (Numbered Insured Loss) will be sent to the respective port post office with Forms 1510–A and 3841 attached.

(2) Unnumbered loss and damage claims will be sent directly to the addressee with both copies of 1510–A attached.

(3) Duplicate claims will be sent to the addressee post office with Forms 1510–A and 3841 attached.

Title 41—Public Contracts and Property Management

CHAPTER 9—ATOMIC ENERGY COMMISSION

[AECPR Temporary Reg. 5]

PART 9–1—GENERAL

PART 9–4—SPECIAL TYPES AND METHODS OF PROCUREMENT

Selection and Award of Architect-Engineer Contracts

MARCH 11, 1974.

1. *Purpose.* This regulation implements Pub. L. 92–582 and FPR 1–1.1003–3, 1–1003–7, and 1–4.10 concerning the procurement of Architect-Engineer Contracts.

2. *Effective date.* This regulation is effective on March 18, 1974.

3. *Expiration date.* This regulation will remain in effect until cancelled and replaced by a permanent AEC Procurement Regulation.

4. *Explanation of changes.* a. Add new Subpart 9–1.10, Publicizing Procurement Actions:

Subpart 9–1.10—Publicizing Procurement Actions

Sec.
9–1.1000 General.
9–1.1003–3 Special areas of negotiation.
9–1.1003–7 Preparation and transmittal.

AUTHORITY: Sec. 161, Atomic Energy Act of 1954, as amended, 68 Stat. (42 U.S.C. 2201); Sec. 205, Federal Property and Administrative Services Act of 1949, as amended, 63 Stat. 390 (40 U.S.C. 486).

Subpart 9–1.10—Publicizing Procurement Actions

§ 9–1.1000 General.

§ 9–1.1003–3 Special areas of negotiation.

(a) [Reserved]
(b) [Reserved]
(c) Architect-engineer and related services contracts over $10,000. For each contract expected to exceed $10,000, a notice of intention to contract for architect-engineer services shall be published in the Commerce Business Daily, Synopsis of U.S. Government Proposed Procurement, Sales and Contract Awards.
(d) Architect-engineer and related services contracts of $10,000 or under. For each contract expected to cost $10,000 or less, a notice of intention to contract for architect-engineer services may be published in the Commerce Business Daily. In the alternative, the notice shall be publicly displayed at the procuring office and shall be published in at least one daily newspaper circulated in the local area. Written notification to affected professional societies in the area of project consideration should also be made.

§ 9–1.1003–7 Preparation and transmittal.

(a) [Reserved]
(b) [Reserved]
(1)–(8) [Reserved]
(9) *Architect-engineer services project notice.* Each notice publicizing procurement of architectural and/or engineering

V 39 R 53 MAR 18 74 XUM

services shall be headed "R Architect-Engineer Services." The project shall be listed with a brief statement concerning its location, scope of service required, and, where applicable, the estimated related construction cost, type of contract proposed and the estimated start and completion dates. Appropriate statements shall be made concerning any specialized qualifications, security classifications, and limitations on eligibility for consideration. Qualifications or performance data required from architect-engineer firms shall be described. This data shall be followed by statements similar to the following:

Architect-engineer firms which meet requirements described in this announcement are invited to submit a complete Standard Form 251, U.S. Government Architect-Engineer Questionnaire, to the procurement office shown below. Firms having a current Standard Form 251 already on file with this procurement office and those responding to this announcement before ---------- will be considered for selection, subject to any limitations indicated with respect to size and geographic location of firm, specialized technical expertise or other requirements. Following an initial evaluation of the qualifications and performance data described on the Standard Form 251 discussions will be held with the most highly qualified to provide the services required. The selection of the contractor for negotiation and award of this contract will be based on the evaluation criteria contained in AECPR 9-4.1004-2. This is not a request for a proposal. See also Numbered Note 63 on annual statements.

The name of the responsible procuerment office shall then be shown complete with the full address and telephone number. The numbered note will appear in each issue of the Commerce Business Daily as follows:

63. Procurement of architectural and/or engineering services shall be made by negotiation. Selection of architect-engineer firms for negotiation shall be based on demonstrated competence, qualifications necessary for the satisfactory performance of the type of professional services required and any other requirements set forth by the individual procurement agency. Firms desiring automatic consideration for all future projects administered by the procurement office (subject to specific requirements for individual projects) are encouraged to submit annually a statement of qualifications and performance data, utilizing Standard Form 251, U.S. Government Architect-Engineer Questionnaire.

b. Add new Subpart 9-4.10, Architect-Engineer Services:

Subpart 9-4.10—Architect-Engineer Services

Sec.

9-4.1000 Scope of subpart.
9-4.1001 General policy.
9-4.1002 Definitions.
9-4.1003 Public Announcements.
9-4.1004 Selection.
9-4.1004-1 Establishment of architect-engineer evaluation boards.
9-4.1004-2 Evaluation criteria.
9-4.1004-3 Collection of data on architect-engineer firms.
9-4.1004-4 Evaluation of qualifications and performance data.
9-4.1004-5 Conducting discussions.
9-4.1004-6 Use of requests for proposals.
9-4.1004-7 Selection of most highly qualified firm for negotiations.
9-4.1004-8 Late proposals.
9-4.1005 Negotiation procedures.
9-4.1005-1 Conduct of negotiations.
9-4.1005-2 Independent Government estimate.
9-4.1005-3 Architect-engineer's price proposal.
9-4.1005-4 Contract price.
9-4.1005-5 Record of negotiation.
9-4.1005-6 Exemption from limitations on fee for architect-engineer.
9-4.1006 Limitation on contracting with architect-engineer firms for construction work.
9-4.1007 Small business.

AUTHORITY: Sec. 161, Atomic Energy Act of 1954, as amended, 68 Stat. 948 (42 U.S.C. 2201); sec. 205, Federal Property and Administrative Services Act of 1949, as amended, 63 Stat. 390 (40 U.S.C. 486).

Subpart 9-4.10—Architect-Engineer Services

§ 9-4.1000 Scope of subpart.

This subpart contains the policies and procedures of the AEC for the procurement of professional architect-engineer services, either individually or together, by contract. The requirements of this subpart do not apply to the procurement of professional architect-engineer services by AEC contractors.

§ 9-4.1001 General policy.

Pursuant to Pub. L. 92-582 dated October 27, 1972, which amended the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 471, et seq.), it is the policy of the AEC to publicly announce all requirements for architect-engineer services, and to negotiate contracts for architect-engineer services on the basis of demonstrated competence and qualification for the type of professional services required and at fair and reasonable prices.

§ 9-4.1002 Definitions.

(a) "Firm" means any individual, firm, partnership, corporation, association, or other legal entity permitted by law to practice the professions of architecture or engineering.

(b) "Architect-engineer services" are those professional services of an architectural or engineering nature as well as incidental services that members of these professions and those in their employ may logically or justifiably perform.

(c) The term "discussions" includes telephone conversations, exchange of correspondence, or interviews.

§ 9-4.1003 Public announcements.

To ensure the broadest publicity concerning the AEC's interest in obtaining architect-engineer services, a notice of intention to contract for architect-engineer services shall be prepared and published for each procurement of architect-engineer services, in accordance with the requirements of AECPR 9-1.1003 (c) and (d) and 9-1.1003-7(b)(9).

§ 9-4.1004 Selection.

§ 9-4.1004-1 Establishment of architect-engineer evaluation boards.

Architect-engineer evaluation boards will be used for the selection of professional architect-engineer services when either the estimated cost of the contract is $50,000 or more, or the related construction cost for the project requiring the architect-engineer services is $500,000 or more. Except as provided by this subpart, the use of architect-engineer evaluation boards shall be governed by the general policies and procedures contained in AECPR 9-56, and the internal AEC management directives concerning the selection of contractors by board process.

§ 9-4.1004-2 Evaluation criteria.

Contracting officers or architect-engineer evaluation boards shall apply the following evaluation criteria contained in this subsection, and any special criteria developed for individual selections:

(a) General qualifications, including:

(1) Reputation and standing of the firm and its principal members;

(2) Experience and technical competence of the firm in comparable work;

(3) Past record in performing work for the AEC, other Government agencies, and private industry, including performance from the standpoint of cost and the nature, extent, and effectiveness of contractor's cost reduction program; quality of work; and ability to meet schedules (where applicable);

(4) The volume of past and present workloads;

(5) Interest of company management in the project and expected participation and contribution of top officials;

(6) Adequacy of central or branch office facilities for the proposed work, including facilities for any special services that may be required;

(7) Adequacy of the firm's accounting system;

(8) Geographic location of the home office and familiarity with the locality in which the project is located; and

(9) Willingness to grant the Government principal or exclusive rights in resulting inventions.

(b) Personnel and organization.

(1) Specific experience and qualifications of personnel proposed for assignment to the project, including, as required for various phases of the work, (i) technical skills and abilities in planning, organizing, executing, and controlling; (ii) abilities in overall project coordination and management; and (iii) experience in working together as a team;

(2) Proposed project organization, delegations of responsibility, and assignments of authority;

(3) Availability of additional competent, regular employees for support of the project and the depth and size of the organization so that any necessary expansion or acceleration could be handled adequately;

(4) Experience and qualifications of proposed consultants and subcontractors; and

(5) Ability to assign an adequate number of qualified key personnel from its own organization, including a competent supervising representative.

(c) The policies contained in AECPR 9-56.405 concerning distribution of work and the selection of firms which are compatible with the size and complexity of the job requirements.

§ 9-4.1004-3 Collection of data on architect-engineer firms.

AEC offices that regularly procure architect-engineer services shall collect and maintain current qualifications and performance data files on architect-engineer firms, including information on the qualifications of their members and key employees and past experience on various types of construction projects. Normally, Standard Form 251, U.S. Government Architect-Engineer Questionnaire, supported by required photographs shall be used for this purpose. Information from other sources, such as appraisals of performance on previous projects awarded to the firm, may also be included in the files.

§ 9-4.1004-4 Evaluation of qualifications and performance data.

After the notice of intention to contract for architect-engineer services has been published and the date for submission of new or current Standard Form 251 has passed, the contracting officer or the evaluation board shall review and evaluate the current Standard Form 251s and other current qualifications and performance data on file, including any Standard Form 251s that were submitted in response to the public announcement. Based on this initial evaluation, no less than three firms shall be selected for the purpose of holding discussions. It is not necessary to hold discussions with any firm that submits a Standard Form 251 in direct response to the public announcement. It is only necessary to review the Standard Form 251s already on file and any new forms that are submitted, and select three or more firms for discussions. The firms selected may or may not be the firms that responded to the public announcement.

§ 9-4.1004-5 Conducting discussions.

After three or more firms have been selected in accordance with § 9-4.1004-4, discussions shall be held with these firms regarding anticipated concepts and the relative utility of alternative methods of approach for furnishing the required services. These discussions should also be used to obtain additional qualification and performance data, and other information that may be needed to properly apply the selection criteria nd to adequately evaluate the firms under consideration. For example, the present workload and avilability of senior staff personnel are often decisive factors that affect the ranking of architect-engineer firms with respect to a specific project, but this information is not available from the Standard Form 251. Also in the case of the more complex and sophisticated construction projects, e.g., nuclear reactors, accelerators, and research, development and production facilities, it is necessary for the AEC to obtain and evaluate very detailed performance data and information on the specialized capabilities of a firm which are not adequately covered on the Stndard Form 251. However, firms normally should not be requested to submit preliminary designs, plans and drawings, except in unique situations involving prestige projects.

§ 9-4.1004-6 Use of requests for proposals.

(a) Requests for proposals may not be used as a means of obtaining an initial expression of interest in obtaining a particular contract. Firms indicate their initial interest by either submitting the Standard Form 251 on annual basis or in response to the public announcement for a particular project. Requests for proposals may be used as a means of initiating the discussion phase of the architect-engineer selection process required by §§ 9-4.1004-4 and 9-4.1004-5. This may be particularly appropriate for the larger or more complex projects where sufficient qualification and performance data are not available from the Standard Form 251, and additional information is needed to properly apply the selectoin criteria and evaluate and rank the firms.

(b) Requests for proposals should not request firms to submit price proposals. Requests for proposals can only be used to obtain information that will enable the AEC to select the best qualified contractor.

(c) When a request for proposals is used, some wording should be included to identify it with the discussion phase o fhte selection process, similar to the following:

As a result of our evaluation of the current SF 251s and related material on file with this offict, we have selected your firm for further consideration for selection and award of a contract to perform certain architect-engineer services which are described below. A principal purpose of this request for a proposal is to otbain additional qualification and performance data concerning your firm.

§ 9-4.1004-7 Selection of most highly qualified firm for negotiation.

Upon completion of discussions and evaluation of the firms that were selected for discussions, the contracting officer or other selecting official shall select, in order of preference, based upon the criteria in § 9-4.1004-2 and any special criteria included in the public announcement, no less than three firms deemed to be the most highly qualified to provide the services required.

§ 9-4.1004-8 Late proposals.

The proposals requested and received as part of the architect-engineer selection process differ in substance from proposals received for other types of procurement. Consequently, the policies and procedures contained in FPR 1-3.802-1, FPR 1-3.802-2, and AECPR 9-3.802-1 concerning the consideration of late proposals are not applicable to proposals submitted under the provisions of this Subpart 9-4.10.

§ 9-4.1005 Negotiation procedures.

§ 9-4.1005-1 Conduct of negotiations.

The contracting officer shall attempt to negotiate a contract with the firm that is rated as the most highly qualified to provide the services required at a compensation which he determines is fair and reasonable to the Government. If the contracting officer is unable to negotiate a satisfactory contract with the firm considered to be the most highly qualified, at a price he considers fair and reasonable to the Government, negotiations with that firm should be formally terminated. Negotiations should then be undertaken with the second most qualified firm. Failing accord with the second firm, negotiations should be held with the subsequently listed firm in order of preference, and this procedure shall be continued until a satisfactory contract has been negotiated. If the contracting officer is unable to negotiate a contract with any of the selected firms, he shall select additional firms in accordance with § 9-4.1004 and negotiations shall continue in the manner described above.

§ 9-4.1005-2 Independent Government estimate.

Prior to the initiation of negotiations, the procurement agency shall develop an independent Government estimate of the cost of the required architect-engineer services based on a detailed analysis of the costs expected to be generated by the work. Consideration shall be given to the estimated value of the services to be rendered, the scope, complexity, and the nature of the project. The independent Government estimate shall be revised as required during negotiations to reflect changes in or clarification of the scope of the work to be performed by the architect-engineer. On construction projects, a fee estimate based on the application of percentage factors to project cost estimates of the various segments of the work involved may be developed for comparison purposes, but such a cost estimate shall not be used as a substitute for the independent Government estimate.

§ 9-4.1005-3 Architect-engineer's price proposal.

The contracting officer shall request the selected architect-engineer firm to submit its price proposal with supporting cost or pricing data in accordance with §§ 1-3.807-3 and 1-3.807-4 of this title. Revisions of the price and supporting cost or pricing data may be made as required during negotiations to reflect changes in or clarification of the scope of the work to be performed by the architect-engineer or findings derived from preaward audits conducted pursuant to § 1-3.809.

§ 9-4.1005-4 Contract price.

The contracting officer shall negotiate a price considered fair and reasonable based on a comparative study of the independent Government estimate and the architect-engineer's proposal. Significant

V 39 53 MAR 18 74 XUM

differences between elements of the two figures and between the overall figures shall be discussed and the contracting officer shall ascertain the reasons therefor.

§ 9–4.1005–5 Record of negotiation.

Promptly at the conclusion of each negotiation, a memorandum setting forth the principal elements of the negotiations shall be prepared in accordance with the requirements of § 1–3.811 of this title for use by the reviewing authorities and for inclusion in the contract file. The memorandum shall contain sufficient detail to reflect the significant considerations controlling the establishment of the price and other terms of the contract.

§ 9–4.1005–6 Exemption from limitations on fee for architect-engineer services.

The AEC has exempted itself from the 6 percent statutory limitation upon the fees (Price) of architect-engineers. See § 9–3.405(c) of this chapter.

§ 9–4.1006 Limitation on contracting with architect-engineer firms for construction work.

See FPR 1–4.1006 and AECPR 9–1.5407(g).

§ 9–4.1007 Small business.

See FPR 1–4.1007.

JOSEPH L. SMITH,
Director,
Division of Contracts.

Title 43—Public Lands: Interior

CHAPTER II—BUREAU OF LAND MANAGEMENT, DEPARTMENT OF THE INTERIOR

APPENDIX—PUBLIC LAND ORDERS

[Public Land Order 5417]

[Arizona 7528]

ARIZONA

Partial Revocation of Reclamation Withdrawals

By virtue of the authority contained in section 3 of the Act of June 17, 1902, as amended and supplemented, 43 U.S.C. 416 (1970), it is ordered as follows:

1. The departmental orders of January 31, 1903, April 9, 1904, and any other order or orders which withdrew lands for reclamation purposes, are hereby revoked so far as they affect the following described lands:

GILA AND SALT RIVER MERIDIAN

T. 11 S., R. 24 W.,
Sec. 2, lots 1 thru 4, and S½N½ excepting therefrom the following described lands:
The north 73 feet of lots 1 thru 4; west 73 feet of lot 4 and SW¼NW¼; east 73 feet of lot 1 and SE¼NE¼; south 20 feet of the S½N½; west 20 feet of lot 2 and SW¼NE¼; east 20 feet of lot 3 and SE¼NW¼.

The area described aggregates approximately 288.70 acres in Yuma County.

2. The lands will not be subject to use or disposition under the public land laws as consummation of this revocation will automatically vest title in the State of Arizona.

JACK O. HORTON,
Assistant Secretary of the Interior.

MARCH 12, 1974.

Title 46—Shipping

CHAPTER I—COAST GUARD, DEPARTMENT OF TRANSPORTATION

[CGD 73–24R]

EMERGENCY POSITION INDICATING RADIOBEACON

Carriage, Operational Testing, and Approval

These amendments require certain inspected vessels in ocean and coastwise service to carry a Coast Guard approved emergency position indicating radiobeacon (EPIRB) on board as part of their lifesaving equipment. Also, minimum tests are prescribed to ensure that the equipment is operable. These requirements were proposed in the March 5, 1973, FEDERAL REGISTER at pages 5968–5970. The Federal Communications Commission has also proposed requirements for EPIRB's in the same FEDERAL REGISTER at pages 5970–5972.

Comments were received concerning the proposed requirement to test an EPIRB weekly. The commenters said that, because of the reliability of solid state devices, frequent testing would be unnecessary and would shorten battery life. The final rule requires only monthly testing of EPIRB's as recommended by these comments.

Several commenters opposed the proposed requirement that an EPIRB be stowed in a manner so that it would float free if the vessel sank. The commenters said that compliance with this float free requirement would expose the EPIRB to adverse effects of weather, to theft, and to the possibility of unauthorized activation. One Manufacturer has told the Coast Guard that when these regulations become effective he will have EPIRB's available that can withstand adverse effects of weather. Theft and unauthorized activation of an EPIRB are problems that each vessel should be able to solve. The importance of the float free requirement is readily demonstrated by the recent loss of two Norwegian vessels, the NORSE VARIANT and the ANITA. Each vessel had a floatable, automatically activated EPIRB. However, Norwegian regulations required stowage of the device inside the wheelhouse. Both vessels sank immediately with only one survivor, and the EPIRB's were not activated. Because of the importance of the float free requirement, it is retained in the final rule.

The EPIRB regulations being issued by the Federal Communications Commission (FCC) incorporate the equipment and marking requirements proposed in §§ 161.011–10 and 161.011–15 of the Coast Guard notice of proposed rule making. Accordingly, the final rule contained in this document deletes these requirements, and comments directed to the Coast Guard concerning §§ 161.011–10 and 161.011–15 have been forwarded to the FCC for consideration in their rulemaking proceeding for EPIRB's.

Several comments opposed the proposed requirement to carry EPIRB's on small passenger vessels operating in certain coastal waters. The final rule provides that a coastwise vessel which has a Certificate of Inspection endorsed for a route which does not extend more than 20 miles from a harbor of safe refuge is not required to carry an EPIRB if it has a VHF radiotelephone on board that meets the FCC requirements for these radios.

Though EPIRB requirements for public nautical school ships were not proposed, requirements have been included in the final rule. Notice of proposed rulemaking is not required since the public nautical school ships to which the EPIRB requirements will apply are owned by the United States.

Three comments suggested the use of EPIRB's on survival craft. The Coast Guard currently has this suggestion under consideration.

The statement in the notice of proposed rulemaking concerning the authority to require EPIRB's was incomplete and should have read as follows:

Though these regulations will not apply to uninspected commercial vessels, or to vessels that are defined to be boats under the Federal Boat Safety Act of 1971, these vessels when operating beyond the range of marine VHF radio distress coverage are encouraged by the Coast Guard and permitted under FCC's proposed EPIRB regulations to carry EPIRB's as part of their lifesaving equipment.

The Coast Guard received several comments pertaining to the proposed FCC requirements. These comments have been referred to the FCC.

Several minor revisions involving no substantive changes have been made to the proposed amendments for the purpose of clarity.

In consideration of the foregoing, Chapter I of Title 46 of the Code of Federal Regulations is amended as follows:

PART 33—LIFESAVING EQUIPMENT

1. By adding Subpart 33.60 to Part 33 to read as follows:

Subpart 33.60—Emergency position indicating radiobeacon (EPIRB) T/OC

§ 33.60–1 Emergency position indicating radiobeacon (EPIRB) T/OC.

(a) Each vessel in ocean and coastwise service must have an approved Class A emergency position indicating radiobeacon (EPIRB) that is—

(1) Operative;

(2) Stowed where it is readily accessible for testing and use; and

(3) Stowed in a manner so that it will float free if the vessel sinks.

(b) Compliance with this section is not required for a coastwise vessel—

(1) That carries a VHF radiotelephone that complies with the FCC requirements; and

(2) Whose Certificate of Inspection is endorsed for a route which does not extend more than 20 miles from a harbor of safe refuge.

AUTHORITY: R.S. 4488, as amended (46 U.S.C. 481); 49 CFR 1.4(b)(1)(ii) and 1.46(b).

Subpart 161.011—Emergency Position Indicating Radiobeacons

§ 161.011–1 Purpose.

This subpart prescribes approval requirements for emergency position indicating radiobeacons (EPIRB).

§ 161.011–5 Classes.

EPIRB's are classed as follows:

(a) Class A—an EPIRB that has been type approved or type accepted by the FCC as a Class A EPIRB. These EPIRB's are capable of floating free of a vessel and activating automatically if the vessel sinks.

§ 161.011–10 EPIRB approval.

(a) An EPIRB that has been type approved or type accepted by the FCC as a Class A EPIRB is hereby approved by the Coast Guard to meet the requirements of §§ 33.60–1, 75.60–1. 94.60–1, 167.35–72, 180.40–1 and 192.65–5 of this chapter.

(b) An application for type approval or type acceptance as a Class A EPIRB should be submitted to the Federal Communications Commission in accordance with 47 CFR Part 2.

(c) Manufacturers receiving type acceptance or type approval for a Class A EPIRB may request listing in USCG Publication CG–190, Equipment Lists, by addressing a request to COMDT (G–MMT–3/83), 400 Seventh Street, SW., Washington, D.C. 20590.

PART 167—PUBLIC NAUTICAL SCHOOL SHIPS

11. By adding § 167.35–72 to Part 167 to read as follows:

§ 167.35–72 Emergency position indicating radiobeacon (EPIRB).

(a) Each vessel in ocean and coastwise service must have an approved Class A emergency position indicating radiobeacon (EPIRB) that is—

(1) Operative;

(2) Stowed where it is readily accessible for testing and use; and

(3) Stowed in a manner so that it will float free if the vessel sinks.

(b) Compliance with this section is not required for a coastwise vessel—

(1) That carries a VHF radiotelephone that complies with the FCC requirements; and

(2) Whose Certificate of Inspection is endorsed for a route which does not extend more than 20 miles from a harbor of safe refuge.

§ 167.55–5 [Amended]

12. By amending § 167.55–5(j)(1) of Part 167 by adding "EPIRB," after "life preservers,".

13. By adding § 167.65–1(c)(3) to Part 167 to read as follows:

extend more than 20 miles from a harbor of safe refuge.

PART 35—OPERATIONS

2. By adding § 35.10–25 to Part 35 to read as follows:

§ 35.10–25 Emergency position indicating radiobeacon (EPIRB)—T/OC.

The master shall ensure that—

(a) The EPIRB required in § 33.60–1 of this subchapter is tested monthly, using the integrated test circuit and output indicator, to determine that it is operative; and

(b) The EPIRB's battery is replaced after the EPIRB is used and before the date required by FCC regulations in 47 CFR Part 83 to be marked on the outside of the EPIRB.

§ 35.40–10 [Amended]

3. By amending § 35.40–10(a) of Part 35 by adding ", EPIRB," after the words "life preservers."

PART 75—LIFESAVING EQUIPMENT

4. By adding Subpart 75.60 to Part 75 to read as follows:

Subpart 75.60—Emergency Position Indicating Radiobeacon (EPIRB)

§ 75.60–1 Emergency position indicating radiobeacon (EPIRB).

(a) Each vessel in ocean and coastwise service must have an approved Class A emergency position indicating radiobeacon (EPIRB) that is—

(1) Operative;

(2) Stowed where it is readily accessible for testing and use; and

(3) Stowed in a manner so that it will float free if the vessel sinks.

(b) Compliance with this section is not required for a coastwise vessel—

(1) That carries a VHF radiotelephone that complies with the FCC requirements; and

(2) Whose Certificate of Inspection is endorsed for a route which does not extend more than 20 miles from a harbor of safe refuge.

PART 78—OPERATIONS

5. By adding § 78.17–35 to Part 78 to read as follows:

§ 78.17–85 Emergency position indicating radiobeacon (EPIRB).

The master shall ensure that—

(a) The EPIRB required in § 75.60–1 of this subchapter is tested monthly, using the integrated test circuit and output indicator, to determine that it is operative; and

(b) The EPIRB's battery is replaced after the EPIRB is used and before the date required by FCC regulations in 47 CFR Part 83 to be marked on the outside of the EPIRB.

6. By adding § 78.47–72 to Part 78 to read as follows:

§ 78.47–72 Emergency position indicating radiobeacon (EPIRB).

The EPIRB required in § 75.60–1 of this subchapter must be marked with the vessel's name.

PART 94—LIFESAVING EQUIPMENT

7. By adding Subpart 94.60 to Part 94 to read as follows:

Subpart 94.60—Emergency Position Indicating Radiobeacon (EPIRB)

§ 94.60–1 Emergency position indicating radiobeacon (EPIRB).

(a) Each self propelled vessel in ocean and coastwise service must have an approved Class A emergency position indicating radiobeacon (EPIRB) that is—

(1) Operative;

(2) Stowed where it is readily accessible for testing and use; and

(3) Stowed in a manner so that it will float free if the vessel sinks.

(b) Compliance with this section is not required for a coastwise vessel—

(1) That carries a VHF radiotelephone that complies with the FCC requirements; and

(2) Whose Certificate of Inspection is endorsed for a route which does not extend more than 20 miles from a harbor of safe refuge.

PART 97—OPERATIONS

8. By adding § 97.15–65 to Part 97 to read as follows:

§ 97.15–65 Emergency position indicating radiobeacon (EPIRB).

The master shall ensure that—

(a) The EPIRB required in § 94.60–1 of this subchapter is tested monthly, using the integrated test circuit and output indicator, to determine that it is operative; and

(b) The EPIRB's battery is replaced after the EPIRB is used and before the date required by FCC regulations in 47 CFR Part 83 to be marked on the outside of the EPIRB.

9. By adding § 97.37–55 to Part 97 to read as follows:

§ 97.37–55 Emergency position indicating radiobeacon (EPIRB).

The EPIRB required in § 94.60–1 of this subchapter must be marked with the vessel's name.

PART 161—ELECTRICAL EQUIPMENT

10. By adding Subpart 161.011 to Part 161 to read as follows:

Subpart 161.011—Emergency Position Indicating Radiobeacons

Sec.
161.011–1 Purpose.
161.011–5 Classes.
161.011–10 EPIRB approval.

V 39 I 53 MAR 18 74 XUM

§ 167.65–1 Station bills, drills, and log book entries.

* * * * *

(c) * * *

(3) The master shall ensure that—

(i) The EPIRB required in § 167.35–72 is tested monthly, using the integrated test circuit and output indicator, to determine that it is operative; and

(ii) The EPIRB's battery is replaced after the EPIRB is used and before the date required by FCC regulations in 47 CFR Part 83 to be marked on the outside of the EPIRB.

PART 180—LIFESAVING EQUIPMENT

14. By adding § 180.05–1(b)(10) to read as follows:

§ 180.05–1 Equipment of an approved type.

* * * * *

(b) * * *

(10) Type A EPIRB's -------- 161.011

15. By adding Subpart 180.40 to Part 180 to read as follows:

Subpart 180.40—Emergency Position Indicating Radiobeacon (EPIRB)

§ 180.40–1 Emergency position indicating radiobeacon EPIRB.

(a) Each vessel in ocean and coastwise service must have an approved Class A emergency position indicating radiobeacon (EPIRB) that is—

(1) Operative;

(2) Stowed where it is readily accessible for testing and use; and

(3) Stowed in a manner so that it will float free if the vessel sinks.

(b) Compliance with this section is not required for a coastwise vessel—

(1) That carries a VHF radiotelephone that complies with the FCC requirements; and

(2) Whose Certificate of Inspection is endorsed for a route which does not extend more than 20 miles from a harbor of safe refuge.

PART 185—OPERATIONS

16. By adding § 185.25–20 to Part 185 to read as follows:

§ 185.25–20 Tests of emergency position indicating radiobeacon (EPIRB).

The licensed operator of the vessel shall ensure that—

(a) The EPIRB required in 180.40–1 of this subchapter is tested monthly, using the integrated test circuit and output indicator, to determine that it is operative; and

(b) The EPIRB's battery is replaced after the EPIRB is used and before the date required by FCC regulations in 47 CFR Part 83 to be marked on the outside of the EPIRB.

17. By adding § 185.30–30 to Part 185 to read as follows:

§ 185.30–30 Emergency position indicating radiobeacon (EPIRB).

The EPIRB required in § 180.40–1 of this subchapter must be marked with the vessel's name.

PART 192—LIFESAVING EQUIPMENT

18. By adding Subpart 192.60 to Part 192 to read as follows:

Subpart 192.65—Emergency Position Indicating Radiobeacon (EPIRB)

§ 192.65–1 Emergency position indicating radiobeacon (EPIRB).

(a) Each vessel in ocean and coastwise service must have an approved Class A emergency position indicating radiobeacon (EPIRB) that is—

(1) Operative;

(2) Stowed where it is readily accessible for testing and use; and

(3) Stowed in a manner so that it will float free if the vessel sinks.

(b) Compliance with this section is not required for a coastwise vessel—

(1) That carries a VHF radiotelephone that complies with the FCC requirements; and

(2) Whose Certificate of Inspection is endorsed for a route which does not extend more than 20 miles from a harbor of safe refuge.

PART 196—OPERATIONS

19. By adding § 196.15–65 to Part 196 to read as follows:

§ 196.15–65 Emergency position indicating radiobeacon (EPIRB).

The master shall ensure that—

(a) The EPIRB required in § 192.65–1 of this subchapter is tested monthly, using the integrated test circuit and output indicator, to determine that it is operative; and

(b) The EPIRB's battery is replaced after the EPIRB is used and before the date required by FCC regulations in 47 CFR Part 83 to be marked on the outside of the EPIRB.

20. By adding § 196.37–49 to Part 196 to read as follows:

§ 196.37–49 Emergency position indicating radiobeacon (EPIRB).

The EPIRB required in § 192.65–1 of this subchapter must be marked with the vessel's name.

(R.S. 4488, as amended (46 U.S.C. 481); 49 CFR 1.4(b)(1)(ii) and 1.46(b))

Effective date. These amendments become effective on March 1, 1975.

Dated: March 1, 1974.

C. R. BENDER,
Admiral, U.S. Coast Guard,
Commandant.

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 19693; FCC 74-228]

PART 2—FREQUENCY ALLOCATIONS AND RADIO TREATY MATTERS; GENERAL RULES AND REGULATIONS

PART 83—STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

Permission for Use of Frequencies

1. The Commission has been working toward the improvement of the methods of locating both downed aircraft and vessels of seafarers in distress for several years. In a previous Docket (19647), the use of emergency locator transmitters (ELTs) for aircraft was provided for. In this instant Docket (19693), the use by the marine community of a comparable item, the emergency position indicating radio beacon (EPIRB), is provided. A notice of proposed rule making in this matter was adopted February 21, 1973, released February 26, 1973 and published in the FEDERAL REGISTER March 5, 1973 (38 FR 5970). The time for filing of comments and reply comments has passed.

2. In the Aviation Radio Services both 121.5 and 243 MHz are available for communications related to emergencies and to search and rescue operations. Presently only the frequency 121.5 MHz is available in the maritime service, and then, only under certain limited conditions for radiobeacon purposes. Since both air and surface craft are generally involved in emergencies and search and rescue operations in offshore water areas, it appears that it would be in the best interests of safety of life at sea if there were fewer restrictions on the use of these frequencies in the maritime service.

3. The frequency 121.5 MHz is a universally used radiotelephone channel (class A3 emission) for aircraft in distress or condition of emergency. It also provides aviation a common frequency for survival communications and for emergency locator beacons (emission A9). Locator beacons of this type are commonly referred to as Emergency Locator Transmitters (ELTs) or Emergency Position Indicating Radiobeacons (EPIRBs). In the maritime community the most universally used term is the latter, so that designation will be used herein and in the rules. The use of 121.5 MHz by maritime interests in the United States is presently limited to vessels which have been registered or documented by the U.S. Coast Guard. For the most part these are commercial vessels of over 5 gross tons. Its use is further limited to class A2 emission, and to vessels which are authorized to carry and are equipped with a ship station.

4. The frequency 243 MHz, normally used by U.S. military aircraft for survival purposes, is available nationally for use by survival craft stations and equipment used for survival purposes (footnote US98). However, no provisions have been made in Part 83 to implement this footnote for the maritime service. Amendment of the rules, as set forth in the attached Appendix, provides for the use of both the frequencies 121.5 and 243 MHz by all U.S. vessels expected to operate in international waters beyond the range of marine VHF distress coverage for use in survival craft and emergency position indicating radiobeacon (EPIRB) stations. Marine use of these frequencies in EPIRBs will be permitted in the same manner as they are used by civil aircraft in ELTs, with substantially the same technical characteristics and packaging requirements as observed by aviation. This will increase the efficiency of search and rescue operations as well as provide greater safety for an increased number of vessels and will permit some degree of

standardization of survival radiobeacons. In addition, the amendment provides for the use of radiotelephony (class A3 emission) on the frequency 121.5 MHz by authorized ship stations for emergency communications between ships and aircraft. The frequency 123.1 MHz is the auxiliary scene of action frequency used in conjunction with 121.5 MHz by those involved in the rescue operation. This is also provided for.

5. It is recognized that the EPIRB, as well as the aviation ELT, will often serve as a distress alerting device when other methods of communication are not successful or available. However, the marine use of 121.5/243 MHz for EPIRBs is generally limited to the oceanic areas approximately 20 miles or more offshore, as described by the phrase "those whose vessels are expected to operate in international waters beyond the range of marine VHF distress coverage." It is felt that the safety of this rather limited number of vessels can be improved substantially and immediately by the use of EPIRBs, and that their use of the frequencies can be effectively controlled. The millions of recreational boats which operate near the shore and in inland waters have been purposely excluded, since these vessels may use marine VHF radio or other extremely reliable methods to alert the shore to their situation. Also the potential inadvertant or improper use by this very large population could render the existing aviation distress and safety system, as well ts the offshore marine use, completely ineffective.

6. The amendment to the rules conforms basically with the recommendations adopted by the Maritime World Administrative Radio Conference, Geneva, 1967, and with recommendation 48 of the 1960 Safety of Life at Sea Conference and subsequent recommendations of the Subcommittee on Radio-communications and the Maritime Safety Committee of the Inter-Governmental Maritime Consultative Organization (IMCO). More specifically the amendment is in response to a recent request of the U.S. Coast Guard and to recent recommendations of the National Transportation Safety Board.

7. All commentators were agreed on the need for the provision, in the rules, for marine use of beacons using the frequencies 121.5 and 243 MHz for emergency locating purposes. There were differences of opinion in the means and frequency of required testing, the technical specifications and the type of vessels permitted to use the beacons.

8. Six comments were received and no reply comments were received. The received comments were diversified as they were presented by: Pacific Far East Line, Inc. (PFEL), a public carrier steamship line; American Radio Association, AFL–CIO and Radio Officers' Union, AFL–CIO (AFL–CIO) jointly; Aeronautical Radio, Inc. (ARINC), a non-profit organization which is owned and operated by airlines and which supplies aeronautical communications services; American Institute of Merchant Shipping (AIMS) representing many U.S. Flag deep sea shipping companies; and two equipment manufacturers, Dayton Aircraft Products, Inc. (DAP) and Burndept Electronics, Ltd. (Burndept).

9. Several specific comments were directed not at the Commission's notice of proposed rule making, but at the Coast Guard's proposal which was simultaneously printed in the FEDERAL REGISTER. Those portions of the comments addressed to the Coast Guard regulation are discussed here only as they apply to the Commission's authority.

10. PFEL expressed opposition to the FCC's proposal that EPIRBs for use in the maritime service be different in any respect from similar requirements governing the aircraft ELTs. We do not accept their position. Conditions at sea will often submit EPIRBs to weather and humidity environment requiring technical specifications not necessarily imposed on ELTs. PFEL is opposed to the USCG testing equipment rather than the FCC. Without regard to the requirements of the USCG, it is, of course, the routine inspection of radio equipment by FCC representatives which will be maintained in regard to EPIRBs as with other such equipment. If the Coast Guard also requires additional inspections and tests as a part of their requirement for mandatory carriage of this item, then that is beyond the scope of this docket as is also PFEL's opposition to the USCG's requirement for float off storage.

11. The AFL–CIO proposed weekly tests at sea and within 24 hours of departure by a qualified licensee and logging of the tests. It is not the intention of the Commission to require any testing of the EPIRBs other than that conducted as a normal part of the Field Operations Bureau's routine inspection of marine radio equipment. In any event, the equipment as specified in § 83.144 (d) will be capable of being tested by untrained personnel, either during the first five minutes of any hour, with the cooperation of the Coast Guard or, if equipped with manually operated test switch, at any time merely by observing an indicator or listening to the swept tone. We recognize the advantage of having the confidence factor of a visual or aural indication of the EPIRBs capability to function. We are opposed to frequent testing of the beacons for technical reasons as well as because of the potential problem of inadvertent activation of the beacon as a result of handling it for testing. We, therefore, discourage the testing of the beacon except during the controlled conditions of FCC inspection or during similar infrequent periods.

12. ARINC urged the inclusion of restrictions to the use of 121.5 MHz comparable to the restrictions applicable to aeronautical users. They feel that the amendment as proposed would not assure that 121.5 MHz would be limited to bona fide emergency purposes when utilizing class A3 emission. We find their argument persuasive and have revised the appropriate section accordingly. ARINC objected to testing of EPIRB without proper supervision. We consider the testing into a dummy load, during a specified period of the hour or under Coast Guard supervision as being realistic and practicable and therefore have made no change from the proposal.

13. AIMS asks that the EPIRBs be identical to the approved standard ELTs (DOT standard TSOC 61A). We feel that the conditions at sea impose environmental problems, particularly humidity, which warrant slight variations between the ELTs and EPIRBs. Such conditions have been considered in the amendments. AIMS also states their belief that there is no requirement for shipboard reception of emergency beacon signals. We do not impose such a requirement in our rules. They suggest that EPIRBs be specified as intrinsically safe. We believe that the technical requirements as specified will assure that the equipment will be intrinsically safe. AIMS believes there is a need for both a manual activation capability (on/off) and a manual test capability. Although we have provided for manual test capability, we are fearful of excessive testing, as previously stated, and do not feel that mandatory manual test capability is advisable; except in the case of Class A EPIRBs. (See para. 15 below). We have provided for a positive manual means of deactivation.

14. The equipment manufacturers' comments were either items covered in the text above, directed to the Coast Guard, or were basically presented as information. One specific item which both DAP and Burndept addressed, and which was not mentioned by others, was the specified radiation during test. We agree that the proposed radiation in the test position would introduce unnecessary expense in unit production costs. We have, therefore, revised the radiation level from the previously proposed 15 microvolts per meter at a distance of twenty feet free space to approximately that which Burndept states was found to be suitable after experience, 25 microvolts per meter at 150 feet.

15. The U.S. Coast Guard has notified the Commission of intention to make the carriage of a certain configuration of EPIRBs mandatory on a limited number of vessels. The specified configuration has physical and technical charactertistics beyond those previously detailed in the notice of proposed rule making. For purposes of inclusion of those EPIRBs in the rules, a new subsection has been added. In order to distinguish those specific EPIRBs from the other configurations, we have identified them as Class A items of equipment.

16. In view of the foregoing, *it is ordered,* That pursuant to the authority contained in sections 4(i), 303(r) and 318 to the Communications Act of 1934, as amended, Parts 2 and 83 of the Commission's rules, are amended, effective April 19, 1974, as set forth in the attached Appendix. *It is further ordered,* That this proceeding is hereby terminated.

V 39 I 53 MAR 18 74 XUM

(Secs. 4, 303, 318, 48 Stat., as amended, 1066, 1082, 1089; 47 U.S.C. 154, 303, 318.)

Adopted: March 7, 1974.

Released: March 14, 1974.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

Parts 2 and 83 of Chapter I of Title 47 of the Code of Federal Regulations are amended as follows:

1. In § 2.106, column 11 is amended as follows:

§ 2.106 Table of Frequency Allocations.

Frequency MHz	*Nature of services*	*OF SERVICES of stations*
10		11
•	• • • • •	
121.5 ----	AERONAUTICAL MOBILE.	
	Maritime search and rescue.	
	Survival craft and equipment.	
•	• • • • •	
123.100....	Aeronautical search and rescue mobile.	
	Maritime search and rescue mobile.	
	Survival craft and equipment.	
•	• • • • •	

2. Section 83.3 is amended by adding a new paragraph (q) to read as follows:

§ 83.3 Maritime mobile services.

• • • • • •

(q) *Emergency position indicating radiobeacon station.* A station in the maritime mobile service consisting of a transmitter only, the distinctive emissions of which are intended to facilitate search and rescue operations.

3. Section 83.7 is amended by adding a new paragraph (l) to read as follows:

§ 83.7 Technical.

• • • • • •

(l) *Peak effective radiated power.* For emergency position indicating radiobeacon stations, the average power supplied to the antenna by the transmitter during one radio frequency cycle at the highest crest of the modulation envelope, multiplied by the relative gain of the antenna in a given direction. The relative gain is referenced to a quarter-wave loss free monopole mounted on a one wavelength diameter ground plane.

4. Section 83.68 and headnote are revised to read as follows:

§ 83.68 Authority for survival craft stations and emergency position indicating radiobeacon stations.

(a) Authority to operate survival craft stations, which may include an emergency position indicating radiobeacon (EPIRB) station, will be granted only when the parent vessel is equipped with and authorized to operate a ship station.

(b) Authority to operate an EPIRB station will be granted only for use aboard vessels authorized to carry survival craft stations or to those whose vessels are expected to operate in international waters beyond the range of marine VHF distress coverage.

5. In § 83.131, the introductory text of paragraph (c) is amended and subparagraph (3) is added to read as follows:

§ 83.131 Authorized frequency tolerance.

• • • • • •

(c) Authorized frequency tolerance for ship, survival craft and emergency position indicating radiobeacon (EPIRB) stations operating on frequencies above 27.5 MHz.

• • • • • •

(3) EPIRB stations on 121.5 and 243 MHz—50.

• • • • • •

6. In § 83.132(a), subdivisions (iii) and (iv) are added to subparagraph (1) and subdivision (ii) of subparagraph (2) is amended to read as follows:

§ 83.132 Authorized classes of emission.

(a) • • •

(1) • • •

(iii) For the frequency 121.5 MHz—A2, A9.

(iv) For the frequency 243 MHz—A9.

(2) • • •

(ii) For the frequencies 121.5 and 123.1 MHz—A3.

• • • • • •

7. In § 83.133(a), the table is amended to add emission A9 and footnote 5 to read as follows:

§ 83.133 Authorized bandwidth.

• • • • • •

Class of emission	Emission designator	Authorized bandwidth (kHz)
• • •	•	•
A3	6A3	8.0
A9	3.2A9	[5] 25.0
F1	[1] 0.3F1	[1] 0.5
• • •	•	•

[1] Applicable only to emergency position indicating radiobeacon stations.

• • • • • •

8. Section 83.134 is amended by adding a new paragraph (i) to read as follows:

§ 83.134 Transmitter power.

• • • • • •

(i) For emergency position indicating radiobeacon stations operating on the frequencies 121.5 and 243 MHz the peak effective radiated power on each frequency, measured during and at the end of 48 hours of continuous operation, and without replacement or recharge of batteries, shall not be less than 75 milliwatts. This specification shall apply to all units whether dry, or immersed for any or all of the forty-eight hour period in fresh or salt-water, as long as the entire antenna extends above the water surface. The method of peak effective radiated power measurement specified in the Radio Technical Commission for Aeronautics (RTCA) Document Numbers DO–145 or DO–146 shall be employed. The required power shall obtain over an air temperature range from −20 to +55 degrees centigrade.

9. Section 83.137 is amended by adding a new paragraph (i) to read as follows:

§ 83.137 Modulation requirements.

• • • • • •

(i) Emergency position indicating radiobeacon stations operating on the frequencies 121.5 and 243 MHz shall employ a distinctive emission consisting of amplitude modulation of the carrier with an audio frequency sweeping downward over a range of not less than 700 Hz, within the range 1600 to 300 Hz, with a sweep rate between 2 and 4 times per second. The modulation applied to the carrier shall be in accordance with that specified in the Radio Technical Commission for Aeronautics (RTCA) Document Numbers DO–145 or DO–146.

10. Section 83.139(b) is amended to read as follows:

§ 83.139 Acceptability of transmitters for licensing.

• • • • • •

(b) Each survival craft station transmitter or emergency position indicating radiobeacon station transmitter which has not been type approved pursuant to § 83.469 or § 83.472 shall be type accepted for licensing.

• • • • • •

11. Section 83.141(a)(4) & (b) are amended and a new paragraph (d) is added to read as follows:

§ 83.141 Special requirements for survival craft stations.

(a) • • •

(4) The frequency 121.5 MHz, be able to use A2 or A3 emission and where A3 emission is used the equipment must also be capable of transmitting on 123.1 MHz using A3 emission.

(b) Receivers used in survival craft stations shall be capable of receiving the frequency and types of emission which the transmitter is capable of using: *provided,* That where the transmitter frequency is 8364 kHz the receiver shall be capable of receiving A1 and A2 emission throughout the band 8320–8745 kHz.

• • • • • •

(d) When an EPIRB station is contained as a part of a survival craft station, the EPIRB portion shall be limited to the frequencies 121.5 and 243 MHz (transmission only) and to A9 emission only.

12. A new § 83.144 is added to read as follows:

§ 83.144 Special requirements for emergency position indicating radiobeacon stations.

(a) Emergency position indicating radiobeacon (EPIRB) stations are limited to transmission only, using A9 emission, on the frequencies 121.5 and 243 MHz.

(b) The EPIRB may be turned on by automatic means, such as water activated battery, or by an on-off switch. In any event, a positive means of turning the equipment off shall be provided. Where an on-off switch is employed, a guard or other means shall be provided to prevent inadvertent activation.

(c) The EPIRB shall be provided with a visual and/or audible indicator which, clearly shows that the device is transmitting.

(d) In regard to testing, the following criteria for EPIRBs applies:

(1) May be fitted with a manually-activated test switch, or comparable device, associated test circuit, and output indicator which shall, in the test position:

(i) Permit the operator to determine that the unit is operative;

(ii) Switch the transmitter output to a test circuit (dummy load), the impedance of which is equivalent to that of the antenna affixed to the EPIRB; and

(iii) Reduce radiation to a level not to exceed 25 microvolts per meter at a distance of one hundred fifty (150) feet, free space, irrespective of direction.

(2) If so equipped, the manually-activated test switch, or comparable device, shall be of a type which must be held in position to operate, and which will switch the transmitter off and reconnect the output from the test circuit (dummy load) to the antenna when released. A guard or other means shall be provided to prevent its inadvertent activation.

(3) Means shall be provided to protect the indicator from damage due to dropping or contact with other objects.

(4) An EPIRB without a test circuit as described above in (1) and (2) may be tested in coordination with, or under the control of the U.S. Coast Guard to insure that testing is conducted under electronic shielding, or other conditions sufficient to insure that no transmission or radiated energy occurs that could be received by a radio station and result in a false distress alarm. If testing with Coast Guard involvement is not practicable, brief operational tests are authorized provided the tests are conducted within the first five minutes of any hour, are not longer than three audio sweeps or one second, whichever is longer, and, if available, a dummy load is used during test.

(e) The power and modulation requirements specified in this Part for EPIRBs shall be met under the environmental test conditions, with the exception of the temperature limits, specified in the Radio Technical Commission for Aeronautics (RTCA) Document Numbers DO–145 or DO–146. The air temperature limits for testing these devices shall be from −20 to 55 degrees centigrade. Additionally those tests specified by RTCA with regard to altitude, decompression and overpressure are not applicable to EPIRB stations.

(f) The equipment shall not incorporate any vacuum tubes in its design. Components shall be so rated that the equipment will meet the requirements specified for EPIRBs in this Part after extended periods of inaction while carried in vessels and subjected to the environmental conditions prescribed. Operation into any load likely to occur in service, from open to short, shall not cause continuing degradation in performance.

(g) The operation of controls intended for use during normal operation in all possible combinations or sequences shall not result in a condition whose presence or continuation would be detrimental to the continued performance of the equipment. The number of controls shall be kept to a minimum to permit ease of operation of the equipment.

(h) The EPIRB shall have a battery for power supply which is independent of the vessel power supply. The battery, whether an original or replacement component, shall be designed as an integral part of the equipment or be securely attached thereto. The date (month and year) of the battery's manufacture shall be permanently and legibly marked on the battery and the expiration date (month and year) upon which 50 percent of its useful life has expired shall be permanently and legibly marked on both the battery and the outside of the transmitter. The useful life of the battery (established by the EPIRB manufacturer) is the length of time, after its date of manufacture, that the battery may be stored under normal marine environmental conditions without losing its ability to meet the transmitter power requirement prescribed in § 83.134(h). The electro-mechanical connectors on and to the battery must be corrosion resistant and positive in action, and may not rely for contact upon spring force alone.

(i) The EPIRB shall be waterproof and shall not be accidentally activated by rain, seaspray, hose wash-down spray or storage in high humidity conditions. The effects of standing water on the outer surface of the equipment shall have no significant adverse effect upon the performance of the EPIRB.

(j) Concise, unambiguous operating structions, understandable by untrained personnel, shall be conspicuously and permanently displayed on the equipment. The display shall be weather resistant, waterproof, and abrasion resistant.

(k) The exterior of the equipment shall have no sharp edges or projections which could easily damage inflatable survival equipment, injure personnel or damage their clothing. Means shall be provided to secure the EPIRB to a survival craft or person.

(l) If the antenna is not designed to be stowed in its normal operating position, the antenna shall be deployable to the designed length and operating position in a foolproof manner. The antenna shall be securely attached to the EPIRB and of such design that it is easy to de-ice. The antenna shall provide optimum performance at 121.5 and 243 MHz and its radiation pattern in the horizontal plane shall be essentially omnidirectional.

(m) The equipment shall be so designed that it may be deployed, its controls actuated, or the antenna erected, each by a single action task which can be performed by either hand.

13. New § 83.145 is added:

§ 83.145 Special requirements for Emergency Position Indicating Radio Beacon Stations, Class A.

(a) For purposes of regulations for mandatory carriage by certain vessels a Class A EPIRB is one that is capable of floating free of a sinking vessel and activating automatically.

(b) In addition to the other requirements for EPIRBS elsewhere in this Part a Class A EPIRB must:

(1) Operate on frequencies 121.5 and 243 MHz and must have a manually activated test switch or comparable device, associated test circuit, and output indicator;

(2) Activate automatically when it floats free of a sinking vessel;

(3) Have an antenna that deploys automatically when the EPIRB activates automatically;

(4) Float in calm water with at least the upper two inches of the EPIRB out of the water and the base of the antenna at least two inches above the water;

(5) Be ballasted to right itself from a position of 90° from its upright position in one second or less;

(6) Meet the requirements of paragraphs (1) through (5) above after free fall into water 3 times from a height of 60 feet; and

(7) Must be marked with the manufacturer's name, with the type number and with the indication Class A.

(c) For FCC type-acceptance as a Class A equipment the requirements of (b) above must be met as well as the other requirements for EPIRBs prescribed elsewhere in this Part.

14. Section 83.164(b) is amended to read as follows:

§ 83.164 Waivers of operator requirement.

• • • • • • •

(b) No radio operator authorization is required for the operation of a survival craft station or an emergency position indicating radiobeacon station while it is being used solely for survival purposes or to facilitate search and rescue operations.

• • • • • •

15. Section 83.178 is amended by adding a new paragraph (e) to read as follows:

§ 83.178 Unauthorized transmissions.

• • • • • •

(e) Use telephony on 243 MHz.

16. Section 83.233, table, is amended to add the frequency bands 118—136 MHz and 225—399.9 MHz to read as follows:

§ 83.233 Frequencies for use in distress.

• • • • •

V 39 53 MAR 18 74 XUM

Frequency band	Emission	Carrier frequency
405–535 kHz	A2	500 kHz.[1]
1605–4000 kHz	A3, A3H	2182 kHz.
118–136 MHz	A2, A3, A9	121.5 MHz.
	A3	123.1 MHz.
156–162 MHz	F3	156.8 MHz.
225–399.9 MHz	A9	243 MHz.

[1] The maximum transmitter power obtainable shall be used.

17. A new § 83.252 is added to read as follows:

§ 83.252 Equipment to facilitate search and rescue operations.

(a) Survival craft stations may transmit the signals, calls and messages described in this subpart.

(b) Emergency position indicating radiobeacons may transmit only the distinctive emission specified in § 83.137 and only on the frequencies 121.5 and 243 MHz.

18. Section 83.322(c) is amended and a new paragraph (d) is added to read as follows:

§ 83.322 Frequencies for use in distress.

* * * * *

(c) The frequency 121.5 MHz (using class A2 emission) is available for radiobeacon purposes to survival craft stations. The frequency 121.5 MHz (using A9 emission) is available to emergency position indicating radiobeacon (EPIRB) stations for facilitating search and rescue operations. The frequency 121.5 MHz (class A3 emission) is available to authorized ship stations for emergency communications between ships and aircraft only if operation on the auxiliary frequency 123.1 MHz is also provided for. The frequency 121.5 is available to authorized ship stations for A3 emission for emergency communications between ships and aircraft involved in coordinated search and rescue operations when other VHF channels are not available. As soon as practicable after establishing contact on 121.5 MHz ships and aircraft engaged in the search and rescue operation should shift to the auxiliary frequency 123.1 MHz. The universal auxiliary frequency 123.1 MHz is available to mobile stations engaged in scene of action search and rescue operations as the auxiliary to the emergency clear channel frequency 121.5 MHz.

(d) The frequency 243 MHz (class A9 emission only) is available to EPIRB stations for facilitating search and rescue operations.

19. Section 83.326 is amended by adding a new paragraph (c) to read as follows:

§ 83.326 Identification of stations.

* * * * *

(c) Emergency position indicating radiobeacon stations do not require identification.

20. Section 83.352(b) is amended and a new paragraph (c) is added to read as follows:

§ 83.352 Frequencies for use in distress.

* * * * *

(b) The frequency 121.5 MHz (using class A2 emission) is available for radiobeacon purposes to survival craft stations. The frequency 121.5 MHz (using A9 emission) is available to emergency position indicating radiobeacon (EPIRB) stations for facilitating search and rescue operations. The frequency 121.5 MHz (class A3 emission) is available to authorized ship stations for emergency communications between ships and aircraft only if operation on the auxiliary frequency 123.1 MHz is also provided for. The frequency 121.5 is available to authorized ship stations for A3 emission for emergency communications between ships and aircraft involved in coordinated search and rescue operations when other VHF channels are not available. As soon as practicable after establishing contact on 121.5 MHz ships and aircraft engaged in the search and rescue operation should shift to the auxiliary frequency 123.1 MHz. The universal auxiliary frequency 123.1 MHz is available to mobile stations engaged in scene of action search and rescue operations as the auxiliary to the emergency clear channel frequency 121.5 MHz.

(c) The frequency 243 MHz (class A9 emission only) is available to EPIRB stations for facilitating search and rescue operations.

21. Section 83.401(c) is amended to read as follows:

§ 83.101 Assignable frequencies for direction finding.

* * * * *

(c) In the event of distress, the following frequencies may be used for radio direction finding for purposes of search and rescue by any authorized ship or survival craft station or by emergency position indicating radiobeacon stations as described in this part.

410 kHz, 500 kHz, 218 kHz, 836 kHz, 121.5 MHz, 243 MHz.

[FR Doc.74-6147 Filed 3-15-74;8:45 am]

[RM-2253; FCC 74-227]

PART 2—FREQUENCY ALLOCATIONS AND RADIO TREATY MATTERS; GENERAL RULES AND REGULATIONS

PART 91—INDUSTRIAL RADIO SERVICES

Permission for Use of Frequencies

1. The Commission is aware from discussion with industry and other Government agencies that increased resource exploration in the offshore areas of the United States has created a requirement for a more reliable long range radiolocation service to enable greater accuracy in the charting and relocating of potential mineral deposits. The United States Coast Guard has advised the Commission that within recent months several oil companies have discussed the desire to use enhanced LORAN type radiolocation techniques in support of offshore drilling activities. The techniques involve the use of signals in the 90–110 kHz band for improved accuracy and coverage. We have been told that small portable transmitters are available commercially which can be used for this purpose.

2. In a filing dated June 18, 1973, Offshore Navigation, Inc. (ONI), an existing licensee in the Industrial Radiolocation Service, submitted an application to the Commission for the authorization of LORAN type radiolocation land stations on a secondary basis in the 90–110 kHz band in the Industrial Radiolocation Service. ONI suggested that the authorization could be granted under the intent of existing rules, but that if the Commission decided otherwise, either the rules should be waived to permit ONI's specific operation or rulemaking initiated looking toward a regular provision for the radiolocation service in this band on a secondary basis.

3. Subsequent to ONI's filing, the Lorac Service Corporation (Lorac) also an existing licensee in the Industrial Radiolocation Service petitioned the Commission on September 6, 1973 to initiate rulemaking to provide for industrial radiolocation on a secondary basis in the 90–110 kHz band (RM–2253). The enhanced LORAN–C type radiolocation activity that Lorac wishes to introduce to the 90–110 kHz band would be on a secondary, non-interference basis to extant LORAN operations within the band, with assurance of protection effectuated through coordination and supervision of activities by the U.S. Coast Guard. Lorac contends that through appropriate regulation of certain station operational parameters (e.g. phase code and repetition rates, effective radiated power, and on air time, etc.) that the desired Loran protection could be realized.

4. Comments relevant to Lorac's proposal were filed by ONI and Decca Survey Systems, Inc. (DECCA). Both entities essentially agreed with Lorac's request that provision should be made for radiolocation on a secondary basis within the 90–110 kHz band. Decca specifically emphasized that proper authority should come from waivers of existing rules while ONI's contention was that the Commission should take any action it deems appropriate to achieve the sought after objective.

5. Nationally, the frequency band 90–110 kHz is allocated exclusively to the radionavigation service. Primary use of the band is for LORAN–C stations operated by the Coast Guard although certain non-Government radionavigation stations may be authorized on a secondary basis under the provisions of footnote US18 to the National Table of Frequency Allocations, § 2.106 of the Commission's Rules. Recent tests conducted by the Coast Guard in the Gulf of Mexico have shown that enhanced LORAN type radiolocation techniques of the kind proposed by ONI can provide the necessary accuracy and range and can be utilized concurrently with LORAN–C radionavigation operations in the 90–110 kHz band without harmful interference to the latter.

6. Consequently, the Coast Guard and the Interdepartment Radio Advisory Committee (IRAC) have indicated concurrence with the proposed secondary radiolocation use subject to adequate protection being provided to the LORAN radionavigation service. They have recommended in this regard that the radiolocation stations be limited to pulsed (as distinct from continuous wave) emission, with specified pulse repetition rates; that all applications for radiolocation operations be subject to case-by-case coordination with the IRAC; and that any license for such operations reflect the present and future priority of the LORAN radionavigation system and require the immediate termination of transmissions of the radiolocation station if any interference is caused to the radionavigation service.

7. Therefore, based on the above information, it appears that the stated radiolocation requirements can be satisfactorily accommodation in the 90–110 kHz band without interference to the LORAN radionavigation system. We also believe that a rule amendment is preferable to the waiver approach, based on an anticipated broad application of the technique, and §§ 2.106 and 91.604 of the rules are being amended accordingly. Applications will be considered on a case-by-case basis through the regular IRAC/FCC coordination mechanism. As indicated in the appended rules, only pulsed systems of the LORAN type will be authorized, subject to such conditions as may be necessary to protect the LORAN radionavigation system.

8. Because there are no existing non-Government operations in the band which could be affected by the abovementioned rule amendments and the action represents an additional provision for non-Government radio services, the prior notice, public comments, and effective date procedures of 5 U.S.C. 553 are unnecessary. Authority for these rule changes is contained in sections 4(i) and 303(r) of the Communications Act of 1934, as amended.

9. In view of the foregoing, *it is ordered*, That effective March 19, 1974, Parts 2 and 91 of the rules are amended by revision of §§ 2.106 and 91.604 as shown in the attached appendix. *It is further ordered*, That this proceeding is terminated.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303.)

Adopted: March 7, 1974.

Released: March 12, 1974.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

Parts 2 and 91 of Chapter I of Title 47 of the Code of Federal Regulations are amended to read as follows:

§ 2.106 Table of frequency allocations.

1. In § 2.106, footnote US104 is amended to read as follows:

* * * * *

US104/The LORAN Radionavigation System has priority in the band 90–110 kHz in the United States and Possessions. Radiolocation land stations making use of LORAN type equipment may be authorized to both Government and non-Government on a SECONDARY SERVICE basis for offshore radiolocation activities of offshore industries only at specific locations and subject to such technical and operational conditions (e.g., power, emission, pulse rate and phase code, hours of operation), including on-the-air testing, as may be required on a case-by-case basis to insure protection of the LORAN Radionavigation System from harmful interference and to insure mutual compatibility among radiolocation operators. Such authorizations to stations in the radiolocation service are further subject to showing of need for service which is not currently provided and which the Government is not yet prepared to render by way of the radionavigation service.

* * * * *

2. In § 91.604(a), the table is amended to add the frequency band 90–110 kHz, and par (b)(19) is added to read as follows:

§ 91.604 Frequencies available.

(a) * * *

Frequency or band	Class of station(s)	Limitation(s)
kHz:		
70–90	Radiolocation land or mobile	1
90–110	Radiolocation land	1, 19
110–130	Radiolocation land or mobile	1

* * * * *

(b) * * *

(19) This band is limited to radiolocation land stations in accordance with footnote US104 for offshore radiolocation activities.

Title 49—Transportation

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[Rev. S.O. 1145, Amdt. 1]

PART 1033—CAR SERVICE

Distribution of Boxcars

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 12th day of March, 1974.

Upon further consideration of Service Order No. 1145 (38 FR 31809), and good cause appearing therefor:

It is ordered, That:

§ 1033.1145 Service Order No. 1145 be, and it is hereby, amended by substituting the following paragraph (d) for paragraph (d) thereof:

(d) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., June 30, 1974, unless otherwise modified, changed, or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., March 15, 1974.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended (49 U.S.C. 1, 12, 15, and 17(2)). Interprets or applies Secs. 1(10–17), 15(4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911 (49 U.S.C. 1(10–17), 15(4), and 17(2)))

It is further ordered, That a copy of this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this amendment be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board.

[SEAL] ROBERT L. OSWALD,
Secretary.

[FR Doc.74-6184 Filed 3-15-74;8:45 am]

[S.O. 1177]

PART 1033—CAR SERVICE

Atchison, Topeka and Santa Fe Railway Co. et al.

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 13th day of March, 1974.

It appearing, that Union Terminal Company of Dallas, Texas, has been authorized to discontinue separate operations and will be dissolved; that certain tracks presently operated, owned or used by this company are required for normal freight operations of the railroads serving Dallas; that these railroads have formed a "Right-of-Way District" to acquire joint ownership and use of these tracks; and that continued operation of these railroads over these tracks formerly owned by the Union Terminal Company is necessary in the interest of the public and the commerce of the people; that notice and public procedure herein are impracticable and contrary to the public interest; and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered, That:

§ 1033.1177 Service Order No. 1177.

(a) The Atchison, Topeka and Santa Fe Railway Company, Chicago, Rock Island and Pacific Railroad Company, Fort Worth and Denver Railway Company, Missouri-Kansas-Texas Railroad Company, St. Louis-San Francisco Railway Company, St. Louis Southwestern Railway Company, Southern Pacific Transportation Company, and the Texas and Pacific Railway Company authorized to conduct joint operations over certain tracks located at Dallas, Texas. The Atchison, Topeka and Santa Fe Railway Company (ATSF), Chicago, Rock Island and Pacific Railroad Company (RI), Fort Worth and Denver Railway Company (FWD), Missouri-Kansas-Texas Railroad (MKT), St. Louis-San Francisco Railway Company (SLSF), St. Louis Southwestern Railway Company

V 39 53 MAR 18 74 XUM

(SSW), Southern Pacific Transportation Company (SP), and the Texas and Pacific Railway Company (TP) be, and they are hereby authorized to operate over tracks formerly owned or used by the Union Terminal Company (UT) of Dallas, Texas, and to be now identified as the "Right-of-Way District" extending between Caruth Street, on the north and the crossing of the ATSF at Terminal Junction on the south, all located at Dallas, Texas, pending disposition by the Commission of the application of these railroads in FD 27595 seeking permanent authority to acquire and operate over these tracks.

(b) *Rates applicable.* Inasmuch as this operation of the ATSF, RI, FWD, MKT, SLSF, SSW, SP, and TP over these tracks formerly operated by the UT is deemed to be due to carriers' disability, the rates applicable to traffic moved by the aforementioned lines over tracks formerly operated by the UT shall be the rates which were applicable on the shipments at the time of shipment as originally routed.

(c) In executing the directions of the Commission, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to said traffic. Divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(d) *Application.* The provisions of this order shall apply to intrastate, interstate, and foreign traffic.

(e) *Effective date.* This order shall become effective at 11:59 p.m., March 13, 1974.

(f) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., November 30, 1974, unless otherwise modified, changed, or suspended by order of this Commission.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; (49 U.S.C. 1, 12, 15, and 17(2)). Interprets or applies Secs. 1(10–17), 15(4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; (49 U.S.C. 1(10–17), 15(4), and 17(2)))

It is further ordered, That copies of this order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board.

[SEAL] ROBERT L. OSWALD,
Secretary.

Title 50—Wildlife and Fisheries

CHAPTER II—NATIONAL MARINE FISHERIES SERVICE, NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION, DEPARTMENT OF COMMERCE

AQUATIC MAMMALS OTHER THAN WHALES

Endangered Species

The Endangered Species Act of 1973 (hereinafter referred to as the Act of 1973) was signed into law on December 28, 1973 (Pub. L. 93–205). Under the Act of 1973 the Secretary of Commerce is given responsibilities in regard to the conservation of certain endangered and threatened species.

Section 4(f)(2)(B)(i) of the Act of 1973 provides that regulations which were promulgated under the Endangered Species Conservation Act of 1969 (hereinafter referred to as the Act of 1969), may be republished and readopted where appropriate to carry out the provisions of the Act of 1973. This procedure allows regulations to be in effect to protect certain endangered species until new regulations are promulgated in accordance with section 4(f)(2)(A) of the Act of 1973.

Section 4(c)(3) of the Act of 1973 provides that species which were on any endangered species list under the Act of 1969 as of the day before the Act of 1973 became effective, shall be deemed to be "endangered species" under that Act of 1973, until such time as any former list (under the Act of 1969) is republished to conform with the classifications for "endangered" and "threatened" species under the Act of 1973.

The purpose of this rule making is to insure the continuity of protection of endangered species listed under the Act of 1969 by (1) republishing and adopting the rules promulgated under the Act of 1969 as they apply to permit issuance and enforcement for endangered species under the program responsibilities of the Secretary of Commerce, and (2) by identifying the lists of endangered species which continue in effect pursuant to the Act of 1973.

All of the regulations to be readopted and the lists of endangered species appear or are referred to in the rule making published by the Department of the Interior on January 4, 1974, at 39 FR 1157. These regulations as they pertain to the species under the jurisdiction of the Department of Commerce are set forth below, and do not contain substantive changes from the regulations published and referred to by the Department of the Interior on January 4, 1974, at 39 FR 1157. Technical changes have been made to provide for the correct placement of the regulations in the Code of Federal Regulations and to clearly designate the proper offices and officials to receive correspondence. For additional clarity, the definitions of "Director" and "Secretary" have been placed in the definitions section of the regulations. At a future date, in accordance with the procedures prescribed by the Act of 1973, regulations will be promulgated to control taking and other activities newly covered by the Act of 1973. In addition, as required, necessary additions or modifications will be made to the list of endangered species, and a list of threatened species will be established.

Accordingly, these regulations, as they apply to permit issuance and enforcement activities for endangered species under the program responsibilities of the Secretary of Commerce, are hereby adopted.

Effective Date: These regulations shall be effective on March 18, 1974.

Dated: March 12, 1974.

JACK W. GEHRINGER,
Acting Director.

PART 217—GENERAL PROVISIONS

Subpart A—Introduction

Sec.
217.1 Purpose of regulations.
217.2 Scope of regulations.
217.3 Other applicable laws.
217.4 When regulations apply.

Subpart B—Definitions

217.11 Scope of definitions.
217.12 Definitions.
217.13 List of migratory birds.

Subpart C—Addresses

217.21 Director.
217.22 Division of Law Enforcement and Marine Mammal Protection.

AUTHORITY: Endangered Species Act of 1973, sec. 11(f), 87 Stat. 884, Pub. L. 93–205; Fish and Wildlife Act of 1956, sec. 13(d), 88 Stat. 905 amending 85 Stat. 480.

Subpart A—Introduction

§ 217.1 Purpose of regulations.

The regulations of Parts 217–222 are promulgated to implement the following statutes enforced by the National Marine Fisheries Service which regulate the taking, possession, transportation, sale, purchase, barter, exportation, and importation of wildlife:

Endangered Species Act of 1973, section 11(f), 87 Stat. 884, Pub. L. 93–205; Fish and Wildlife Act of 1956, 16 U.S.C. 742a–1.

§ 217.2 Scope of regulations.

The various provisions of Parts 217–222 of this chapter are interrelated, and particular note should be taken that the parts must be construed with reference to each other.

§ 217.3 Other applicable laws.

No statute or regulation of any State shall be construed to relieve a person from the restrictions, conditions, and requirements contained in Parts 217–222 of this chapter. In addition, nothing in Parts 217–222 of this chapter, nor any permit issued under Parts 217–222 of this chapter, shall be construed to relieve a person from any other requirements imposed by a statute or regulation of any State or of the United States, including any applicable health, quarantine, agricultural, or customs laws or regulations, or other National Marine Fisheries Service enforced statutes or regulations.

§ 217.4 When regulations apply.

The regulations of Parts 217–222 of this chapter shall apply to all matters arising after the effective date of such regulations, with the following exceptions:

(a) *Civil penalty proceedings.* Except as otherwise provided in section 218.25, the civil penalty assessment procedures contained in Parts 217–222 of this chapter shall apply only to any proceeding instituted by notice of violation dated subsequent to the effective date of these regulations, regardless of when the act or omission which is the basis of a civil penalty proceeding occurred.

(b) *Permits.*—The regulations in Parts 217–222 of this chapter shall apply to any permit application received after the effective date of the appropriate regulations in Parts 217–222 of this chapter and, insofar as appropriate, to any permit which is renewed after such effective date.

Subpart B—Definitions

§ 217.11 Scope of definitions.

In addition and subject to definitions contained in applicable statutes and subsequent parts or sections of Parts 217–222 of this chapter, words or their variants shall have the meanings ascribed in this subpart. Throughout Parts 217–222 of this chapter, words in the singular form shall include the plural, words in the plural form shall include the singular, and words in the masculine form shall include the feminine.

§ 217.12 Definitions.

"Bureau" means the Bureau of Sport Fisheries and Wildlife, United States Fish and Wildlife Service, Department of the Interior.

"Country of exportation" means the last country from which the animal was exported before importation into the United States.

"Country of origin" means the country where the animal was taken from the wild, or the country of natal origin of the animal.

"Director" means the Director of the National Marine Fisheries Service, National Oceanic and Atmospheric Administration, Department of Commerce, or his authorized representative.

"Fish or wildlife" means any wild mammal, bird, fish, amphibian, reptile, mollusk, or crustacean, whether or not raised in captivity, and including any part, product, egg, or offspring thereof, or the dead body or parts thereof, whether or not included in a manufactured product or in a processed food product.

"Foreign commerce" includes, among other things, any transaction (1) between persons within one foreign country, or (2) between persons in two or more foreign countries, or (3) between a person within the United States and a person in one or more foreign countries, or (4) between persons within the United States, where the fish or wildlife in question are moving in any country or countries outside the United States.

"Import" means to land on, bring into, or introduce into, or attempt to land on, bring into, or introduce into any place subject to the jurisdiction of the United States, whether or not such landing, bringing, or introduction constitutes an importation within the meaning of the tariff laws of the United States.

"Permit" means any document so designated as a permit by the National Marine Fisheries Service and signed by an authorized official of the National Marine Fisheries Service.

"Person" means any individual, firm, corporation, association, partnership, club, or private body, any one or all, as the context requires.

"Possession" means the detention and control, or the manual or ideal custody of anything which may be the subject of property, for one's use and enjoyment, either as owner or as the proprietor of a qualified right in it, and either held personally or by another who exercises it in one's place and name. Possession includes the act or state of possessing and that condition of facts under which one can exercise his power over a corporeal thing at this pleasure to the exclusion of all other persons. Possession includes constructive possession which means not actual but assumed to exist, where one claims to hold by virtue of some title, without having actual custody.

"Secretary" means the Secretary of Commerce or his authorized representative.

"State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, and Guam.

"Take" means to pursue, hunt, shoot, wound, kill, trap, capture, or collect, or attempt to pursue, hunt, shoot, wound, kill, trap, capture, or collect.

"Transportation" means to ship, convey, carry or transport by any means whatever, and deliver or receive for such shipment, conveyance, carriage, or transportation.

"United States" means the several States of the United States of America, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, and Guam.

"Whoever" means the same as person.

"Wildlife" means the same as fish or wildlife.

Subpart C—Addresses

§ 217.21 Director.

Mail forwarded to the Director of the National Marine Fisheries Service should be addressed:

Director
National Marine Fisheries Service

218.21 Commencement of hearing proceedings.
218.22 Appearance and practice.
218.23 Hearings.
218.24 Final administrative decision.
218.25 Appeals.
218.26 Reporting service.

AUTHORITY: Endangered Species Act of 1973, section 11(f), 7 Stat. 884, Pub. L. 93–205.

Subpart A—Introduction

§ 218.1 Purpose of regulations.

The regulations contained in this part provide uniform rules and procedures for the assessment of civil penalties in connection with violations of certain laws and regulations enforced by the National Marine Fisheries Service.

§ 218.2 Scope of regulations.

The regulations contained in this part apply only to actions arising under the following laws and regulations issued thereunder:

Endangered Species Act of 1973, 87 Stat. 884, Pub. L. 93–205.

§ 218.3 Filing of documents.

(a) Whenever a document or other paper is required to be filed under this Part within a certain time, such document or paper will be considered filed as of the date of the postmark if mailed, or the date actually delivered to the office where filing is required. The time periods set forth in this Part shall begin to run as of the day following the date of the document or other paper.

(b) If an oral or written application is made to the Director up to 10 calendar days after the expiration of a time period established in this Part for the required filing of documents or other papers, the Director may permit a late filing within a fixed period where reasonable grounds are found for an inability or failure to file within the time period required. All such extensions shall be in writing. Except as provided in this subsection, no other requests for an extension of time may be granted.

Subpart B—Assessment Procedure

§ 218.11 Notice of violation.

(a) A notice of violation (hereinafter "notice"), shall be issued by the Director and served personally or by registered or certified mail, return receipt requested, upon the person believed to be subject to a civil penalty (the respondent). The notice shall contain: (1) A concise statement of the facts believed to show a violation, (2) a specific reference to the provisions of the statute or regulation allegedly violated, and (3) the amount of penalty proposed to be assessed. The

V 39 53 MAR 18 74 XUM

notice may also contain an initial proposal for compromise or settlement of the case. The notice shall also advise the respondent of his right to file a petition for relief pursuant to § 218.12, or to await the Director's notice of assessment.

(b) The respondent shall have 45 days from the date of the notice of violation in which to respond. During this time he may:

(1) undertake informal discussions with the Director;

(2) accept the proposed penalty, or the compromise, if any, offered in the notice;

(3) file a petition for relief; or

(4) take no action, and await the Director's decision, pursuant to § 218.13.

(c) Acceptance of the proposed penalty or the compromise shall be deemed to be a waiver of the notice of assessment required by § 218.14, and of the opportunity for a hearing. Any counter offer of settlement shall be deemed a rejection of the proposed offer of compromise.

§ 218.12 Petition for relief.

If the respondent so chooses he may ask that no penalty be assessed or that the amount be reduced, and he may admit or contest the legal sufficiency of the charge and the Director's allegations of facts, by filing a petition for relief [hereinafter "petition"] with the Director at the address specified in the notice within 45 days of the date thereof. The petition shall be in writing and signed by the respondent. If the respondent is a corporation, the petition must be signed by an officer authorized to sign such documents. It must set forth in full the legal or other reasons for the relief.

§ 218.13 Decision by the Director.

Upon expiration of the period required or granted for filing of a petition for relief, the Director shall proceed to make an assessment of a civil penalty, taking into consideration information available to him and such showing as may have been made by the respondent, either pursuant to § 218.11 or § 218.12, or upon further request of the Director.

§ 218.14 Notice of assessment.

The Director shall notify the respondent by a written notice of assessment, by personal service or by registered or certified mail, return receipt requested, of his decision pursuant to § 218.13. He shall set forth therein the facts and conclusions upon which he decided that the violation did occur and appropriateness of the penalty assessed.

§ 218.15 Request for a hearing.

Except where a right to request a hearing is deemed to have been waived as provided in § 218.11, the respondent may, within 45 calendar days from the date of the notice of assessment referred to in § 218.14, file a dated, written request for a hearing with the Director, National Marine Fisheries Service, Washington, D.C. 20235. The request should state the respondent's preference as to the place and date for a hearing. The request must enclose a copy of the notice of violation and notice of assessment. A copy of the request shall be served upon the Director personally or by registered or certified mail, return receipt requested, at the address specified in the notice.

§ 218.16 Final administrative decision.

(a) Where no request for a hearing is filed as provided in § 218.15 the Director's assessment shall become effective and shall constitute the final administrative decision of the Secretary on the 45th calendar day from the date of the notice of assessment.

(b) If a request for a hearing is timely filed in accordance with § 218.15, the date of the final administrative decision in the matter shall be as provided in Subpart C of this part.

§ 218.17 Payment of final assessment.

When a final administrative decision becomes effective in accordance with this Part 218, the respondent shall have 20 calendar days from the date of the final administrative decision within which to make full payment of the penalty assessed. Payment will be timely only if received in Office of the Director during normal business hours, on or before the 20th day. Upon a failure to pay the penalty, the General Counsel of the Department may request the Attorney General to institute a civil action in the U.S. District Court to collect the penalty.

Subpart C—Hearing and Appeal Procedures

§ 218.21 Commencement of hearing procedures.

Proceedings under this subpart are commenced upon the timely filing with the Director of a request for a hearing, as provided in § 218.15 of Subpart B. Upon receipt of a request for a hearing, the Secretary will assign an administrative law judge to the case. Notice of assignment will be given promptly to the parties, and thereafter, all pleadings, papers, and other documents in the proceeding shall be filed directly with the administrative law judge, with copies served on the opposing party.

§ 218.22 Appearance and practice.

(a) Subject to the provisions of 43 CFR 1.3, the respondent may appear in person, by representative, or by counsel, and may participate fully in these proceedings.

(b) Department counsel designated by the General Counsel of the Department shall represent the Director in these proceedings. Upon notice to the Director of the assignment of an administrative law judge to the case, said counsel shall enter his appearance on behalf of the Director and shall file all petitions and correspondence exchanged by the Director and the respondent pursuant to Subpart B of this Part, which shall become part of the hearing record. Thereinafter, service upon the Director in these proceedings shall be made to his counsel.

§ 218.23 Hearings.

(a) The administrative law judge shall have all powers accorded by law and necessary to preside over the parties and the proceedings and to make decisions in accordance with 5 U.S.C. Sections 554–557. Failure to appear at the time set for hearing shall be deemed a waiver of the right to a hearing and consent to the making of a decision on the record made at the hearing. Copies of the transcript may be inspected or copied.

(b) The transcript of testimony, the exhibits, and all papers, documents, and requests filed in the proceedings, shall constitute the record for decision. The judge will render a written decision upon the record, which shall set forth his findings of fact and conclusions of law, and the reasons and basis therefor, and an assessment of a penalty, if any.

§ 218.24 Final administrative action.

Unless a notice of request for an appeal is filed in accordance with § 218.25 of this Subpart C, the administrative law judge's decision shall constitute the final administrative determination of the Secretary in the matter and shall become effective 30 calendar days from the date of the decision.

§ 218.25 Appeal.

(a) Either the respondent or the Director may seek an appeal from the decision of an administrative law judge rendered subsequent to February 1, 1974, by the filing of a "Notice of Request for Appeal" with the Secretary within 30 calendar days of the date of the administrative law judge's decision. Such notice shall be accompanied by proof of service on the administrative law judge and the opposing party.

(b) Upon receipt of such a request, the Secretary shall appoint an ad hoc appeals board to determine whether an appeal should be granted, and to hear and decide an appeal. To the extent they are not inconsistent herewith, the provisions of Subpart G of 43 CFR Part 4 shall apply to appeal proceedings under this Subpart. The determination of the board to grant or deny an appeal, as well as its decision on the merits of an appeal, shall be in writing and become effective as the final administrative determination of the Secretary in the proceeding on the date it is rendered, unless otherwise specified therein.

§ 218.26 Reporting service.

Copies of decisions in civil penalty proceedings instituted under statutes referred to in Subpart A of this Part and rendered subsequent to February 1, 1974, may be obtained by letter of request addressed to the Secretary. Fees for this service shall be as established by the Secretary.

PART 219—SEIZURE AND FORFEITURE PROCEDURES

Subpart A—Introduction

Sec.
219.1 Purpose of regulations.
219.2 Scope of regulations.

Subpart B—Holding, Bonding, and Return of Certain Wildlife or Other Property

219.11 Notification of seizure.
219.12 Seizure by Customs.
219.13 Bonded release.
219.14 Return of seized wildlife or other property.

AUTHORITY: Endangered Species Act of 1973, section 11(f), 87 Stat. 884, Pub. L. 93–205.

Subpart A—Introduction

§ 219.1 Purpose of regulations.

The regulations in this part provide rules and procedures for the seizure, holding, bonding, abandonment, and forfeiture of wildlife and other property, which under certain laws enforced by the National Marine Fisheries Service are subject to seizure and forfeiture.

§ 219.2 Scope of regulations.

(a) The regulations contained in Subpart B of this Part apply only to actions arising under the following laws and regulations issued thereunder:

Endangered Species Act of 1973, 87 Stat. 884, Pub. L. 93–205.

Subpart B—Holding, Bonding, and Return of Certain Wildlife or Other Property

§ 219.11 Notification of seizure.

Except where the owner or consignee is personally notified or seizure is made pursuant to a search warrant, the Director shall, as soon as practicable following his seizure or other receipt of seized wildlife or other property, mail a notification of seizure by registered or certified mail, return receipt requested, to the owner or consignee, if known. Such notification shall describe the seized wildlife or other property, and shall state the time, place, and reason for the seizure.

§ 219.12 Seizure by Customs.

Any authorized employee or officer of the U.S. Customs Service who has seized any wildlife or other property shall deliver such seizure to the Division of Law Enforcement and Marine Mammal Protection (See § 217.22), or its designee, who shall either hold such seized wildlife or other property or arrange for its proper handling and care.

§ 219.13 Bonded release.

The Director may, in his sole discretion, accept an appearance bond or other security in place of wildlife or other property seized. Said bond or security may contain such additional conditions as may be appropriate. Such bond or security may be in an amount up to $10,000 per offense and shall only be allowed where the Director determines either that the health or safety of any wildlife so requires, or that the release of the seized wildlife or other property would not frustrate the purposes of the statute.

§ 219.14 Return of seized wildlife or other property.

If, at the conclusion of the appropriate proceedings, the seized wildlife or other property is to be returned to the owner or consignee, the Director shall issue a letter or other document authorizing its return. This letter or other document shall be delivered personally or sent by registered or certified mail, return receipt requested, and shall identify the owner or consignee, the seized property, and, if appropriate, the bailee of the seized wildlife or other property. It shall also provide that upon presentation of the letter or other document and proper identification, the seized wildlife or other property is authorized to be released, provided it is properly marked in accordance with applicable State or Federal requirements.

§ 219.15 Abandonment provisions.

When any wildlife or other property is subject to seizure and forfeiture, a blank assent to forfeiture form (Customs Form 4607, or a similar National Marine Fisheries Service form) may be given or sent, with the notification required by §218.11 or by § 219.11, to the owner thereof. The owner may voluntarily abandon the wildlife or other property to the Government by executing and returning the assent to forfeiture form. Such abandonment will be considered by the Director in the disposition of the case, and may be the basis for the compromise of any proposed assessment of a civil penalty under Part 218.

PART 220—GENERAL PERMIT PROCEDURES

Subpart A—Introduction

Sec.
220.1 General.
220.2 Purpose of regulations.
220.3 Scope of regulations.
220.4 Emergency variation from requirements.

Subpart B—Application for Permits

220.11 Procedure for obtaining a permit.
220.12 Information requirements on permit applications.
220.13 Abandoned application.
220.14 Insufficient fee.

Subpart C—Permit Administration

220.21 Issuance of permits.
220.22 Duration of permit.
220.23 Amendment of applications or permits.
220.24 Renewal of permit.
220.25 Permits not transferable; agents.
220.26 Right of succesion by certain persons.
220.27 Change of mailing address.
220.28 Change in name.
220.29 Official endorsement of changes required.
220.30 Certain continuancy of activity.
220.31 Discontinuance of activity.

Subpart D—Conditions

220.41 Recall and amendment of permit during its term.
220.42 Permits are specific.
220.43 Alteration of permits.
220.44 Display of permit.
220.45 Filing of reports.
220.46 Maintenance of records.
220.47 Inspection requirement.

Subpart E—Violations of the Permit

220.51 Penalties for violation of a permit; notice; demonstration of compliance.

AUTHORITY.—Endangered Species Act of 1973, section 11(f), 87 Stat. 884, Pub. L. 93–205; act of August 31, 1951, Ch. 376, Title 5, section 501, 65 Stat. 290 (31 U.S.C. 483a).

Subpart A—Introduction

§ 220.1 General.

Each person intending to engage in an activity for which a permit is required by Parts 217–222 of this chapter shall, before commencing such activity, obtain a valid permit authorizing such activity. Each person who desires to obtain the permit privileges authorized by Parts 217–222 of this chapter must make application for such permit in accordance with the requirements of this Part 220 of this chapter and the other regulations in Parts 217–222 of this chapter which set forth the additional requirements for the specific permits desired. If the activity for which permission is sought is covered by the requirements of more than one Part of Parts 217–222 of this chapter, the requirements of each Part must be met. If the information required for each specific permitted activity is included, one application will be accepted for all permits required, and a single permit will be issued.

§ 220.2 Purpose of regulations.

The regulations contained in this part will provide uniform rules and procedures for application, issuance, renewal, conditions, revocation, and general administration of permits issuable pursuant to Parts 217–222 of this chapter.

§ 220.3 Scope of regulations.

The provisions in this part are in addition to, and are not in lieu of, other permit regulations of Parts 217–222 of this chapter and apply to all permits issued thereunder, including "Import and Marking" (Part 221), "Endangered Wildlife" (Part 222).

§ 220.4 Emergency variation from requirements.

The Director may approve variations from the requirements of this part when he finds that an emergency exists and that the proposed variations will not hinder effective administration of Parts 217–222 of this chapter, and will not be unlawful.

Subpart B—Application for Permits

§ 220.11 Procedure for obtaining a permit.

The following general procedures apply to applications for permits:

(a) *Forms.*—Applications must be submitted by letter containing all necessary information, attachments, certification, and signature. In no case will oral or telephone applications be accepted.

V 39 53 MAR 18 74 XUM

(b) *Forwarding instructions.*—Applications must be submitted to the Division of Law Enforcement and Marine Mammal Protection. The address is listed in § 217.22.

(c) *Time requirement.*—Applications must be received by the appropriate official of the National Marine Fisheries Service at least 30 calendar days prior to the date on which the applicant desires to have the permit made effective. The National Marine Fisheries Service will, in all cases, attempt to process applications in the shortest possible time, and most complete and properly addressed applications will be acted on within 30 days. The National Marine Fisheries Service does not, however, guarantee 30 day issuance and some permits cannot be issued within that time period.

§ 220.12 Information requirements on permit applications.

(a) *General information required for all permit applications.*—All applications for permits must contain the following information:

(1) Applicant's name, mailing address, and phone number;

(2) Where the applicant is an individual, his date of birth, height, weight, color of hair, color of eyes, and sex; and business or institutional affiliation, if any, having to do with the wildlife to be covered by the permit;

(3) Where the applicant is a corporation, firm, partnership, institution, or agency, either private or public, the name and address of the president or principal officer;

(4) Location where the permitted activity is to be conducted;

(5) Part and section of Parts 217–222 under which the permit is requested and such additional information and justification, including supporting documents from appropriate authorities, as required by that section (Paragraph (b) of this section contains a list of sections of Parts 217–222 where the additional information needed on applications for various permits may be found.)

(6) Where the permitted activity involves an importation from any foreign country which restricts the taking, possession, transportation, exportation or sale of wildlife, the appropriate documentation, as indicated in § 221.42 of this subchapter;

(7) Certification in the following language:

> I hereby certify that I have read and am familiar with the regulations contained in Title 50, Part 220, of the Code of Federal Regulations and the other applicable parts in Parts 217–222 of Chapter II of Title 50, and I further certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement hereon may subject me to the criminal penalties of 18 U.S.C. 1001.

(8) Desired effective date of permit except where issuance date is fixed by the part under which the permit is issued;

(9) Date;

(10) Signature of the applicant; and

(11) Such other information as the Director determines relevant to the processing of the application.

(b) *Additional information required on permit applications.*—As stated in paragraph (a) (5) of this section certain additional information is required on all applications. These additional requirements may be found by referring to the section of Parts 217–222 of this chapter cited after the type of permit for which application is being made:

Type or permit:	Section
Importation at nondesignated ports:	
Scientific	221.
Deterioration prevention	221.
Marking of package or container:	
Symbol marking	221.
Endangered wildlife permits:	
Zoological, educational, scientific or propagation	222.23

§ 220.13 Abandoned application.

Upon receipt of an incomplete or improperly executed application, the applicant shall be notified of the deficiency in the application. If the applicant fails to supply the deficient information or otherwise fails to correct the deficiency within 60 days following the date of notification, the application shall be considered abandoned.

Subpart C—Permit Administration

§ 220.21 Issuance of permits.

(a) No permit may be issued prior to the receipt of a written application therefor, unless a written variation from the requirements, as authorized by § 220.4 is inserted into the official file of the National Marine Fisheries Service. An oral or written representation of an employee or agent of the United States Government, or an action of such employee or agent, shall not be construed as a permit unless it meets the requirements of a permit as defined in 50 CFR 217.12.

(b) Upon receipt of a properly executed application for a permit, the Director shall issue the appropriate permit unless—

(1) The applicant has been assessed a civil penalty as convicted of any civil or criminal provision of any statute or regulation relating to the activity for which the application is filed, if such assessment or conviction, evidences a lack of responsibility;

(2) The applicant has failed to disclose material information required, or has made false statements as to any material fact, in connection with his application;

(3) The applicant has failed to demonstrate a valid justification for the permit and a showing of responsibility;

(4) The authorization requested potentially threatens a wildlife population, or

(5) The Director finds through further inquiry or investigation, or otherwise, that the applicant is not qualified.

(c) Each permit shall bear a serial number. Such number may be reassigned to the permittee to whom issued so long as he maintains continuity of renewal.

(d) The applicant shall be notified in writing of the denial of any permit request, and the reasons therefor. If authorized in the notice of denial, the applicant may submit further information, or reasons why the permit should not be denied. Such further submissions shall not be considered a new application. The final action by the Director shall be considered the final administrative decision of the Department.

§ 220.22 Duration of permit.

Permits shall entitle the person to whom issued to engage in the activity specified in the permit, within the limitations of the applicable statute and regulations contained in Parts 217–222 of this chapter for the period stated on the permit, unless sooner terminated.

§ 220.23 Amendment of applications or permits.

Where circumstances have changed so that an applicant or permittee desires to have any term or condition of his application or permit modified, he must submit in writing full justification and supporting information in conformance with the provisions of this part and the part under which the permit has been issued or requested. Such applications for modification are subject to the same issuance criteria as are original applications, as provided in § 220.21.

§ 220.24 Renewal of permit.

Where the permit is renewable and a permittee intends to continue the activity described in the permit during any portion of the year ensuing its expiration, he shall, unless otherwise notified in writing by the Director, file a request for permit renewal, together with a certified statement that the information in his original application is still currently correct, or a statement of all changes in the original application, accompanied by any required fee at least 30 days prior to the expiration of his permit. Any person holding a valid renewable permit, who has complied with the foregoing provision of this section, may continue such activities as were authorized by his expired permit until his renewal application is acted upon.

§ 220.25 Permits not transferable; agents.

(a) Permits issued under this part are not transferable or assignable. Some permits authorize certain activities in connection with a business or commercial enterprise and in the event of any lease, sale, or transfer of such business entity, the successor must obtain a permit prior to continuing the permitted activity. However, certain limited rights of succession are provided in § 220.26.

(b) Except as otherwise stated on the face of a permit, any person who is under the direct control of the permittee, or who is employed by or under contract to the permittee for the purposes authorized by the permit, may carry out the activity authorized by the permit.

§ 220.26 Right of succession by certain persons.

(a) Certain persons, other than the permittee, are granted the right to carry on a permitted activity for the remainder of the term of a current permit provided they comply with the provisions of paragraph (b) of this section. Such persons are the following:

(1) The surviving spouse, child, executor, administrator, or other legal representative of a deceased permittee; and

(2) A receiver or trustee in bankruptcy or a court designated assignee for the benefit of creditors.

(b) In order to secure the right provided in this section, the person or persons desiring to continue the activity shall furnish the permit to the issuing officer for endorsement within 90 days from the date the successor begins to carry on the activity.

§ 220.27 Change of mailing address.

During the term of his permit, a permittee may change his mailing address without procuring a new permit. However, in every case notification of the new mailing address must be forwarded to the issuing official within 30 days after such change. This section does not authorize the change of location of the permitted activity for which an amendment must be obtained in accordance with § 220.23.

§ 220.28 Change in name.

A permittee continuing to conduct a permitted activity is not required to obtain a new permit by reason of a mere change in trade name under which a business is conducted or a change of name by reason of marriage or legal decree: *Provided*, That such permittee must furnish his permit to the issuing official for endorsement within 30 days from the date the permittee begins conducting the permitted activity under the new name.

§ 220.29 Official endorsement of changes required.

Any change in a permit must be made by endorsement of the Director or issuing officer. Any modification or change in an issued permit, other than those specifically provided for in this subpart, may be granted or denied in the discretion of the Director.

§ 220.30 Certain continuancy of activity.

A permittee who furnishes his permit to the issuing official for endorsement or correction in compliance with the provisions of this subpart may continue his operations pending its return.

§ 220.31 Discontinuance of activity.

When any permittee discontinues his activity, he shall, within 30 days thereof, mail his permit and a request for cancellation to the issuing officer, and said permit shall be deemed void upon receipt. No refund of any part of an amount paid as a permit fee shall be made where the operations of the permittee are, for any reason, discontinued during the tenure of an issued permit.

Subpart D—Conditions

§ 220.41 Recall and amendment of permit during its term.

All permits are issued subject to the condition that the National Marine Fisheries Service reserves the right to recall and amend the provisions of a permit for just cause at any time during its term. Such amendments take effect on the date of notification, unless otherwise specified.

§ 220.42 Permits are specific.

The authorizations on the face of a permit which set forth specific times, dates, places, methods of taking, numbers and kinds of wildlife, location of activity, authorize certain circumscribed transactions, or otherwise permit a specifically limited matter, are to be strictly construed and shall not be interpreted to permit similar or related matters outside the scope of strict construction.

§ 220.43 Alteration of permits.

Permits shall not be altered, erased, or mutilated, and any permit which has been altered, erased, or mutilated shall immediately become invalid. Unless specifically permitted on the face thereof, no permit shall be copied, nor shall any copy of a permit issued pursuant to Parts 217–222 of this chapter be displayed, offered for inspection, or otherwise used for any official purpose for which the permit was issued.

§ 220.44 Display of permit.

Any permit issued under this part shall be displayed for inspection upon request to the Director or his agent, or to any other person relying upon its existence.

§ 220.45 Filing of reports.

Permittees may be required to file reports of the activities conducted under the permit. Any such reports shall be filed not later than March 31 for the preceding calendar year ending December 31, or any portion thereof, during which a permit was in force, unless the regulations of Parts 217–222 of this chapter or the provisions of the permit set forth other reporting requirements.

§ 220.46 Maintenance of records.

From the date of issuance of the permit, the permittee shall maintain complete and accurate records of any taking, possession, transportation, sale, purchase, barter, exportation, or importation of wildlife pursuant to such permit. Such records shall be kept current and shall include names and addresses of persons with whom any wildlife has been purchased, sold, bartered, or otherwise transferred, and the date of such transaction, and such other information as may be required or appropriate. Such records, unless otherwise specified, shall be entered in books, legibly written in the English language. Such records shall be retained for 5 years from the date of issuance of the permit.

§ 220.47 Inspection requirement.

Any person holding a permit under Parts 217–222 of this chapter shall allow the Director's agent to enter his premises at any reasonable hour to inspect any wildlife held or to inspect, audit, or copy any permits, books, or records required to be kept by regulations of Parts 217–222 of this chapter.

Subpart E—Violations of the Permit

§ 220.51 Penalties for violation of a permit, notice; demonstration of compliance.

(a) Any violation of the applicable provisions of this Subchapter, or of the statute under which the permit was issued, or a condition of the permit, may subject the permittee to the following penalties:

(1) The penalty provided in the statute under which the permit was issued;

(2) Temporary suspension of the permit for a specified period; and

(3) Revocation of the permit. When revoked, permits must be surrendered to the Director on demand.

(b) Except in cases of willfullness or those in which the public health safety or interest requires, and prior to any suspension or revocation of a permit, the permittee shall be given:

(1) Notice by the National Marine Fisheries Service in writing of the facts or conduct which may warrant the suspension or revocation; and

(2) Opportunity to demonstrate or achieve compliance with all permit requirements.

PART 221—DESIGNATED PORTS

§ 221.1 Importation at designated ports.

Any endangered or threatened species, or product of these, which is subject to the jurisdiction of the National Marine Fisheries Service, National Oceanic and Atmospheric Administration, Department of Commerce and is intended for importation into the United States shall be subject to the provisions of 50 CFR Part 14. Importers are advised to see 50 CFR Part 14 for importation requirements and information.

PART 222—ENDANGERED WILDLIFE

Subpart A—Introduction

Sec.
222.1 Purpose of regulations.
222.2 Scope of regulations.

Subpart B [Reserved]

Subpart C—Endangered Wildlife Importation Permits

222.21 General permit requirement.
222.22 [Reserved]
222.23 Zoological, educational, scientific, or propagation permits.

AUTHORITY: Endangered Species Act of 1973, section 11(f), 87 Stat. 884, Pub. L. 93–205.

Subpart A—Introduction

§ 222.1 Purpose of regulations.

The regulations contained in this part identify the species or subspecies of native and foreign wildlife determined by the Secretary to be threatened with extinction, establish procedures and criteria for issuance of permits for importation of endangered foreign wildlife, and

V 39 53
MAR 18 74
XUM

provide for public participation in the amendment of the endangered wildlife lists. The regulations of this part implement, in part, the Endangered Species Act of 1973, 87 Stat. 884, Pub. L. 93–205.

§ 222.2 Scope of regulations.

(a) The regulations of this part apply only to endangered wildlife.

(b) The provisions in this part are in addition to, and are not in lieu of, other regulations of Parts 217–222 of this chapter which may require a permit or prescribe additional restrictions or conditions for the importation, exportation, and interstate transportation of wildlife. (See also Part 220 of this subchapter.)

Subpart B [Reserved]

Subpart C—Endangered Wildlife Importation Permits

§ 222.21 General permit requirement.

No person shall import from any foreign country any species or subspecies of wildlife which the Secretary has determined to be threatened with worldwide extinction, as evidenced by its inclusion on the list of endangered foreign wildlife (50 CFR 17.11) without a valid permit issued pursuant to this subpart C.

§ 222.22 [Reserved]

§ 222.23 Zoological, educational, scientific, or propagation permits.

The Director may, upon receipt of an application and in accordance with the issuance criteria of this section, issue a permit authorizing the importation of endangered foreign wildlife for zoological, scientific, or educational purposes, or for the propagation of such wildlife in captivity.

(a) *Application procedures.*—Application for permits to import endangered foreign wildlife for zoological, educational, scientific, or propagational purposes shall be submitted by letter of application to the Director. Each such application must contain the general information and certification required by § 220.12(a) of this subchapter plus the following additional information:

(1) Common and scientific names of the species or subspecies, number, age, and sex of the wildlife to be covered in the permit;

(2) Copy of the contract or other agreement under which such wildlife is to be imported, showing the country of origin, name and address of the seller or consignor, date of the contract, number and weight (if available), and description of the wildlife;

(3) A full statement of justification for the permit, including details of the project or other plans for utilization of the wildlife in relation to zoological, educational, scientific, or propagational purposes as appropriate and the planned disposition of the wildlife upon termination of the project;

(4) A description and the address of the institution or other facility where the wildlife will be used or maintained;

(5) A statement that at the time of application the wildlife to be imported is still in the wild, was born in captivity, or has been removed from the wild;

(6) A résumé of the applicant's attempts to obtain the wildlife to be imported from sources which would not cause the death or removal of additional animals from the wild, if appropriate; and

(7) If live wildlife is to be imported, include:

(i) A complete description, including photographs or diagrams, of the area and facilities in which the wildlife will be housed;

(ii) A brief résumé of the technical expertise available, including any experience the applicant or his personnel have had in propagating the species or closely related species to be imported;

(iii) A statement of willingness to participate in a cooperative breeding program and maintain or contribute data to a studbook; and

(iv) A detail description of the type, size, and construction of the container; arrangements for feeding, watering, and otherwise caring for the wildlife in transit; and the arrangements for caring for the wildlife on importation into the United States.

(b) *Additional permit condition.*—In addition to the general conditions set forth in Part 220, permits to import endangered foreign wildlife for scientific, educational, or zoological purposes or for the purpose of propagation of such wildlife in captivity shall be subject to the following conditions:

(1) In addition to any reporting requirements set forth in the permit, a report of the importation made under authority of any such permit shall be submitted in writing to the Director. Such report must be postmarked or actually delivered no later than 10 days following each such importation.

(2) The death or escape of any living wildlife imported under the authority of such permit shall be reported to the Division of Law Enforcement and Marine Mammal Protection immediately. The carcass of any such wildlife which die or are killed should be retained in such a manner as not to impair its use as a scientific specimen.

(c) *Issuance criteria.*—The Director shall consider, among other criteria, the following in determining whether to issue a permit to import endangered foreign wildlife for scientific, educational, or zoological purposes or for the purpose of propagation of such wildlife in captivity:

(1) The direct or indirect effect which issuing such a permit would be likely to have upon the wild populations of the wildlife;

(2) Whether the purpose for which the permit is being requested would likely reduce the severity of the threat of extinction facing the subject species or subspecies;

(3) Opinions or views of scientists or other persons or organizations knowledgeable of the wildlife to be imported or of other matters germane to the application;

(4) Whether the expertise, facilities or other resources available to the applicant appear adequate to successfully accomplish the objectives stated in the application; and

(5) Whether the purpose for which the permit is being requested is adequate to justify the removal of the wildlife from the wild or otherwise change its status.

(d) *Tenure of permits.*—The tenure of permits to import endangered foreign wildlife for scientific, educational, or zoological purposes or for the purpose of propagation of such wildlife in captivity shall be designated on the face of the permit.

Title 6—Economic Stabilization

CHAPTER I—COST OF LIVING COUNCIL

[Phase IV Price Ruling 1974–3]

EXPORTS EXEMPTION: SALE TO U.S. GOVERNMENT

Phase IV Price Ruling

Facts. Firm M is a meat processor which intends to bid on two contracts for the sale of meat to an agency of the United States Government. Under the first contract, the meat is being purchased for sale in military commissaries and base exchanges outside the United States. Under the second contract, the meat is being purchased as part of the military assistance program to a foreign government. The assistance is in the form of a grant without any payment required of the foreign government.

6 CFR 150.54(d)(1) provides that the prices charged for export sales, including the sale of products to a domestic purchaser who certifies that the product is for export, are exempt from Phase IV price regulations.

Issue. May an agency of the United States Government certify that sales of meat to it for resale in military commissaries and base exchanges outside the United States and for use as a grant to a foreign government are "for export" and, therefore, exempt from the Phase IV price regulations by virtue of 6 CFR 150.54(d)(1)?

Ruling. No certification is allowable in either sale. A purpose of the export exemption is to allow sales of exports, which will produce revenues from foreign sources, to be made at the highest price. Transactions which do not produce such revenues are therefore not considered exports for the purpose of exemption from the regulations under the Economic Stabilization Program.

Neither the sale in United States overseas commissaries and base exchanges nor the grant to a foreign government will produce any revenue from foreign sources. The sales at the commissaries and base exchanges are primarily to United States citizens and are not normal commercial export transactions. If sales of these meat items were treated as sales of products for export, higher bidding and an artificial allocation of limited meat supplies would likely result without any corresponding economic benefit. Therefore, sales of meat by Firm M to the military cannot be certified as sales of products for export and exempted under 6 CFR 150.54(d)(1).

This ruling readopts the substance of Phase III Ruling 1973–3.

ANDREW T. H. MUNROE,
General Counsel.

MARCH 14, 1974.

Title 10—Energy

CHAPTER II—FEDERAL ENERGY OFFICE

PART 202—PRODUCTION OR DISCLOSURE OF MATERIAL OR INFORMATION

This establishment of a new Part, Part 202, to the Federal Energy Office Regulations, under the Freedom of Information Act (5 U.S.C. 552) sets forth the guidelines for requesting and obtaining certain public information from the FEO. It also sets forth the procedures to be followed by FEO employees when they receive a subpoena, order, or other demand of a court or other authority for production or disclosure of material in Departmental files.

Under the provisions of § 202.3, initial requests by persons for FEO records must be addressed to the Director of Public Affairs, Attention: Information Access Officer; appeals from actions by the Information Access Officer may be lodged under § 202.6 with the Deputy Administrator of FEO. The timing for action by these officials is established at 48 hours for response to initial requests, with provision for up to 10 days for reply when further time is needed to collect and prepare records or to evaluate the status of the request under the Freedom of Information Act, or up to 20 days in special cases (§ 202.4), and 10 days for action upon an appeal (§ 202.6).

Under the provision of § 202.22 no FEO employee may produce or disclose any information or materials from FEO files in response to subpoenas or orders of a court or other authority without prior approval of the General Counsel. Section 202.25 sets out the procedure to be followed where the response to a demand is required before instructions are received by the employee from the General Counsel.

In consideration of the foregoing, Chapter II of Title 10 of the Code of Federal Regulations is amended by adding Part 202 as set forth below, effective immediately.

Issued in Washington, D.C., March 14, 1974.

WILLIAM N. WALKER,
General Counsel,
Federal Energy Office.

Subpart A—Production or Disclosure Under 5 U.S.C. 552

Sec.
202.1 Purpose and scope.
202.2 Public reference facilities.
202.3 Requests for identifiable records and copies.
Time for response to request for records.
202.5 Responses by Information Access Officer: Form and content.
202.6 Appeals to the Deputy Administrator from initial denials.
202.7 Maintenance of files.

Subpart A—Production or Disclosure Under 5 U.S.C. 552

§ 202.1 Purpose and scope.

This subpart contains the regulations of the Federal Energy Office (FEO) implementing 5 U.S.C. 552. The regulations of this subpart provide information concerning the procedures by which records may be obtained from all divisions within the FEO. Official records of the FEO made available pursuant to the requirements of 5 U.S.C. 552 shall be furnished to members of the public as prescribed by this subpart. Officers and employees of the FEO may furnish to the public, informally and without compliance with the procedures prescribed herein, information and records of types which prior to enactment of 5 U.S.C. 552 were furnished customarily in the regular performance of their duties to the public by other agencies. Persons seeking information or records of the FEO may find it useful to consult with FEO's Office of Public Affairs before invoking the formal procedures set out below. To the extent permitted by other laws, the FEO will make available records which it is authorized to withhold under 5 U.S.C. 552 unless it determines that such disclosure is not in the public interest.

§ 202.2 Public reference facilities.

(a) The National Office, FEO and Regional Offices, FEO will maintain in a public reading room or public reading area, the materials relating to that office which are required by 5 U.S.C. 552(a)(2) and 552(a)(4) to be made available for public inspection and copying. These materials will also be available at some additional locations within specific regions; their addresses and telephone numbers may be obtained from the Regional Offices, FEO, listed in § 205.12 of this chapter.

(b) Each of these public reference facilities will maintain and make available for public inspection and copying a current index of the materials available at that facility which are required to be indexed by 5 U.S.C. 552(a)(2), and the National Office, FEO will maintain and make available for public inspection and copying copies of all such indexes.

§ 202.3 Requests for identifiable records and copies.

(a) *Addressed to the Director of Public Affairs.* A request for a record of the FEO which is not customarily made available and which is not available in a public reference facility as described in § 202.2 shall be addressed to the Director of Public Affairs, Federal Energy Office, Washington, D.C., 20461, and should be clearly marked on the envelope "Attention: Information Access Officer".

(b) *Request should be in writing and for identifiable records.* A request for access to records should be submitted in writing and should sufficiently identify the records requested to enable FEO personnel to locate them with a reasonable amount of effort. Where possible, specific information regarding dates, titles, file designations, and other information which may help identify the records should be supplied by the requester. If the request relates to a matter in pending litigation, the court and its location should be identified.

(c) *Form may be requested.* Where the information supplied by the requester is not sufficient to permit location of the records by FEO personnel with a reasonable amount of effort, the requester may be sent and asked to fill out and return a form which is designed to elicit the necessary information, pursuant to § 202.4(a).

(d) *Categorical requests*—(1) *Must meet identifiable records requirement.* A request for all records falling within a reasonably specific category shall be regarded as conforming to the statutory requirement that records be identifiable if it can reasonably be determined which particular records are sought in the requests, and the records can be searched for, collected, and produced without unduly burdening or interfering with FEO operations because of the staff time consumed or the resulting disruption of files.

(2) *Assistance in reformulating nonconforming requests.* If it is determined that a categorical request would unduly burden or interfere with the operations of the FEO under subparagraph (1) of this paragraph, the response denying the request on those grounds shall specify the reasons why and the extent to which compliance would burden or interfere with FEO operations, and shall extend to the requester an opportunity to confer with knowledgeable FEO personnel in an attempt to restate the request or reduce the request to manageable proportions by reformulation and by agreeing on an orderly procedure for the production of the records.

(e) *Requests for records of other agencies.* Some of the records in the files of the FEO have been obtained from other

V 39 53 MAR 18 74 XUM

federal agencies. Where it is determined that the question of the availability of requested records is primarily the responsibility of another federal agency and that such records may be exempt under 5 U.S.C. 552(b), the Information Access Officer will inquire of the originating agency as to whether it concurs in release of the records. If that agency does not concur, the Information Access Officer will refer the request to the originating agency, and inform the requester of the appropriate official with whom to pursue his request. The FEO will accompany such referral with a recommendation, based on the interest of FEO in such records, concerning the disclosure of the requested records.

§ 202.4 Time for response to request for records.

(a) *Response prepared by Information Access Officer.* An Information Access Officer, appointed by the Director of Public Affairs, shall be responsible for processing written requests for records submitted pursuant to this part. Upon receiving such a request, the Information Access Officer shall ascertain which division or divisions of the FEO have primary responsibility for, custody of, or concern with the records requested and forward the request to such division or divisions, who shall promptly identify and review the records encompassed by the request. After reviewing the material, the division or divisions concerned shall forward to the Information Access Officer either the requested material, a recommendation that the request be wholly or partially denied, or a recommendation that an interim response be made under the provisions of this subsection. A recommendation of an interim response shall specify the type of response suggested and the reasons for recommending an interim response. Any recommendation that a request be denied shall set forth the policy considerations supporting such denial and shall be forwarded, with the information sought or a representative sample thereof, by the Information Access Officer to the General Counsel for his review and recommendation. On the basis of the recommendations of the division or divisions, the Information Access Officer shall, within 43 hours (including Saturdays, Sundays, and Federal legal holidays) of receipt by the Director of Public Affairs of a request for FEO records, either (1) grant the request, (2) deny the request, (3) grant it in part and/or deny it in part, or (4) reply with an interim response stating (i) that the records requested cannot be collected and prepared within said 48 hour period; (ii) that further time is needed to evaluate whether the requested records are exempt under the Freedom of Information Act and should be withheld as a matter of sound public policy or disclosed only with appropriate deletions; (iii) that the request has been referred to another agency under § 202.3(e) of this part; or (iv) that additional information is needed from the requester to render the records identifiable. Such an interim response shall specify (A) the reason or reasons for delay in granting or denying the request; (B) any further information needed by the FEO from the requester; (C) the agency to whom the request has been referred, if any, and the name of the appropriate official of that agency with whom to pursue the matter; and (D) the expected time within which the request fo records will be either granted or denied. All requests for which an interim response is made stating that further time is needed to collect and prepare the records, or to evaluate the status of the request under the Freedom of Information Act, shall be either granted or denied, or granted in part and denied in part, within 10 days of receipt of the request by the Director of Public Affairs, except that if circumstances require additional time before a decision on a request can be reached, and the person requesting records is promptly informed in writing of these circumstances and the Information Access Officer certifies to such person that such delay is unavoidable, the decision may be made within 20 days of receipt of the request by the Director of Public Affairs. A response granting a request or stating that the information will be available within 10 days or less of receipt of the request may be issued by officers or employees of FEO other than the Information Access Officer: *Provided*, That a copy of such response is forwarded to the Information Access Officer.

(b) *Petition if response not forthcoming.* If the Information Access Officer does not respond to or acknowledge a request for records within 48 hours, or does not act on a request within an extended deadline, as provided for in paragraph (a) of this section, or if the requester believes an extended deadline adopted pursuant to paragraph (a) of this section is unreasonable, the requester may petition the Deputy Administrator to take appropriate measures to assure prompt action on the request.

(c) For purposes of this section, the term "division" includes all administrative or operating units of the FEO.

§ 202.5 Responses by Information Access Officer: Form and content.

(a) *Form of grant.* When a requested record has been identified and is to be made available, the Information Access Officer or other appropriate official of FEO shall notify the requester as to when the record is available. The notification shall also advise the requester of any applicable fees under § 202.8.

(b) *Form of denial.* A reply denying a written request for a record shall be in writing signed by the Information Access Officer and shall include:

(1) *Exemption category.* A reference to the specific exemption under the Freedom of Information Act authorizing the withholdings of the record, and to the extent consistent with the purposes of the exemption, a brief explanation of how the exemption applies to the record withheld, and, if the Information Access Officer considers it appropriate, a statement of why the exempt record is being withheld; and,

(2) *Administrative appeal and judicial review.* A statement that the denial may be appealed within 30 days to the Deputy Administrator, and that judicial review will be thereafter available either in the district in which the requester resides or has a principal place of business or in which the agency records are situated.

(c) *Denial because record cannot be located or does not exist.* If a requested record is known to have been destroyed or otherwise disposed of, or if no such record was ever known to exist, the requester shall be so notified.

§ 202.6 Appeals to the Deputy Administrator from initial denials.

(a) *Appeal to Deputy Administrator.* When the Information Access Officer has denied a request for records in whole or in part, the requester may, within 30 days of its receipt, appeal the denial to the Deputy Administrator, FEO, Washington, D.C. The appeal shall be in writing.

(b) *Action within 10 days.* The Deputy Administrator will act upon the appeal within 10 days of its receipt, and more rapidly if practicable, except that if novel or difficult questions are involved, the Deputy Administrator may extend the time for final action by him for an additional 20 days upon notifying the requester of the reasons for the extended deadline and the date on which a final response may be expected.

(c) *Form of action on appeal.* The Deputy Administrator's action on an appeal shall be in writing. A denial in whole or in part of a request on appeal shall set forth the exemption relied on, a brief explanation consistent with the purpose of the exemption of how the exemption applies to the records withheld, and the reasons for asserting it.

§ 202.7 Maintenance of files.

(a) *Maintenance of file open to public.* The Information Access Officer shall maintain a file, open to the public, which shall contain copies of all grants or denials of all requests for information or appeals made under this subpart. The material shall be indexed by the exemption asserted by the FEO, if any, and, to the extent feasible, according to the type of records requested.

(b) *Protection of privacy.* Where the identity of a requester, or other identifying details related to a request, would constitute an invasion of a personal privacy if made generally available, the Information Access Officer shall delete identifying details from the copies of documents maintained in the public file established under paragraph (a) of this section.

§ 202.8 Fees for provision of records.

(a) *When charged.* User fees pursuant to 31 U.S.C. 483a (1970), shall be charged according to the schedule contained in paragraph (b) of this section for services rendered in responding to requests for FEO records under this subpart unless

the Information Access Officer determines, in conformity with the provisions of 31 U.S.C. 483, that such charges or a portion thereof are not in the public interest. Such a determination shall ordinarily not be made unless the service to be performed will be of benefit primarily to the public as opposed to the requester, or unless the requester is an indigent individual. Fees shall not be charged where they would amount, in the aggregate, for a request or series of related requests, to less than $3. Ordinarily, fees shall not be charged if the records requested are not found, or if all of the records located are withheld as exempt. However, if the time expended in processing the request is substantial, and if the requester has been notified of the estimated cost pursuant to paragraph (c) of this section and has been specifically advised that it cannot be determined in advance whether any records will be made available, fees may be charged.

(b) *Services charged for, and amount charged.* For the services listed below expended in locating or making available records or copies thereof, the following charges shall be assessed:

(1) *Copies.* For copies of documents (maximum of 5 copies will be supplied) $.10 per copy of each page.

(2) *Clerical searches.* For each one quarter hour spent by clerical personnel in excess of the first quarter hour in searching for and producing a requested record, $1.25.

(3) *Monitoring inspection.* For each one quarter hour spent in monitoring the requester's inspection of records, $1.25.

(4) *Certification.* For certification of true copies, each, $1.

(5) *Nonroutine, nonclerical searches.* Where a search cannot be performed by clerical personnel, for example, where the task of determining which records fall within a request and collecting them requires the time of professional or managerial personnel, and where the amount of time that must be expended in the search and collection of the requested records by such higher level personnel is substantial, charges for the search may be made at a rate in excess of the clerical rate, namely for each one quarter hour spent in excess of the first quarter hour by such higher level personnel in searching for a requested record, $3.75.

(6) *Examination and related tasks in screening records.* No charge shall be made for time spent in resolving legal or policy issues affecting access to records of known contents. In addition, no charge shall ordinarily be made for the time involved in examining records to determine whether they are exempt from mandatory disclosure and should be withheld as a matter of sound policy. However, where a broad request requires FEO personnel to devote a substantial amount of time to examining records for the purpose of screening out certain records or portions thereof in accordance with determinations that material of such a nature is exempt and should be withheld as a matter of sound policy, a fee may be assessed for the time consumed in such examination. Where such examination can be performed by clerical personnel, a fee may be assessed at the rate of $1.25 per quarter hour, and where higher level personnel are required, a fee may be assessed at the rate of $3.75 per quarter hour.

(7) *Computerized Records.* Fees for services in processing requests maintained in whole or part in computerized form shall be in accordance with this section so far as practicable. Services of personnel in the nature of a search will be charged for at rates prescribed in paragraph (b)(5) of this section unless the level of personnel involved permits rates in accordance with paragraph (b)(2) of this section. A charge may be made for the computer time involved, based upon the prevailing level of costs to governmental organizations and upon the particular types of computer and associated equipment and the amounts of time on such equipment that are utilized. A charge may also be made for any substantial amounts of special supplies or materials used to contain, present, or make available the output of computers, based upon prevailing levels of costs to governmental organizations and upon the type and amount of such supplies or materials that is used. Nothing in this paragraph shall be construed to entitle any person, as of right, to any services in connection with computerized records, other than services to which such person may be entitled under 5 U.S.C. 552 and under the provisions, not including this paragraph (b).

(c) *Notice of anticipated fees in excess of $25.* Where it is anticipated that the fees chargeable under this section will amount to more than $25, and the requester has not indicated in advance his willingness to pay fees as high as are anticipated, the requester shall be promptly notified by the Information Access Officer of the amount of the anticipated fee or such portion thereof as can readily be estimated. An advance deposit may be required. The notice or request for an advance deposit shall extend an offer to the requester to confer with knowledgeable FEO personnel in an attempt to reformulate the request in a manner which will reduce the fees and meet the needs of the requester. Dispatch by certified mail of such a notice or request shall toll the running of the period for response by the FEO until a reply is received from the requester.

(d) *Form of payment.* Payment should be made by check or money order payable to the Treasury of the United States.

§ 202.9 Exemptions.

(a) 5 U.S.C. 552 exempts from all of its publication and disclosure requirements nine categories of records which are described in paragraph (b) of that section. These categories include such matters as national defense and foreign policy information; investigatory files, internal procedures and communications; materials exempted from disclosure by other statutes, information given in confidence; and matters involving personal privacy. Specifically, the exemption in 5 U.S.C. 552(b) applies to matters that are—

(1) Specifically required by Executive order to be kept secret in the interest of the national defense or foreign policy;

(2) Related solely to the internal personnel rules and practices of an agency;

(3) Specifically exempted from disclosure by statute;

(4) Trade secrets and commercial or financial information obtained from a person and privileged or confidential;

(5) Inter-agency or intra-agency memorandums or letters which would not be available by law to a party other than an agency in litigation with the agency;

(6) Personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy;

(7) Investigatory files compiled for law enforcement purposes except to the extent available by law to a party other than an agency;

(8) Contained in or related to examination, operating, or condition reports repaired by, on behalf of, or for the use of an agency responsible for the regulation or supervision of financial institutions; or

(9) Geological and geophysical information and data, including maps, concerning wells.

(b) The scope of the exemption is discussed generally in the Attorney General's Memorandum on the Public Information section of the Administrative Procedure Act, which was published in June 1967. The document is available from the Superintendent of Documents and may be consulted in considering questions arising under 5 U.S.C. 552.

§ 202.10 Computation of time.

Computation of a period of time, described as "days", prescribed or allowed by this subpart shall be pursuant to § 205.5(a) of this chapter.

Subpart B—Production or Disclosure in Response to Subpoenas or Demands of Courts or Other Authorities

§ 202.21 Purpose and scope.

(a) This subpart sets forth the procedures to be followed when a subpoena, order, or other demand (hereinafter referred to as a "demand") of a court or other authority is issued for the production or disclosure of (1) any material contained in the files of the Federal Energy Office (FEO), (2) any information relating to material contained in the files of the FEO, or (3) any information or material acquired by any person while such person was an employee of the FEO as a part of the performance of his official duties or because of his official status.

(b) For purposes of this subpart, the term "employee of the FEO" includes all officers and employees of the United States appointed by, or subject to the supervision, jurisdiction, or control of, the Administrator of FEO.

V 39 53 MAR 18 74 XUM

§ 202.22 Production or disclosure prohibited unless approved by appropriate FEO official.

No employee or former employee of the FEO shall, in response to a demand of a court or other authority, produce any material contained in the file of the FEO or disclose any information relating to material contained in the files of the FEO, or disclose any information or produce any material acquired as part of the performance of his official duties or because of his official status without prior approval of the General Counsel of FEO.

§ 202.23 Procedure in the event of a demand for production or disclosure.

(a) Whenever a demand is made upon an employee or former employee of the FEO for the production of material or the disclosure of information described in § 202.21(a), he shall immediately notify the Regional Counsel for the region where the issuing authority is located. The Regional Counsel shall immediately request instructions from the General Counsel of FEO.

(b) If oral testimony is sought by the demand, an affidavit, or, if that is not feasible, a statement by the party seeking the testimony or his attorney, setting forth a summary of the testimony desired, must be furnished for submission by the Regional Counsel to the General Counsel.

§ 202.24 Final action by the appropriate FEO official.

If the General Counsel approves a demand for the production of material or disclosure of information, he shall so notify the Regional Counsel and such other persons as circumstances may warrant.

§ 202.25 Procedure where a decision concerning a demand is not made prior to the time a response to the demand is required.

If response to the demand is required before the instructions from the General Counsel are received, a U.S. attorney or FEO attorney designated for the purpose shall appear with the employee or former employee of the FEO upon whom the demand has been made, and shall furnish the court or other authority with a copy of the regulations contained in this subpart and inform the court or other authority that the demand has been, or is being, as the case may be, referred for the prompt consideration of the appropriate FEO official and shall respectfully request the court or authority to stay the demand pending receipt of the requested instructions.

§ 202.26 Procedure in the event of an adverse ruling.

If the court or other authority declines to stay the effect of the demand in response to a request made in accordance with § 202.25 pending receipt of instructions, of if the court or other authority rules that the demand must be complied with irrespective of instructions not to produce the material or disclose the information sought, the employee or former employee upon whom the demand has been made shall respectfully decline to comply with the demand. "United States ex rel Touhy v. Ragen," 340 U.S. 462.

[FR Doc.74-6311 Filed 3-15-74;8:45 am]

PART 211—MANDATORY PETROLEUM ALLOCATION REGULATIONS

Unusual Growth Adjustment of Base Period Volumes

Subpart A of the Mandatory Allocation Regulations, concerning the adjustment of wholesale purchaser's base period volumes, is amended to provide for a supplier initiated adjustment of base period volumes for unusual growth based upon suppliers' records. Suppliers will be permitted to adjust base period volumes based upon the supplier's records without an application by a wholesale purchaser for the adjustment. If a supplier elects to make such adjustments, the supplier must adjust the base period volumes of all of the supplier's wholesale purchasers which are eligible for the adjustment according to the supplier's records. There is no longer a requirement that FEO validate such adjustments for growth in excess of twenty percent. Deliveries based upon such adjustments cannot commence until the supplier has made such adjustments for all of its wholesale purchasers. Suppliers may elect to adjust for either motor gasoline or other products subject to § 211.13 or for both. Suppliers must certify such adjustments to FEO within five (5) days of commencing deliveries pursuant to such adjustments.

Because the purpose of this revision is to provide immediate guidance and information with respect to the mandatory petroleum allocation rules and regulations in order to expedite relief for purchasers which have had unusual growth in 1973, the Federal Energy Office finds that normal rulemaking procedure is inapplicable and that good cause exists for making this revision effective in less than 30 days.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, E.O. 11748, 38 F.R. 33575; Economic Stabilization Act of 1970, as amended, Pub. L. 92-210, 85 Stat. 743; Pub. L. 93-28, 87 Stat. 27; E.O. 11730, 38 F.R. 19345; Cost of Living Council Order No. 47, 39 FR 24)

In consideration of the foregoing, Part 211 of Chapter II, Title 10 of the Code of Federal Regulations is amended as set forth below, effective immediately.

Issued in Washington, D.C., March 15, 1974.

WILLIAM N. WALKER,
General Counsel.

Section 211.13(b) is revised to read as follows:

§ 211.13 Adjustments to the allocation program.

* * * * *

(b) *Unusual growth since base period.* Wholesale purchasers who have had unusual growth between the base period and December 31, 1973, may apply to their supplier, to be assigned an adjustment to their base period volume. Suppliers may adjust a wholesale purchaser's base period volume without an application by the wholesale purchaser to the extent that the supplier's records indicate that the wholesale purchaser is eligible for an unusual growth adjustment.

(1) For the purpose of this paragraph, unusual growth is defined as more than ten (10) percent per year for gasoline, or more than five (5) percent per year for all other products.

(2) Applications for increased base period volumes made under this section shall be filed with a supplier by June 1, 1974.

(3) If the supplier does not agree that the application submitted under this section is valid, he may request that the FEO determine the validity of the application before increased deliveries are made. In this event, the wholesale purchaser shall certify to the FEO documented evidence of actual increases in sales volumes, on an annual average basis, since the base period. Only actual certified historical sales volumes in excess of the growth percentages specified shall be considered by the FEO in determining whether or not unusual growth has occurred.

(4) In those cases where the supplier does not agree with the validity of an application submitted under this section, the supplier may adjust the wholesale purchaser's base period volume for unusual growth to the extent that the supplier's records indicate that the wholesale purchaser is eligible for an unusual growth adjustment and may make increased deliveries based upon such adjustment during the period that FEO has the validity of the application under consideration. Suppliers will make adjustments under paragraph (b)(3) of this section if the supplier makes adjustments for unusual growth based upon the supplier's records for wholesale purchasers which have not submitted applications for an unusual growth and adjustment.

(5) If the supplier agrees that an application is valid, or if the FEO validates the application, the supplier shall then increase the base period volume such that if the growth since the base period exceeds ten (10) percent for gasoline or five (5) percent for other refined products per year considering seasonal factors, the supplier shall grant an increase in base period volume that is equal to the actual yearly growth percentage in excess of ten (10) percent for gasoline or five (5) percent for other refined products, multiplied by the wholesale purchaser's adjusted base period volume at that time.

(6) If the supplier makes adjustments for unusual growth for wholesale purchasers who have not applied for an adjustment, the supplier shall increase the wholesale purchaser's base period volume such that if the growth since the base period exceeds ten (10) percent for gasoline or five (5) percent for other refined products per year considering seasonal factors, the supplier shall grant an increase in base period volume that is equal to the actual yearly growth percentage in excess of ten (10) percent for gasoline or five (5) percent for other refined products, multiplied by the wholesale purchaser's adjusted base period volume at that time.

(7) Suppliers which make unusual growth adjustments based upon their records shall make adjustments for all wholesale purchasers which are eligible for an adjustment as indicated by the supplier's records. Suppliers may make such adjustments either for motor gasoline or for other products subject to this section or for both. Suppliers shall not commence deliveries for an unusual growth adjustment based upon the supplier's records for any wholesale purchaser until the supplier has made adjustments to base period volumes for all eligible wholesale purchasers.

(8) Unusual growth adjustments based upon a supplier's records shall be certified by the supplier and filed with FEO. The supplier shall also certify that the supplier has adjusted the base period volumes of all wholesale purchasers eligible for an unusual growth adjustment as indicated by the supplier's records and that deliveries based upon such adjustments were not commenced until all such adjustments were made. The supplier's certification shall be filed with FEO within five (5) days after deliveries have been commenced. FEO approval or validation of the supplier's certification is not required.

Proposed Rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rulemaking prior to the adoption of the final rules.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[50 CFR Part 20]

MIGRATORY BIRDS

Proposed Rulemaking

Notice is hereby given that pursuant to the authority contained in the Migratory Bird Treaty Act of July 3, 1918, as amended (40 Stat. 755 (16 U.S.C. 703–711)), it is proposed to amend Part 20 of Title 50, Code of Federal Regulations. Based on the results of migratory game bird studies now in progress and having due consideration for any views or data submitted by interested parties, these amendments will specify open seasons, certain closed seasons, shooting hours, and bag and possession limits for the hunting of migratory game birds during the 1974–75 season.

Amendments specifying open seasons, bag and possession limits, and shooting hours for doves, pigeons, ducks, coots, gallinules, and Wilson's snipe in Puerto Rico and for doves in the Virgin Islands, will be proposed for final adoption no later than July 15, 1974, to become effective on or after August 15, 1974.

Amendments specifying open seasons, bag and possession limits, and shooting hours for doves, pigeons, rails (except coots), gallinules, woodcock, Wilson's snipe, certain waterfowl; coots, cranes, and waterfowl in Alaska; and certain sea ducks in coastal waters of certain eastern States will be proposed for final adoption not later than August 1, 1974, to become effective on or before September 1, 1974. Amendments specifying open seasons, bag and possession limits, and shooting hours for waterfowl, coots, cranes, and any other migratory game birds not previously adopted will be proposed for final adoption not later than September 1, 1974, to become effective on or about October 1, 1974.

It is the policy of the Department of the Interior, whenever practicable, to afford the public an opportunity to participate in the rule making process. Accordingly, interested persons may submit written comments, suggestions, or objections with respect to the proposed amendments to the Director, Bureau of Sport Fisheries and Wildlife, Washington, D.C. 20240. Comments received by May 15, 1974, will be considered.

LYNN A. GREENWALT,
Director, Bureau of Sport Fisheries and Wildlife.

MARCH 13, 1974.

[FR Doc.74-6111 Filed 3-15-74;8:45 am]

Geological Survey

[30 CFR Part 260]

OUTER CONTINENTAL SHELF

Proposed Hard Mineral Operating Regulations; Extension of Comment Period

In the FEDERAL REGISTER of February 1, 1974 (39 FR 4108), there were published, as a notice of proposed rulemaking, regulations governing operations conducted on the Outer Continental Shelf for minerals other than oil and gas, sulphur, and salt.

That notice afforded interested parties until March 15, 1974, the opportunity to submit to the Director, U.S. Geological Survey, written comments, suggestions, or objections with respect to the proposed regulations.

Notice is hereby given that the period for submitting written comments, suggestions, or objections with respect to the proposed regulations to the Director, U.S. Geological Survey, National Center, 12201 Sunrise Valley Drive, Reston, Virginia 22092, is extended to April 15, 1974.

Dated: March 12, 1974.

RICHARD R. HITE,
Deputy Assistant Secretary of the Interior.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Part 630]

BIOLOGICAL PRODUCTS

Proposed Additional Standards for the Bacillus of Calmette and Guerin (BCG) Vaccine

Section 351 of the Public Health Service Act requires that each manufacturer of the Bacillus of Calmette and Guerin (BCG) Vaccine, used for the prevention of tuberculosis, be licensed prior to marketing such vaccine in interstate commerce. Licenses for establishments manufacturing the vaccine may be issued only upon a showing that the particular establishment will produce BCG Vaccine that is safe, pure, and potent.

Since 1945 this licensing for the production and distribution of BCG Vaccine has been guided primarily by uncodified standards, originally developed in 1945, and published by the Department of Health, Education, and Welfare as "Minimum Requirements".

The Bureau of Biologics, Food and Drug Administration, has been reviewing many licensed products, including BCG Vaccine, for the purpose of revising older standards of production and testing. Proposed additional standards for the manufacture of BCG Vaccine have been prepared by the Bureau of Biologics. This proposal includes many of the provisions of the "Minimum Requirements" but also contains significant changes and additions that reflect more recent experience and the development of scientific knowledge in the field. The Commissioner of Food and Drugs has determined that expanded and revised criteria for BCG Vaccine should be required for the production of all licensed BCG Vaccine.

BCG Vaccine contains live bacteria of the Bacillus of Calmette and Guerin (thus the name BCG) and is an attenuated strain of Mycobacterium bovis. Since 1921, vaccination with BCG Vaccine has been recognized as an effective means of preventing tuberculosis in man. It has become an accepted standard practice in countries throughout the world to utilize the vaccine routinely as a means of prophylactic treatment of tuberculosis. BCG Vaccine has been used to vaccinate over 100 million people.

Although vaccination with BCG Vaccine is a long recognized medical treatment, it is always imperative that great care be taken in its production to insure that the nonvirulent bacillus does not become virulent or contaminated with virulent organisms, and therefore cause disease in those individuals who have been innoculated with the vaccine. Considering the potential hazards associated with the manufacture of BCG Vaccine, the Commissioner has concluded that additional standards for BCG Vaccine are necessary to assure a uniform high quality of licensed vaccine.

In recent years, BCG Vaccine has been used experimentally in immunotherapy for cancer and leukemia. However, these proposed additional standards are intended to regulate the manufacturing of BCG Vaccine only for its well-established use as an immunizing agent against tuberculosis, and not for its use in cancer research. Those persons wishing to investigate the utility of BCG Vaccine in cancer research must submit a "Notice of Claimed Investigational Exemption for a New Drug" to the Bureau of Biologics, Food and Drug Administration, 8800 Rockville Pike, Bethesda, MD 20014.

Therefore, pursuant to provisions of the Public Health Service Act (sec. 351, 58 Stat. 702, as amended; 42 U.S.C. 262) and under authority delegated to him (21 CFR 2.120), the Commissioner proposes to amend Part 630 of Chapter I of Title 21 of the Code of Federal Regulations by adding thereto a new Subpart J to read as follows:

PART 630—ADDITIONAL STANDARDS FOR VIRAL VACCINES

Subpart J—Bacillus of Calmette and Guerin (BCG) Vaccine

§ 630.90 BCG Vaccine.

(a) *Proper name and definition.* The proper name of this product shall be BCG Vaccine, which shall consist of a freeze-dried preparation containing live bacteria of the Bacillus of Calmette and Guerin, which is an attenuated strain of *Mycobacterium bovis*.

(b) *Criteria for an acceptable strain.* The source of the BCG strain used in the manufacture of any lot of the final product vaccine shall be identified by complete historical records.

(1) *Seed lot system.* The BCG strain shall be maintained in the form of a primary seed lot which shall be the basic material from which all secondary seed lots are prepared. Production of BCG Vaccine may be from either primary or secondary seed lots. Each seed lot shall be stored in either a freeze-dried state at −20° C. or colder, or in a frozen state at −70° C. or colder.

(2) *Freedom from virulence.* The BCG strain shall be demonstrated to be incapable of producing progressive tuberculosis in guinea pigs tested as prescribed in § 630.94 of this part, except that no less than 48 guinea pigs shall be used to test the primary seed lot and no less than 12 guinea pigs shall be used to test each secondary seed lot. In order to assure an adequate basis upon which to evaluate the absence of progressive tuberculosis in the test animals, at least two-thirds of the animals shall survive the observation period of no less than 6 months.

(3) *Induction of tuberculin sensitivity in guinea pigs.* Guinea pigs injected with one human dose of BCG Vaccine shall develop tuberculin sensitivity in 4 to 6 weeks when skin tested with tuberculin as prescribed in § 630.95(b)(3)(ii) of this part. Tuberculin sensitivity induction shall be demonstrated in at least eight of ten guinea pigs used.

(4) *Clinical information.* Clinical data shall establish that the BCG strain is safe and induces tuberculin sensitivity. After having passed all laboratory tests prescribed for BCG Vaccine, each primary and secondary seed lot of vaccine shall be tested for its ability to induce sensitivity in persons negative to five U.S. units of Tuberculin, PPD administered by the Mantoux technique 6 to 8 weeks after BCG vaccination. At least 200 persons shall be included in the test for the primary seed lot, and 20 persons in the test for each secondary seed lot. At least 90 percent of those persons tested from each group shall develop tuberculin reactivity as indicated by an induration reaction of at least 5 millimeters in diameter when injected with five or ten units of Tuberculin, PPD.

§ 630.91 Establishment and personnel requirements.

In addition to the applicable requirements of §§ 600.10 and 600.11 of this chapter, the following practices and procedures are required:

(a) *Isolation of BCG unit.* The BCG unit shall be completely isolated from other production and surrounding areas and shall include separate facilities such as water supply, ventilation, sewage and trash disposal. The equipment used in BCG Vaccine production shall be kept in the BCG unit continuously. The BCG unit shall be situated and ventilated so as to minimize the possibility of contamination of the product. Microbial controlled areas shall be available for handling the BCG cultures. No cultures of microorganisms other than the BCG production strain shall be permitted in the BCG unit. No animals shall be permitted in the BCG unit. All tests necessary for the control of the vaccine, in which contaminating microorganisms may be cultured, or in which animals are used, shall be conducted in an area separate from the BCG production unit.

(b) *Restrictions on personnel.* (1) A staff specially trained in maintaining the seed cultures, propagating the cultures, preparing the vaccine, and filling the vaccine into final containers shall produce the BCG Vaccine. Such personnel shall work with no other infectious agents in any laboratory at any time, nor shall they be exposed to a known risk of tuberculosis. Within 30 days prior to employment in the BCG unit, each person working in the unit shall have a medical examination, including a tuberculin skin test with five U.S. units of Tuberculin, PPD by the Mantoux procedure, and a chest roentgenogram. No person who has had a history of tuberculosis or mycobacterial disease shall be permitted in the production area. There shall be periodic medical examinations of BCG unit personnel, including X-ray examinations, of sufficient frequency to detect the appearance of early active tuberculosis. Repeated tuberculin skin testing of staff who are negative to tuberculin may be used as an additional diagnostic aid in isolating the source of tuberculin exposure. In the event a person working in the BCG unit develops active tuberculosis, (i) the entire staff shall be examined and treated for possible tuberculosis infection, (ii) all current vaccine preparations and all cultures which the person may have come into contact with since his or her last satisfactory medical examination, except cultures sealed prior to such examination, shall be discarded, and (iii) the BCG areas and all equipment which the person may have come in contact with shall be decontaminated.

(2) Personnel shall wear protective clothing and use devices to the extent necessary to protect the product from contamination.

(3) Any person not assigned to the BCG unit shall not be allowed into the production area at any time unless a medical examination shows the person to be free from mycobacterial disease.

§ 630.92 Reference BCG Vaccine.

A reference BCG Vaccine shall be obtained from the Director, Bureau of Biologics, HFB–1, Food and Drug Administration, 8800 Rockville Pike, Bethesda, MD 20014, to determine the validity of the test for colony-forming units.

§ 630.93 Manufacture of BCG Vaccine.

(a) *BCG inoculum.* The inoculum of BCG used for production of a lot of BCG Vaccine shall not have been removed from the secondary seed lot in seed build-up for more than nine passages within a 6-week period.

(b) *Propagation of bacteria.* The culture medium for propagation of BCG Vaccine shall not contain ingredients known to be capable of producing allergenic effects in human subjects or causing the bacteria to become virulent for guinea pigs. The growth in each container shall be examined visually, and ony those cultures that have grown in a characteristic manner may be used in a vaccine.

(c) *Colony-forming units prior to and after freeze-drying.* The number of colony-forming units shall be determined on at least five vials of BCG Vaccine from each production lot prior to and after freeze-drying. The loss in viability after drying shall not exceed 90 percent.

§ 630.94 Test for freedom from virulent mycobacteria.

(a) Each lot of BCG Vaccine shall be tested to determine that it does not contain virulent mycobacteria. The test shall be performed using at least six guinea pigs each weighing between 250 and 300 grams. Vaccine intended for intradermal injection shall be tested by injecting the number of bacteria contained in at least 50 human doses into the guinea pigs. Vaccine intended for percutaneous use shall be tested by injecting into guinea pigs 50 times the number of bacteria estimated to be introduced parenterally by the recommended procedure. The test material for all tests shall be inoculated subcutaneously or intramuscularly into the guinea pigs. In order to assure the validity of the test, at least two-thirds of the animals on test shall survive an observation period of not less than 6 weeks. Any animal that dies during the observation period, and each surviving animal after sacrificing, shall be examined postmortem and shall show no macroscopic evidence of tuberculosis.

(b) In addition to the requirements of §§ 600.12 and 600.14 of this chapter, the manufacturer shall immediately report to the Bureau of Biologics if any virulent mycobacteria are found in any lot of BCG Vaccine, whether or not the manufacturer intends to submit samples and protocols of this lot to the Bureau of Biologics for release. All production and distribution of lots of BCG Vaccine produced from the same secondary seed lot as the contaminated lot of BCG Vaccine shall be discontinued until the manufacturer is notified by the Bureau of Biologics that production and distribution may be resumed. The manufacturer shall conduct a thorough and prompt investigation of the failure of the

V 39 53 MAR 18 74 XUM

lot to meet the required safety and purity specifications, including retesting the suspect lot and the source secondary seed lot and reviewing all manufacturing records and procedures to determine the probable cause of the failure. A written record of the investigation, including the retest results, shall be submitted to the Director, Bureau of Biologics.

§ 630.95 Potency tests.

(a) *Colony-forming units.* (1) A determination of the number of colony-forming units (CFU) shall be made on at least five vials of each lot of BCG Vaccine. The upper and lower limits of the viable count shall be established by the manufacturer for vaccines intended for both intradermal and percutaneous injection, and shall be specified in the license application. All tests for CFU shall be performed on vaccine reconstituted as for human use. Serial half-log dilutions shall be made as follows:

(i) An appropriate number of 16 x 125 millimeter screw-capped test tubes shall be filled with 4.5 milliliters of modified Youman's medium containing a final concentration of 0.5 percent bovine serum albumin.

(ii) An appropriate volume of the BCG Vaccine under test shall be added to the first tube and mixed well.

(iii) After mixing, 1.4 milliliters of the mixture shall be transferred to the second tube and mixed well. The transferring and mixing shall continue until all dilutions are completed. 1.4 milliliters from the last tube shall be discarded.

(2) After the serial half-log dilutions are completed, 0.5 milliliter of 1.5 percent agar solution, which has been cooled to 42° C., shall be quickly added, where necessary, to make a final concentration of 0.15 percent agar, and the contents of the tubes thoroughly mixed. After mixing, all tubes shall be incubated at 35° to 37° C. for 3 to 4 weeks. The tube from which counts shall be determined shall have between 10 and 50 colonies of BCG.

(3) The composition of modified Youman's medium is as follows:

Asparagine	grams	5.0
Monopotassium phosphate (KH_2PO_4)	do	5.0
Potassium sulfate (K_2SO_4)	do	.5
Magnesium citrate	do	1.5
Monosodium glutamate	do	19.0
Glycerine	milliliters	20.0
Distilled water q.s. to	do	900.0

(4) One hundred milliliters of 5-percent-aqueous solution of bovine albumin which has been sterilized by filtration shall be added to the Youman's medium to produce a final concentration of 0.5 percent of bovine albumin. The pH shall be adjusted to 7.0 with 5N sodium hydroxide.

(b) *Intradermal guinea pig test.* Two or more guinea pigs weighing at least 300 grams each shall be injected intradermally in four different sites with the following amounts and dilutions of each lot of BCG Vaccine:

(1) For vaccine intended for intradermal injection, 0.1 milliliter of undiluted vaccine, and 0.1 milliliter each of three dilutions of 1:10, 1:100, and 1:1000 of the undiluted vaccine in an appropriate diluent shall be injected intradermally into the guinea pigs.

(2) For vaccine intended for percutaneous injection, 0.1 milliliter of vaccine containing 1 to 9 x 10^5 CFU, and 0.1 milliliter each of three dilutions of 1:10, 1:100, and 1:1000 which have been prepared in an appropriate diluent shall be injected intradermally into the guinea pigs.

(3) The vaccine is satisfactory if (i) at the end of 2 to 4 weeks, nodules have developed which are graded in relation to the amount of the test dose with the largest dose inducing a nodule of between 4 to 10 millimeters in diameter and the smallest dose inducing essentially no nodule, (ii) by the end of 4 to 6 weeks, each guinea pig shows a degree of sensitivity such that an intradermal injection of no greater than 25 U.S. units of Tuberculin, PPD in 0.1 milliliter will induce an erythematous reaction at least 10 millimeters in diameter within 18 to 24 hours, and (iii) during the test period each guinea pig gains weight.

§ 630.96 General requirements.

(a) *Dose.* These standards are based on (1) vaccine intended for intradermal injection in a single human immunizing dose of 0.1 milliliter and (2) vaccine intended for percutaneous injection in a single skin application through which inoculation is made by a multiple puncture device.

(b) *Date of manufacture.* For dating purposes, the date of the test for determination of CFU shall be considered to be the date of manufacture of the vaccine.

(c) *Labeling.* In addition to the applicable requirements of §§ 610.60, 610.61 and 610.62 of this chapter, the package label shall bear the following information:

(1) The proper name of the product followed by specification of the route of administration.

(2) A statement to the effect that the enclosed vial contains live bacterial vaccine and should be protected against exposure to light.

(3) A statement that the vaccine shall be administered within 8 hours after reconstitution and advising that reconstituted vaccine not used within 8 hours shall be discarded.

§ 630.97 Samples; protocols; official release.

For each lot of vaccine, the following material shall be submitted to the Director, Bureau of Biologics, Food and Drug Administration, Building 29–A, 8800 Rockville Pike, Bethesda, MD 20014:

(a) A sample of no less than 40 milliliters of the product in final labeled containers, including a corresponding appropriate amount of the diluent to be used in reconstituting the vaccine.

(b) A protocol which consists of a complete summary of the manufacture of each lot, including all results of all tests which are required by all applicable regulations. If the protocol is not included in the shipment of the samples as required in paragraph (a) of this section, the protocol shall be sent to the Director, Bureau of Biologics, Food and Drug Administration, HFB–1, 8800 Rockville Pike, Bethesda, MD 20014.

(c) The product shall not be issued by the manufacturer until notification of official release of the lot is received from the Director, Bureau of Biologics.

The Commissioner proposes that the effective date of these regulations shall be 30 days after publication of the final order in the FEDERAL REGISTER.

Interested persons may, on or before May 17, 1974, file with the Hearing Clerk, Food and Drug Administration, Room 6–86, 5600 Fishers Lane, Rockville, MD 20852, written comments (preferably in quintuplicate) regarding this proposal. Comments may be accompanied by a memorandum or brief in support thereof. Received comments may be seen in the above office during regular business hours, Monday through Friday.

Dated: March 12, 1974.

SAM D. FINE,
Associate Commissioner for Compliance.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[46 CFR Part 160]

[CGD 73–246P]

LIFESAVING EQUIPMENT

Proposed Specification

The Coast Guard is considering amending the lifesaving equipment specifications by changing the buoyancy requirements for Type IV personal flotation devices approved under Subpart 160.064, by changing the title of the Subpart to "Marine Water Safety Devices", by deleting the words "special purpose" wherever they appear in the subpart, and by substituting the words "intended to be thrown" wherever the words "designed for grasping" appear in the Subpart.

Any interested person may submit written data, views, or arguments concerning this notice to the Executive Secretary, Marine Safety Council (G–CMC/82), Room 8234, U.S. Coast Guard, comment should include the docket number (CGD 73–246P) to which the comment is addressed, any specific wording recommended, and the reason and supporting data for any recommended change.

Each comment received before May 2, 1974, will be fully considered and evaluated before final action is taken on this proposal. Copies of all written communications received will be available for examination in Room 8234, Commandant (G–CMC/82), U.S. Coast Guard, Washington, D.C. 20590, both before and after the closing date for the receipt of comments. The proposal may be changed in the light of the comments received.

As a result of studies completed by the Coast Guard during recent years, it has been determined that the buoyancy requirement for foam buoyant cushions may be relaxed. Foam cushions were found not to lose an appreciable amount of buoyancy during normal use, thus a minimum of 18 pounds of buoyancy is considered satisfactory.

The studies indicated that kapok cushions did lose buoyancy during normal use. Compression of the kapok can cause the cushion to lose up to three pounds of buoyancy; however, this is compensated for by requiring twenty pounds of buoyancy.

In order to bring the buoyancy requirements for ring life buoys used for recreational boating in Subpart 160.064 in line with those approved for commercial use in Subpart 160.050, the buoyancy requirement will be changed to 16½ pounds of buoyancy in Subpart 160.064.

Foam cushion having the lower buoyancy requirement will be approved under specification Subpart 160.064. The dimensional requirements for these cushions have been added to § 160.064–2(d).

The title of Subpart 160.064 will be amended to read "Marine Water Safety Devices". The present title is confusing as it implies that all devices approved under this specification are truly special purpose which is the phraseology more appropriately applied to Type V Personal Flotation Devices. Devices approved under this specification are designed more specifically with recreational boating in mind and not restricted to a special purpose or event. Accordingly, the words "special purpose" would be stricken wherever they appear throughout the specification.

In consideration of the foregoing, the Coast Guard proposes to amend Part 160 of Title 46 of the Code of Federal Regulations as follows:

Subpart 160.064 Marine Water Safety Devices

1. By revising the heading of Subpart 160.064 to read as set forth above.

§ 160.064–2 [Amended]

2. By amending § 160.064–2 as follows:

a. In paragraph (a), by striking the words "special purpose", and by striking the words "intended for grasping by a person in water", and inserting the words "intended to be thrown".

b. In paragraph (b), by striking the words "special purpose".

c. In paragraph (c), by striking the words "special purpose" in the first sentence, and by striking the words "Special purpose buoyant devices designed for grasping by a person in water," and inserting the words "Water safety buoyant devices intended to be thrown," in the second sentence.

d. By adding paragraph (d) to read as follows:

(d) *Dimensions.* A foam cushion designed to be thrown must be 2 inches or more in thickness and must have 225 or more square inches of top surface area.

§ 160.064–3 [Amended]

2. Section 160.064–3 is amended as follows:

a. In paragraph (a), by striking the words "special purpose".

b. In paragraph (b), by striking the words "special purpose buoyant devices," and inserting the words "water safety buoyant devices".

c. In paragraph (b), by striking the words "Devices intended for grasping" and inserting the words "Devices intended to be thrown" in the fifth sentence.

d. By revising paragraph (d) to read as follows:

(d) *Buoyancy.* (1) Buoyancy for devices to be worn is as follows:

(i) Devices for persons weighing more than 90 pounds must have 15½ pounds or more of buoyancy.

(ii) Devices for persons weighing 50 to 90 pounds must have 11 pounds or more of buoyancy.

(iii) Devices for persons weighing less than 50 pounds must have 7 pounds or more of buoyancy.

(2) Buoyancy for devices to be thrown is as follows:

(i) Ring life buoys must have 16½ pounds or more of buoyancy.

(ii) Foam cushions must have 18 pounds or more of buoyancy.

(iii) A device other than those specified in paragraph (d) (2) (i) or (ii) of this section must have 20 pounds or more of buoyancy.

(3) The buoyancy values required in paragraph (d) (1) and (2) of this section must be as follows:

(i) For each device containing foam buoyant materials, the required buoyancy value must remain after the device has been submerged in fresh water for 24 or more continuous hours.

(ii) For each device containing kapok, the required buoyancy value must remain after the device has been submerged in fresh water for 48 or more continuous hours.

e. In paragraph (e), by striking the words "special purpose buoyant devices" and inserting the words "water safety buoyant devices".

§ 160.064–4 [Amended]

3. In § 160.064–4(a), by striking the words "special purpose buoyant device" and inserting the words "water safety buoyant devices".

§§ 160.064–6, 160.064–7 and 160.064–8 [Amended]

4. In §§ 160.064–6, 160.064–7 and 160.064–8 by striking the words "special purpose" from the first sentence of paragraph (a) of each section.

(Sec. 17, 54 Stat. 166, as amended (46 U.S.C. 526p), Sec. 5, 85 Stat. 215 (46 U.S.C. 1454), sec. 6(b)(1), 80 Stat. 937 (49 U.S.C. 1655 (b)(1)); 49 CFR 1.46 (b) and (o)(1))

Dated: March 8, 1974.

W. F. REA, III,
Rear Admiral, U.S. Coast Guard, Chief, Office of Merchant Marine Safety.

[Airspace Docket No. 74–SO–9]

VOR FEDERAL AIRWAY

Proposed Designation

The Federal Aviation Administration (FAA) is considering an amendment to Part 71 of the Federal Aviation Regulations that would designate a VOR Federal Airway between Montgomery, Ala., and Birmingham, Ala.

Interested persons may participate in the proposed rule making by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Southern Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Ga. 30320. All communications received on or before April 17, 1974, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received.

An official docket will be available for examination by interested persons at the Federal Aviation Administration, Office of the General Counsel, Attention: Rules Docket, 800 Independence Avenue SW., Washington, D.C. 20591. An informal docket also will be available for examination at the office of the Regional Air Traffic Division Chief.

The proposed amendment would designate alternate Airway V–7E from Montgomery, Ala., via INT Montgomery 358° T (355° M) and Birmingham, Ala., 140° T (137° M) radials, to Birmingham. Designation of this route would provide a numbered airway for a route over which aircraft are presently operating by use of radar vectors.

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Washington, D.C., on March 12, 1974.

GORDON E. KEWER,
Acting Chief, Airspace and Air Traffic Rules Division.

[FR Doc.74–6105 Filed 3–15–74;8:45 am]

[14 CFR Part 71]

[Airspace Docket No. 74–SO–32]

CONTROL ZONE

Proposed Designation

The Federal Aviation Administration is considering an amendment to Part 71 of the Federal Aviation Regulations that would designate the Pompano Beach, Fla., control zone.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Federal Aviation Administration, Southern Region, Air Traffic Division, P.O. Box 20636, Atlanta, Ga. 30320. All communications received on or before April 1,

V 39 53 MAR 18 74 XUM

1974, will be considered before action is taken on the proposed amendment. No hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Chief, Airspace and Procedures Branch. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in light of comments received.

The official docket will be available for examination by interested persons at the Federal Aviation Administration, Southern Region, Room 645, 3400 Whipple Street, East Point, Ga.

The Pompano Beach control zone would be designated as:

Within a 5-mile radius of Pompano Beach Airpark (latitude 26°15'00" N., longitude 80°06'30" W.); within 3 miles each side of Pompano Beach VOR (latitude 26°14'52" N., longitude 80°06'32" W.) 319° radial, extending from the 5-mile radius zone to 8.5 miles northwest of the VOR; excluding the portion within the Fort Lauderdale, Fla. (Executive Airport) control zone. This control zone is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Airman's Information Manual.

The proposed designation is required to provide controlled airspace protection for IFR operations at Pompano Beach Airpark in climb to 700 feet above the surface and in descent from 1,000 feet above the surface. The Federal Aviation Administration plans to assume operation of the city-owned Pompano Beach Airport Traffic Control Tower on June 20, 1974, in conjunction with the designation of this control zone.

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in East Point, Ga., on March 12, 1974.

PHILLIP M. SWATEK,
Director, Southern Region.

[FR Doc.74-6273 Filed 3-15-74;8:45 am]

[14 CFR Part 75]

[Airspace Docket No. 74-SO-8]

RNAV ROUTE

Proposed Establishment and Revocation

The Federal Aviation Administration (FAA) is considering an amendment to Part 75 of the Federal Aviation Regulations that would revoke J-873R serving Columbia, S.C., to Atlanta, Ga., and replace it with new RNAV route J-869R.

Interested persons may participate in the proposed rule making by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Southern Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Ga. 30320. All communications received on or before April 17, 1974, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received.

An official docket will be available for examination by interested persons at the Federal Aviation Administration, Office of the General Counsel, Attention: Rules Docket, 800 Independence Avenue SW., Washington, D.C. 20591. An informal docket also will be available for examination at the office of the Regional Air Traffic Division Chief.

The proposed amendment would:

1. Revoke J-873R from Waypoint Irmos to Waypoint Lands. The revocation of this inbound route to the Atlanta, Ga., terminal area would improve air traffic control procedures by eliminating a crossing point which conflicts with northeastbound departure traffic from Atlanta.

2. Establish new RNAV route No. J-869R to serve from Columbia, S.C., to Atlanta, Ga., as follows:

Waypoint	Latitude and longitude	Ref. facility	RHO/THETA
Zolly	33°47'20" N., 81°23'00" W.	CAE	258.7° M/16.9
Augusta, Ga.	33°32'40" N., 82°08'00" W.	CAE	253.2° M/57.2
Sinca	33°05'19" N., 83°33'03" W.	AGS	250.4° M/76.3

This action is intended to simplify flight planning and improve traffic flow to and from the Atlanta terminal area.

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Washington, D.C., on March 12, 1974.

GORDON E. KEWER,
Acting Chief, Airspace and Air Traffic Rules Division.

National Highway Traffic Safety Administration

[49 CFR Part 571]

[Docket No. 74-12; Notice 1]

NEW PNEUMATIC TIRES FOR PASSENGER CARS

Replacement Size Designations

This notice proposes to amend Motor Vehicle Safety Standard No. 109 (49 CFR 571.109) to provide for labeling of "replaces" tire size designations.

Standard No. 109 presently requires each tire to be labeled with, "one size designation, except that equivalent inch and metric size designations may be used" (S4.3). The NHTSA has taken the position that this language prohibits what are commonly referred to as "dual-size markings" except when the marking indicates that one of the sizes is intended to replace the other.

Dual-size markings were traditionally a representation that a particular tire could be considered as meeting fully the criteria of two contemporaneous and separate tire size designations. Such tires did not in fact meet the physical dimension criteria in Standard No. 109 for both size designations, and as a consequence labeling of this type was specifically prohibited (36 FR 1195; January 26, 1971). Replacement size markings, however, represent that a particular size is replacing or superseding an existing size designation. The NHTSA believes this type of information to be advantageous to consumers, providing on the tire itself information that a specified size designation is intended to be used in place of another. Unlike traditional dual size markings, no misrepresentations are involved.

This notice would clarify the labeling requirements of Standard No. 109, to allow, subject to certain conditions, the labeling of replacement tire size designations. Manufacturers must intend the primary size to be a replacement size. This would not require the discontinuation of the existing size, but there should at least be a bona fide intent on the part of the tire manufacturer that the replacement size will eventually supersede the replaced size in terms of production and marketing.

The replacement or primary size designation would be required to be followed by the word, "REPLACES" and the replaced size, and the latter two items would be required to be no greater than one-half the height of the primary size marking. The use of other words or phrases to indicate replacement would be prohibited, such as the use of the phrase "also fits". While not presently prohibited if used to indicate replacement, the NHTSA believes the phrase "also fits" connotes dual-size markings rather than replacement size designations. The restriction for label size is intended to emphasize that the replacement information is of a secondary and purely informational nature.

The tire would be required to meet the physical dimension requirements of Standard No. 109 for both the primary and replaced tire size designations, and in no case would the aspect ratio of the two size designations be allowed to differ by more than 5 percent. The primary size would also be required to have a maximum load at least as great as the replaced size. These requirements are designated to ensure both that a replacement size is closely related in terms of physical dimensions and load carrying capacity to the replaced size, and that manufacturers do not indiscriminately designate newly developed tire size designations as replacements for existing sizes regardless of whether interchangeability in vehicle applications is practical or safe.

In light of the above, it is proposed that § 571.109 in Chapter V of Title 49, Code of Federal Regulations, be amended as follows:

1. S3, "Definitions", would be amended by the addition of the following definitions for "aspect ratio" and "section height":

"Aspect ratio" means the tire's section height divided by its section width, expressed as a percentage.

"Section height" means the linear distance between the tire beads and the tread surface, measured as the distance between two lines parallel to the tire axis and perpendicular to a tire diameter, one tangent to the tread surface and the other tangent to the bead surfaces closest to the tire axis.

2. S4.3 (a) would be amended to read:

S4.3 *Labeling requirements.*

. . . . . .

(a) Except as provided in S4.3.4, one size designation, except that equivalent inch and metric size designations may be used.

. . . . . .

3. A new S4.3.4 would be added to read:

S4.3.4 If a tire size designation is intended to replace an existing size designation, the tire may be labeled, immediately following the size designation, with the word "REPLACES", followed by the replaced size designation, in letters and numerals not more than one-half the height of the primary (replacement) size designation, if each of the following conditions is met:

(a) The maximum load for the primary size designation is at least as great as that of the replaced size designation;

(b) The tire meets the physical dimension requirements of S4.2.2.2 of this section for both the primary and the replaced size designations; and

(c) The difference between the aspect ratio of the primary size designation and the replaced size designation does not exceed 5 percent.

Interested persons are invited to submit comments on the proposal. Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5221, 400 Seventh Street SW., Washington, D.C. 20590. It is requested but not required that 10 copies be submitted.

All comments received before the close of business on the comment closing date indicated below will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. However, the rulemaking action may proceed at any time after that date, and comments received after the closing date and too late for consideration in regard to the action will be treated as suggestions for future rulemaking. The NHTSA will continue to file relevant material as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Comment closing date: May 17, 1974.

Proposed effective date: Publication date of final rule.

(Secs. 103, 112, 119, 201, and 202, Pub. L. 89-563, 80 Stat. 718, (15 U.S.C. 1392, 1401, 1403, 1407, 1421, 1422); delegations of authority at 49 CFR 1.51 and 49 CFR 501.8)

Issued on March 12, 1974.

ROBERT L. CARTER,
Associate Administrator, Motor Vehicle Programs.

FEDERAL MARITIME COMMISSION

[46 CFR Part 526]

[Docket No. 73-55]

FREE TIME ON IMPORT CONTAINERIZED CARGO AT THE PORT OF NEW YORK

Evidentiary Hearing

On August 28, 1973, the Federal Maritime Commission issued a notice of proposed rulemaking (38 FR 23540), giving notice that it was considering amending General Order No. 8 (46 CFR 526) to make the provisions thereof applicable to containerized cargo.

Having carefully considered the comments, requests, and recommendations submitted to it pursuant to said notice the Commission is of the opinion that due to the complex nature of the containerization issue a full evidentiary hearing is called for in this proceeding. In addition, the Commission feels that the issues of demurrage free time and detention free time are so inexorably intertwined that to exclude the subject of detention free time from this evidentiary proceeding might result only in a limited form of regulation which would have the effect of precipitating new or unforeseen problems regarding container detention free time.

Therefore, it is ordered, That the Commission pursuant to section 4 of the Administrative Procedure Act (5 U.S.C. 553) and sections 17, 22, and 43 of the Shipping Act, 1916 (46 U.S.C. 816, 821, and 841(a)), is considering promulgation of the proposed rules set forth in the original notice as well as the promulgation of rules to regulate container detention free time at the Port of New York not inconsistent with General Order No. 8.

It is further ordered, That notice of this Supplemental Notice be published in the FEDERAL REGISTER; and

It is further ordered, That this proceeding be assigned for public hearing before an Administrative Law Judge of the Commission's Office of Administrative Law Judges and that the hearing be held at a date and place to be determined by the Presiding Administrative Law Judge;

It is further ordered, That the Presiding Administrative Law Judge shall hear evidence regarding both demurrage free time and detention free time, and shall determine whether the rules amendment regarding free time and demurrage should be adopted and whether new rules need to be promulgated to regulate container detention time as well;

It is further ordered, That if the Presiding Administrative Law Judge finds the need for rules on either container free time and demurrage or container detention time applicable to the Port of New York that he recommend specific draft text for such rules;

It is further ordered, That all future notices issued by or on behalf of the Commission in this proceeding, including notice of time and place of hearing or prehearing conference, shall be mailed directly to all parties of record.

All persons (including individuals, corporations, associations, firms, partnerships and public bodies) not already participating in [1] and having an interest in this proceeding and desiring to intervene herein should notify the Secretary of the Commission promptly and file petitions for leave to intervene in accordance with Rule 5(1) of the Commission's rules of practice and procedure (46 CFR 502.72).

By the Commission.

[SEAL] FRANCIS C. HURNEY,
Secretary.

Correction

In FR Doc. 74–5437 appearing at page 9205 in the issue for Friday, March 8, 1974, in the third column, fifth paragraph on page 9210, the word "subscribed" in the twelfth line should now read "subscriber" and the word "subscribed" in the first column, first paragraph, sixth line on page 9211 should also read "subscriber" respectively.

ATOMIC ENERGY COMMISSION

[10 CFR Parts 31 and 32]

LICENSING PROCEEDINGS: REVISION OF GENERAL LICENSE FOR BYPRODUCT MATERIAL CONTAINED IN CERTAIN DEVICES

Notice of Extension of Time To File Comments

On February 5, 1974 the Atomic Energy Commission published in the FEDERAL REGISTER (39 FR 4583) a notice of proposed changes in its regulations pertaining to the use of byproduct material in certain gauges and similar devices. The proposed changes, among other things, would require the user to register with the Commission prior to receiving byproduct material for use under the general license in § 31.5 of the Commission's regulation, 10 CFR Part 31, General Licenses for Byproduct Material. Related changes would be made in the requirements imposed on persons specifically licensed under 10 CFR 32.51 to distribute byproduct material in devices for use under the general license. Interested persons were invited to submit written comments or suggestions in connection with the proposed amendments by March 18, 1974.

In response to a request from the President, Measurex Corporation, the time within which comments may be filed is hereby extended to and including April 17, 1974. Copies of comments on the proposed amendments may be examined in the Commission's Public Document Room at 1717 H Street, NW, Washington, D.C.

(Secs. 81, 82, 161, 69 Stat. 935, 948, as amended; (42 U.S.C. 2111, 2112, 2201))

Dated at Washington, D.C., this 14th day of March 1974.

For the Atomic Energy Commission.

GORDON M. GRANT,
Assistant Secretary of the Commission.

Notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF STATE

Agency for International Development

[Amdt. to Delegation of Authority No. 27]

ASSISTANT ADMINISTRATOR FOR PROGRAM AND MANAGEMENT SERVICES

Delegation of Authority Relating to Personnel Functions

Pursuant to the authority delegated to me by Delegation of Authority No. 104, as amended, from the Secretary of State, dated November 3, 1961 (26 FR 10608), I hereby amend A.I.D. Delegation of Authority No. 27, as follows:

SEC. 1. Section I is amended by adding thereto the following numbered paragraphs:

"22. To perform so much of the functions under Title VIII of the Foreign Service Act of 1946, as amended, as relate to establishing and maintaining retirement records for personnel participating in the Foreign Service Retirement and Disability System under section 625 (k) of the Foreign Assistance Act of 1961, as amended, and for transferring such records to the Department of State upon the separation, retirement or death of such personnel.

23. To approve, in accordance with section 636 of the Foreign Service Act of 1946, as amended, and 3 FAM 670 et seq., the voluntary retirement of personnel participating in the Foreign Service Retirement and Disability System, subject to the reservations set forth in Section III.

24. To extend the service, pursuant to section 625(k)(6) of the Foreign Assistance Act of 1961, as amended, and 3 FAM 670 et seq., of personnel participating in the Foreign Service Retirement and Disability System for a period of time not to exceed five years beyond mandatory retirement age, subject to the reservations set forth in Section III."

SEC. 2. Section III is amended by adding thereto, the following numbered paragraphs:

"4. To approve, in accordance with section 636 of the Foreign Service Act of 1946, as amended, and 3 FAM 670 et seq., the voluntary retirement of persons serving under the Executive Schedule (5 U.S.C. 5311 et seq.) and persons employed as Chief of Mission, Deputy Chief of Mission, A.I.D. Representative and the Chairman of the Development Assistance Committee of the Organization for Economic Cooperation and Development.

5. To extend the service, pursuant to section 625(k)(6) of the Foreign Assistance Act of 1961, as amended, and 3 FAM 670 et seq., of persons serving under the Executive Schedule (5 U.S.C. 5311 et seq.) and persons employed as Chief of Mission, Deputy Chief of Mission, A.I.D. Representative and the Chairman of the Development Assistance Committee of the Organization for Economic Cooperation and Development."

SEC. 3. This amendment to Delegation of Authority No. 27 shall be effective immediately.

Dated: March 6, 1974.

DANIEL PARKER,
Administrator.

DIRECTOR, OFFICE OF PERSONNEL AND MANPOWER

Redelegation of Authority Regarding Personnel

SEC. I. Pursuant to the authority delegated to me by A.I.D. Delegation of Authority No. 27, as amended, from the Administrator, I hereby redelegate to the Director, Office of Personnel and Manpower, the following authority:

A. The authority to exercise all of the authorities set forth in section I of Delegation of Authority No. 27, as amended, with respect to all personnel of the Agency for International Development, whether assigned to the United States or overseas, to the extent such provisions are applicable to such categories of personnel, subject to those reservations set forth in Delegation of Authority No. 27 and this Redelegation of Authority.

B. The authority set forth in paragraph 2 of section IV of Delegation of Authority No. 27, to the extent consistent with law, or by regulation of competent authority, to exercise the authority vested in the Administrator as head of an agency by statute or regulation, including those of other agencies, relating to any aspect of personnel authority or administration, and to establish policy and procedures relating thereto.

SEC. II. The following authority is reserved to the Assistant Administrator for Program and Management Services.

A. The authority to extend the service, pursuant to section 625(k)(6) of the Foreign Assistance Act of 1961, as amended, and 3 FAM 670 et seq., of personnel participating in the Foreign Service Retirement and Disability System for a period of time not to exceed five years beyond mandatory retirement age.

SEC. III. The authorities redelegated herein may be redelegated successively and may be exercised by persons who are performing the functions of designated officers in an acting capacity.

SEC. IV. The redelegation of authority to the Director, Office of Personnel and Manpower, dated November 26, 1969 (34 FR 19662) is hereby superseded.

SEC. V. This Redelegation of Authority shall be effective immediately.

Dated: March 7, 1974.

JAMES F. CAMPBELL,
Assistant Administrator for Program and Management Services.

[FR Doc.74–6175 Filed 3–15–74;8:45 am]

JOHN F. KEYES

Cancellation of Redelegation of Authority No. 99.1.4

Pursuant to the authority delegated to me by Redelegation of Authority No. 99.1 (38 FR 12836), dated May 1, 1973, from the Assistant Administrator for Program and Management Services, I hereby revoke Redelegation of Authority No. 99.1.4 to John F. Keyes, Overhead and Special Cost Branch, Support Division, Office of Contract Management (38 FR 22564). This revocation is effective immediately.

Dated: March 6, 1974.

JOHN F. OWENS,
Director, Office of Contract Management.

Correction

In FR Doc. 74-5008 appearing on page 8357 in the issue of Tuesday, March 5, 1974, delete the second line of the fourth paragraph "the public is precluded because of the" and insert in lieu of the line "the public since budgetary matters which".

DEPARTMENT OF THE INTERIOR

Bonneville Power Administration

DRAFT ENVIRONMENTAL STATEMENT WHOLESALE POWER RATE INCREASE

Notice of Public Meeting

Notice of a series of public meetings is hereby given by the Bonneville Power Administration, to solicit public comment on BPA's proposed wholesale rate increase, now scheduled for December 1974.

The Bonneville Project Act (Pub. L. 329, August 20, 1937, 50 Stat. 731 as amended (16 U.S.C. 825a)) requires "recovery * * * of the cost of producing and transmitting * * * electric energy, including the amortization of the capital investment over a reasonable number of years." Pursuant to that Act, BPA is proposing new rate schedules for sale of electric energy to its wholesale customers to be effective December 20, 1974.

The purpose of these meetings is twofold: To present to the public an environmental statement concerning the proposed rate increase and to elicit comments from the public with respect to the environmental impact of the proposal.

The dates, hours, and place of the meetings are as follows:

Seattle, Washington: April 19, 1974, at 7:30 p.m. at the Seattle Center, Orcas Room, Seattle, Washington; *Kalispell, Montana:* April 22, 1974, at 7:30 p.m. at the Conrad National Bank, Community Room, 2 Main Street, Kalispell, Montana; *Wenatchee, Washington:* April 22, 1974 at 7:30 p.m. at the Douglas County PUD Auditorium, East Wenatchee, Washington; *Burley, Idaho:* April 23, 1974, at 1:30 p.m. at the Ramada Inn, 800 N. Overland, Burley, Idaho; *Portland, Oregon:* April 23, 1974, at 7:30 p.m. at the Bonneville Power Administration building auditorium, 1002 NE. Holladay, Portland, Oregon; *Walla Walla, Washington:* April 24, 1974, at 7:30 p.m. at the Marcus Whitman Hotel, Walla Walla, Washington; *Spokane, Washington:* April 25, 1974, at 7:30 p.m. at the U.S. Courthouse, West 920 Riverside, Spokane, Washington; *Eugene Oregon:* April 25, 1974, at 7:00 p.m. at the Eugene City Hall Council Chamber, 777 Pearl Street, Eugene, Oregon.

Oral and written statements will be accepted at this series of meetings. Members of the public who wish to be given preference in the order of appearance should contact the Bonneville Area or District Office in the area in which the particular meeting is to be held. However, all those present wishing to comment will be allowed to do so in the time remaining. Those wishing to comment orally are encouraged but not required to submit comments, whether oral or written, will be given consideration. Because of the technical nature of the subject matter, members of the public and other reviewers are also encouraged to familiarize themselves with the draft environmental statement before commenting.

Written comments on the draft environmental statement have been invited and will be accepted on or before Tuesday, April 30, 1974. Copies of the draft environmental statement are available for inspection at any of the BPA Area of District Offices or the headquarters building, Bonneville Power Administration, 1002 NE. Holladay Street, Portland, Oregon 97232. Copies of the draft environmental statement have also been placed in the Federal depository libraries in the BPA service area.

Additional or clarifying information may be obtained by writing or calling the Environmental Office, Bonneville Power Administration, P.O. Box 3621, Portland, Oregon 97208; Area Code (503) 234-3361, extension 5140.

Dated: March 14, 1974.

WILLIAM H. CLAGETT,
Assistant Administrator.

National Park Service

DINOSAUR NATIONAL MONUMENT

Notice of Intention To Issue a Concession Permit

Pursuant to the provisions of section 5, of the Act of October 9, 1965 (79 Stat. 969; 16 U.S.C. 20), public notice is hereby given that on or before April 17, 1974, the Department of the Interior, through the Superintendent, Dinosaur National Monument, proposes to issue a concession permit to Wilkins Transportation, Inc., authorizing it to provide concession facilities and services for the public at Dinosaur National Monument for a period of five (5) years from January 1, 1974 through December 31, 1978.

The foregoing concessioner has performed its obligations under a prior permit to the satisfaction of the National Park Service, and, therefore, pursuant to the Act cited above, is entitled to be given preference in the renewal of the permit and in the negotiation of a new permit. However, under the Act cited above, the National Park Service is also required to consider and evaluate all proposals received as a result of this notice. Any proposal to be considered and evaluated must be submitted on or before April 17, 1974.

Interested parties should contact the Superintendent, Dinosaur National Monument, P.O. Box 210, Dinosaur, Colorado 81610, for information as to the requirements of the proposed permit.

Dated: February 14, 1974.

RICHARD S. TOUSLEY,
Superintendent,
Dinosaur National Monument.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

COMMITTEE ON RULEMAKING AND PUBLIC INFORMATION

Notice of Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given of a meeting of the Committee on Rulemaking and Public Information of the Administrative Conference of the United States, to be held at 10:00 a.m. on April 11, 1974 in the Library, Suite 500, 2120 L Street NW., Washington, D.C. 20037.

The Committee will meet to discuss a number of projects including a proposed study of emergency rulemaking procedures, a proposed manual on pre-rulemaking procedures and a pending study of procedures for the inter-agency transfer of information.

Attendance is open to the interested public, but limited to the space available. To the extent that time permits the Committee Chairman may allow public presentation of oral statements at the meeting. Any member of the public may file a written statement with the Committee before, during or after the meeting. For further information concerning this committee meeeting contact John F. Cushman, Suite 500, 2120 L Street NW., Washington, D.C. 20037 or phone 202-254-7020. Minutes of the meeting will be available on request.

RICHARD K. BERG,
Executive Secretary.

Food and Drug Administration

[Docket No. FDC–81]

IMPROVEMENT OF NUTRIENT LEVELS OF ENRICHED FLOUR, ENRICHED SELF-RISING FLOUR, AND ENRICHED BREAD, ROLLS OR BUNS

Notice of Prehearing Conference

In the matter of amending the standards of identity for enriched flour, enriched self-rising flour, and enriched bread, rolls or buns to improve the nutrient levels.

In the FEDERAL REGISTER of February 11, 1974 (39 FR 5188), the Commissioner of Food and Drugs ordered that a public hearing be held in this matter.

Pursuant to § 2.74 (21 CFR 2.74), a prehearing conference for the simplification of the issues; the possibility of obtaining stipulations, admission of facts, and documents; the possibility of limitation of the number of expert witnesses; the identification, and if practicable, the scheduling of witnesses to be called; the advance submission in quintuplicate of all documentary evidence to be marked for identification; and such other matters as may aid in the expeditious disposition of the proceeding will be held in Room 4A–35, 5600 Fishers Lane, Rockville, Maryland 20852 beginning at 10 a.m. on Monday, March 25, 1974.

Reference is made to §§ 2.75 and 2.76 (21 CFR 2.74 and 2.75) relating to prehearing procedures.

Dated: March 6, 1974.

IRVING SOMMER,
Administrative Law Judge.

Request for Comments Regarding Proposed Implementation Plan

Correction

In FR Doc. 74–5368, Part III for the issue of March 8, 1974, appearing at page 9326, the closing date for the comment period found at the top of the third column on page 9326, should be changed from "April, 22, 1974", to read "May 7, 1974".

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket No. — FRA Pet. Nos. 83, 84; Notice 3]

VOICE TRAIN CONTROL SYSTEM

Extension of Time for Filing Comments

On January 4, 1974 the Federal Railroad Administration (FRA) published a notice of a hearing to be conducted upon the petitions of the Baltimore and Ohio Railroad Company (B&O) for approval of the general concept of Voice Train Control Systems (VTCS) and also for approval of installation and operation of VTCS on a portion of its lines in central Ohio. That notice contained a brief explanation of the VTCS and a description of the territory in which the B&O has proposed to install the system (39 FR 1088). Hearings on these petitions were conducted on January 22, 1974 and March 5, 1974. The dockets were to remain open until March 15, 1974 for filing of additional comments.

The Brotherhood of Railroad Signalmen and the Brotherhood of Locomotive Engineers have filed requests for additional time to submit the views and comments of their memberships. This request was made so that the Brotherhoods could have sufficient time to review the data submitted at the March 5, 1974 hearing as well as additional data which was requested of the B&O by the Hearing Officer at that hearing.

To provide all interested parties an adequate opportunity to express their views concerning this new system of train control, and for good cause shown in the Brotherhoods' request, the FRA has decided to extend the closing date for filing written comments until April 15, 1974. Persons wishing to file views or comments should identify the docket and notice numbers and submit all communications to the Docket Clerk, Office of Chief Counsel, Federal Railroad Administration, 400 Seventh Street, SW., Washington, D.C. 20590. Comments received by April 15, 1974 will be considered before the FRA takes action on these petitions. Comments received after that date will be considered as far as practicable.

(Sec. 12, 24 Stat. 383, Sec. 441, 41 Stat. 498, sec. 6, 80 Stat. 939, 210 (49 U.S.C. 12, 26, 1655), § 1.49(g) of the regulations of the Office of the Secretary of Transportation (49 CFR 1.49(g))

Issued in Washington, D.C., March 13, 1974.

DONALD W. BENNETT,
Chief Counsel.

[FR Doc.74–6218 Filed 3–15–74;8:45 am]

ATOMIC ENERGY COMMISSION

[Docket Nos. 50–424—50–427]

GEORGIA POWER CO.

Notice of Change in Hearing Date and Location

On March 5, 1974, a notice of environmental hearing was issued scheduling an evidentiary hearing in this matter for April 9, 1974, at the Fulton County Courthouse, Atlanta, Georgia. The subject hearing date and location have now been changed, and the environmental hearing will commence at 9:30 a.m. local time on April 16, 1974, at the following location:

City Council Chambers
Waynesboro City Hall
Myrick Street
Waynesboro, Georgia 30830

The purpose of this evidentiary hearing before an Atomic Safety and Licensing Board is the same as set forth in the March 5 Notice, i.e., an evidentiary hearing to determine whether the Georgia Power Company (the Applicant) should be permitted to engage in certain preconstruction activities on the site of its proposed four-unit nuclear powerplant, designated as the Alvin W. Vogtle Nuclear Plant, Units 1, 2, 3 and 4, on the southwestern bank of the Savannah River, about 26 miles south-southeast of Augusta, Georgia and 15 miles northeast of Waynesboro.

This proceeding is in accordance with the Commission's proposed amendments to 10 CFR Parts 2 and 50,[1] which would allow applicants to apply for authorization to engage in limited site pre-construction activities (Limited Work Authorization or "LWA") prior to the hearing on, or issuance of, a construction permit for a power reactor. However, this may be done only after the full "NEPA"[2] review has been completed and an environmental hearing has been held. Before such an "LWA" may be issued, an Atomic Safety and Licensing Board must determine that all the environmental findings required for issuance of a construction permit may properly be made, based on the evidentiary record.

Notice of Availability of the Final Environmental (Impact) Statement (FES) was published in the FEDERAL REGISTER on March 8, 1974. 39 FR 9224. Copies of the FES are available for inspection in the Commission's Public Document Room, 1717 H St., NW., Washington, D.C. 20545; in the Burke County Library, 4th Street, Waynesboro, Georgia 30830; in the Bureau of State Planning and Community Affairs, Rm. 611, 270 Washington St., SW., Atlanta, Georgia 30309; and also at the Central Savannah River APDC, P.O. Box 2800, Augusta, Georgia.

Members of the public are welcome to attend the hearing. Persons who have filed requests to make limited appearance statements will be heard the morning of the first day of the hearing. Limited appearance statements may be filed in writing without an oral presentation, if desired.

Issued at Washington, D.C., this 13th day of March 1974.

It is so ordered.

For the Atomic Safety and Licensing Board.

THOMAS W. REILLY,
Chairman.

GULF STATES UTILITIES CO.

Assignment of Members of Atomic Safety and Licensing Appeal Board

Notice is hereby given that, in accordance with the authority in 10 CFR 2.787 (a), the Chairman of the Atomic Safety and Licensing Appeal Panel has assigned the following panel members to serve as the Atomic Safety and Licensing Appeal Board for these proceedings:

Alan S. Rosenthal, Chairman
Dr. John H. Buck, Member
Michael C. Farrar, Member

Dated: March 11, 1974.

MARGARET E. DU FLO,
Secretary to the Appeal Board.

REGULATORY GUIDES

Notice of Issuance and Availability

The Atomic Energy Commission has issued four new guides in its Regulatory Guide series. The Regulatory Guide series has been developed to describe and make available to the public methods acceptable to the AEC Regulatory staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

The new guides are in Division 3, "Fuels and Materials Facilities Guides." Regulatory Guide 3.17, "Earthquake Instrumentation for Fuel Reprocessing Plants," describes an acceptable program for providing seismic instrumentation at fuel reprocessing plants. Regulatory Guide 3.18, "Confinement Barriers and Systems for Fuel Reprocessing Plants," provides information relative to establishing principal design criteria for confinement systems for radioactive material at fuel reprocessing plants. These systems are required to minimize releases of radioactive materials to the environment. Regulatory Guide 3.19, "Reporting of Operating Information for Fuel Reprocessing Plants," lists specific reporting requirements for licensees as specified in AEC regulations and as usually specified in licensee Technical Specifications. Regulatory Guide 3.20, "Process Offgas Systems for Fuel Reprocessing Plants," provides information relative to establishing principal design criteria for process offgas systems for reprocessing plants.

Regulatory Guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW, Washington, D.C. Comments and suggestions in connection with improvements in the guides are encouraged and should be sent to the Secretary of the Commission, U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Chief, Public Proceedings Staff. Requests for single copies of issued guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future guides should be made in writing to the Director of Regulatory Standards, U.S. Atomic Energy Commission, Washington, D.C. 20545. Telephone requests cannot be accommodated.

Other Division 3 Regulatory Guides currently being developed include the following:

General Design Guide for Process Building Ventilation Systems for Fuel Reprocessing Plants
General Fire Protection Guide for Fuel Reprocessing Plants
Standard Format and Content of License Applications for Fuel Reprocessing Plants
Standard Format and Content of License Applications for Plutonium Fuel Fabrication and Recovery Plants
Standard Format and Content of License Applications for Commercial Waste Burial Facilities
Quality Assurance Requirements for Protective Coatings Applied to Fuel Reprocessing, Plutonium Processing and Fuel Fabrication Plants (This guide will endorse ANSI Standard N101.4)
Protective Coatings (Paints) for Nuclear Plants (This guide will endorse ANSI Standard N512)
(5 U.S.C. 552(a))

Dated at Bethesda, Md., this 11th day of March 1974.

For the Atomic Energy Commission.

LESTER ROGERS,
Director of Regulatory Standards.

[Docket No. 50–141]

STANFORD UNIVERSITY

Order Authorizing Dismantling of Facility

By application notarized September 20, 1973, and supplement dated November 19, 1973, Stanford University requested authorization to dismantle their reactor in accordance with a plan submitted to the Commission. Operation of the facility has been discontinued and all fuel has been removed from the reactor and shipped to an authorized reprocessing facility.

The Commission has reviewed the application in accordance with the provisions of the Commission's regulations and has identified an additional requirement that all planned liquid releases from the facility must be verified within 30 days of planned release to be within the standards established by 10 CFR Part 20 by current radiological analysis.

The Commission also has found that the dismantlement and disposal of component parts and waste from the facility in accordance with the regulations in 10 CFR Ch. I and the application, as modified, will not be inimical to the common defense and security or to the health and safety of the public. The bases for these findings are set forth in the Safety Evaluation by the Regulatory Staff dated January 30, 1974.

Accordingly, it is hereby ordered that Stanford University may dismantle their reactor covered by Facility License No. R–60, as amended in accordance with the Commission's regulations. The dismantling plan, as modified by this order, will replace the Technical Specifications in their entirety.

After completion of the dismantling and the decontamination, the submission of a report on the radiation survey to confirm that radiation levels in the facility area meet the values defined in the dismantling plan, as modified, and an inspection by representatives of the Commission, consideration will be given to whether a further order should be issued terminating Facility License No. R–60.

Dated at Bethesda, Md., this 12th day of March 1974.

For the Atomic Energy Commission,

DONALD J. SKOVHOLT,
Assistant Director for Operating Reactors, Directorate of Licensing.

[Docket No. STN 50–480]

WESTINGHOUSE ELECTRIC CORP.

Receipt of Standard Safety Analysis Report

Westinghouse Electric Corporation, in response to Option No. 1 of the policy statement of the Atomic Energy Commission (the Commission) entitled "Methods of Achieving Standardization of Nuclear Power Plants," issued March 5, 1973, has filed with the Commission an eight-volume document entitled "Reference Safety Analysis Report-41" (RESAR–41), which was docketed March

[1] For environmental issues to be determined in this proceeding, see Commission's April 27, 1973 "Notice of Hearing on Application for Construction Permits" (published in 38 FR 10,751, May 1, 1973) and 10 CFR Part 50, Appendix D.

V 39 53
MAR 18 74
XUM

11, 1974. The tendered application for RESAR–41 was received on December 3, 1973. Following a preliminary review for completeness, it was accepted on February 13, 1974, for docketing. Docket No. STN 50–480 has been assigned to RESAR–41 and should be referenced in any correspondence relating thereto.

RESAR–41 has been submitted in accordance with the "reference system" option wherein an entire facility design or major fractions of it can be identified as a standard design to be used in multiple applications. RESAR–41 describes and analyzes a standard four-loop pressurized water nuclear steam supply system (NSSS) with auxiliary and safety systems. The reactor is designed for initial operation at a core thermal power level of 3800 megawatts.

When its review of RESAR–41 is complete, the Commission's Regulatory staff will prepare and publish a Safety Evaluation Report documenting the results of the review. In addition, RESAR–41 will be referred to the Advisory Committee on Reactor Safeguards (ACRS) for its review and a report thereon. Copies of the Safety Evaluation Report and the ACRS report will be made available to the public. A notice relating to the availability of these documents will be published in the FEDERAL REGISTER.

A copy of RESAR–41 is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20545. When available, the Safety Evaluation Report and the ACRS report will also be made available for inspection by the public at the AEC Public Document Room.

Dated at Bethesda, Md., this 11th day of March 1974.

For the Atomic Energy Commission.

D. B. VASSALLO,
Chief, Light Water Reactors Project Branch 1–1, Directorate of Licensing—Regulation.

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS WORKING GROUP ON CONTROL OF COMBUSTIBLE GASES FOLLOWING A LOSS OF COOLANT ACCIDENT (LOCA)

Notice of Meeting

In accordance with the purposes of sections 29 and 182 b. of the Atomic Energy Act (42 U.S.C. 2039, 2232 b.), the Advisory Committee on Reactor Safeguards' Working Group on Control of Combustible Gases Following A Loss of Coolant Accident (LOCA) will hold a meeting on March 25, 1974, in Room 1046, at 1717 H Street NW., Washington, D.C. The subject scheduled for discussion is control of combustible gases following a LOCA. This may include discussion of a Regulatory Staff working paper pertaining to a proposed Revision 1 to Regulatory Guide 1.7.

The Working Group is meeting with its consultants and members of the Regulatory Staff and their consultants to formulate recommendations to the ACRS regarding the above subject.

I have determined, in accordance with subsection 10(d) of Pub. L. 92–463, that the meeting will consist of an exchange of opinions and internal deliberations, the discussion of which, if written, would fall within exemption (5) of 5 U.S.C. 552(b). It is essential to close this meeting to protect the free interchange of internal views and to avoid undue interference with agency or Committee operation.

JOHN C. RYAN,
Advisory Committee Management Officer.

CIVIL AERONAUTICS BOARD

[Docket No. 26502]

AIR PACIFIC LTD.

Notice of Prehearing Conference and Hearing

In the matter of Fiji-Majuro via Intermediate Points; Fiji-Pago Pago via Intermediate Points.

Notice is hereby given that a prehearing conference in this proceeding is assigned to be held on March 26, 1974, at 10:00 a.m. (local time) in Room 1031, North Universal Building, 1875 Connecticut Avenue NW., Washington, D.C., before Administrative Law Judge Ross I. Newmann.

Notice is also given that the hearing may be held immediately following conclusion of the prehearing conference unless a person objects or shows reason for postponement on or before March 20, 1974.

Dated at Washington, D.C., March 12, 1974.

[SEAL] RALPH H. WISER,
Chief Administrative Law Judge.

[Docket No. 26290, 23080–2; Order 74–3–59]

EASTERN AIR LINES, INC. AND PRIORITY AND NONPRIORITY DOMESTIC SERVICE MAIL RATES—PHASE 2

Order To Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 13th day of March 1974.

By Order 74–1–75, dated January 11, 1974, the Board granted review of an order issued by the Postmaster General on January 3, 1974, requiring Eastern Air Lines to retain a Boston-New York-Atlanta flight and postponed the effective date of the Postmaster General's order pending review. Pursuant to section 232 of the Board's Regulations, Eastern filed an application, which was supplemented on January 8, 1974, requesting that the Postmaster General's order be canceled.

In support of its application Eastern alleges, inter alia, that each of the segments in issue (Boston-New York, Boston-Atlanta, New York-Atlanta) receives multiple daily nonstop service providing sufficient capacity to accommodate the needs of the Postal Service; that the subject flight was canceled in order to conserve fuel during the fuel allocation program; that there are numerous comparable markets which do not receive late-night service; and that the scheduling of a one-directional flight to satisfy the needs of the Postal Service would have an adverse effect on Eastern's overall scheduling.

In answer to Eastern's pleadings, as supplemented, the Postmaster General asserts, inter alia, that while there may be sufficient total capacity operated over each segment throughout the day there is no capacity available at the specific times required by the Postal Service; that the canceled Eastern cargo flight carried substantial amounts of mail; and that no alternative modes of transportation can be employed without serious and unacceptable delay to substantial volumes of priority mail.[1]

Upon consideration of the foregoing and all the relevant facts, we find that the public convenience and necessity do not require cancellation of the Postmaster General's order so long as Eastern is adequately compensated for providing the flight directed by the Postmaster General. Accordingly, we have decided to deny Eastern's application and to effectuate the January 3, 1974, order of the Postmaster General. This will require Eastern to reinstitute its canceled Boston-New York-Atlanta southbound flight. However, we will condition the effectiveness of the Postmaster General's order upon final adoption by the Board of the proposed minimum temporary service mail rate for the transportation of mail by Eastern pursuant to the order of the Postmaster General issued January 3, 1974, discussed in detail below.

This is a unique case in which the Board, for the first time, has been called upon to review an order of the Postmaster General under section 405(b) of the Act. This section requires the Board to evaluate the issues raised in accordance with the standards of the public convenience and necessity. The Postmaster General has demonstrated that Boston and New York, and the areas they serve, have enjoyed an ongoing pattern of late-night mail service by Eastern, allowing for same-day delivery of priority mail at Atlanta. Cancellation of Eastern's Boston-New York-Atlanta all-cargo operation has effectively eliminated this

[1] The Postmaster General filed two motions for expedited processing of Eastern's application. In view of the action taken herein, the motions are moot. It must be emphasized, however, that this is a case of first impression involving complex questions of policy which require a unique balancing of the interests of the affected carrier, the traveling and shipping public, and the Postal Service. In conformance with the mandate of section 405(b), the Board has accorded this case priority treatment and has acted as expeditiously as possible within the limits of our resources.

established pattern of mail service for which, as the Postmaster General asserts, there are no alternate modes of transportation. In these special circumstances, absent a compelling showing to the contrary, the allegations of the Postal Service for continuation of an ongoing service must be given substantial weight.

However, evaluating the public convenience and necessity in accordance with the statutory declaration of policy contained in section 102 of the Act, the Board is compelled to consider not only the needs of the Postal Service, but fostering and promoting economically sound air transportation as well. We are concerned, in this regard, that the mandatory operation of the flight will impose a financial burden on the carrier, a situation we find undesirable, especially in light of Eastern's present financial difficulties.[2] Nevertheless, relying on the Postmaster General's representations with respect to need for the service and the volume of mail the Postal Service proposes to tender to Eastern on the flight in issue, we will sustain the Postmaster General's order. However, we believe that it is desirable to take steps to insure that Eastern will be adequately compensated for the involuntary operation of the flight, and, consequently we propose to condition our action upon the establishment of a minimum rate of compensation, discussed below, to be paid by the Postmaster General for the operation by Eastern of the flight directed by the Postmaster General in his order issued January 3, 1974. By denying Eastern's application subject to the adoption of the below minimum temporary rate of compensation, the Board seeks to accommodate the needs of the Postal Service and at the same time insure that the economic burden of providing the mandatory flight is not assumed by the carrier.

Accordingly, we tentatively find and conclude that the fair and reasonable temporary mail rate to be paid to Eastern by the Postmaster General for the operation of the Boston-New York-Atlanta flight ordered by the Postmaster General, the facilities used and useful therefor, and the services connected therewith shall be $2,500, or the amount which the Postmaster General would be required to pay Eastern for the mail it tenders using the current temporary mail rate, whichever is higher. The $2,500 temporary rate of compensation is based upon the estimate of the Postmaster General in his January 3, 1974 order of the average daily volume of mail which the Postmaster General anticipates tendering to Eastern on the reinstituted flight,[3] to which was applied the current temporary mail rate formula for the segments in issue. Use of this figure as a temporary rate of compensation for the operation of the flight, coupled with Eastern's ability to attract additional commercial revenue, should insure that the carrier will not be financially distressed by the mandatory operation of the flight.[4] The temporary rate proposed herein will be subject to retroactive adjustment as required by the order establishing final service mail rates in Docket 23080–2.

Finally, we note that further reductions in fuel allocations requiring additional service cutbacks could upset the balance which we are trying to achieve between the needs of the Postal Service, the traveling and shipping public, and the affected carrier. Consequently, we will retain jurisdiction in this matter and reserve the power to amend, revise, suspend or cancel the order of the Postmaster General if the public convenience and necessity require.

Accordingly, pursuant to the Federal Aviation Act of 1958, as amended, and particularly sections 204(a), 405, and 406 thereof, and the regulations promulgated in 14 CFR Part 302;

It is ordered, That:

1. Upon final Board adoption of the temporary service mail rate proposed herein, the application of Eastern Air Lines, Inc., to cancel the order of the Postmaster General issued on January 3, 1974, be and it hereby is denied;

2. Upon final Board adoption of the temporary service mail rate proposed herein, the order of the Postmaster General isued on January 3, 1974, be and it hereby is effective;

3. Eastern Air Lines, the Postmaster General, and all other interested persons are directed to show cause why the Board should not adopt the foregoing proposed findings and conclusions and fix, determine, and publish the temporary rate specified above for the transportation of mail by aircraft, the facilities used and useful therefor, and the services connected therewith as specified above as the fair and reasonable rate of compensation to be paid to Eastern Air Lines, Inc., for the operation of a Boston-New York-Atlanta southbound flight as ordered by the Postmaster General in his order issued January 3, 1974, pending the fixing of a final rate in the "Priority and Nonpriority Domestic Service Mail Rates Case," Phase 2, Docket 23080–2;

4. Further procedures herein shall be in accordance with 14 CFR, Part 302, and notice of any objection to the rate or to the other findings and conclusions proposed herein, shall be filed within seven days, and if notice is filed, written answers and supporting documents shall be filed within 14 days after service of this order;

5. If notice of objection is not filed within 7 days after service of this order, or if notice is filed, and an answer, which raises a material issue of fact, is not filed within 14 days after service of this order, all persons shall be deemed to have waived the right to a hearing and all other procedural steps, short of a final decision by the Board, and the Board may enter an order incorporating the findings and conclusions proposed herein and fix and determine the temporary rate specified herein;

6. If answer is filed presenting material issues of fact for hearing, the issues involved in determining the fair and reasonable temporary rates shall be limited to those specifically raised by the answer, except insofar as other issues are raised in accordance with Rule 307 of the rules of practice (14 CFR 302.307); and

7. This order shall be served upon all parties to Docket 23080–2.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND,
Secretary.

[FR Doc.74–6182 Filed 3–15–74;8:45 am]

[Dockets No. 25280 and 25513; Order 74–3–63]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Order Relating to Increased Fuel Costs

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 13th day of March, 1974.

By procedural Order 74–2–91 of February 22, 1974, the Board set dates for the receipt of justification, comments and objections pertaining to agreements adopted by the International Air Transport Association (IATA) which would further increase passenger fares and cargo rates on or after March 15, 1974, generally by seven percent as a consequence of escalating fuel prices.[1]

Insofar as air transportation as defined by the Federal Aviation Act of 1958 is concerned, the agreements would increase passenger fares and cargo rates over the North/Central and South Pacific routes between the United States and Asia/Australia/Australasia, and international fares and rates to and from United States possessions in the Pacific.[2] For passenger travel to and from Japan, the increase would be three percent on all first-class and normal economy fares and seven percent on all promotional fares. For passenger travel and cargo shipments originating in Australia, the increase would be held to a maximum of three percent.

Justification has been submitted in support of the agreements by The Flying Tiger Line Inc. (Flying Tiger), Northwest Airlines, Inc. (Northwest), Pan

[2] For the year ended September 30, 1973, Eastern experienced an operating loss of over $14 million and a net loss of $16.8 million.

[3] 12,000 pounds on the Boston-New York segment and 16,000 pounds on the New York-Atlanta segment.

[4] Final adoption by the Board of the minimum rate proposed herein does not rule out the Board's taking other and different rate-related actions in future cases involving 405(b), should they arise.

V 35 N 53 MAR 18 74 XUM

American World Airways, Inc. (Pan American), and Trans World Airlines, Inc. (TWA). Comments have been received from Japan Air Lines Co., Ltd. (JAL), and RCA. The matter now stands ready for the Board's decision.

Flying Tiger submits a forecast for 1974 which reflects reductions in fuel consumption and staff which in total produce annual savings of $5 million. The carrier estimates that available ton miles in 1974 will aproximate 73 percent and revenue ton miles 74 percent of the 1973 level. System load factors are expected to be in excess of 65 percent by weight, which approximates a 75 percent cube load factor. Over the critical transpacific leg which has historically operated at weight load factors in the upper 70's and lower 80's, Flying Tiger alleges that there is obviously little it can do to increase space utilization. Based on these considerations, Flying Tiger projects that in the absence of the proposed increases, it will experience an operating loss of $3.6 million assuming current fuel costs—a decline of $21.7 million from its results in 1973. Even with the additional revenue and assuming no further fuel cost increases, the carrier alleges that it will still incur an operating loss of $1.3 million in 1974. Flying Tiger indicates that fuel expenses for 1974 will increase in excess of $10 million over 1973, and will account for 58.3 percent of flying operations expense in 1974, versus 35.7 percent a year earlier.

Northwest's revenue and expense projections assume the level of service provided in its current schedules, adjusted for a 15 percent reduction during the first half of 1974 because of the fuel shortage. Without the proposed fare and rate increases, Northwest projects a negative net profit of $2.9 million for 1974, and anticipates a $6.4 million net profit with the increases. Northwest indicates that total fuel-related expense increases amount to $32.3 million, whereas total revenues are anticipated to increase by only $19.5 million. During the period January–September 1973, Northwest's fuel cost per gallon averaged approximately 11 cents, as compared with the latest cost of 37.45 cents per gallon, an increase of 240 percent.

Pan American states that since December 1973 its fuel cost has increased from 24.19 cents to 33.02 cents per gallon, representing an increase of 160 percent over fuel costs for the year ending September 1973. As a consequence, Pan American projects an increase in the total cost of its Pacific combination services for the year ending March 31, 1975 in excess of $32.1 million, over the year ending September 30, 1973. On the other hand, revenues from the proposed agreements and the earlier agreement relating to fuel cost increases are expected to approximate $25 million. Absent the proposed instant fare and rate adjustments, Pan American projects a return on investment in its Pacific scheduled combination services of 8.5 percent. With the proposed increases the anticipated rate of return is estimated at 10.6 percent. In its all cargo services the projected rate of return, absent the proposed increases, is 0.7 percent, and 4.1 percent with the increases.

TWA alleges that, absent the proposed seven percent fuel related increase, its Pacific services would be operated at an even greater loss in 1974 than was incurred a year earlier. TWA's financial projections are based on a forecast fuel cost of 35 cents per gallon which, in light of January results and those anticipated in February and March, appears conservative. Although the limited availability of fuel has resulted in a significant reduction in previously planned scheduled operations for 1974, the associated cost savings will allegedly only partially offset the rising price of fuel. Consequently, TWA anticipates that its Pacific Division pre-tax loss will substantially exceed the $6 million experienced in 1973, despite reductions in the level of operation.

With respect to the more limited three percent increase in fares and rates from Australia, Pan American states that the fuel-cost situation in that country is quite different from that elsewhere. The cost of fuel at Sydney has increased by only 30 percent. Because of the nature of the fuel situation in Australia, and the position of the Australian transport authorities, the carriers reached a compromise to limit the increases for Australian originating passengers and freight to a maximum of three percent.

Northwest cites the exceptional treatment for normal-first class and economy fares to/from Japan which are proposed to be increased by three percent while the promotional fares would be increased by seven percent, alleging that this stems from the floating of the yen. Japan Air Lines points out that the lower-rated promotional fares should not be subsidized by higher normal fares, and that the difference in the percentage increases will have the effect of narrowing the disparity between normal and promotional fares. Japan Air Lines also indicates that in March 1974 its average cost per gallon of fuel will have increased by 178.1 percent over the cost per gallon incurred in the second quarter of 1973. In order for that carrier to recoup this increased cost, revenues would allegedly need to be increased by 18.33 percent.

RCA in its comments indicates that it does not oppose the granting of an emergency increase to offset rising fuel costs. RCA, however, strongly urges that the emergency increase be clearly earmarked as such, that it should be factually justified on the basis of proven costs, and that it should be applied equitably between passenger and freight service, between different areas of the world, and between all types of shipments.

Upon consideration of the carrier justifications and comments, we conclude that the request for an additional seven percent increase in passenger fares and cargo rates over the North/Central and South Pacific, and likewise the three percent involving Australia and Japan, appear warranted in view of increased costs of fuel which have been experienced and should not result in increased profits for the carriers. All of the four U.S.-flag carriers have furnished data which indicate the most recent prices they are being required to pay for fuel, and have provided forecasts which take into consideration various economy measures including but not limited to reduced operations and reductions in the personnel force. Our evaluation indicates that the projections are not unreasonable, that the increases herein requested are in fact related to the amount of service to be performed in the forecast period, and that increased profits will not flow from our approval.[3]

With respect to RCA's comments, we recognize that the increases would be incorporated into the fares and rates themselves, and not be applied as a surcharge which would be earmarked as such. We are aware that there may be some advantages to isolating an emergency increase of this sort. On the other hand, fuel costs are a necessary cost of doing business and are properly a part of the cost base upon which fares and rates are determined. Moreover, there is the advantage that the tariffs will more simply set forth the total rate or fare to be charged. Finally, the Board can, of course, rescind its approval of any IATA agreement at any time such action may be warranted.

By Order 73–9–58 dated September 14, 1973, the Board disapproved an IATA agreement which would have established first-class and normal economy fares over the South Pacific at levels higher than the sum of the individual sector fares over Honolulu. While this situation remains unresolved within IATA, many of the affected carriers have complied with the Board's findings, and have filed tariffs reflecting normal first-class and economy fares on this route which are equal to the sum of the local-sector fares. However, imposition of the proposed increase would once again result in through fares in excess of the sum of sector fares. We shall, therefore, condition our approval of the appropriate agreement now before us to require that under no circumstances shall its application result in through normal first-class and economy fares over the South Pacific which exceed the sum of the local-sector fares over Hawaii.

[1] The proposed increases would apply through March 31, 1975 and September 30, 1975 to passenger fares and cargo rates, respectively.

[2] Insofar as other than direct air transportation is concerned, the agreements provide for similar increases within Asia/Australia/Australasia and between Europe and Asia.

[3] We have difficulty with the unsupported profit and loss statement submitted by Flying Tiger, which would reduce revenue by an amount roughly equal to proposed service reductions, and we are unable to conclude whether such a reduction is reasonable. As regards fuel-cost increases, however, our evaluation of Flying Tiger's submissions indicates that the proposed increases appear warranted.

The Board, acting pursuant to sections 102, 204(a), 404(b), 412 and 1002 of the Act, makes the following findings:

1. It is not found that the following resolutions, set forth in the agreements indicated, are adverse to the public interest or in violation of the Act:

Agreement CAB	IATA No.	Title	Application
24209:			
R-1	005k	General Increases in Passenger Fares (New)	3.
R-2	005m	do	1/2/3.
24210:			
R-1	005n	do	3/1. N/Central Pacific.
R-2	005kk	General Increases in Cargo Rates (New)	3.
R-3	005mm	do	2/3.
R-4	005nn	do	3/1.
R-5	00600	do	1/2/3.
24234	314	Special Rates for Personal Effects (Amending)	3/1. 1/2/3.

2. It is not found that the following resolution set forth in the agreement indicated, is adverse to the public interest or in violation of the Act, subject to the following condition:

Agreement CAB	IATA No.	Title	Application
24209:			
R-3	005s	General Increases in Passenger Fares (New)	3/1. South Pacific.

Provided that in no event shall the application of IATA Resolution 005n have the effect of establishing normal first-class and economy fares in air transportation, as defined by the Act, in excess of the sum of the local-sector fares over Honolulu.

Accordingly, It is ordered, That:

1. Those portions of Agreements C.A.B. 24209, 24210 and 24234 set forth in finding paragraph 1 above be and hereby are approved;

2. That portion of Agreement C.A.B. 24209 set forth in finding paragraph 2 above be and hereby is approved, subject to condition;

3. The carriers are hereby authorized to file tariffs implementing the approved agreements on not less than one day's notice for effectiveness not earlier than March 15, 1974. The authority granted in this paragraph expires with April 15, 1974;

4. Tariffs implementing Agreements C.A.B. 24209, C.A.B. 24210, R–1 and C.A.B. 24234 shall be marked to expire no later than March 31, 1975; and

5. Tariffs implementing Agreement C.A.B. 24210, R–2 through R–5 shall be marked to expire no later than September 30, 1975.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND, Secretary.

COMMISSION ON CIVIL RIGHTS

DISTRICT OF COLUMBIA ADVISORY COMMITTEE

Agenda and Notice of Open Meeting

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights, that a planning meeting of the District of Columbia Advisory Committee to this Commission will convene at 6:30 p.m. on March 20, 1974, in Room 512, 1121 Vermont Avenue, NW, Washington, D.C. 20425.

Persons wishing to attend this meeting should contact the Committee Chairman, or the Mid-Atlantic Regional Office of the Commission, Room 510, 2120 L Street, NW, Washington, D.C. 20425.

The purpose of this meeting shall be to discuss plans for followup activities to the District of Columbia SAC report on Minority Enterprises.

This meeting will be conducted pursuant to the rules and regulations of the Commission.

Dated at Washington, D.C., March 11, 1974.

ISAIAH T. CRESWELL, Jr.,
Advisory Committee Management Officer.

MICHIGAN STATE ADVISORY COMMITTEE

Agenda and Notice of Open Meeting

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights, that a planning meeting of the Michigan State Advisory Committee (SAC) to this Commission will convene at 10:15 a.m. on March 21, 1974, in the Oak Room, Second Floor, Union Building, Michigan State University, East Lansing, Michigan 48823.

Persons wishing to attend this meeting should contact the Committee Chairman, or the Midwestern Regional Office of the Commission, Room 1428, 219 South Dearborn Street, Chicago, Illinois 60604.

The purposes of this meeting shall be (1) to receive report of SAC members on a two-day Native American Conference held in February 1974, (2) to discuss role Michigan SAC will undertake in a proposed Native American Project, and (3) to plan future activities on the Revenue Sharing Project.

This meeting will be conducted pursuant to the rules and regulations of the Commission.

Dated at Washington, D.C., March 11, 1974.

ISAIAH T. CRESWELL, Jr.,
Advisory Committee Management Officer.

NEBRASKA STATE ADVISORY COMMITTEE

Agenda and Notice of Open Meeting

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights, that a planning meeting of the Nebraska State Advisory Committee (SAC) to this Commission will convene at 1:00 p.m. on March 22, 1974, at the Courthouse, 10 and P Streets, Lincoln, Nebraska 68508.

Persons wishing to attend this meeting should contact the Committee Chairman, or the Central States Regional Office of the Commission, Room 3103, Old Federal Office Building, 911 Walnut Street, Kansas City, Missouri 64106.

The purpose of this meeting shall be to begin plans to determine the next project to be undertaken by the Nebraska SAC.

This meeting will be conducted pursuant to the rules and regulations of the Commission.

Dated at Washington, D.C., March 11, 1974.

ISAIAH T. CRESWELL, Jr.,
Advisory Committee Management Specialist.

NEW YORK STATE ADVISORY COMMITTEE

Agenda and Notice of Open Meeting

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights, that a planning meeting of the New York State Advisory Committee (SAC) to this Commission will convene at 6:30 p.m. on March 18, 1974, Dumpling House Restaurant, 17 Division Street, New York, New York 10002.

Persons wishing to attend this meeting should contact the Committee Chairman, or the Northeastern Regional Office of the Commission, Room 1639, 26 Federal Plaza, New York, New York 10007.

The purpose of this meeting shall be to discuss plans for a meeting of the New York SAC Subcommittee on Asian American Affairs.

This meeting will be conducted pursuant to the rules and regulations of the Commission.

V 39 N 53 MAR 18 74 XUM

Dated at Washington, D.C., March 11, 1974.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

CERTAIN WOOL TEXTILE PRODUCTS PRODUCED OR MANUFACTURED IN THE REPUBLIC OF KOREA

Entry or Withdrawal From Warehouse for Consumption

MARCH 13, 1974.

On February 1, 1974, there was published in the FEDERAL REGISTER (39 FR 4128) a letter dated January 29, 1974 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs establishing a specific limitation for wool textile products in Category 121 produced or manufactured in the Republic of Korea and exported to the United States during the agreement year which began on October 1, 1973. It has been determined that the level of restraint established for Category 121 should have been 177,758 units, instead of 143,925 units.

Accordingly, there is published below a letter of March 13, 1974, from the Chairman of the Committee for the Implementation of Textile Agreements amending the directive of January 29, 1974.

ALAN POLANSKY,
Acting Chairman, Committee for the Implementation of Textile Agreements, and Acting Deputy Assistant Secretary for Resources and Trade Assistance.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

COMMISSIONER OF CUSTOMS,
Department of the Treasury,
Washington, D.C. 20229.

MARCH 13, 1974.

DEAR MR. COMMISSIONER: This directive amends but does not cancel the directive issued to you on January 29, 1974 by the Chairman of the Committee for the Implementation of Textile Agreements regarding imports into the United States of wool textile products in Category 121 produced or manufactured in the Republic of Korea.

The first paragraph of the directive of January 29, 1974 is hereby amended to show a level or restraint of 177,758 units for Category 121 produced or manufactured in the Republic of Korea and exported to the United States during the twelve-month period which began on October 1, 1973 and extends through September 30, 1974. This amended level of restraint reflects entries made through November 30, 1973. No adjustment has been made to reflect any entries made after November 30, 1973.

The actions taken with respect to the Government of the Republic of Korea and with respect to imports of wool textile products from the Republic of Korea have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

ALAN POLANSKY,
Acting Chairman, Committee for the Implementation of Textile Agreements, and Acting Deputy Assistant Secretary for Resources and Trade Assistance.

DELAWARE RIVER BASIN COMMISSION

WATER SUPPLY CHARGES; ENVIRONMENTAL ASSESSMENT

Notice of Intent

The Commission has prepared an environmental assessment of its proposed regulations relating to water supply charges. Assessment was made of the degree to which the charges would affect demand for water supply and for products and services associated with the water supply used in their production; and the impact upon the environment. The assessment has shown that change in the demand for water and the products and services associated with its use would be insignificant, and the impact on the environment would be neutral, should the water supply charges be implemented. Based upon the assessment, the Executive Director has determined that the proposed water supply charges regulations will not cause a significant environmental impact and that the preparation of an environmental impact statement is, therefore, not required.

Notice is hereby given of the Executive Director's intent to issue a Negative Declaration in accordance with the Commission's rules of practice and procedure as amended on December 12, 1973. The negative declaration will take effect on April 15, 1974, unless prior to that date interested parties submit written evidence sufficient to demonstrate good cause why an environmental impact statement on the regulations should be prepared.

Copies of the document "Environmental Assessment for the Proposed Sale of Water by the Delaware River Basin Commission" dated March 1974 are available upon request.

W. BRINTON WHITALL,
Secretary.

MARCH 8, 1974.

[FR Doc.74-6191 Filed 3-15-74;8:45 am]

WATER SUPPLY CHARGES

Notice of Public Hearing

Notice is hereby given that the Delaware River Basin Commission will hold a public hearing on proposed amendments of its Administrative Manual—Basin Regulations to establish a system of water supply charges. The hearing will be held on Tuesday, March 26, 1974, in the auditorium of the Moore College of Art, Southeast corner of 20th and Race Streets in Philadelphia, commencing at 1:30 p.m.

Developed pursuant to Commission Resolution No. 71-4, the proposed program of charges would apply to water supply withdrawn under specified conditions from the surface waters of the four-state 13,000-square-mile Delaware River Basin. Revenues received by the Commission would be used to repay the Federal Government for the cost of water supply storage incorporated into existing and planned multi-purpose reservoirs as required by the terms of the Federal Water Supply Act of 1958. The Commission held a public hearing on the initial draft of water supply charges regulations on February 28, 1973. Substantial revisions were made as the result of that hearing and a revised draft (dated June 28, 1973) was distributed to news media, government agencies, business and civic organizations, and interested private citizens on August 3, 1973, along with a summary of hearing issues and Commission staff response thereto. The proposed regulations that are the subject of this hearing notice are identical to those distributed last August.

Commission staff has prepared an environmental assessment of the proposed water charges regulations. Based on that assessment, the Executive Director has determined that the proposed regulations will not cause significant environmental impact and that the preparation of an environmental impact statement is, therefore, not required. A notice of intent to issue a negative declaration was given on March 8, 1974 in accordance with the Commission's rules of practice and procedure as amended on December 12, 1973.

Draft of the proposed water supply charges regulations, the environmental assessment and other documents referred to in this notice are available upon request. All parties wishing to testify at the hearing are requested to notify the Secretary no later than 5 p.m. on March 25, 1974. Written statements may be submitted in lieu of oral testimony.

W. BRINTON WHITALL,
Secretary.

MARCH 8, 1974.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

ISSUANCE OF NOTICES OF RIGHT-TO-SUE

Formal Ratification

Notice is hereby given that the Equal Employment Opportunity Commission at a Commission meeting on March 12, 1974, formally ratified the acts of the District Directors of EEOC District Offices in issuing Notices of Right-To-Sue pursuant to Commission practice instituted on October 15, 1969, and continued to the present.

Signed at Washington, D.C., the 13th day of March, 1974.

JOHN H. POWELL, JR.,
Chairman.

[FR Doc.74-6159 Filed 3-15-74;8:45 am]

ENVIRONMENTAL PROTECTION AGENCY

ANTIMICROBIAL PROGRAM ADVISORY COMMITTEE

Notice of Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 707), notice is hereby given that a meeting of the Antimicrobial Program Advisory Committee will be held at 8:30 a.m., March 26 and 27, 1974. The meeting on March 26 will be held in Conference Room 3305, Waterside Mall, and the meeting on March 27 will be held in Conference Room 412, East Tower, Waterside Mall, 401 M Street, SW., Washington, D.C.

This will be the fifth meeting of this Committee. The agenda will allow a maximum time of one hour for public participation at the beginning of each session, provided the procedures established by the Committee for public participation have been followed. Any member of the public who desires to present an oral statement must: (1) Notify the Executive Secretary or the Chairman at least 48 hours prior to the meeting; (2) Identify himself by name and affiliation; (3) Identify the subject of the statement; (4) Estimate the time that will be required to present the statement; and, (5) Limit the statement to the agenda of the meeting, as published in the FEDERAL REGISTER.

The meeting will be devoted exclusively to a review and evaluation of EPA's proposed statement of policy regarding Labeling Claims for Residual Bacteriostatic and/or Self-Sanitizing Activity in Labeling of Pesticide Products (38 FR 163). The Committee will review and evaluate written comments submitted from interested persons in response to the above FEDERAL REGISTER notice.

Efforts are being made to obtain the services of eminent consultants to address the Committee at this meeting. The membership has agreed that the expertise of the consultants they have selected is desirable prior to the Committee's making any final recommendations. Because of the short notice, it is uncertain as to whether these consultants will be available at the fifth meeting.

The meeting will be open to the public. Any member of the public wishing to participate or present written or oral views should contact Dr. William G. Roessler, Ph. D., Executive Secretary, Antimicrobial Program Advisory Committee, (202) 755-2562, at least 48 hours prior to the meeting.

Dated: March 12, 1974.

CHARLES L. ELKINS,
Acting Assistant Administrator for Hazardous Materials Control.

[FR Doc.74-6154 Filed 3-15-74;8:45 am]

PRESIDENT'S AIR QUALITY ADVISORY BOARD

Notice of Meeting

Pursuant to Pub. L. 92-463, notice is hereby given that a meeting of the President's Air Quality Advisory Board will be held 10:00 a.m. on April 1 and 2, 1974, in the Administrator's Conference Room (11th floor), 401 M Street SW., Washington, D.C. 20460.

The Board advises the Administrator on matters of policy relating to the activities and functions of the Administrator under the Federal Clean Air Act. The purpose of the meeting is to present to the Board an overview of the Agency's Air Pollution Control Program and consider Board Activities for the coming year.

The meeting will be open to the public. A limited number of seats—approximately 10—will be available on a reserved first come basis. Any member of the public wishing to attend the meeting or requesting additional information should contact Robert F. Powell, Executive Secretary; EPA Telephone: 202-755-6906.

Oral statements or questioning of Board members or other participants by observers in attendance at the meeting will not be permitted. Members of the public may file written statements with the Board before or after the meeting.

ROGER STRELOW,
Acting Assistant Administrator for Air and Water Programs.

FEBRUARY 20, 1974.

[OPP-32000/24]

RECEIPT OF APPLICATIONS FOR PESTICIDE REGISTRATION

Data To Be Considered in Support of Applications

On November 19, 1973, the Environmental Protection Agency published in the FEDERAL REGISTER (38 FR 31862) its interim policy with respect to the administration of section 3(c)(1)(D) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 979), and its procedures for implementation. This policy provides that EPA will, upon receipt of every application, publish in the FEDERAL REGISTER a notice containing the information shown below. The labeling furnished by the applicant will be available for examination at the Environmental Protection Agency, Room EB-37, East Tower, 401 M Street SW, Washington, D.C. 20460.

On or before May 17, 1974, any person who (a) is or has been an applicant, (b) desires to assert a claim for compensation under section 3(c)(1)(D) against another applicant proposing to use supportive data previously submitted and approved, and (c) wishes to preserve his opportunity for determination of reasonable compensation by the Administrator must notify the Administrator and the applicant named in the FEDERAL REGISTER of his claim by certified mail. Every such claimant must include, at a minimum, the information listed in this interim policy published on November 19, 1973.

Applications submitted under 2(a) or 2(b) of the interim policy in regard to usage of existing supportive data for registration will be processed in accordance with existing procedures. Applications submitted under 2(c) will be held for the 60-day period before commencing processing. If claims are not received, the application will be processed in normal procedure. However, if claims are received within 60 days, the applicants against whom the particular claims are asserted will be advised of the alternatives available under the Act. No claims will be accepted for possible EPA adjudication which are received after this 60-day period.

APPLICATIONS RECEIVED

EPA File Symbol 12227-R. Abbot Chemicals, 18640 Parthenia Street, Northridge, California 91324. *Con-Ker.* Active Ingredients: n-Alkyl (50% C14, 40% C12, 10% C16) dimethyl benzyl ammonium chloride 5.0%; Tetrasodium salt of ethylene diamine tetraacetic acid 2.3%; Sodium carbonate 2.0%. Method of Support: Application proceeds under 2(b) of interim policy.

FEDERAL COMMUNICATIONS COMMISSION

[FCC 74–218]

NCSA PLANS

Waiver of Requirements Granted State Broadcasters Association

1. The Commission has under consideration (1) waiver of the requirements of section 317 of the Communications Act of 1934, as amended, which has been granted to a number of state broadcasters' associations in connection with "Non-Commercial Sustaining Announcement" plans; and (2) information obtained regarding the operation of such plans.

BACKGROUND OF THE MATTER

2. Since 1962 the Commission has, under authority of subsection (d) of section 317 of the Communications Act and based upon petitions by a number of states broadcasters' associations, found that the public interest, convenience or necessity does not require that public service announcements broadcast under specified conditions by members of the associations be announced as sponsored or logged as commercial even though the state associations receive contributions from some of the non-profit organizations whose announcements are so broadcast. The state associations assist such organizations in planning, preparing, producing and/or distributing their announcements to member stations.[1]

3. In granting the first such waiver (Southern California Broadcasters Association; see footnote 1) the Commission stated that,

> Passing solely upon the facts before it, the Commission is of the view that it cannot be determined that no consideration inures to the member stations of SCBA as a result of the contributions made to the Association by the non-profit organizations. Under the circumstances, section 317(a) of the Communications Act would appear to require program material broadcast on behalf of such non-profit organizations to be identified as sponsored, and the Commission's rules would require such program material to be logged as commercial.[2] However, the Commission has also considered the compelling public interest benefits which flow to non-profit organizations of this type and to the public from these broadcasts and has concluded that (a) under these circumstances and in accordance with subsection (d) of section 317, public interest, convenience or necessity would be served by waiving the requirements of sponsorship identification, and (b) such material may continue to be logged as sustaining.

It was represented by the SCBA that no commitments or promises were made as consideration for the contributions and that all of the contributing organizations had for many years received time, announcements and similar cooperation from radio stations without regard to any contribution made to the Association.

4. Although there were no other precise conditions placed upon the waiver granted the Southern California Broadcasters Association, in making additional grants some years later the Commission set forth more specific conditions. Thus, in granting a waiver of section 317(a) to the Wyoming Association of Broadcasters (footnote 1, supra), the Commission stated,

[1] See, for example, letters to Southern California Broadcasters Association, 24 RR 284 (1962); Kansas Association of Radio Broadcasters, 4 FCC 2d 267 (1966); Wyoming Association of Broadcasters, 21 FCC 2d 238 (1969).

[2] In its subsequent grants of similar waivers, the Commission also stated that section 317(a) was applicable and that a Commission grant of a waiver pursuant to subsection (d) was necessary if announcements from contributing organizations were not to be identified as sponsored and logged as commercial.

> In considering your request, we have noted that only your executive committee is aware of whether a contribution has been made to the association. In addition, we have noted that all requests from public service, non-profit organizations will be processed in the same manner, whether or not a contribution is made; that such organizations have been apprised of this fact; and that your member stations will not know whether or not a contribution has been made.

In granting the Wyoming request the Commission also stated,

> However, the Commission is concerned with the possibility that some of the non-profit organizations . . . will be prompted to contribute by a belief that they will be discriminated against if they fail to contribute. In view of the representations contained in your letter, it is expected that in such eventuality you will take effective action to dispel any such misapprehension.

Similar language was appended to many other letters granting the requested waiver.

5. Monies received by state associations from non-profit organizations are in most cases used not only to finance the associations' assistance in preparing and distributing public service announcements or other program matter, but also to defray the general operating costs of the associations, as many associations have candidly indicated in requesting waiver of section 317(a). In some states, part of the contributions also is used to finance college scholarships or to defray the costs of attending radio operator schools. The assistance rendered the non-profit organizations ranges from merely advising member stations of the names and addresses of organizations seeking air time, to distributing spots prepared by the public service organizations and to writing and producing the spots, as well. Most state groups use the phrase, "Non-Commercial Sustaining Announcement plan" (hereinafter NCSA) in referring to the arrangement set forth above.

6. In an effort to ascertain the ways in which such NCSA plans were being operated, the Commission sent letters to all state associations asking which operate NCSA or similar plans and, if so, detailed information regarding operation of the plans.

RESPONSES OF ASSOCIATIONS

7. Responses reveal that broadcasters' associations in 19 states operate NCSA or similar plans and that two of the associations have not applied for or been granted waiver of the provisions of section 317(a). Thirty-one states and the District of Columbia operate no NCSA plan. The maximum amount received in contributions in 1972 under such a plan was approximately $24,000, representing 37 percent of that association's total income. (In three cases, contributions represented 50 or more percent of total income.) The smallest amount contributed was $150, representing less than one percent of total income. Only four of the 19 reporting groups report that all of the money contributed was spent on processing, writing or distributing PSAs for non-profit organizations or for college scholarships. Most of the other state associations spent most of the contributed money on general operating expenses or their conventions. The proportion of contributions spent for operating expenses ranged up to 100 percent. All associations deny that promises or agreements have been made for preferential treatment of contributing organizations; however, it is obvious from other data supplied that in some cases, where all or most of the associations' contributions come from a single source or only two or three sources (e.g., state tourist departments or state fairs), that preferential treatment is being given such contributors. One association states candidly that if any other non-profit organization than its sole (and substantial) contributor sought assistance on a regular basis, the association would be inclined to discuss with it "the desirability of a contribution."

8. As to actions taken to dispel a possible belief by non-profit organizations that their material will be discriminated against unless they make contributions, some associations include such a statement in printed matter distributed to non-profit organizations,[3] some state they give such assurances orally, and others state that it is generally known that a contribution is not necessary. Responses reveal that requests for assistance are reviewed by only one official of the association in one instance, by two in others and by the entire board of directors of the association or a committee of its members in still others. The same holds true generally with respect to the persons having knowledge of which non-profit organizations have made contributions, and in what amounts. Most associations state that member stations do not know which organizations contribute, but one states its members are informed that this is a special project of the association, another states there is no reason why a member would not be informed of it inquired, a third candidly admits that member stations know who contributes. In certain other states, where the association receives its entire contribution from a single organization or only two or three organizations, there is reason to suspect that the member stations are aware of the arrangements.

9. Most state associations report that member stations are requested to report the number of spots broadcast for each campaign assisted by the association, and that such information is forwarded to the non-profit groups assisted, but that no discrimination in this respect is made between contributing and non-contributing organizations. However, in a few instances it appears that only contributors receive such reports. Almost all associations state that the spots they distribute to member stations are logged as PSAs (i.e., non-commercial), although a few state that some stations may log them as commercial.

10. The associations also were requested to list all campaigns assisted in calendar 1972, the nature of the assistance given, the number of spots broadcast by their members for each campaign if such information is available, and the amount, if any, contributed by each organization assisted. The responses reveal that from only one to as many as 23 organizations were assisted and that the assistance ranged from merely informing member stations of the names and addresses of non-profit organizations wishing assistance (which could then be contacted directly by each station if it desired) to distributing spots prepared by non-profit groups, to writing and distributing such spots, and, finally, to writing, producing and distributing spots. The reports in many cases indicate that no discrimination was practiced against non-contributors, in that the number of spots broadcast by member stations did not appear to vary in accordance with whether contributions were made, or the amounts of the contributions. In a few cases, however, assistance was granted only to contributing organizations and in still others there is reason to conclude that considerably more assistance was granted contributors than non-contributors (e.g., see last sentence of par. 7 above).

DISCUSSION

11. On the basis of the responses received, it appears that many state associations are not operating their NCSA plans in the manner contemplated by the Commission when it granted waiver of the provisions of section 317(a), and that in some instances the state association is in effect serving as an advertising agency, collecting funds from non-profit organizations which then become, for all practical purposes, sponsors of the announcements broadcast on their behalf. These accounts are serviced much as an advertising agency might, and much or even most of the monies so received by many state organizations are used for their general operating expenses, thus proportionately reducing the amounts their members need contribute for this purpose. Although almost all associations state that they do not inform members which non-profit organizations make contributions, some acknowledge that they do so inform members and in some other cases, it strains credibility to assert that member stations do not have such knowledge, e.g., when one or two or three organizations are the only contributors.

12. We believe on the basis of the information available to us that many of the NCSA plans are not being operated as contemplated by us in granting waivers. Moreover, by the very nature of the arrangement, such plans are always

[3] We believe, however, that printed or mimeographed material distributed by some associations is misleading in that it states that the Commission has "approved" their NCSA plans and "given permission • • • to ask for a contribution for making this program available." Such language implies a direct endorsement by the Commission of attempts to obtain contributions, whereas the Commission merely granted a waiver of the provisions of section 317(a) under certain conditions.

V 39 I 53 MAR 18 74 XUM

likely to be conducted in a manner inconsistent with the assumptions on which the waivers were granted. It obviously is difficult, if not impossible, to conceal from member stations the identity of groups making contributions, and if member licensees have such knowledge, there is an obvious difficulty in treating non-contributors in exactly the same manner as contributors. Moreover, even if member stations have no such knowledge, there also is obviously a human temptation on the part of officials of the state associations to give a quid pro quo to contributors, since they are in many cases contributing one-half or more of the funds used by the association for general operating expenses and conventions.

13. As we have made clear many times, the obligation of each licensee is to ascertain the principal problems and needs of the area it serves and to program in such a way as to be responsive to those problems and needs. These interests are paramount, not the private interests of the licensee or its advertisers.[4] In the present case, the licensee's acceptance of public service announcements or other material provided by the state broadcaster's association must be based on the public interest, not on whether money is received either directly by the licensee or indirectly by reduction of the amount the licensee need contribute to the support of its state association. We now believe that continued grant of waivers of section 317(a) for NCSA and similar plans will tend to interfere with implementation of this policy, and therefore that all waivers previously granted must be rescinded after allowing a reasonable period of time for the associations to make whatever adjustments are necessary.

14. In no sense do we wish to imply that state broadcasters' associations do not provide a valuable service to their members or to broadcasting generally; to the contrary, most associations play a most useful role in providing for an interchange of ideas among their members, in informing them of statutes and Commission rules and policies affecting broadcasters, and in providing a means for collective expression to the Commission, the Congress and the public of the views of broadcasters. We wish to emphasize that we are not prohibiting acceptance of contributions by state associations from non-profit organizations, or the expenditure of substantial parts of such contributions on general association operating expenses. What we are doing is rescinding our grants of waivers of the provisions of section 317(a) so that all announcements or programs broadcast by stations on behalf of contributing organizations must be announced and logged as sponsored and by whom, and computed as commercial matter. Thus, rescission of the waivers need not end acceptance by state associations of contributions, although we recognize that in some instances it may have the effect of reducing them in number.

15. Accordingly, for the reasons set forth above, *it is ordered*, That all waivers granted to date of the provisions of section 317(a) of the Communications Act of 1934, as amended, with respect to announcements on behalf of contributing organizations are rescinded effective March 1, 1975.[5]

Adopted: Februray 27, 1974.

Released: March 5, 1974.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

[FR Doc.74-6140 Filed 3-15-74;8:45 am]

FEDERAL MARITIME COMMISSION

[Independent Ocean Freight Forwarder License No. 603]

KOPPEL BROS., INC.

Order of Revocation

By letter of February 28, 1974, Koppel Bros., Inc., 1400 East Anaheim Street, Wilmington, California 90744 surrendered its Independent Ocean Freight Forwarder License No. 603 for revocation because of a shipper connection prohibited by § 510.2(a) of the Commission's General Order 4 (46 CFR Part 510) and Section 44, Shipping Act, 1916 (46 U.S.C. 841b).

By virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders, Commission Order No. 1 (revised) § 7.04(f) (dated 9/15/73);

It is ordered, That Independent Ocean Freight Forwarder License No. 603 be returned to the Commission for cancellation.

It is further ordered, That the Independent Ocean Freight Forwarder License of Koppel Bros., Inc. be and is hereby revoked effective February 28, 1974.

It is further ordered, That a copy of this Order be published in the FEDERAL REGISTER and served upon Koppel Bros., Inc.

AARON W. REESE,
Managing Director.

SOUTH JERSEY PORT CORP. AND ITO CORPORATION OF AMERIPORT

Notice of Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763 (46 U.S.C. 814)).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street NW., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California, and Old San Juan, Puerto Rico. Comments on such agreement, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before March 28, 1974. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of Agreement Filed by:

Robert L. Pettegrew, Executive Director
South Jersey Port Corporation
Broadway & Morgan Boulevard
Camden, New Jersey 08104

Agreement No. T-2667-1, between the South Jersey Port Corporation (Port) and ITO Corporation of Ameriport (ITO), modifies the basic agreement which provides for the 5-year lease to ITO of Berths Nos. 5 and 6 and inland property at the Port's Broadway Terminal, Camden, New Jersey, for use as a marine terminal and purposes incidental thereto. The purpose of the modification is to (1) provide for the construction of Transit Shed TS-1, (2) increase the rental accordingly, with provisions for an increase in taxes and cost of living, (3) designate a fixed minimum annual rental, (4) exclude the the wharfage revenue, generated by cargo handled in Transit Shed TS-1, from the calculation of percentage rental, (5) provide for an 8-year lease term (with renewal options), (6) provide that the Port approve all firms performing stevedoring services within the leased premises, (7) provide options for the exclusion of certain areas from the leased premises, with corresponding rental reductions, and (8) provide for ITO's payment of certain maintenance expenses.

By order of the Federal Maritime Commission.

Dated: March 13, 1974.

FRANCIS C. HURNEY,
Secretary.

[FR Doc.74-6192 Filed 3-15-74;8:45 am]

[4] See, for example, our public notice on program-length commercials, 39 FCC 2d 1062, 26 RR 1023 (1973), and the cases cited there, where we expressed, among other things, our concern as to subordinating the public interest to the interests of advertisers or to the station's own economic interests. In adopting the Primer on the ascertainment of community problems by broadcast applicants, we emphasized that applicants are judged by the public interest standard, not their private economic interests, 27 FCC 2d 650, 676, 21 RR 2d 1507, 1533 (1971). This policy has deep roots. The Federal Radio Commission stated in its second annual report (1928) at page 168:

> While it is true that broadcasting stations in this country are for the most part supported or partially supported by advertisers, broadcasting stations are not given these great privileges by the United States Government for the primary benefit of advertisers. Such benefit as is derived by advertisers must be incidental and entirely secondary to the interest of the public.

[5] By the Commission: Commissioners Burch, Chairman; and Hooks concurring but would have rescinded all waivers as of a date six months from issuance of the Memorandum Opinion and Order.

FEDERAL POWER COMMISSION

[Docket No. E-7616]

CITIZENS UTILITIES CO.

Notice of Application

MARCH 12, 1974.

Take notice that on February 21, 1974, Citizens Utilities Company (Applicant) filed a supplemental application seeking an order pursuant to section 204 of the Federal Power Act authorizing the issuance of short-term promissory notes in an aggregate principal amount not to exceed $38,000,000 outstanding at any one time.

Applicant is incorporated under the laws of the State of Delaware and is qualified to do business in the States of Arizona, Colorado, Connecticut, Hawaii, Idaho, and Vermont.

The notes are to be issued pursuant to a credit arrangement with Marine Midland Bank—New York and certain other commercial banks now extending credit to applicant, or in the alternative, in the form of commercial paper to an established commercial paper dealer or dealers for resale in the customary commercial paper market without limitation as to the number of offerees or purchasers public or to institutional investors not for resale. All notes are to have a final maturity on or before April 1, 1975. The interest rate for notes issued pursuant to the bank credit agreement shall be at the prime commercial interest rate at Marine Midland Bank—New York for 90 day notes as of the date of issuance. The maximum principal amount of all notes to be issued pursuant to the supplemental application shall not exceed $38,000,000 outstanding at any one time.

The net proceeds from the sale of the notes will be used, together with other funds of the applicant, for the replenishment of the treasury for expenditures for current transactions and for the construction, extension and improvement of facilities.

Any person desiring to be heard or to make any protest with reference to said application should on or before March 26, 1974, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. E-8647]

SOUTHERN CALIFORNIA EDISON CO.

Notice of Proposed Cancellation

MARCH 12, 1974.

Take notice that on February 26, 1974, Southern California Edison Company (SCE) tendered for filing the proposed cancellation of its Rate Schedule FPC No. 66, Edison-Arizona 1972 Service Agreement dated May 16, 1972, between SCE and Arizona Public Service Company (APS). SCE states that the said Rate Schedule terminated by its own terms on September 30, 1972. SCE also states no service has been provided since this latter date nor has a new Schedule been filed in its place.

SCE requests that the proposed cancellation become effective thirty days after filing, that is, on March 28, 1974.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE, Washington, D.C 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions should be filed on or before March 21, 1974. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.74-6142 Filed 3-15-74;8:45 am]

[Docket No. RP72-121]

SOUTHWEST GAS CORP.

Notice of Filing of Revised Tariff Sheets

MARCH 12, 1974.

Take notice that on March 1, 1974, Southwest Gas Corporation (Southwest) tendered for filing Third Revised Sheet No. 13A and 13B, and First Revised Sheet No. 13C which constitute a portion of the General Terms and Conditions, all in Southwest's Federal Power Commission Gas Tariff, Original Volume No. 1.

Southwest states that the purpose of this filing is to revise its "Purchased Gas Adjustment Clause" to eliminate the reference to El Paso Natural Gas Company and replace it with Northwest Pipeline Corportion which has now succeeded El Paso. Also, Southwest states that the clause has been reworded so that the method of handling the increases or decreases associated with compressor station fuel and unaccounted for gas is clearly defined. Southwest requests an effective date of April 1, 1974, for these sheets.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.18 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before March 25, 1974. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.74-6139 Filed 3-15-74;8:45 am]

[Docket No. RP73-23]

LAWRENCEBURG GAS TRANSMISSION CORP.

Notice of Filing of Revised Tariff Sheets

MARCH 12, 1974.

Take notice that on February 28, 1974, Lawrenceburg Gas Transmission Corporation (Lawrenceburg) tendered for filing two gas tariff sheets to its Federal Power Commission Gas Tariff, Original Volume No. 1. The sheets are designated Fourth Revised Sheet No. 3-A (superseding Third Revised Sheet No. 3-A) and Fourth Revised Sheet No. 18-B (superseding Third Revised Sheet No. 18-B).

Lawrenceburg states that the sheets are being filed to reflect changes in the cost of gas purchased from Texas Gas Transmission Corporation (Texas Gas). According to Lawrenceburg, Texas Gas filed a "Motion to Substitute Tariff Sheets" in its Docket No. RP74-25, under which Texas Gas has requested that it be allowed to substitute new tariff sheets to become effective April 1, 1974, for those which it submitted in its original filing. Lawrenceburg tenders this filing in order to reflect increased costs of purchased gas due to Texas Gas' substitute sheet filing. In order for these revised sheets to become effective on the same date that the Texas Gas substitute sheets become effective, Lawrenceburg requests an effective date of April 1, 1974, and waiver of the notice requirements under Section 154.51 of the Commission's regulations. Lawrenceburg further states that it has mailed copies of this filing to its two wholesale customers, Lawrenceburg Gas Company and The Cincinnati Gas & Electric Company, and to the two interested state commissions, Public Service Commission of Indiana and The Public Utilities Commission of Ohio.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before March 25, 1974. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.74-6144 Filed 3-15-74;8:45 am]

[Project Nos. 2225 and 2526]

PUBLIC UTILITY DISTRICT NO. 1 OF PEND OREILLE COUNTY, WASHINGTON

Order Dismissing Application for Amendment of License Denying Motion of Commission Staff Counsel To Dismiss Application and Fixing Deadline for Filing of Revised Application

MARCH 8, 1974.

On March 11, 1965, Public Utility District No. 1 of Pend Oreille County, Washington (District) filed an application for amendment of the license for Project No. 2225. This application proposed redevelopment of an existing project that is inoperative except for its reservoir facility. So extensive was the scope of the redevelopment that, in effect, a new project was proposed. Hence, the District was advised that an application for a license would be more appropriate. Accordingly, on June 14, 1965, the District filed an application for a license for Project No. 2526 encompassing all of the facilities proposed in the prior application for amendment. The District agreed that the license for Project No. 2225 should be surrendered upon issuance of the license for Project No. 2526.

The District's prosecution of its application for a license has been characterized by uncertainty and delay. Following the initial filing in 1965, several years passed without significant progress toward completion of the application. In a letter from the Commission's Regional Engineer dated April 2, 1970, the District was requested to report on the status of the project. In a letter dated June 12, 1970, the District stated that it was unable to sell the power from the proposed new project due to the high interest rates at the time. It proposed that the license application be left on file indefinitely until a determination could be made as to whether the interest rates would ever lower sufficiently to make the power saleable.

A February 9, 1973 letter by the Commission's Secretary pointed out that the District had neither completed its application nor indicated any intent to do so since the letter of June 12, 1970. The Secretary also pointed out that substantial changes had been made in the Commission's rules and regulations in the intervening years, and that consequently it would be necessary to either submit a new application for license for the project, superseding the original application in its entirety, or apply to withdraw the original application.

The District, in a letter dated March 2, 1973, requested that it be given an extension until December, 1974, during which the effect on project feasibility of the suggested rate increase by Bonneville Power Administration could be analyzed. It was indicated that the contemplated rate increase and the growing power shortages in the area would increase the likelihood that the project power could be sold. The District added that the extension of time would be used to prepare new exhibits and revise existing exhibits, in lieu of filing an entirely new application.

By a letter dated March 30, 1973, the Secretary reiterated his request that the District withdraw its application, and indicated that the withdrawal would be approved without prejudice to the filing of a new application at such time as the feasibility of the project could be definitely established. No further communications were received from the District with regard to its license application.

On December 7, 1973, Commission Staff Counsel filed a motion to dismiss both the application for amendment of license for Project No. 2225 and the application for license for Project No. 2526. In support of this motion, Staff Counsel cited the District's inability to demonstrate the financial feasibility of the project and its consistent failure to submit requested materials. On December 20, 1973, the District requested an extension of time to answer Staff Counsel's motion, and on January 7, 1974, the Commission issued notice of an extension of time to January 20, 1974. The District's answer to Staff Counsel's motion to dismiss, filed on January 18, 1974, asserted that "conditions now exist which definitely make the project feasible," and again requested that the District be granted an extension to December 31, 1974, in order to complete its original application.

The Commission has consistently shown in the past that it will not countenance undue delay in the determination of project feasibility at the expense of committing potential power resources and the Commission's administrative resources for an indefinite period of time.[1] Since Staff Counsel's motion was filed, however, the District has provided the Commission with affirmative evidence of the possible saleability of project power in the form of letters to the District from the City of Seattle Department of Lighting and The Washington Water Power Company, expressing interest in the project. Although these letters represent little more than an indication of willingness to discuss the project, the District proposes to submit quarterly reports on the progress of its attempts to arrange for the sale of project power.

Taking into consideration the increasing power demands in the area and the need to search out every potential avenue of power production, we find that the District should be afforded another opportunity to demonstrate the feasibility of the project. However, the District's request that it be allowed to supplement the existing application with new and revised exhibits cannot be accommodated. In the years since the application was initially filed there have been many amendments to the Commission's rules and regulations governing license applications.[2] Many of the previously submitted materials, and the comments thereon which were solicited from State and Federal agencies, are already inadequate and outdated. The administrative burden on the Commission Staff which would result from an attempt to bring the existing deficient application into conformity with current requirements would be too great. Therefore, the District will be required to submit a revised application for consideration by the Commission and for referral to Federal, State and local agencies, superseding the original application in its entirety. This revised application should conform to current regulations and should be submitted as a single bound document by December 31, 1974. If no such application has been submitted by that date, the Commission will, on its own motion, dismiss the existing application for a license for Project No. 2526 without prejudice.

Inasmuch as the application for amendment of the license for Project No. 2225 has been superseded by the application for a license for Project No. 2526, it is superfluous and will be dismissed accordingly.

The Commission finds. (1) The application for amendment of the license for Project No. 2225 has been superseded by the application for a license for Project No. 2526, and should be dismissed.

(2) It is appropriate and in the public interest to afford the District another opportunity to demonstrate the feasibility of the project, and Commission Staff Counsel's motion should be denied to the extent that it would dismiss the application for a license for Project No. 2526.

(3) The District should be required to submit a revised application for a license for Project No. 2526, superseding the existing application in its entirety.

The Commission orders. (A) The application for amendment of the license for Project No. 2225, filed on March 11, 1965, by Public Utility District No. 1 of Pend Oreille County, Washington, is hereby dismissed.

(B) Commission Staff Counsel's motion of December 7, 1973, is hereby denied to the extent that it would dismiss the application for a license for Project No. 2526.

(C) Public Utility District No. 1 of Pend Oreille County, Washington, shall submit a revised application for license for Project No. 2526 in the form of a single bound document by December 31, 1974: *Provided*, That if such application has not been submitted by that date, the Commission will, on its own motion, dismiss the existing application for license for Project No. 2526 without prejudice.

(D) Public Utility District No. 1 of Pend Oreille County, Washington, shall submit to the Commission quarterly reports on the progress of negotiations for the sale of power from Project No. 2526, as proposed in the January 18, 1974, answer to Staff Counsel's motion; such quarterly reports shall be filed March 31, June 30, and September 30, 1974.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

[Docket No. CP68-193 (Phase II), et al.]

NORTHERN NATURAL GAS CO. ET AL.

Proposed Contribution Refund Plan

MARCH 8, 1974.

Take notice that on February 19, 1974, Northern Natural Gas Company (Northern), 2223 Dodge Street, Omaha, Nebraska 68102, submitted for Commission approval a proposed contribution refund plan in compliance with the order of the Commission issued in said docket December 23, 1969 (42 FPC 1266), all as more fully set forth in said proposal which is on file with the Commission and open to public inspection.

Northern states that the Commission in its order in the instant docket of December 23, 1969, imposed as a condition precedent to the commencement of construction of the branchlines proposed therein that specific dollar contributions be made to Northern in aid of such construction. It was further conditioned that if the actual volume of sales on a branchline during the third year of operation exceeded the projected total for that branchline, Northern, within 60 days after the end of the third year, would be required to submit a plan for refunding such portion of the contribution as may be appropriate. In this determination the same factors employed in the formula used to determine contributions would be used, except for the use of actual rather than estimated sales volumes.

Northern plans, upon Commission approval, to refund $31,032 to two distributors in fulfillment of its obligations under said order. Northern's proposed contribution plan is set forth in the appendix to this notice.

Northern states that the factors used in its proposed contribution refund plan are with one exception as required in the subject order. Northern states that this exception is a result of Northern's institution prior to the beginning of the third

[1] See In re Rocky Mountain Power Company, 37 F.P.C. 329 (1967), rehearing denied, 37 F.P.C. 900 (1967), affirmed, Rocky Mountain Power Co. v. F.P.C., 409 F.2d 1122 (CADC 1969); In re Gasconade River Power Company, 1 F.P.C. 424 (1937).

[2] The most recent revision of Commission procedures pertaining to license applications is Order No. 501, issued January 10, 1974, prescribing amendments to Sections 4.31, 4.40, 4.42, 4.50, 4.60, 4.70, 4.82, 4.84, 5.1, 9.1, 9.10, 16.6, and 16.7 of the regulations under the Federal Power Act.

V 39 I 53 MAR 18 74 XUM

year of service of a new premium seasonal Rate Schedule SS–1. Northern states that its Rate Schedule SS–1 provides for long-term firm seasonal service and therefore should be utilized in computing the proper refund of contributions in aid of construction. To this effect, Northern states it has computed a rate applicable for said service at the time of the issuance of the order to account for the revenues generated by this service. Northern states that as a result of this computation the demand and commodity rates utilized in the formula were adjusted by adding two dollars and twenty-five cents respectively.

Northern states that it intends to make the proposed refund promptly upon receipt of Commission approval.

Any person desiring to be heard or to make any protest with reference to said proposed contribution refund plan should on or before March 29, 1974, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

APPENDIX—CONTRIBUTION REFUND PLAN

To determine if a refund is required, the contribution was recalculated in accordance with the formula utilized in Docket No. CP68–193, (Phase II), et al. In recalculating the following procedure was utilized.

The contribution formula may be expressed as follows:

$$\text{Contribution} = \frac{[(S \times CR) + CDR] - [COS + (S \times VC)]}{CF}$$

where:

S = Annual sales as billed for the period December 27, 1972 through December 26, 1973, including volumes billed as Seasonal Service commodities.

CR = Commodity rate which is precisely same rate as utilized in the formula to determine the original amount of contribution, adjusted where applicable to reflect premium Seasonal Service.

Seasonal Service: Rate Zone 3 = $.2375/Mcf, Rate Zone B = $.2521/Mcf, Rate Zone 3 = $.4875/Mcf, Rate Zone B = $.5021/Mcf.

CDR = Contract Demand revenues arrived through utilization of the Contract Demand and Seasonal Service demand in effect on January 1, 1973, and the Contract Demand rates utilized in determining the original computation. Contract rates were adjusted to reflect Seasonal Service where applicable.

Seasonal Service: Rate Zone 3 = $38.712/Mcf, Rate Zone B = $40.104/Mcf, Rate Zone 3 = $20.900/Mcf, Rate Zone B = $21.368/Mcf.

COS = Cost of service which is precisely the same as utilized in the formula used to determine the original amount of contribution.

VC = Variable cost of gas which is precisely the same cost as that utilized in the formula to determine the original amount of contribution, i.e., $.180/Mcf.

CF = Contribution factor which is precisely the same factor as utilized in determining the original amount of contribution, i.e., 0.1050.

The contribution required, as recalculated, appears in column 10 of the tabulation. By comparing column 10 with column 5, which column shows the contribution as ordered, it was determined whether a refund was required. Where column 10 exceeded column 5, there would be no refund. Where column 10 showed no contribution required, the refund would be the entire amount of the contribution. When column 10 showed a contribution but it was less than the contribution showed in column 5, the difference between column 5 and column 10 would be the refund required.

Summary of contribution refunds

[Docket Nos. RI74–168, etc.]

AMOCO PRODUCTION CO. et al

Order Providing for Hearing and Suspension

MARCH 8, 1974.

Respondent has filed a proposed change in rate and charge for the jurisdictional sale of natural gas, as set forth in Appendix A hereof.

The proposed changed rate and charge may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

The Commission finds: It is in the public interest and consistent with the Natural Gas Act that the Commission enter upon a hearing regarding the lawfulness of the proposed change, and that the supplement herein be suspended and its use be deferred as ordered below.

The Commission orders: (A) Under the Natural Gas Act, particularly sections 4 and 15, the regulations pertaining thereto (18 CFR, Chapter I), and the Commission's rules of practice and procedure, a public hearing shall be held concerning the lawfulness of the proposed change.

(B) Pending hearing and decision thereon, the rate supplement herein is suspended and its use deferred until date shown in the "Date Suspended Until" column. This supplement shall become effective, subject to refund, as of the expiration of the suspension period without any further action by the Respondent or by the Commission. Respondent shall comply with the refunding procedure required by the Natural Gas Act and § 154.102 of the regulations thereunder.

(C) Unless otherwise ordered by the Commission, neither the suspended supplement, nor the rate schedule sought to be altered, shall be changed until disposition of this proceeding or expiration of the suspension period, whichever is earlier.

By the Commission.

[SEAL] MARY B. KIDD,
Acting Secretary.

* Unless otherwise stated, the pressure base is 15.025 lb/in²a.
[1] Subject to Btu adjustment from a base of 1,000 Btu per cubic foot.
[2] For gas from wells completed after June 1, 1970.
[3] Considered new gas pursuant to Opinion No. 639.
[4] 0.48 cent deducted for gas with Btu below 1,000 Btu per cubic foot.
[5] 24.4807 cents base rate plus 1.1345 cents tax reimbursement and 3.390 cents upward Btu adjustment from a base of 1,050 Btu per cubic foot.
[6] Not used.
[7] 24.4807 cents base rate plus 1.1065 cents upward Btu adjustment from a base of 1,000 BTU per cubic foot.
[8] The proposed rate increase is accepted pursuant to Opinion No. 658 insofar as it does not exceed the ceiling rate of 24.4807 cents per M ft³ plus Btu adjustment, effective as of Mar. 10, 1974, and the 1.1345 cents per M ft³ tax portion of the increase is suspended until Mar. 11, 1974, 1 day after expiration of the statutory notice period.

The proposed rate increases which exceed the applicable ceiling rate established by Opinion No. 658 are suspended for five months and the proposed rate increases which exceed the applicable area ceiling rate in Order No. 435 are suspended for one day.

The proposed rate increase of Texaco Inc., designated as Supplement No. 8 to its FPC Gas Rate Schedule No. 298, is accepted pursuant to Opinion No. 658 insofar as it does not exceed the ceiling rate of 24.4807¢ per Mcf, plus Btu adjustment, effective as of March 10, 1974, but the 1.1345¢ per Mcf tax portion of the increase is suspended until March 11, 1974, pending determination as to whether ad valorem taxes are allowable in computing the area ceiling rate under Opinion No. 658.

Amoco's proposed tax increase under its FPC Gas Rate Schedule No. 602 is suspended for one day from the expiration of the statutory notice period.

FEDERAL RESERVE SYSTEM

BARNETT BANKS OF FLORIDA, INC.

Order Approving Acquisition of Bank

Barnett Banks of Florida, Inc., Jacksonville, Florida, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 90 percent or more of the voting shares of Barnett Bank of Lake Placid, Lake Placid, Florida, a proposed new bank.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and none has been timely received. The Board has considered the application in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant, the second largest bank holding company in Florida controls 50 banks[1] with aggregate deposits of approximately $1.6 billion, representing 7.9 percent of the total deposits in commercial banks in the State. Since Bank is a proposed new bank, consummation of this proposal would not immediately increase Applicant's share of commercial bank deposits in Florida.

Bank is to be located in the Sebring banking market (approximated by Highlands County and the community of Wauchula) where Applicant controls the largest bank in the market, holding approximately 30 percent of the area's total commercial bank deposits. The next four largest banks in the market each hold deposits of from 19 to 14 percent of the total market deposits. Since Bank is a proposed new bank, consummation of the proposal would not eliminate any existing competition or increase the concentration of banking resources in the market. In view of the Sebring banking market's strong population growth, it does not appear that acquisition of Bank by Applicant would significantly reduce the prospects for future expansion or entry by other banking organizations. Nor is there any evidence that Applicant's proposal is an attempt to preempt a site before there is a need for a bank. It is the Board's judgment that competitive considerations are consistent with approval of this application.

The financial and managerial resources and future prospects of Applicant and its subsidiary banks are generally regarded as satisfactory in view of Applicant's commitments to inject equity capital into certain of its subsidiaries. Bank, as a proposed new bank, has no financial or operating history; however, its prospects as a subsidiary of Applicant appear favorable. Considerations relating to the banking factors are consistent with approval of the application. Although there is no evidence in the record that the major banking needs of the community are not adequately being

[1] All deposit figures are as of June 30, 1973, and reflect holding company formations and acquisitions approved by the Board through January 31, 1974.

V 39 N 53 MAR 18 74 XUM

served, Bank would serve as an additional source of full banking services and would have access, through Applicant, to considerable financial resources and expertise. Considerations relating to convenience and needs of the community to be served lend some weight toward approval of the application. It is the Board's judgment that the proposed acquisition is in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after that date, and (c) Barnett Bank of Lake Placid, Lake Placid, Florida shall be opened for business not later than six months after the effective date of this Order. Each of the periods described in (b) and (c) may be extended for good cause by the Board, or by the Federal Reserve Bank of Atlanta pursuant to delegated authority.

By order of the Board of Governors,[2] effective March 11, 1974.

[SEAL] THEODORE E. ALLISON,
Assistant Secretary of the Board.

[FR Doc.74-6126 Filed 3-15-74;8:45 am]

DEPOSITORS CORP.

Order Approving Acquisition of Firestone Financial Corporation

Depositors Corporation, Augusta, Maine, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval, under section 4(c)(8) of the Act and § 225.4(b)(2) of the Board's Regulation Y, to acquire all of the voting shares of Firestone Financial Corporation ("Firestone"), Chestnut Hill, Massachusetts, a company that engages in the activities of commercial financing and financing second mortgages. Such activities have been determined by the Board to be closely related to banking (12 CFR 225.4(a)(1)).

Notice of the application, affording opportunity for interested persons to submit comments and views on the public interest factors, has been duly published (38 FR 29638). The time for filing comments and views has expired, and none has been timely received.

Applicant, the largest banking organization in Maine, controls six banks with deposits of approximately $266 million, representing 16.2 percent of the total deposits in commercial banks in that State.[1]

Firestone, a Massachusetts corporation with total assets of $3.5 million as of May 31, 1973, is principally engaged in the financing of restaurant, bakery, laundry, vending, and industrial equipment. As of May 31, 1973, Firestone had outstanding loans of around $3 million; of that amount, approximately 75 percent represents commercial loans, with the remainder being second mortgages. Firestone engages in commercial lending primarily in eastern Massachusetts, which encompasses the Boston area, and in which market it competes with a number of large national commercial finance firms. Neither Applicant nor any of its subsidiaries is engaged in commercial lending in Firestone's market area other than to a very limited degree. Applicant and its subsidiaries do not engage in making second mortgage loans. Accordingly, no significant existing competition would be eliminated in either commercial financing or the origination of second mortgage loans upon consummation of the subject proposal. There are sufficient potential entrants into these product markets so that the elimination of Applicant would not have any adverse effects on future competition upon approval of this application.

In its consideration of this application, the Board has considered a post-employment covenant contained in the employment agreement entered into between Firestone and the two principals and sole stockholders of Firestone. The covenant provides that the principals will not engage or participate in any manner in the financing business of the type engaged in by Firestone for a period of five years after termination of employment. The record indicates that the principals (who are also the founders of Firestone) during their employment term will have complete managerial control and decision making authority with respect to Firestone's business, and, by the very nature of the business, these principals will have substantial contact with Firestone's customers. Accordingly, the Board finds that the covenant's provisions are reasonable in duration, scope, and geographic area and are consistent with the public interest.

There is no evidence in the record indicating that consummation of the proposed transaction would result in any undue concentration of resources, unfair competition, conflicts of interest, unsound banking practices or other adverse effects on the public interest. Applicant's greater access to financial resources may assure Firestone of more ready access to funds and enable it to become a more effective competitor; thus, competition with affiliates of larger regional and national commercial finance firms is likely to be stimulated.

Based upon the foregoing and other considerations reflected in the record, the Board has determined that the balance of the public interest factors the Board is required to consider under section 4(c)(8) is favorable. Firestone is presently holding some realty for sale which the Board regards as an impermissible activity for bank holding companies. Thus, Board approval of the proposal is granted subject to the condition that Applicant divest itself of the tract of land at the earliest practicable time, but in no event later than two years from the date of this Order. Accordingly, Applicant's proposal to acquire Firestone is hereby approved subject to the above condition. The order herein is also subject to the conditions set forth in § 225.4(c) of Regulation Y and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

The transaction shall be made not later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Boston.

By order of the Board of Governors,[2] effective March 11, 1974.

[SEAL] THEODORE E. ALLISON,
Assistant Secretary of the Board.

[FR Doc.74-6128 Filed 3-15-74;8:45 am]

FIRST CITY BANCORPORATION OF TEXAS, INC.

Order Permitting Revision in the Method of Acquisition of Shares of the First National Bank of San Angelo and the First National Bank of Paris

By Order dated January 2, 1974, 1974 Federal Reserve Bulletin 128, the Board approved applications of First City Bancorporation of Texas, Inc., Houston, Texas, a bank holding company within the meaning of the Bank Holding Company Act, to acquire 100 percent, less directors' qualifying shares, of the successors by merger to (1) the First National Bank of San Angelo ("San Angelo Bank"), San Angelo, Texas, and (2) the First National Bank of Paris ("Paris Bank"), Paris, Texas.

Applicant requested approval on February 11, 1974, of a change in the manner of acquiring San Angelo Bank and Paris Bank from the acquisition through merger method as stated in the applications and the Board's Order to a direct acquisition of 70 percent or more of the voting shares of San Angelo Bank and 90 percent or more of the voting shares of Paris Bank through an exchange for cash. Applicant stated it has incurred difficulties in proceeding through acquisition by merger and that the proposed direct method of acquiring shares of San Angelo Bank and Paris Bank would result in a savings in both time and expense.

The Board has concluded that the request should be granted. The Board's Order of January 2, 1974, is hereby amended to permit Applicant to acquire 70 percent or more of the voting shares of San Angelo Bank and 90 percent or more of the voting shares of Paris Bank through an exchange for cash.

[2] Voting for this action: Chairman Burns and Governors Mitchell, Sheehan, Bucher, and Holland. Absent and not voting: Governors Brimmer and Wallich.

[1] All banking data are as of June 30, 1973, and reflect bank holding company formations and acquisitions approved by the Board through December 31, 1973.

By order of the Board of Governors,[1] effective March 11, 1974.

THEODORE E. ALLISON,
Assistant Secretary of the Board.

[FR Doc.74-6127 Filed 3-15-74;8:45 am]

FIRST COMMERCE CORP.

Proposed Acquisition of First Boeing Data Services Inc.

First Commerce Corporation, New Orleans, Louisiana, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y, for permission to engage in a joint venture with Boeing Computer Services, Inc., Dover, New Jersey, and Kent, Washington, a wholly owned subsidiary of The Boeing Company, Seattle, Washington, and thereby to acquire voting shares of First Boeing Data Services, Inc., New Orleans, Louisiana, a de novo corporation. Notice of the application was published on December 19, 1973, in The Ruston Daily Leader, a newspaper circulated in the City of Ruston, Louisiana; on December 19, 1973, in The Times Picayune, a newspaper circulated in the City of New Orleans, Louisiana; on December 20, 1973, in the Houma Daily Courier & The Terrebonne Press, a newspaper circulated in the Parish of Terrebonne, Louisiana; on December 20, 1973, in the Advertiser, a newspaper circulated in the Parish of Lafayette, Louisiana; and on December 26, 1973, in The Lake Charles American Press, a newspaper circulated in Lake Charles, Louisiana.

Applicant states that the proposed subsidiary would engage de novo in the activities of providing bookkeeping and data processing services for the internal operations of Applicant and its banking and non-banking subsidiaries and the storing and processing of other banking, financial, or related economic data, such as performing payroll, accounts receivable or billing services of the types which national banks are permitted to perform. Additionally, Applicant states that the proposed subsidiary would engage in the activities of making excess computer time available to anyone, with the only involvement by the proposed subsidiary being the furnishing of facilities and necessary operating personnel; selling a by-product of a development program for a permissible data processing activity; and furnishing any data processing service upon request of a customer where such data processing service is not otherwise reasonably available in the relevant market area. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Atlanta.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than April 8, 1974.

Board of Governors of the Federal Reserve System, March 8, 1974.

[SEAL] THEODORE E. ALLISON,
Assistant Secretary of the Board.

[FR Doc.74-6123 Filed 3-15-74;8:45 am]

FIRST NATIONAL FINANCIAL CORP.

Order Approving Acquisition of an Existing Bank

First National Financial Corporation, Kalamazoo, Michigan, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)), of the acquisition of 100 percent of the voting shares (less directors' qualifying shares) of the successor by merger to The First National Bank of Sault Ste. Marie, Sault Ste. Marie, Michigan ("Bank"). The bank into which Bank is to be merged has no significance except as a means to facilitate the acquisition of the voting shares of Bank. Accordingly, the proposed acquisition of shares of the successor organization is treated herein as the proposed acquisition of the shares of Bank.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and none has been timely received. This Reserve Bank has considered the application in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant is the 10th largest banking organization in Michigan with seven subsidiary banks and an additional bank acquisition approved but not yet consummated. Upon consummation of the acquisition of that bank, Applicant will control deposits of $424.6 million, representing 1.6 percent of the total commercial bank deposits in the State.[1] Consummation of the subject proposed transaction will increase Applicant's share of State deposits by 0.1 percentage points and will not significantly increase the concentration of banking resources in the State. Applicant would remain the 10th largest bank holding company in Michigan.

Bank (June 30, 1972, deposits of $17.4 million) is the second largest bank in the Sault Ste. Marie banking market[2] and controlled about 27 percent of total commercial bank deposits as of that date. The first and third largest banking organizations account, respectively, for approximately 40 and 22 percent of total commercial bank deposits. The banking office of Applicant that is nearest to Bank is located 45 miles to the south of Bank. No meaningful competition appears to exist between Bank and any of the banking offices of Applicant's present subsidiary banks. Moreover, it appears unlikely that significant competition between Bank and Applicant's subsidiary banks will develop in the future in view of the distances involved and the restrictive nature of Michigan's branching laws. It is concluded that consummation of the proposed transaction would not have any adverse effects on competition in any relevant area. Accordingly, competitive factors are considered to be consistent with aproval of the application.

The financial and managerial resources and future prospects of Applicant, its existing subsidiary banks and Bank are considered to be satisfactory. Banking factors are consistent with approval of the application.

Although there is no evidence to indicate that the financial needs of the community to be served are not currently being met, Applicant plans to offer trust services to the area through the trust department of its lead bank and, in addition, to assist Bank in providing a wider range of services and in expanding and improving services now available at Bank. Convenience and needs considerations lend some weight toward approval of the application.

It is this Federal Reserve Bank's judgment that the proposed transaction is in the public interest and that the application should be approved.

On the basis of the record as summarized above, the Federal Reserve Bank of Chicago approves the application, provided that the transaction shall not be consummated (a) before the thirtieth calendar day following the date of this Order, or (b) later than three months after the date of this Order unless such period is extended for good cause by the Board or this Federal Reserve Bank pursuant to delegated authority.

By order of the Federal Reserve Bank of Chicago, acting pursuant to delegated authority for the Board of Governors of the Federal Reserve System, effective March 4, 1974.

[SEAL] ROBERT P. MAYO,
President.

[FR Doc.74-6122 Filed 3-15-74;8:45 am]

PRAIRIE HOME, INC.

Order Approving Retention of the Assets of L. A. Westland Agency

Prairie Home, Inc., Lincoln, Nebraska, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval, under section 4(c)(8) of the Act and § 225.4(b)(2) of the Board's Regulation Y, to retain the assets of L. A. Westland Agency, Prairie Home, Nebraska ("Agency"), a company that engages in general insurance agency activities in Prairie Home (population of approximately 50).

The operation by a bank holding company of a general insurance agency in a community with a population not exceeding 5,000 is an activity that the Board has previously determined to be closely related to banking (12 CFR 225.4(a)(9)(iii)(a)).

Notice of the application, affording opportunity for interested persons to submit comments and views on the public interest factors, has been duly published (39 FR 2310). The time for filing comments and views has expired, and none has been timely received.

Applicant controls one bank, The Farmers Bank, Prairie Home, Nebraska ("Bank"), with deposits of $1.4 million, representing .03 percent of the State's total commercial bank deposits.[1]

Agency is a general insurance agency and has conducted its business from the premises of Bank in Prairie Home for the past 50 years. Prairie Home is an agriculturally oriented community located 4 miles east of Lincoln, Nebraska. Agency engages in the sale of general insurance and since Applicant's acquisition of both Bank and Agency in 1970, it has expanded its insurance sales to include credit life and accident and health insurance related to extensions of credit by Bank. As it is the only insurance agency in the rural community of Prairie Home, continued availability of these services through Applicant assures the residents of the Prairie Home area of a convenient source of insurance services. There is no evidence in the record indicating that approval herein would have adverse effects on competition in the relevant area nor result in any undue concentration of resources, unfair competition, conflicts of interests, unsound banking practices, or other adverse effects on the public interest.

On the basis of the foregoing and other facts of record, the Board has determined that the balance of the public interest factors the Board is required to consider under section 4(c)(8) of the Act is favorable. Accordingly, the application is hereby approved. This determination is subject to the conditions set forth in § 225.4(c) of Regulation Y and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

By order of the Board of Governors,[2] effective March 8, 1974.

[SEAL] THEODORE E. ALLISON,
Assistant Secretary of the Board.

[FR Doc.74-6115 Filed 3-15-74;8:45 am]

UNITED MISSOURI BANCSHARES, INC.

Order for Hearing

In the matter of the application of United Missouri Bancshares, Inc., Kansas City, Missouri, for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 80 percent or more of the voting shares of Westport Bank, Kansas City, Missouri.

On March 1, 1974, notice of subject application was published in the FEDERAL REGISTER (39 FR 7998). Additionally, in accordance with section 3(b) of the Act (12 U.S.C. 1842(b)), notice of receipt of subject application was duly given to the Commissioner of Finance of the State of Missouri. Within 30 days thereafter, the Commissioner submitted to the Board in writing his statement expressing disapproval of the application. In light of the Commissioner's submission, the Board is required by section 3(b) of the Act to schedule a hearing on the application. Accordingly, *It is hereby ordered*, That, pursuant to section 3(b) of the Bank Holding Company Act (12 U.S.C. 1842(b)), a public hearing with respect to this application be held in Kansas City, Missouri, before a duly designated Administrative Law Judge, such hearing to be conducted in accordance with the Board's rules of practice for formal hearings (12 CFR Part 263). Such hearing shall commence not less than ten nor more than thirty days after the effective date of this order. *It is further ordered*, That the following matters will be the subject of consideration at said hearing, without prejudice to the designation of additional related matters and questions upon further examination:

(1) Whether the proposed acquisition would result in a monopoly, or would be in furtherance of any combination or conspiracy to monopolize or to attempt to monopolize the business of banking in any part of the United States;

(2) Whether the effect of the proposed acquisition in any section of the country may be substantially to lessen competition, or to tend to create a monopoly, or in any other manner would be in restraint of trade, and whether any anticompetitive effects found with respect to the proposed transaction are clearly outweighed in the public interest by the probable effect of the transaction in meeting the convenience and needs of the community to be served; and

(3) The financial and managerial resources and future prospects of the Applicant and of the bank proposed to be acquired, and the convenience and needs of the community to be served.

It is further ordered, That any person desiring to give testimony, present evidence, or otherwise participate in these proceedings should file with the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, on or before March 26, 1974, a written request containing a statement of the nature of the Petitioner's interest in the proceedings, the extent of the participation desired, a summary of the matters concerning which the Petitioner desires to give testimony or submit evidence, and the names and identity of witnesses who propose to appear. Requests will be submitted to the designated Administrative Law Judge for his determination and persons submitting them will be notified of his decision.

By order of the Board of Governors, March 15, 1974.

[SEAL] THEODORE E. ALLISON,
Assistant Secretary of the Board.

GENERAL SERVICES ADMINISTRATION

[Federal Property Management Regs.; Temporary Reg. D-43; Supplement 1]

FEDERAL EMPLOYEE PARKING

Revised Policy and Reporting Procedures

1. *Purpose.* This supplement prescribes revised policies and reporting procedures for assignment of parking spaces to physically handicapped employees and deletes separate reporting requirements for facilities which do not meet the 10/90 ratio.

2. *Effective date.* This regulation is effective March 18, 1974.

3. *Expiration date.* This regulation expires July 31, 1974, unless sooner revised or superseded.

4. *Applicability.* The provisions of this regulation apply to all Federal agencies as defined in FPMR Temporary Regulation D-43.

5. *Background.* These changes have been made as a result of recent agency recommendations.

6. *Changes.* FPMR Temporary Regulation D-43 is amended as follows:

a. Insert in subparagraph 6e the word "Government" at the beginning of the first sentence.

b. Delete from subparagraph 7a(1) ", severely handicapped employees,".

c. Change subparagraph 7a(3) to read as follows:

(3) Where practical, the 10/90 ratio shall be applied at each Federal facility (Each agency shall maintain a list of all facilities at which it is not practical to achieve the 10/90 ratio.);

d. Change subparagraph 8a to read as follows:

a. *Assignment.* Agencies shall give first priority to official and visitor parking requirements when assigning parking spaces. Agencies shall also give priority to parking for severely physically handicapped employees who meet the definition in subparagraph 6e. Parking spaces not required for official or visitor parking or for severely physically handicapped employee parking shall be assigned for employee parking at the 10/90 ratio. Assignment of spaces to carpools shall be based on the number of regular members in the carpool. Carpools with the highest number of regular members shall receive the highest priority in receiving parking spaces; e.g., a carpool with six regular members shall be assigned a parking space before a carpool with five regular members. In determining the number of regular members in a carpool, a person who does not travel on a daily basis or who travels one way shall be counted on a pro rata basis; e.g., an individual who travels to and from work 3 days each week shall be counted as three-fifths of a regular member, and one who travels one way each day of the week shall be counted as one-half of a regular member.

e. Add a new subparagraph 10e as follows:

e. Steps that are being taken to improve the utilization of carpooling at those facilities where it is not practical to meet the 10/90 ratio.

f. Change subparagraphs 10e, f, g, and h, to 10f, g, h, and i.

g. Change paragraph 11 to read as follows:

11. *Assistance from GSA.* In order to facilitate the formation of carpools, the Administrator of General Services, with the cooperation of the Secretary of Transportation and the agencies involved, will provide assistance through the use of such aids as computerized carpool matching or carpool boards. He will also develop reciprocal agreements with private sector employers through State or local government agencies or other organizations operating carpool matching programs for the public and/or private sectors.

h. Delete from subparagraph 12a(1) "Isolated facilities under the control and jurisdiction of one agency with less than 25 parking spaces shall be exempt from this reporting requirement.".

i. Add the following to subparagraph 12a(1):

e. Number of employees assigned parking spaces in the basis of severe physical handicap.

j. Delete subparagraph 12a.(3).

k. Delete from subparagraph 12b "Isolated facilities under the control and jurisdiction of one agency with less than 25 parking spaces shall be exempt from this reporting requirement.".

l. Change subparagraph 12b(1) to read as follows:

Change subparagraph 12b(1) to paragraph 12a(1) (a) through (e), above;

m. Delete subparagraph 12b(3).

n. Change paragraph 13 to read as follows:

13. *Exceptions.* Exceptions to the policies set forth in this regulation must be submitted by the head of the agency to the Administrator of General Services who will recommend approval or disapproval to the Administrator, Federal Energy Office.

ARTHUR F. SAMPSON,
Administrator of General Services.

SMALL BUSINESS ADMINISTRATION

[License No. 03/03–5114]

MODEDCO INVESTMENT COMPANY

Notice of Approval of Conflict of Interest Transaction

On October 26, 1973, the Small Business Administration published notice in the FEDERAL REGISTER (38 FR 29655) that MODEDCO Investment Company (MODEDCO), 1325 Massachusetts Avenue NW., Washington, D.C. 20005, a licensee under the Small Business Investment Act of 1958, as amended (the Act), had filed an application, pursuant to § 107.1004 (38 FR 30845, November 7, 1973), for approval of a conflict of interest transaction. The transaction involved the purchase of a subordinated debenture of Potomac Service Company (Potomac) in the principal amount of $150,000.

The sole stockholder and an officer and director of Potomac was Mr. Arthur Blount, Jr., who was an associate of MODEDCO by virtue of having been an officer and/or director of MODEDCO and/or its parent company, the Model Cities Economic Development Corporation.

Comments were received in opposition to the financing for a number of reasons which, among others, include (1) the close relationship existing between Mr. Blount and the licensee at the time of the financing; (2) the fact that the license was sponsored by and funded with Model Cities funds and that Mr. Blount was not a resident of the Model Cities Neighborhood, and (3) the failure to explore alternatives to the ownership of the laundry (Manhattan Laundry Company) by Potomac, i.e., Model Cities Community investors in the company, a public offering of the company stock, and ownership by employees of the company.

After careful consideration of all pertinent facts and information relating to the financing, including the continued existence of a small business concern, the preservation of jobs for more than 250 employees, and the economic impact on the community, SBA has deemed it judicious and in the best interest of the purposes of the Small Business Investment Act of 1958, as amended, to approve the transaction.

Accordingly, the financing made by MODEDCO to Potomac is hereby approved.

Dated: March 12, 1974.

DAVID A. WOLLARD,
Associate Administrator for Finance and Investment.

TARIFF COMMISSION

[337–33]

CERTAIN DISPOSABLE CATHETERS AND CUFFS THEREFOR

Notice of Resumption of Hearing

Notice is hereby given that the United States Tariff Commission will resume its public hearing in connection with investigation No. 337–33, Certain Disposable Catheters and Cuffs Therefor, on April 23, 1974, at 10:00 a.m. E.d.t. in the Hearing Room of the U.S. Tariff Commission Building, 8th and E Streets, NW., Washington, D.C. Requests for appearances at the hearing should be received by the Secretary of the Tariff Commission, in writing, at his office in Washington, D.C. 20436, not later than noon, Thursday, April 18, 1974. It is requested that prehearing briefs be filed with the Secretary by April 16, 1974.

Notice of the institution of the investigation and the ordering of a public hearing for October 9, 1973 (subsequently postponed) was published in the FEDERAL REGISTER on August 15, 1973 (38 FR 22083). Notice of the postponement of the hearing was published in the FEDERAL REGISTER on September 19, 1973 (38 FR 26244). Notice of the public hearing held on March 12, 1974, was published in the FEDERAL REGISTER on February 7, 1974 (39 FR 4821).

Issued: March 13, 1974.

By order of the Commission.

[SEAL] KENNETH R. MASON,
Secretary.

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

ADVISORY COMMITTEE ON CONSTRUCTION SAFETY AND HEALTH

Notice of Subcommittee Meeting

Notice is hereby given that the Project 1926/1910 Subcommittee of the Advisory Committee on Construction Safety and Health, established under section 107(e)(1) of the Contract Work Hours & Safety Standards Act (40 U.S.C. 333) and section 7(b) of the Williams-Steiger Occupational Safety and Health Act of 1970 (20 U.S.C. 656) will meet on Thursday, April 4, and Friday, April 5, 1974, starting at 9:00 a.m. in Room 107 C, Main Labor Building, 14th Street and Constitution Avenue NW., Washington, D.C. The meeting shall be open to the public.

The subcommittee will continue review of the General Industry Standards, Part 1910, to determine which individual items may be applicable to construction operations.

Written data, views, or arguments concerning the subject to be considered may be filed, together with 20 copies thereof, with the Committee Management Officer by April 2, 1974. Such submissions may also be filed with the Committee Management Officer at the meeting. Any such submissions will be provided to the members of the committee and will be included in the record of the meeting.

Persons wishing to orally address the committee at the meeting should submit a written request to be heard, together with 20 copies thereof, to the Committee Management Officer no later than April 2, 1974. The request must contain a short summary of the intended presentation and an estimate of the amount of time that will be needed.

Communications may be mailed to:

N. Schnaubelt
Committee Management Office
Occupational Safety and Health Administration
1726 M Street, NW., Room 240
Washington, D.C. 20210

Signed at Washington, D.C., this 13th day of March 1974.

JOHN STENDER,
Assistant Secretary of Labor.

ASSIGNMENT OF HEARINGS

MARCH 13, 1974.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested. No amendments will be entertained after the date of this publication.

MC 76032 Sub 281, Navajo Freight Lines, Inc., application is dismissed.
MC–4963 Sub 40, Alleghany Corporation, FBA Jones Motor, now assigned April 8, 1974, will be held in Room B–2231, Federal Plaza, New York, N.Y.
MC 138195, Mid-Island Messenger Service, Inc., now assigned continued hearing April 1, 1974, at New York, N.Y., will be held in Room E–2222, 26 Federal Plaza.
MC 76032 Sub 282, Navajo Freight Lines, Inc., application is dismissed.

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act, and rules and regulations

V 39 N 53
MAR 18 74
XUM

prescribed thereunder (49 CFR Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's Special Rules of Practice any interested person may file a petition seeking reconsideration of the following numbered proceedings on or before April 8, 1974. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC-74895. By order of March 12, 1974, the Motor Carrier Board approved the transfer to Star Bus Lines, Inc., 1422 Broadway, Scottsbluff, Nebr., of Certificates Nos. MC-97549 (Sub-No. 3) and MC-97549 (Sub-No. 5) issued February 11, 1958, and September 23, 1960, respectively, to John G. Rutz, doing business as Star Bus Line, Scottsbluff, Nebr., authorizing the transportation of passengers and their baggage between points in Nebraska on specified routes and between Scottsbluff, Nebr., and Kimball, Nebr., respectively.

No. MC-FC-74976. By order of March 12, 1974, the Motor Carrier Board approved the transfer to Sloane's Transfer & Storage Co., Inc., 2121 South 15th Avenue, Phoenix, Ariz. 85007, of Certificate of Registration No. MC-96866 (Sub-No. 1) issued June 1, 1965, to Richard J. Follett, doing business as Sloane's Transfer & Storage Co., Phoenix, Ariz., evidencing the authority to perform a transportation service in interstate or foreign commerce corresponding in scope to the intrastate authority granted in Certificate No. 3358 by the Arizona Corporation Commission.

No. MC-FC-75005. By order of March 12, 1974, the Motor Carrier Board approved the transfer to Wang Transport, Inc., Edison, N.J., of Permit No. MC-91505 issued to Alfred Lederer Transportation, Inc., dba Lederer Transportation, New York, N.Y., authorizing the transportation of: Paint, varnish, and toilet articles, and paint materials, between specified points in New York, and New Jersey. Robert B. Pepper, practitioner, 168 Woodbridge Ave., Highland Park, N.J. 08904.

[Notice 36]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

MARCH 8, 1974.

The following are notices of filing of application, except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application, for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the new rules of Ex Parte No. MC-67, (49 CFR Part 1131) published in the FEDERAL REGISTER, issue of April 27, 1965, effective July 1, 1965. These rules provide that protests to the granting of an application must be filed with the field official named in the FEDERAL REGISTER publication, within 15 calendar days after the date of notice of the filing of the application is published in the FEDERAL REGISTER. One copy of such protests must be served on the applicant, or its authorized representative, if any, and the protests must certify that such service has been made. The protests must be specific as to the service which such protestant can and will offer, and must consist of a signed original and six (6) copies.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in field office to which protests are to be transmitted.

No. MC 18302 (Sub-No. 1 TA), filed February 27, 1974. Applicant: STATE MOVING & STORAGE, INC., 1991 Utica Avenue, Brooklyn, N.Y. 11234. Applicant's representative: Larsh B. Mewhinney, 235 Mamaroneck Avenue, White Plains, N.Y. 10605. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Household goods*, (1) From (a) points in Westchester, Nassau, Suffolk, Rockland, and Putnam Counties, N.J.; Fairfield County, Conn., Hudson, Bergen, Essex, Passaic, Sussex, Morris, Warren, Union, Somerset, Middlesex, Monmouth, Mercer, Hunterdon Counties, N.J.; to (b) points in Maine, Vermont, New Hampshire, Rhode Island, Massachusetts, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, West Virginia, Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, Tennessee, Kentucky, Ohio, Indiana, Illinois, Wisconsin, and Michigan; (2) From (a) New York, N.Y., to (b) points in Maine, Vermont, New Hampshire, Rhode Island, Delaware, West Virginia, Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, Tennessee, Kentucky, Ohio, Indiana, Illinois, Wisconsin and Michigan; (3) From (a) points in Maine, Vermont, New Hampshire, Rhode Island, Delaware, West Virginia, Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, Tennessee, Kentucky, Ohio, Indiana, Illinois, Wisconsin, and Michigan, to (b) New York, N.Y.; and (4) From points in (1) (b) to points in Connecticut, Maryland, Massachusetts, New Jersey, New York (except New York, N.Y.), Pennsylvania, New Hampshire, Vermont, Delaware, and Rhode Island, for 180 days. SUPPORTING SHIPPER: State Moving & Storage, Inc., 1991 Utica Avenue, Brooklyn, N.Y. 11234. SEND PROTESTS TO: Marvin Kampel, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 26 Federal Plaza, New York, N.Y. 10007

No. MC 35807 (Sub-No. 44 TA), filed February 26, 1974. Applicant: WELLS FARGO ARMORED SERVICE CORPORATION, P.O. Box 4313, Atlanta, Ga. 30302. Applicant's representative: Harry J. Jordan, 1000 16th Street NW., Washington, D.C. 20036. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Gasoline coupons*, between points and places in the United States (except Alaska and Hawaii), for 180 days. PROFESSIONAL STANDARDS REVIEW

Designation of Areas

V 39 53 MAR 18 74 XUM

Title 42—Public Health

CHAPTER I—PUBLIC HEALTH SERVICE, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 101—PROFESSIONAL STANDARDS REVIEW

Designation of Professional Standards Review Areas

On December 20, 1973, there was published in the FEDERAL REGISTER (38 FR 34944–34951) a notice of proposed rulemaking implementing the provisions of section 1152 (a) of the Social Security Act as added by section 249F of the Social Security Amendments of 1972 (86 Stat. 1429–1430; (42 U.S.C. 1320C–1(a))), with respect to the establishment throughout the United States of appropriate Professional Standards Review Organization areas. The notice proposed that a new Part 101, entitled "Professional Standards Review," be added to Title 42, Code of Federal Regulations, and that Subpart A, entitled "Area Designation," be established therein. Interested individuals and organizations were given until January 21, 1974 to submit comments and suggestions on the proposed regulations. Subsequently the 30-day comment period was extended to February 5, 1974 (39 FR 2384). Comments and suggestions received with regard to this notice of proposed rulemaking, the responses thereto, and changes in the proposed areas are summarized below.

GENERAL DISCUSSION

The vast majority of comments were received from organizations and individuals in States in which multiple areas were proposed, suggesting their State be designated as a single area.

The Department's guidelines for the designation of areas, which are set out in § 101.2 of the regulations, were widely distributed, and public discussions of this material were held in the various regions of this Department. These guidelines, which were derived from the statutory language and the related legislative history, and a brief summary of their underlying premises, are:

1. Generally, an area should not cross State lines. The basis for this guideline is the provision of the law relating to the creation of Statewide Councils and the several references in the Senate Committee Report to areas established on a multi-county or State basis. In addition, the Medicaid program is organized on a State-by-State basis.

2. In general, an area should not divide a county. Considerations of administrative practicability serve as the basis for this guideline. However, in instances of large geographic areas or large county populations, it may be necessary and appropriate to divide a county.

3. Existing boundaries of local medical review organizations and local health planning areas should be considered. Since the Senate Finance Committee Report recognizes the existence of local professional medical review organizations, the current boundaries of these organizations should be considered. In addition, established health planning areas need to be considered as possible precedents.

4. An area should, to the extent possible, coincide with a medical service area and assure broad, diverse representation of all medical specialties. The PSRO area should be drawn to include, to the extent possible, the existing medical service or medical trade areas. Consideration should also be given to existing medical centers and to natural geographic barriers. In addition, effective peer review is attainable only if the review body has available to it the necessary range of professional expertise.

5. An area should generally include a minimum of approximately 300 practicing physicians. While the maximum can be expected to vary with local circumstances, generally, it should not exceed 2,500 practicing physicians. The purpose of an approximate limitation on the maximum size of an area's physician population is to emphasize the statutory concepts of local peer review responsibility and the active participation of local practicing physicians in the activities of the PSRO.

6. The designation of an area should take into account the need for effective coordination with Medicare/Medicaid fiscal agents. This principle is stated in the statute and the Senate Finance Committee Report. Since the PSRO is involved in the Medicare and Medicaid programs, it will have a significant effect on the claims process.

The proposals for the designation of various States as single areas were, except with respect to Georgia and Washington (see items 4 and 19 below), inconsistent with the guidelines discussed herein, and, accordingly, were rejected.

The designation of multiple areas in various large heavily populated States has, however, caused concern that Statewide organizations would be precluded from participation in the PSRO program. Such designations are not intended to exclude experienced State organizations.

As indicated in the December 20, 1973, notice of proposed rulemaking, arrangements of this sort have always been contemplated as fully consistent with the Department's policy that such arrangements (1) assure appropriate local autonomy and responsibility and (2) provide opportunities for existing Statewide organizations to make available their experience, knowledge, and capacity to the local organizations in the State.

Such organizations, serving as Statewide Professional Standards Review Organization Support Centers, could provide substantial support, guidance and aid to the local organizations within the State on a variety of professional, administrative and technical matters. This kind of assistance would, moreover, expedite organizational development of local PSROs through the introduction of common services.

Thus, in accordance with the legislative directives to the Secretary to provide for all necessary assistance in the establishment of local PSROs under sections 1156(a), 1163(c), and 1169 of Pub. L. 92–603, financial support will be available for the establishment of Statewide PSRO Support Centers to assist in the creation and operation of local PSROs, under appropriate arrangements.

Within the framework of the Secretary's policies and guidelines, a Support Center could carry out a number of functions such as general assistance and support to physicians in organizing to apply for planning funds. Other key duties could include assistance to local PSROs, upon request, in all phases of professional and technical activity. Finally, a Support Center under appropriate arrangements could provide assistance to State PSRO Councils in the accomplishment of their responsibilities under the Statute.

Financial support will also be available to physician organizations to plan and develop PSRO's in the areas designated below. Information as to the requirements of organizations wishing to apply is being published separately.

SPECIFIC COMMENTS

1. Comments proposed that Arizona be designated a single PSRO area. This was rejected because there are two local peer review organizations operating in the proposed areas which are in accord with the guidelines. (§ 101.5)

2. The designation of areas in California has been changed with respect to "Area XVIII—Los Angeles County". This change was deemed appropriate upon reconsideration of the following factors based on additional information furnished by the comments: size of the area and geographical configuration; number of physicians; location of major health care facilities, including teaching hospitals and clinics; and the existing patterns of patient referral. This change is consistent with the guidelines. Accordingly, 28 PSRO areas are designated in California with the addition of PSRO Areas XVIII through XXV covering Los Angeles County. (§ 101.7)

3. Comments suggested that the eight proposed areas in Florida were not consistent with medical practice patterns and that they be replaced by 12 areas to be consistent with such patterns. After reviewing the 12 suggested areas and additional information, it was concluded that such areas are consistent with medical practice patterns and the guidelines for designation of areas. Therefore, the designations are revised accordingly. All areas, except for Areas I and XII, are revisions of the proposed areas. (§ 101.12)

4. Proposals were received suggesting that Georgia be designated a single PSRO area. After consideration of the comments and additional information, it was concluded that since the Atlanta area is the locus of specialty and subspecialty care for the entire State and a Statewide continuing medical education program influences patterns of care throughout the State of Georgia, the designation of a single PSRO area for the State was considered to comply with the guidelines. It is also noted that peer review is presently being carried out on a Statewide basis.

5. The areas of Guam, the Trust Territory of the Pacific Islands, Hawaii, and America Samoa, have been combined into a single area. This change was made upon reconsideration of the conditions in this area in light of additional information made available since the preliminary designation. In accordance with the guidelines, the factors considered were the number of physicians and facilities in Guam, American Samoa and the Trust Territory, distribution of medical specialties and the pattern of medical practice. (§ 101.15)

6. Comments were received recommending that Illinois be redesignated as a single Statewide PSRO area. Such a designation, however, would be inconsistent with the guidelines. It was also recommended that Area II, as proposed in § 101.17, be divided into two PSRO areas. Such a division would allow the Quad River Foundation for Medical Care, now operating in Kendall, Will, Grundy, and Kankakee Counties, to continue operations and would be consistent with the guidelines. Accordingly, Kendall, Will, Grundy, and Kankakee Counties are designated as a separate PSRO area. (§ 101.17)

7. Recommendations for a single Statewide PSRO area in Indiana were received. Such a designation, however, would clearly be inconsistent with the guidelines. Recommendations for the recognition of the current local medical service areas were also received. A careful analysis of these recommendations indicates that two of the proposed PSRO areas should be divided, resulting in a total of seven. Such a division complies with the guidelines. Areas IV, V, VI, and VII are revisions of the proposed areas. (§ 101.78)

8. During the comment period, a number of objections were received to the combination of the nine Maryland counties east of the Chesapeake Bay with the four counties west of the Bay into a single proposed PSRO Area V and the inclusion of the four Baltimore counties into a single proposed Area I. Upon consideration of the above objections and the receipt of additional information, boundaries were adjusted and two new PSRO areas are designated to bring the total number of PSRO areas in Maryland to seven. Areas I, V, VI, and VII are revisions of the proposed areas. These adjustments satisfy the objections and are in accord with the guidelines. (§ 101.24)

9. With respect to Massachusetts, comments were received that recommended PSRO areas should conform to the substate planning boundaries. Taking the comments and additional information into consideration, areas in Massachusetts were revised to more adequately reflect patterns of practice and boundaries of local medical review organizations. Slight revisions were made in all proposed areas with the exception of proposed Area III. (§ 101.25)

10. Several changes were recommended for Michigan to recognize medical service areas, the medical homogeneity of counties, and to make the PSRO areas more consistent with medical referral patterns. The recommended modifications are consistent with the guidelines. The eight PSRO areas as shown in § 101.26 are changed to ten as a result of the recommended modifications. All of the ten areas with the exception of Areas I, V, and VIII are revisions of the proposed areas. (§ 101.26)

11. Comments received proposed a single Statewide PSRO area for Minnesota. Such a designation, however, is clearly inconsistent with the guidelines. It was also proposed that several counties be moved from proposed Area III to proposed Area I which would result in the areas being more consistent with health planning areas and the Sub-State Planning and Development Areas. The suggested change was made and it is consistent with the guidelines. (§ 101.27)

12. Comments were received requesting the designation of New Jersey as a single PSRO area. This was rejected, as not consistent with guidelines for the designation of PSRO areas. Chilton Hospital which is in Morris County, is included in Area II with Passaic County for PSRO purposes. This reflects an existing pattern of medical practice. (§ 101.34)

13. Changes in the State of New York reflect comments and information received about patterns of medical practice and the boundaries of local medical review organizations. A total of five changes were made, including the addition of three PSRO areas. Areas II, III, IV, VI, VII, IX, X, XII, and XIII are revisions of the proposed areas. (§ 101.36)

14. It was suggested that the four proposed areas in North Carolina were not consistent with medical practice patterns and that they be replaced by eight areas. After reviewing the eight suggested areas and taking into consideration additional information received, it was concluded that they are consistent with medical practice and with the guidelines for designation of areas. Therefore, the suggested eight areas are designated as the PSRO areas for North Carolina. All eight areas are revisions of the proposed areas. (§ 101.37)

15. Proposals to designate Ohio as a single area were rejected because such a designation would not satisfy the guidelines. The proposed PSRO areas were, however, revised to coincide with current review districts. As a result of the realignment, three new areas are added. Areas IV, V, IX, X, and XI are revisions of the proposed areas. (§ 101.39)

16. Several comments were received suggesting that Tennessee be designated a single area or that Shelby County be designated as one area and the remainder of the State be designated as the other area. These suggested changes were not made, because they do not reflect medical practice patterns and are otherwise inconsistent with the guidelines. It was decided to designate Shelby County and 11 surrounding counties as one area and the remainder of the State as the other area. This is consistent with medical practice patterns and the guidelines. (§ 101.47)

17. Comments were received recommending that Texas be redesignated a single Statewide PSRO area. Such a designation, however, would be inconsistent with the guidelines. Comments were also received recommending changes in the local areas. Accordingly, proposed Areas II, III, VI, and VII have been altered slightly to reflect greater compatibility with State Planning Districts; and, in proposed Area VII, with a medical planning area. Additionally, the large geographic area encompassing proposed Areas V and VIII has been divided into three PSRO areas, thereby creating a ninth PSRO area. (§ 101.48)

18. Comments were received suggesting that Virginia be designated a single PSRO area. The suggested change was not made, because it does not reflect medical practice patterns and would be inconsistent with the guidelines. (§ 101.52)

19. Proposals were received suggesting that the State of Washington be designated a single PSRO area. This change was made because additional information indicated that the Seattle-Tacoma-Bremerton area is the locus of specialty and subspecialty care for the entire State and a Statewide continuing medical education program influences patterns of care throughout the State of Washington. It is also noted that peer review is presently being carried on a Statewide basis. (§ 101.53)

20. Based on analysis of comments received, most of which recommended a single Statewide PSRO area, it was concluded that a two-area designation would be appropriate for Wisconsin. This designation allows the current medical care foundations to continue their activities and also preserves the integrity of the two historic medical service areas in the State. (§ 101.55)

21. In addition a number of minor editorial changes were made, and a number of typographical errors were corrected. Accordingly, the regulations as set out below are hereby adopted.

Effective date: These regulations are effective on March 18, 1974.

Dated: February 27, 1974.

CHARLES C. EDWARDS,
Assistant Secretary for Health.

Approved: March 8, 1974.

CASPAR W. WEINBERGER,
Secretary.

AUTHORITY: Title XI, Part B, Social Security Act; 42 U.S.C. 1320c—1320c-20.

§ 101.1 Definitions.

As used in this part:

(a) "Act" means the Social Security Act, as amended, (42 U.S. Chap. 7).

(b) "Area" means the geographical area within the boundaries of a State or within the boundaries of one or more counties or other political subdivisions in a State designated as constituting an area with respect to which a Professional Standards Review Organization may be designated, pursuant to section 1152(a) of the Act.

(c) "PSRO" means Professional Standards Review Organization.

(d) "Secretary" means the Secretary of Health, Education, and Welfare and any other officer or employee of the Department of Health, Education, and Welfare to whom the authority involved may be delegated.

(e) "State" means a State, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa and the Trust Territory of the Pacific Islands.

(f) "Physician" means a licensed doctor of medicine or osteopathy.

§ 101.2 Guidelines for designation of areas.

The Secretary will designate appropriate areas with respect to which Professional Standards Review Organizations may be designated, and from time to time revise such area designations, as may, in his judgment be necessary, taking the following guidelines into consideration:

(a) Generally, an area should not cross State lines.

(b) In general, an area should not divide a county. However, in instances of large geographic areas or large county populations, it may be necessary and appropriate to divide a county.

(c) Existing boundaries of local medical review organizations and local health planning areas should be considered.

(d) An area should, to the extent possible, coincide with a medical service area and assure broad, diverse representation of all medical specialties. Consideration should also be given to the location of existing medical centers and to natural geographic barriers.

(e) An area should generally include a minimum of approximately 300 practicing physicians. While the maximum can be expected to vary with local circumstances, generally it should not exceed 2500 practicing physicians.

(f) The designation of an area should take into account the need for effective coordination with Medicare and Medicaid fiscal agents.

§ 101.3 Alabama.

The State of Alabama is designated as a single Professional Standards Review Organization area.

§ 101.4 Alaska.

The State of Alaska is designated as a single Professional Standards Review Organization area.

§ 101.5 Arizona.

Two Professional Standards Review Organization areas are designated in Arizona, composed of the following counties:

AREA I

Mohave	Yavapai
Coconino	Maricopa
Navajo	Gila
Apache	

AREA II

Yuma	Pima
Pinal	Santa Cruz
Graham	Cochise
Greenlee	

§ 101.6 Arkansas.

The State of Arkansas is designated as a single Professional Standards Review Organization area.

§ 101.7 California.

Twenty-eight Professional Standards Review Organization areas are designated in California, composed of the following counties with the exception of Areas XVIII through XXV which are composed of cities and parts of Los Angeles denoted by postal zone:

AREA I

Del Norte	Lake
Humboldt	Sonoma
Mendocino	

AREA II

Siskiyou	Glenn
Modoc	Butte
Trinity	Colusa
Shasta	Sutter
Lassen	Yuba
Tehama	Sierra
Plumas	

AREA III

Napa	Marin
Solano	

AREA IV

Nevada	Sacramento
Placer	El Dorado
Yolo	

AREA V

San Francisco

AREA VI

San Mateo

AREA VII

Contra Costa — Alameda

AREA VIII

San Joaquin	Calaveras
Amador	Tuolumne
Alpine	

AREA IX

Santa Clara

AREA X

Stanislaus	Merced
Mariposa	

AREA XI

Fresno — Madera

AREA XII

Santa Cruz	San Benito
Monterey	

AREA XIII

Kings — Tulare

AREA XIV

[29 CFR Part 1926]

[S–74–7]

TUNNELS AND SHAFTS, ILLUMINATION, SCAFFOLDING, MOTOR VEHICLES, SEAT BELTS, PNEUMATIC-TIRED EARTHMOVING HAULAGE EQUIPMENT, EXCAVATION, COFFERDAMS, AND SURFACE TRANSPORTATION OF EXPLOSIVES

Notice of Proposed Rulemaking and Public Hearing

The Advisory Committee on Construction Safety and Health has recommended a complete revision of the safety and health standards for tunnels and shafts contained in Subpart S of Part 1926 of Title 29 of the Code of Federal Regulations. The Advisory Committee has also made recommendations for revising the construction safety and health standards concerning illumination, scaffolding, equipment, motor vehicles, seat belts, pneumatic-tired earthmoving haulage equipment, excavation, cofferdams, and surface transportation of explosives.

Upon consideration of the recommendations and pursuant to authority in section 6(b) of the Williams-Steiger Occupational Safety and Health Act of 1970 (84 Stat. 1593; 29 U.S.C. 655), section 107 of the Contract Work Hours and Safety Standards Act (83 Stat. 96; 40 U.S.C. 333), and in Secretary of Labor's Order No. 12–71 (36 FR 8754), it is proposed to amend Part 1926 of Title 29 of the Code of Federal Regulations as set forth below.

Interested persons are invited to comment on the proposed revisions. Written data, views, and arguments should be submitted in triplicate to the Office of Standards, Occupational Safety and Health Administration, attention J. Goodell, Room 240, 1726 M Street NW., Washington, D.C. 20210, on or before May 17, 1974. The data, views and arguments will be available for public inspection and copying at the above address.

In addition, oral data, views, and arguments will be received by an administrative law judge at a public hearing on June 26 and 27, 1974, in the Departmental Auditorium, Constitution Avenue between 14th and 12th Streets, NW., Washington, D.C. Beginning at 9:30 a.m. on June 26, 1974, a prehearing conference will be held in order to establish the order and time for the presentation of statements and settle any other procedural matters relating to the proceeding. The hearing will be conducted by an administrative law judge assigned by the Chief Administrative Law Judge of the Department of Labor. All documents that are intended to be submitted for the record at the hearing should be submitted in triplicate. The hearing shall be conducted, and the decisions will be made, in accordance with 29 CFR Part 1911.

Persons desiring to appear at the hearing must file a notice of intention to appear before May 31, 1974, with the Office of Standards, Occupational Safety and Health Administration, attention J. Goodell, Room 240, 1726 M Street, NW., Washington, D.C. 20210. The notice must contain the following information:

(1) The name and address of the person to appear;

(2) The capacity in which he will appear;

(3) The approximate amount of time needed for the presentation;

(4) The specific provisions of the proposals which will be addressed;

(5) The position that will be taken with respect to each provision addressed; and

(6) A summary of the evidence with respect to each such provision proposed to be adduced at the hearing.

A. *Summary of major general proposals.*

1. *Illumination.* The proposed revision of § 1926.56 would make a correction in the foot candle requirements for general construction areas, and add foot candle requirements for a new designation of outdoor, active construction areas. Also, the illumination requirements for tunnels and shafts would be relocated in § 1926.800(d)(1).

2. *Scaffolding.* It is proposed to revise § 1926.451(a)(6) to permit the use of No. 19 gauge U.S. standard wire because the No. 18 gauge wire presently required is not always available. Section 1926.451(a)(22) would be added, requiring all scaffold platforms to be secured in place and tightly planked to prevent tools or other material from falling through.

3. *Mechanized equipment.* In § 1926.600(a), new general requirements concerning the safe use of mechanized equipment are proposed. These new requirements primarily concern the lockout or tag-out of machinery or equipment when work is being performed on such machinery or equipment; non-return valves for multi-air connections for discharge lines; and safe access to mobile equipment operator stations or work platforms.

In § 1926.600(b), it is proposed to define the term "jumbo" and make the requirements for jumbos used in tunnel construction applicable to jumbos used in general construction.

4. *Motor vehicles.* It is proposed to revise the coverage provisions of § 1926.601(a).

5. *Material handling equipment.* a. *Seat belts.* In § 1926.602(a)(2), it is proposed to revise the requirements for seat belts on agricultural and light industrial tractors used in construction work. The title of the Society of Automotive Engineers J 333a–1970 reference standard would be corrected.

b. *Brakes.* There are no substantive changes proposed in the brake requirements in § 1926.602(a)(4). The proposal would simply add the effective date provisions previously located in § 1926.602(a)(8).

c. *Fenders.* It is proposed to revoke the requirement that fenders be installed on pneumatic-tired earthmoving haulage equipment by revising § 1926.602(a)(5) and revoking the effective date requirements of § 1926.602(a)(8). In lieu of a specific fender requirement, § 1926.602(a)(5) would be revised to require that pneumatic-tired earthmoving haulage equipment, capable of speeds in excess of 15 miles per hour, be designed or equipped and operated to protect the operator from exposure to material thrown radially from rotating tires.

It should be pointed out that the standard requiring the installation of fenders on pneumatic-tired earthmoving haulage equipment, 29 CFR 1926.602(a)(5) and (8) is presently suspended pursuant to a previous recommendation of the Advisory Committee. Notice of the suspension pending the outcome of the present rulemaking proceeding was published in the FEDERAL REGISTER on October 5, 1973 at 38 FR 27594.

6. *Excavation.* In § 1926.651, it is proposed to revise paragraph (t) to make the requirements concerning barricades and covers applicable to all excavations, and to add requirements for barricades for the protection of employees working adjacent to an excavation where the work is not directly connected to the excavation operation. Section 1926.651(t) presently requires that barrier physical protection be provided at all remotely located excavations.

7. *Concrete buckets.* The proposed revision of § 1926.700(d)(2) is not intended to make any substantive change in the standard. The purpose of the revision is to add language which was omitted in the earlier publication of the standard.

8. *Cofferdams.* Paragraph (c) of § 1926.802 would be revised to require that at least two means of rapid exit be provided for employees working in cofferdams. Also, proposed § 1926.802(d) would require that guardrails be provided on cofferdam walkways, bridges and ramps in accordance with § 1926.500. As proposed, § 1926.802(e) would require that cofferdams located close to navigable waters be protected from vessels in transit at all times, eliminating the present requirement that such protection be provided where possible.

9. *Surface transportation of explosives.* It is proposed to revise § 1926.902(i) by changing the rating required for fire extinguishers used on vehicles transporting explosives so as to require not less than 10BC rating (dry chemical type). The present requirements specify the use of a fire extinguisher with a rating of not less than 10 ABC. It is felt that the dry chemical type extinguisher would be preferable for use with the kind of fire encountered in the transportation of explosives.

B. *Summary of major proposed revisions in § 1926.800, concerning tunnels and shafts.*

1. *Scope.* Paragraph (a)(1) would be expanded to include the work areas located in and around tunnels, shafts, caissons, cofferdams, and in compressed air.

2. *Access and egress.* The proposed revision of paragraph (a)(2) would require that a safe means of egress be provided, in addition to a safe means of access presently required. Proposed paragraph (b)(6) would require that an emergency means of access and egress, such as an escape route or a refuge chamber, be provided within 5000 feet of the face or heading.

3. *Barricade.* Presently paragraph (a)(4) requires that access to an unattended underground opening be restricted by gates or doors and that openings such as unused chutes and manways be tightly covered. The proposals, paragraph (a)(iv), would require that completed or unused sections of the tunnels be barricaded.

4. *Gassy operations.* Proposed paragraph (a)(2) would set forth the conditions which would require an underground operation to be treated as gassy. Also the proposed revision would require the use of permissible equipment in gassy operations, as classified by the U.S. Bureau of Mines or a nationally recognized testing laboratory, and would require the posting of all gassy operations to give notice that the operations are gassy.

5. *Records of hazardous conditions and requirements of safety program.* It is proposed to add a requirement that records be maintained, at the jobsite, of hazardous conditions such as major equipment, failures, earth or rock slides, cave-ins, fires, ruptures or explosions. Another new provision would require that each employer maintain, at the jobsite, a description of certain features of a safety program such as safety procedures involving ventilation, lighting and communication systems, emergency procedures, safety training program and the procedure for coordination of other employees working on or affecting the construction site.

6. *First aid and medical attention.* Additional first aid and medical attention requirements, not contained in Subpart D of part 1926, are proposed in paragraph (a)(5). The new requirements are specifically related to tunnel operations.

7. *Emergency provisions.* (a) *Hoisting.* Paragraph (b) would be amended to require that emergency hoisting facilities be provided at shafts when work is in progress.

(b) *Self rescuers.* Paragraph (b)(3) presently requires that self-rescuers approved by the Bureau of Mines be available near the advancing face for each face employee and be located on the haulage equipment and in other areas where employees might be trapped by smoke or gas. The proposed revision of paragraph (b)(3) would require that approved self-rescuers be provided for each person and be readily available in all underground areas where persons might be trapped by smoke or gas. The proposal would require that self-rescuers be approved by either the Bureau of Mines or the National Institute for Occupational Safety and Health (NIOSH).

(c) *Rescue crews.* Rescue equipment, including self-contained breathing apparatus, would be required for the use of each rescue crew member by new paragraph (b)(8).

(d) *Communication.* Paragraph (b)(4) would require communication systems in all shafts and lineal headings where voice communication is ineffective and would require that all telephone or other signal communication systems be independent of the tunnel power supply. Requirements for dual communication systems in specific areas would be added and the installation of such systems in series would be prohibited. Also, immediate means of communication would be required for employees who are isolated or working alone. Presently, paragraph (b)(4) requires that either telephone or some other communication system be provided between the work face and the tunnel portal and that such systems be independent of the tunnel power supply.

(e) *Emergency access and egress.* An emergency means of access and egress, such as an escape route or refuge chamber would be required within 5000 feet of the face of the heading by proposed paragraph (b)(6).

8. *Air quality and ventilation.* As proposed, paragraph (c)(3) would specify the conditions under which an employee would be permitted to work, for short periods of time, in concentrations of airborne contaminants which exceed the threshold limit values set forth in the 1970 edition of "Threshold Limit Values of Airborne Contaminants" adopted by the American Conference of Governmental Industrial Hygienists.

Paragraph (c)(1)(vi) presently requires that atmospheres in all active areas contain at least 20 percent oxygen. It is proposed to revise this requirement to require that the atmospheres in all underground areas contain at least 19.5 percent oxygen.

With respect to flammable gas, proposed paragraph (c)(6) would require that employees be withdrawn from working places when 20 percent of the lower explosive limit or higher concentration of flammable gas is detected in air returning from an underground working place or in air return. Presently, paragraph (c)(2)(vi) requires the removal of employees when 1.5 percent or higher concentration of flammable gas is detected in returning air.

It is proposed to require that mobile diesel-powered equipment used underground in gassy operations meet the requirements of certain Bureau of Mines Publications. This revision would eliminate the requirement that such equipment be approved when used in nongassy mines. The proposal is found in paragraph (c)(7). A new paragraph (c)(8) would be added prohibiting the idling of internal combustion engines in the intake air for more than five minutes.

In addition, it is proposed to revise the requirements concerning the need for mechanically induced primary ventilation in tunnels without adequate natural ventilation, reversible air flow in tunnels over 400 feet in length, failure of the ventilating system, re-entry of qualified and authorized employees into the adit, tunnel, shaft or other underground areas after the main fan or fans have been shut down, and the supply of quality air to all points of the tunnel.

9. *Illumination.* The requirements of paragraph (d)(1) would be revised to require that tunnel and shaft headings, drilling, marking, and scaling work areas underground have a minimum of 5 foot-candles of illumination. A minimum of 2 foot-candles of illumination at zero elevation would be required in all other underground areas. Presently a minimum of 10 foot candles of illumination is required in areas such as the shaft heading and 5 foot candles is required in all other underground areas.

A new paragraph (d)(2) would be added requiring automatic emergency lighting in the heading area. In addition, if the natural light or the emergency lighting system is not adequate for escape then each employee underground would be required to have a portable hand light or cap lamp.

10. *Fire prevention and control.* The requirements of paragraph (e)(1)(viii) requiring the use of fire-resistant hydraulic fluids would be revised. Proposed paragraph (e)(7) would require the use of fire-resistant hydraulic fluids in powered hydraulically-actuated underground machinery and equipment unless such equipment is protected by multipurpose fire extinguishers or a fire suppression system.

In addition, new requirements are proposed covering welding, cutting, and heating operations when an underground operation is considered gassy, storage of flammable materials near tunnels and shafts, and the use of non-combustible or fire resistant materials in buildings built for use within a tunnel or shaft.

11. *Ground support.* It is proposed to add new requirements for the protection of employees working ahead of support replacement operations and tunnel sets. Paragraph (h)(2)(v) would prohibit employees from working ahead of replacement operations unless alternate egress is provided. Paragraph (h)(2)(vii) would require temporary roof supports to be used where ground conditions require the use of such supports in order to protect employees working ahead of tunnel sets.

12. *Drilling—Jumbos.* The requirements for jumbos would be revised. The proposed revision would require that jumbos be chocked to prevent movement and that the decks be kept clean and be of the anti-slip type to prevent slipping hazards.

13. *Blasting.* A new paragraph (j)(2) would be added to require that blasting wires be kept clear of electrical lines, pipes, rails, and other conductive material except the earth.

14. *Haulage.* Paragraph (h) would be revised by adding new requirements concerning cab and canopy protection for powered mobile equipment, refuge stations, bonding of rails, safety chains in addition to couplings for connecting rail cars, pulling of man cars used to transport employees, and a prohibition against employees working from equipment that is not specifically designed or adopted for such use.

15. *Electrical equipment.* It is proposed to revise paragraph (L) by adding provisions to require that lighting circuits be located so that movement of personnel and equipment will not damage the circuits or disrupt the service and to require that non-metallic and

V 39 53 MAR 18 74 XUM

weatherproof light fixtures be used in all areas exposed to dampness.

16. *Hoisting.* Paragraph (m) concerning hoisting would be completely revised. The proposed revision primarily concerns inspection and maintenance of hoisting equipment, the proper use of hoists for men and for materials, the use of cranes as hoists, the maintenance of component parts of the hoists, safety devices, the use of manhoists while sinking shafts under or over 50 feet, manhoists used during tunnel construction, and material hoists.

A. Proposed miscellaneous amendments to Part 1926 of Title 29, Code of Federal Regulations:

1. In § 1926.56(a), Table D–3 would be revised to read as follows:

§ 1926.56 Illumination.

(a) *General.* Construction areas, ramps, runways, corridors, offices, shops, and storage areas shall be lighted to not less than the minimum illumination intensities listed in Table D–3 while any work is in progress:

TABLE D–3—MINIMUM ILLUMINATION INTENSITIES IN FOOT-CANDLES

Foot-candles:	*Area of Operation*
3	General construction area lighting.
5	Outdoors: Active construction areas, concrete placement, excavation and waste areas, accessways, active storage areas, loading platforms, refueling, and field maintenance areas.
5	Indoors: warehouses, corridors, hallways, and exitways.
10	General construction plant and shops (e.g., batch plants, screening plants, mechanical and electrical equipment rooms, carpenter shops, rigging lofts and active storerooms, barracks or living quarters, locker or dressing rooms, mess halls, and indoor toilets and workrooms).
30	First aid stations, infirmaries, and offices.

NOTE: For illumination underground, see § 1926.800(d).

* * * * *

2. In § 1926.451, paragraph (a)(6) would be revised and a new paragraph (a)(22) would be added, reading as follows:

§ 1926.451 Scaffolding.

(a) *General Requirements.* * * *

(6) Where persons are required to work or pass under the scaffold, scaffolds shall be provided with a screen between the toeboard and the guardrail, extending along the entire opening, consisting of no smaller than No. 19 gauge U.S. Standard wire ½-inch mesh openings, or the equivalent.

* * * * *

(22) All scaffold platforms shall be secured in place and shall be tightly planked in such a way as to prevent tools or other materials from falling through.

* * * * *

3. In § 1926.600, new paragraphs (a)(7), (8), (9), (10) and (b) would be added, reading as follows:

§ 1926.600 Equipment.

(a) *General requirements.* * * *

(7) When work must be performed on machinery or equipment, as for repairs, the equipment shall be locked out or tagged out and not restarted until all employees are clear.

(8) (i) Where there are multi-air connections for discharge lines from pressure vessels, compressors, and manifolds, they shall be equipped with nonreturn valves. This applies to discharge lines having a flow of compressed air greater than 60 cubic feet per minute.

(ii) Each air or steam hose connection shall be secured to prevent the hose from whipping.

(9) Safe access shall be provided to all mobile equipment operator stations or work platforms.

(10) Materials, tools, or equipment on mobile units shall not be loaded so as to cause injury to employees.

(b) *Specific equipment — Jumbos.* Jumbos used in other than tunnel operations shall meet the requirements of § 1926.800(i)(8). The term "jumbo" means a mobile carriage, designed with wings, platforms, or decks, upon which one or more drills may be mounted or other operations may be performed.

4. In § 1926.601, paragraph (a) would be revised to read as follows:

§ 1926.601 Motor vehicles.

(a) *Coverage.* This section applies to vehicles used in the performance of construction work on, or immediately adjacent to, a worksite. The requirements of this section do not apply to equipment for which rules are prescribed in § 1926.602.

* * * * *

5. In § 1926.602, paragraphs (a)(2), (a)(4), and (a)(5) would be revised, and paragraph (a)(8) would be revoked. As revised, § 1926.602 would read as follows:

§ 1926.602 Material handling equipment.

(a) *Earthmoving equipment; General.* * * *

(2) *Seat belts.* (i) Seat belts shall be provided on all equipment covered by this section and shall meet the requirements of the Society of Automotive Engineers, J386–1969, Seat Belts for Construction Equipment. Seat belts for agricultural and light industrial tractors used in construction shall meet the seat belt requirements of Society of Automotive Engineers J333a–1970, Operator Protection for Wheel Type Agricultural and Light Industrial Tractors.

* * * * *

(4) *Brakes.* All earthmoving equipment mentioned in paragraph (a)(1) of this section shall have a service braking system capable of stopping and holding the equipment fully loaded, as specified in Society of Automotive Engineers SAE–J237, Loader Dozer-1971, J236, Graders-1971, and J319b, Scrapers-1971. Brake systems for self-propelled rubber-tired off-highway equipment manufactured after January 1, 1972 shall meet the applicable minimum performance criteria set forth in the following Society of Automotive Engineers Recommended Practices:

Self-propelled scrapers	SAE J319b–1971
Self-propelled graders	SAE J236 –1971
Trucks and wagons	SAE J166 –1971
Front end loaders and dozers.	SAE J237 –1971

Equipment manufactured before January 1, 1972, which is used by any employer after that date, shall comply with the applicable rules prescribed herein not later than June 30, 1973.

(5) Pneumatic-tired earthmoving haulage equipment (trucks, scrapers, tractors, and tractors with trailing units), capable of speeds in excess of 15 miles per hour, shall be designed or equipped and operated so that the operator shall not be exposed to material thrown radially from the rotating tires.

* * * * *

(8) [Revoked]

* * * * *

6. In § 1926.651, paragraph (t) would be revised to read as follows:

§ 1926.651 Specific excavation requirements.

* * * * *

(t) All wells, pits, and shafts shall be barricaded or covered. Upon completion of exploration and similar operations, temporary wells, pits, and shafts shall be backfilled. Where employees are working adjacent to an excavation on work not directly connected with the excavation, such excavation shall be adequately barricaded.

* * * * *

7. In § 1926.700, paragraph (d)(7)(i) would be revised to read as follows:

§ 1926.700 General provisions.

* * * * *

(d) *Concrete placement.* * * *

(7) *Concrete buckets.* (i) Concrete buckets equipped with hydraulic or pneumatically operated gates shall have positive safety latches or similar safety devices installed to prevent premature or accidental dumping. Buckets shall be designed to prevent aggregate and loose material from accumulating on the tops and sides of the bucket.

* * * * *

8. In § 1926.802, paragraph (c) would be revised, paragraph (d) would be revised and redesignated paragraph (e) and a new paragraph (d) would be added. As revised § 1926.802 would read as follows:

§ 1926.802 Cofferdams.

* * * * *

(c) At least two means of rapid exit shall be provided for employees working in cofferdams.

(d) Cofferdam walkways, bridges, and ramps shall be provided with guardrails, in accordance with § 1926.500.

(e) Cofferdams located close to navigable waters shall be protected from vessels in transit.

9. In § 1926.902, paragraph (i) would be revised to read as follows:

§ 1926.902 Surface transportation of explosives.

* * * * *

(i) Each vehicle used for transportation of explosives shall be equipped with a fully charged fire extinguisher approved by a nationally recognized testing laboratory, in good condition, of not less than 10BC rating (dry chemical type). The driver shall be trained in the use of the extinguisher on his vehicle.

* * * * *

B. Proposed revision of § 1926.800, Tunnels and Shafts. Section 1926.800 is proposed to be revised to read as follows:

§ 1926.800 Tunnels, shafts, and related work areas.

(a) *General*—(1) *Application.* (i) The specific requirements of Subpart S of this part shall apply to work being performed in and around tunnels, shafts, caissons, cofferdams, in compressed air, and related work areas, in addition to applicable provisions of other subparts of this part.

(ii) Safe means of access and egress shall be provided and maintained to all working places.

(iii) When ladders and stairways are provided in shafts and steep inclines, they shall meet the requirements of Subparts L and M of this part.

(iv) Access to underground openings shall be restricted by gates or doors. Unused chutes, manways, or other openings shall be tightly covered, bulk-headed, or fenced off, and posted. Completed sections or unused sections of the tunnel that are not used by the employees shall be barricaded and made off limits. Conduits, trenches, manholes, and other openings shall meet the requirements of Subparts M and P of this part.

(v) Subsidence areas that present hazards to employees shall be barricaded and posted or supported.

(vi) Each operation shall have a check-in and check-out system that will provide positive identification of every employee underground. Positive identification, for the purpose of this subpart, includes, but is not limited to, a metal disc, tag, or other device worn by the employee for individual count and identification. An accurate record of the employees shall be kept on the surface.

(2) *Gassy operations.* (i) An underground operation shall be considered gassy and shall be operated thereafter as gassy if:

(*a*) Flammable gas or petroleum vapors emanating from the strata have been ignited in the tunnel; or

(*b*) A concentration of 0.25 percent by volume (5 percent of lower explosive level (LEL)) or more of flammable gas has been detected not less than 12 inches from the roof, face, floor, or walls in any open workings; or

(*c*) A concentration of 20 percent of LEL of petroleum vapors has been detected not less than 3 inches from the roof, face, floor, or walls in any open workings; or

(*d*) The tunnel is connected to a gassy excavation which subjects the employees to reasonable likelihood of danger; or

(*e*) The history or past experience indicates that flammable or petroleum vapors in hazardous concentrations are likely to be encountered in such tunnel.

(ii) Only permissible equipment, maintained in permissible condition, shall be used in gassy operations. For the purpose of this part, "permissible" as applied to any device, equipment, or appliance means that such device, equipment, or appliance is classed as permissible by the U.S. Bureau of Mines or a nationally recognized testing laboratory.

(iii) All gassy underground operations shall be prominently posted as a gassy operation at each underground entrance.

(3) *Record of hazardous conditions.* A record of hazardous conditions, such as major equipment failures, earth or rock slides, cave-ins, fires, ruptures or explosives, shall be maintained at the jobsite.

(4) *Safety program.* (i) Each employer shall establish an accident prevent program and a safety training program in accordance with § 1926.20(b), § 1926.21(b), and paragraph (a)(4) of this section. There shall be available at the jobsite:

(*a*) A written statement of the accident prevention program, which shall include the safe procedures involving the ventilation, lighting, and communication systems to be used;

(*b*) Emergency procedures, including access and egress methods, and personal protective equipment to be used;

(*c*) The safety training program; and

(*d*) The plan of coordination with all other employers working on or affecting the construction site.

(ii) Each employee shall be issued a copy of the project's general safety rules prior to commencement of the employee's work at the project.

(iii) Each employer shall designate a competent person with responsibility to administer the safety program. A written record shall be maintained of the safety activities.

(iv) Regular weekly accident prevention training and instruction shall be given to each employee.

(5) *First aid and medical attention.* (i) First aid services and provisions for medical care shall be made available by the employer for his employees in accordance with requirements contained in Subpart D of this part.

(ii) First aid stations, when provided, shall have a minimum of 100 square feet of clear floor space with provisions for adequate light, ventilation, and sanitation facilities as specified in Subpart D of this part. All surfaces shall be maintained in a clean and sanitary condition and the floor shall be of impervious construction.

(6) *Immediate aid.* At least one person shall be on duty above ground when employees are working underground. Such person's primary duties shall include responsibility for securing immediate aid for employees underground in case of emergency.

(b) *Emergency provisions.* (1) Evacuation plans and procedures shall be developed and made known to the employees.

(2) Emergency hoisting facilities shall be provided at shafts when work is in progress.

(3) Self-rescuers approved by either the National Institute for Occupational Safety and Health (NIOSH) or the Bureau of Mines shall be provided for each person, and shall be kept readily available, in all underground areas where persons might be trapped by smoke or gas. The self-rescuers shall be maintained in good current operating condition. Employees shall be trained in their use.

(4) All shafts and lineal headings where voice communication is ineffective shall be provided with communication systems that meet the following requirements:

(i) Telephone or other signal communication systems shall be independent of the tunnel power supply;

(ii) Dual communications shall be provided between the working face or work area, and the top and bottom of the shaft(s), and the hoisting station, or surface where no hoist is involved. Such systems shall not be installed in series;

(iii) Communication systems shall be tested daily for proper working condition.

(5) Employees working alone or at isolated locations underground shall have means of immediate communication for assistance.

(6) Emergency means of access and egress, such as an escape route or a refuge chamber, shall be provided within 5000 feet of the face or heading.

(7) At tunnel operations employing 25 or more employees at one time underground, there shall be at least two rescue crews (10 employees divided between shifts). Rescue crews shall be trained in rescue procedures, in the use, care, and limitations of breathing apparatus, and the use and maintenance of fire-fighting equipment, and shall be retrained at least annually. Where there are fewer than 25 employees, no less than one-third shall be trained in such rescue procedures.

(8) Rescue equipment, including self-contained breathing apparatus, that is suitable for the operation shall be provided, maintained, and readily available for the use of each rescue crew member.

(c) *Air quality and ventilation.* (1) Instruments, approved for specific applications, shall be provided to test the atmosphere quantitatively for carbon monoxide, nitrogen dioxide, flammable or toxic gases, dusts, mists, and fumes that occur in a tunnel or shaft. Tests shall be conducted as frequently as necessary to assure that the required quality and quantity of air is maintained. A record of all tests shall be maintained for the duration of the project and be made available for inspection to authorized representatives of the Secretary.

(2) Field-type oxygen analyzers, or other suitable devices, shall be used to test for oxygen deficiency.

(3) Except as provided in paragraph (c)(4) of this section, no employee may be allowed to work inside a tunnel or a shaft where there is an airborne concentration of a contaminant in excess of the applicable limit imposed by § 1926.55.

V 39 53 MAR 18 74 XUM

(4) Employees may work for short periods of time in concentrations of airborne contaminants which exceed the limits imposed by § 1926.55, provided they wear respiratory protective devices approved for protection against the particular hazards involved. The circumstances under which temporary, limited work may be permitted are as follows:

(i) In cases of emergency;

(ii) While environmental controls are being established; and

(iii) When necessary by the nature of the work, such as, but not limited to, welding, sandblasting, lead burning, and painting.

(5) Atmospheres in all underground areas shall contain at least 19.5 percent oxygen.

(6) If 20 percent of the lower explosive limit, or higher concentration of flammable gas, is detected in air returning from any underground working place(s) or in air return, the employees shall be withdrawn to a safe location and the power cut off to the portion of the area endangered by such flammable gas until the concentration of such gas is reduced to 10 percent of the lower explosive limit or less.

(7) Internal combustion engines used underground shall be diesel-powered. Mobile diesel-powered equipment used underground in gassy operations shall meet the requirements set forth in the following Bureau of Mines publications: Schedule 31, for Gassy Non-Coal Mines and Tunnels, Diesel Equipment Listing for Years 1967 through 1971, Part 1, Certified Diesel Engines and Certified Safety Components; and Information Circular 8354, Mobile Diesel-powered Transportation Equipment for Gassy Non-Coal Mines and Tunnels approved by U.S. Bureau of Mines.

(8) Internal combustion engines shall not be idled in the intake air in excess of five minutes.

(9) Tunnels, without adequate natural ventilation, shall be provided with mechanically induced primary ventilation in all areas. The direction of mechanical airflow shall be reversible in tunnels over 400 feet in length.

(10) Ventilation doors, not operated mechanically, shall be designed and installed so that they are self-closing and will remain closed regardless of the direction of the air movement.

(11) When there has been a failure of the ventilating system to the extent that its efficiency is substantially impaired, and ventilation has been restored in a reasonable time, all places where flammable gas may have accumulated shall be examined by a competent person and determined to be free of flammable gas before power is restored and work resumed.

(12) When the main fan or fans have been shut down with all employees out of the adit, tunnel, shaft, or other underground areas, no employee other than those qualified or authorized to examine the adit, tunnel, shaft, or other underground areas, shall go underground until the fans have been started and all areas have been examined for gas and other hazards, and declared safe.

(13) Ventilation and exhaust systems for tunnel excavation shall be of sufficient capacity to maintain a supply of quality air at all points in the tunnel. The supply of fresh air shall not be less than 200 cubic feet per minute for each employee underground. The linear velocity of the air flow in the tunnel bore shall not be less than 30 feet per minute in those tunnels where blasting or rock drilling is conducted or where there are other conditions that are likely to produce dusts, fumes, vapors, or gases in harmful quantities.

(d) *Illumination*—(1) *General.* All tunnel and shaft headings, drilling, mucking, and scaling work areas underground shall have a minimum of 5 foot-candles of illumination. All other underground areas shall have a minimum of 2 foot-candles of illumination at zero elevation.

(2) *Emergency lighting.* Automatic emergency lighting shall be provided in the heading area. Each employee underground shall have a portable hand light or cap lamp, Bureau of Mines-approved, available for emergency use unless natural light or the emergency lighting system is adequate for escape.

(e) *Fire prevention and control.* (1) The applicable requirements for fire prevention and protection specified in Subpart F of this part shall be complied with in all tunnel and shaft operations.

(2) Smoking and open flames shall be prohibited, and signs warning against smoking and open flames shall be posted so that they can be readily seen, in areas or places where fire or explosion hazards exist.

(3) The carrying of matches or lighters for smoking shall be prohibited in all underground operations where fire or explosion hazards exist.

(4) Not more than a 1 day's supply of diesel fuel shall be stored underground.

(5) Gasoline or liquefied petroleum gases shall not be taken, stored, or used underground.

(6) Oil, grease, or fuel stored underground shall be kept in tightly sealed containers in fire-resistant areas, at safe distances from explosives magazines, electrical installations, and shaft stations.

(7) Approved fire-resistant hydraulic fluids shall be used in powered hydraulically actuated underground machinery and equipment unless such equipment is protected by multi-purpose fire extinguishers for classes A, B and C fires, or by a fire suppression system.

(8) Leakage of flammable fluids shall be corrected.

(9) Fires shall not be built underground.

(10) Noncombustible barriers shall be installed below welding or burning operations in or over a shaft or raise.

(11) Fire extinguishers or equivalent protection shall be provided at the head and tail pulleys of underground belt conveyors.

(12) If the underground operation is considered gassy, local gas checks shall be made prior to, and continuing during, any welding, cutting, and heating to be performed. If more than 10 percent of the LEL (lower explosive level) of a flammable gas or petroleum vapor is detected, all welding, cutting, and heating operations shall be suspended. A fire watch shall be maintained around the completed hot work or completed worksite until all possibility of fire is eliminated.

(13) Flammable materials or supplies shall not be stored within 100 feet of any tunnel or shaft opening. Where this is not practicable a fireproof barrier shall be placed between the stored material and the opening.

(14) Tunnel portal covers, shafts, change houses, and any buildings built for use within a tunnel or shaft, or within 100 feet of same, related to the job, shall be built of either noncombustible construction or of combustible construction having a fire resistance of not less than 1 hour.

(f) *Personal protective equipment.* Protective clothing or equipment shall be required to be used in accordance with Subparts D and E of this part.

(g) *Noise.* Noise exposures shall be controlled or limited in accordance with the requirements in Subpart D of this part.

(h) *Ground support.*—(1) *Tunnel portal area.* Portals shall be scaled, protected and supported where loose soil or rock or fractured material is encountered.

(2) *Tunnel area.* (i) A competent person shall examine and test the roof, face, and walls of the work area at the start of each shift and frequently thereafter. Examinations shall take place from the protection of supports where supports are used.

(ii) Loose ground shall be taken down or supported. Ground conditions along haulage ways and travelways shall be examined periodically and sealed or supported as necessary.

(iii) Torque wrenches shall be available at tunnels where rock bolts are used for ground support. Frequent tests shall be made to determine if bolts meet the required torque. The test frequency shall be determined by rock conditions and distance from vibration sources.

(iv) Damaged or dislodged tunnel supports, whether steel sets or timber, shall be repaired or replaced when structural integrity is impaired. New supports shall be installed whenever possible before removing the damaged supports.

(v) Employees shall not work ahead of support replacement operations unless alternate egress is provided.

(vi) All sets, including horseshoe-shaped or arched rib steel sets, shall be installed so that the bottoms will have required anchorage to prevent pressures from pushing them inward into the excavation. Lateral bracing shall be provided between sets to further stabilize the support.

(vii) Temporary roof supports shall be used where ground conditions require it in order to protect employees working ahead of tunnel sets.

(3) *Shafts.* (i) Small diameter shafts, which employees are required to enter, shall be provided with a steel casing, concrete pipe, timber, or other material of required strength to support the surrounding earth.

(ii) The casing and bracing shall be provided the full depth of the shaft, of at least 5 feet into solid rock, if possible, and shall extend at least 1 foot above ground level.

(iii) All wells or shafts over 5 feet in depth shall be retained with lagging, spiling, or casing.

(iv) In shafts, a competent person shall inspect the walls, ladders, timbers, blocking, and wedges of the last set to determine if they have loosened following blasting operations. Where found unsafe, corrections shall be made before shift operations are started.

(v) Safety belts shall be worn on skips and platforms used in shafts by crews working in the shaft when the skip or platform does not fill the opening to within 1 foot of the sides of the shaft, unless guardrails or cages are provided.

(i) *Drilling.* (1) Equipment that is to be used during a shift shall be inspected each shift by a competent person. Equipment defects affecting safety shall be corrected before the equipment is used.

(2) The drilling area shall be inspected for hazards before starting the drilling operation.

(3) Employees shall not be allowed on a drill mast while the drill bit is in operation.

(4) When a drill is being moved from one drilling area to another, drill steel, tools, and other equipment shall be secured, and the mast placed in a safe position.

(5) Receptacles or racks shall be provided for drill steel stored on jumbos.

(6) Before drilling cycle is started, warning shall be given to men working below jumbo decks.

(7) Drills on columns shall be anchored firmly before drilling is started and shall be retightened frequently thereafter.

(8) (i) The employer shall provide mechanical means for lifting drills, roof bolts, mine straps, and other unwieldy heavy material to the top decks of jumbos where the lift exceeds 10 feet.

(ii) The employer shall provide stair access to jumbo decks wide enough to accommodate two persons if the deck is over 10 feet in height.

(iii) On jumbo decks over 10 feet in height, guardrails which are removable (pipe in sockets with chain guards), or equivalent, shall be provided on all sides and back platforms where space and design permit.

(iv) When jumbos are being moved, riders shall not be allowed on the jumbo unless they are assisting the driver. All jumbos shall be chocked to prevent movement while employees are working thereon.

(v) Jumbos shall be kept clean to prevent the hazard of slipping. The decks shall be anti-slip type and they shall be secured to prevent displacement.

(9) Scaling bars shall be available at scaling operations and maintained in good condition at all times. Blunted and severely worn bars shall not be used.

(10) Before commencing the drill cycle, the face and lifters shall be examined for misfires (residual explosives) and, if found, they shall be removed or controlled. Lifters shall not be drilled through blasted rock (muck) or water. The handling of misfires shall be in accordance with § 1926.911.

(11) Air lines that are buried in the invert shall be identified by signs posted nearby, warning all personnel.

(j) *Blasting.* (1) All blasting and explosives-handling operations shall be conducted in compliance with Subpart U of this part.

(2) All blasting wires shall be kept clear of electrical lines, pipes, rails, and other conductive material except the earth.

(k) *Haulage.* (1) Equipment to be used shall be inspected by a competent person before each shift. Equipment defects affecting safety shall be corrected before the equipment is used.

(2) Powered mobile equipment shall be provided with suitable brakes.

(3) Powered mobile haulage equipment shall be provided with audible warning devices. Lights shall be provided at both ends.

(4) (i) Powered mobile haulage equipment shall be equipped with cab, canopy, or other protective device to protect the operator from shifting or falling materials.

(ii) Where glass is used in cabs, it shall be of safety glass, or equivalent, in good condition, and shall be kept clean.

(5) Adequate backstops or brakes shall be installed on inclined conveyor drive units to prevent conveyors from running in reverse and creating a hazard to employees.

(6) (i) No employee shall be permitted to ride a power-driven chain, belt, or bucket conveyor, unless the conveyor is specifically designed for the transportation of employees.

(ii) The employer shall not permit employees to ride in dippers, shovel buckets, forks, clamshells, or in the beds of dump trucks, or on haulage equipment not specifically designed for the transportation of employees.

(iii) Employees shall not be allowed to work from equipment that is not specifically designed or adapted for such use.

(7) Refuge stations shall be provided every 200 feet where a clearance of at least 2 feet from moving equipment cannot otherwise be provided for employees.

(8) (i) Electrically powered mobile equipment shall not be left unattended unless the master switch is in the off position, all operating controls are in the neutral position, and the brakes are set, or other equivalent precautions are taken against rolling.

(ii) If the rails serve as a return for a trolley circuit, both rails shall be bonded at every joint, and the rails shall be cross-bonded every 200 feet.

(9) When dumping cars by hand, the car dumps shall be provided with tiedown chains or bumper blocks to prevent cars from overturning.

(10) Rocker-bottom or bottom-dump cars shall be equipped with positive locking devices.

(11) Equipment which is to be hauled shall be so loaded and protected as to prevent sliding or spillage.

(12) In addition to couplings, safety chains, or the equivalent, shall be used to connect cars in a train.

(13) Parked railcars shall be blocked securely.

(14) Berms, bumper blocks, safety hooks, or similar means shall be provided to prevent overtravel and overturning at dumping locations.

(15) Where necessary to prevent employee injuries, bumper blocks, or the equivalent, shall be provided at all track dead ends.

(16) Supplies, materials, and tools, other than small handtools, shall not be transported with employees in mantrip cars or on top of locomotives.

(17) When personnel are being transported on man-cars, the man-cars shall be pulled, not pushed.

(l) *Electrical equipment.* (1) Electrical equipment shall conform to the requirements of Subpart K of this part.

(2) Powerlines shall be well separated or insulated from waterlines, telephone lines, and air lines.

(3) Lighting circuits shall be located so that movement of personnel and equipment will not damage the circuits or disrupt the service.

(4) In all areas exposed to dampness, light fixtures shall be non-metallic and weatherproof.

(5) Transformers containing flammable oil shall not be used underground unless they are located in a fire-resistant enclosure and surrounded by a dike to contain the contents of the transformers in event of a rupture.

(m) *Hoisting*—(1) *General requirements.* (i) All hoists used for shafts and tunnels shall be designed by a qualified engineer competent in this field and shall be constructed and rated in accordance with such design.

(ii) Each hoist assembly shall be load-tested to 100 percent of its rated capacity upon installation, after any repairs or alterations affecting its structural integrity or operation of safety devices, and every six months during use. A written record of each test shall be maintained for the duration of the project and shall be made available for inspection to authorized representatives of the Secretary.

(iii) Upon installation, and weekly thereafter, each hoist assembly shall be checked to assure proper operation and condition of all components. A trial run of the cage or skip shall be made prior to transport of personnel when it has been out of service for one complete shift or longer.

(iv) The employer shall designate a qualified person who shall visually inspect all machinery, equipment, anchorages, and hoisting rope at the beginning of each shift, and during use as necessary, to make sure it is in safe operating condition.

(v) Cranes shall be tested and inspected in accordance with Subpart N of this part.

(vi) All unsafe conditions revealed by tests, checks, or inspections shall be corrected before use of equipment.

(vii) Employees shall not be permitted to ride on the top of the cage or skip ex-

V 39 53 MAR 18 74 XUM

cept for inspection or maintenance purposes.

(viii) A fire extinguisher, at least 2–A: 10–B:C (multi-purpose, dry chemical), shall be mounted in each hoist house.

(ix) Before maintenance, repairs, or other work is commenced in the shaft served by a cage, skip, or bucket, the operator shall be informed accordingly and given suitable instructions. A sign shall be installed at the shaft collar stating that work is being done in the shaft.

(x) Personnel and materials other than small tools and supplies shall not be hoisted at the same time, except that the operator may remain in those cages or skips which are designed to be controlled by an operator within the cage. Materials and supplies hauled in cages or skips operated by operators within the cage or skip shall be secured or stacked in a manner to preclude shifting.

(xi) Every shaft shall be provided with two means of interchanging distinct and definite signals between the hoist operator and every working level within the shaft including the bottom.

(xii) Personnel at shaft bottoms shall have protection from the movement of equipment, tools, or materials overhead, or the shaft shall be vacated during the operations that may be hazardous to persons below. When personnel are working at the shaft bottom, no conveyance or equipment shall be lowered directly to the bottom. It shall be stopped at least 15 feet above the bottom of the shaft and remain there until the signal to lower is received from the bottom of the shaft.

(xiii) Where glass is used in hoist house windows, the glass shall be of safety glass or equivalent.

(xiv) In multiple-drum hoists, the controls shall be in a console arrangement.

(xv) Hoist equipment and the operator shall be protected from inclement weather by a roof or hoist house.

(xvi) Rope to be used for hoisting personnel shall be wire rope providing a factor of safety not less than 10 when new. Rope to be used for hoisting material shall have a factor of safety not less than 5 when new. The safety factor shall be calculated by dividing the breaking strength of the wire rope, as given in the manufacturer's rating tables, by the total load to be hoisted including the weight of the wire rope in the shaft when fully let out, plus a proper allowance for impact and acceleration.

(xvii) Wire rope used for hoisting shall be securely fastened at both drum and cage or skip ends and, when in use, shall not be fully unwound; at least two full turns shall remain on the conventional drum hoist so as to protect the end fastening at drum from overload.

(xviii) Wire rope shall not be used when any of the following conditions exist:

(*a*) Six randomly distributed broken wires in one rope lay, 3 broken wires in one strand in one lay, or one valley break (a valley break is a wire break occurring between 2 adjacent strands); or

(*b*) Abrasion, scrubbing, flattening, peening, or any severe change causing loss of more than one-third of the original diameter of the outside wires in any given area; or

(*c*) Evidence of any heat damage, or any damage caused by contact with electrical wires, or marked corrosion of the rope; or

(*d*) Reduction from nominal diameter of more than $\frac{3}{64}$-inch for diameters up to and including $\frac{3}{4}$-inch; $\frac{1}{16}$-inch for diameters $\frac{7}{8}$ to $1\frac{1}{8}$ inches; and $\frac{3}{32}$-inch for diameters $1\frac{1}{4}$ to $1\frac{1}{2}$ inches.

(xix) Except for eye splices in the ends of wire rope slings and for endless rope slings used for hauling material, each wire rope used in hoisting, lowering, or in pulling loads, shall consist of one continuous piece without knot or splice.

(xx) The connection between the hoisting rope and the cage or skip shall be a non-spinning type.

(xxi) All manhoists shall be equipped with landing level indicators at the operator's station.

(xxii) Cranes used to hoist employees shall be designed so that the load hoist drums are powered in both directions of rotation and the brakes are automatically applied upon power release or failure. Drum-operating levers shall be of a type that will automatically return to the "stop" position when the operator's hand is removed, or a deadman switch and emergency button shall be used. Lowering against brake or friction with drums in free-wheeling shall not be allowed when working in shafts except during clamshell operations.

(2) *Manhoisting—sinking shafts 50 feet or less in depth.* (i) The cages or skips shall have all sides enclosed by $\frac{1}{2}$-inch wire mesh, not less than No. 14 U.S. gauge, or equivalent, to a height of at least 42 inches, with a positive locking door that does not open outwardly, and shall have a protective canopy.

(ii) The hoist or crane shall be of such design that the cage or skip is powered up and powered down and so arranged that the load stops if the motor stops. No system of lowering against the brake or friction with the drum in free-wheeling shall be allowed.

(iii) The drum-operating lever shall be of a type that returns automatically to the "stop" position when the operator's hand is removed unless, as a substitute, the throttle that controls the drum speed automatically stops the drum and slows the engine to idling speed when the throttle is released, or a deadman switch and emergency button shall be used.

(iv) The travel speed of the cage or skip shall not exceed 200 feet per minute.

(3) *Manhoisting—sinking shafts over 50 feet in depth.* (i) The cages or skips shall have all sides enclosed by $\frac{1}{2}$ inch wire mesh, not less than Number 14 U.S. gauge, or equivalent, to a height of at least 42 inches, with a positive locking door that will not open outwardly, and shall have a protective canopy.

(ii) The protective canopy shall cover the top in such a manner as to protect those inside from objects falling in the shaft. It shall be steel plate, at least 3/16-inch in thickness, or material of equivalent strength, sloped to outside, and so arranged that a section may be readily pushed upward to afford emergency egress.

(iii) The hoist or crane shall be of such design that the cage or skip is powered up and powered down and so arranged that the load stops if the motor stops. No system of lowering against the brake or friction, with the drum in free-wheeling, shall be allowed.

(iv) The drum-operating lever shall be a type that returns automatically to the "stop" position when the operator's hand is removed unless, as a substitute, the throttle that controls the drum speed automatically stops the drum and slows the engine to idling speed when the throttle is released, or a deadman switch and emergency button shall be used.

(v) The travel speed of the cage or skip shall not exceed 200 feet per minute, unless controlled as outlined in paragraph (b) (4) of this section.

(vi) Shafts shall be equipped with guide rails or guide cables of such design that the cage or skip upon which men ride shall be prevented from undue sway.

(vii) Cages or skips operating on guides or guide cables shall be equipped with bridles and broken-rope safety latches, dogs, or equivalent, that will stop and hold 150 percent of capacity load in the event the hoisting cable parts.

(4) *Manhoisting—during underground operations.* (i) Manhoists used during tunnel or other underground construction shall be equipped with guides.

(ii) In manhoists, the control shall be such that it will return to the "stop" position when the hand of the operator is removed from the control lever, or a deadman switch and emergency button shall be used. The brakes shall be automatically applied.

(iii) The manhoists shall be equipped with at least two brakes, each capable of stopping and holding 150 percent of their rated capacity.

(iv) Manhoists shall be designed so that the load is powered up and powered down.

(v) Manhoists shall be equipped with limit switches to prevent overtravel at the top and bottom of the shaft.

(vi) Manhoists running in excess of 200 feet per minute shall be equipped with slow-down devices for each landing approach.

(vii) Manhoists shall be equipped with bridles and broken-rope safety latches, dogs, or equivalent, that will stop and hold 150 percent of capacity load.

(viii) Manhoists shall be equipped with overspeed governors as follows:

(*a*) The overspeed governor shall be located where it cannot be struck by the cage or the counterweight and where there is adequate space for full movement of governor parts. Overspeed governors for cage safeties shall be set to trip at overspeeds as follows:

(*1*) At not less than 115 percent of rated speed; and

(2) At not more than the tripping speed listed opposite the applicable rated speed given in Table S–1. Maximum tripping speeds for intermediate rated speeds shall be determined from Table S–1.

TABLE S–1.—*Shafts Less Than 1,000 Feet In Depth*

[Maximum speeds in feet per minute at which speed governor trips and governor overspeed switch operates]

Rated speed	Maximum governor trip speed	Maximum speed at which governor overspeed switch operates, down
0–125	175	[1] 175
150	210	[1] 210
175	250	225
200	280	252
225	308	277
250	337	303
300	395	355
350	452	407
400	510	459
450	568	512
500	625	563
600	740	703

[1] Governor overspeed switch not required on car speed governors.

NOTE: Speeds up to 1700 feet per minute will be allowed for deeper shafts provided acceleration, deceleration, and all cage and hoist components are properly engineered for the rated speed.

(b) Counterweights, where provided, shall have overspeed governors set to trip at an overspeed greater than, but not more than 10 percent above that at which the car speed governor is set to trip.

(c) Overspeed governors shall have their means of speed adjustment sealed. Seals shall be of a type which will prevent readjustment of the governor speed without breaking the seal.

(ix) Each cage shall be equipped with a device which will prevent its movement when the door is open.

(x) Cages shall be provided with sides, gates, and protective canopy. Sides and gates shall be made of iron or steel, $\frac{1}{2}$-inch wire mesh not less than No. 14 U.S. gauge, or equivalent materials. Sides shall be not less than 6 feet in height. Gates shall not open outwardly and shall be hung on hinges or work in slides. The protective canopy shall protect those inside from objects falling in the shaft. It shall be of steel plate, at least $\frac{3}{16}$-inch in thickness, or material of equivalent strength, sloped to the outside, and so arranged that a section may be readily pushed upward to afford emergency egress.

(5) *Material hoisting.* (i) While sinking shafts over 50 feet in depth, the material cage, skip, or bucket shall be guided to prevent undue sway.

(ii) In all completed shafts, material hoists shall be equipped with guides.

(iii) Cages, skips, or buckets, operating on guide rails or guide cables, shall be equipped with bridles and broken-rope safety latches, dogs, or equivalent, that will stop and hold 150 percent of capacity load. If double-drum clam buckets are used, only shaft guides will be required.

(iv) All material hoists except cranes shall be equipped with landing level indicators at the operator's station. The marking of wire rope for this purpose is prohibited.

(v) Material being raised or lowered shall be secured to prevent material from snagging and falling into the shaft.

(vi) Employees shall not be permitted to ride material cages, skips, or buckets in shafts of any depth except for inspection and maintenance.

(Sec. 6, Pub. L. 91–596, 84 Stat. 1593 (29 U.S.C. 655); sec. 107, Pub. L. 91–54, 83 Stat. 96 (40 U.S.C. 333); Secretary of Labor's Order No. 12–71, 36 FR 8754).

Signed at Washington, D.C., this 11th day of March 1974.

JOHN STENDER,
Assistant Secretary of Labor.

United States Government Manual

1973/74 Edition

"Bureaucrat's Bible" or "Guerrilla Handbook"?

The Manual has been called the "bureaucrat's bible." It has also been called a "guerrilla warfare handbook for citizens tired of jousting with windmills."

As the United States Government Organization Manual, it has been a familiar aid to businessmen, researchers, lawyers, and students seeking current information about the Federal Government. This year, the title has been changed to reflect a broader emphasis on consumer-interest programs, although the agency organization charts are still included.

A fresh, modern format highlights a "Sources of Information" section for most agencies, with addresses and telephone numbers for obtaining information on:

- Employment
- Government contracts
- Environmental programs
- Small business opportunities
- Federal publications
- Speakers and films available to civic and educational groups

REMINDERS

NOTE: There were no items published after October 1, 1972, that are eligible for inclusion in the list of RULES GOING INTO EFFECT TODAY.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $45 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

HIGHLIGHTS—Continued

REAL ESTATE LIMITED PARTNERSHIPS—SEC proposals on filing of reports and registration statements; comments by 4–15–74 10278

GLASS BOTTLES—CPSC hearing on pressurized container safety, 4–17 and 4–18–74 10319

MOTOR CARRIERS, BROKERS, AND FREIGHT FORWARDERS—ICC rules on liability; effective 7–1–74 10254

HOUSING ASSISTANCE PAYMENTS PROGRAM—HUD proposal on State agency participation; comments by 4–19–74 10262

PUBLIC COAST RADIOTELEGRAPH STATIONS—FCC inquiry into operations; comments by 4–15–74 10284

COMMUNITY ACTION PROGRAM—OEO rules on payment for voluntary services; effective 4–18–74 10253

MARINE SANCTUARIES—Commerce Department proposal on program guidelines; comments by 5–1–74 10255

LOCOMOTIVES—DoT extends comment period on safety proposals; comments by 4–30–74 10267

MEETINGS—

List of CFR Parts Affected

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, appears following the Notices section of each issue beginning with the second issue of the month. In the last issue of the month the cumulative list will appear at the end of the issue.

A cumulative guide is published separately at the end of each month. The guide lists the parts and sections affected by documents published since January 1, 1974, and specifies how they are affected.

Title 3—The President

MEMORANDUM OF MARCH 1, 1974

Memorandum for the Secretary of State, the Secretary of Defense

THE WHITE HOUSE,
Washington, March 1, 1974.

You are hereby designated and empowered to exercise the following functions vested in the President by Public Law 93–199, the Emergency Security Assistance Act of 1973, without the approval, ratification, or other action of the President. Functions not expressly delegated herein are reserved to the President.

1. Functions delegated to the Secretary of State:

   (a) the function of reporting to the Congress any determinations made by the President under Section 2 of the Act;
   (b) the function conferred in Section 6 of the Act.

2. Functions delegated to the Secretary of Defense:

   the function of providing military assistance or foreign military sales credits as determined by the President.

Pursuant to the authority contained in Public Law 93–240, the Foreign Assistance and Related Programs Appropriation Act, 1974, I hereby allocate from the appropriation for "Emergency Security Assistance for Israel" to the Secretary of Defense, $2,200,000,000.00. This allocation is subject to the limitations imposed by the provisos in the provision appropriating these funds and subject to apportionment of the necessary funds by the Office of Management and Budget. I direct the Secretary of Defense to allocate to the Secretary of State such sums from the $2,200,000,000.00 as may be necessary from time to time for payment by the United States of its share of the expenses of the United Nations Emergency Force in the Middle East, as apportioned by the United Nations in accordance with article 17 of the United Nations Charter as authorized in Section 6 of Public Law 93–199, the Emergency Security Assistance Act of 1973.

This memorandum shall be published in the FEDERAL REGISTER.

[FR Doc.74–6402 Filed 3–18–74;8:45 am]

V 39 54 MAR 19 74 XUM

Rules and Regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 213—EXCEPTED SERVICE

Miscellaneous Revocations

Subpart C of Part 213 is amended to show that under the provisions of § 213.3101b, 26 positions are no longer excepted under Schedule C.

Title 6—Economic Stabilization

Chapter I—Cost of Living Council

PART 150—COST OF LIVING COUNCIL PHASE IV PRICE REGULATIONS

PART 152—COST OF LIVING COUNCIL PHASE IV PAY REGULATIONS

Exemption of Printing, Publishing, Broadcasting, and Related Services

The purpose of these amendments is to add an exemption under the Phase IV price regulations applicable to the prices charged by firms in the communications industry and the publishing and printing industries and by firms engaged in providing related services. A related exemption is being added under the Phase IV pay regulations. The pay exemption does not extend to employees of newspaper establishments.

In accordance with the Council's objective to remove controls selectively where conditions permit, the Council has decided to exempt the prices charged for products and services by firms in the communications industry, publishing and printing industry, and related service activities. The price exemption extends to prices charged by firms for activities listed in the Standard Industrial Classification Manual, 1972 Edition, under Major Group No. 27, Group Nos. 483, 489, 731, 733 and 735, Industry No. 7395, and public relations services listed under Industry No. 7392. The affected industries include printing and publishing and allied industries; radio and television broadcasting; communication services; advertising; mailing, reproduction, commercial art and photography, and stenographic services; news syndicates; public relations services; and photofinishing laboratories.

As a group, these industries are not highly concentrated, being composed of many small, highly competitive firms. Advertising is a principal source of revenue for most of these firms, with 1974 revenues projected at $28.3 billion. Of that amount, newspapers will account for about 40%, television 26%, direct mail 18%, and magazines and radio 8% each.

Price increases during the period of controls have been relatively moderate.

V 39 I 54 MAR 19 74 XUM

and the Council expects this pattern of moderate price increases to continue after decontrol.

Of the individual industries affected, only television broadcasting is characterized by a high degree of concentration, as it is dominated by the three major networks. Except for these networks, radio and television broadcasting firms are generally small establishments serving local and regional communities. Revenues for the industry are derived from advertising and are related to audience size and program popularity. The television and radio broadcasting industry is highly competitive with newspapers, magazines and other printed media. Advertising rates are currently very flexible and no wide variations in charges are likely to occur following decontrol.

The printing industry, including publishing, commercial printing, and related activities, is composed of a large number of firms. Its products (newspapers, magazines, books and greeting cards) and its services are generally discretionary items so that the impact of this industry on the economy is not large. Newspaper and magazine prices are generally set in relation to advertising revenues and do not always directly follow changes in cost. Many activities of this industry are dominated by small firms, most of which have not been subject to the Phase IV program because of their small size. These activities include bookbinding, printing trade services, and commercial printing. This exemption will put all firms in the industry on an equal footing.

The advertising and public relations industries are included in this exemption because of their importance to the advertising revenues of the communications and publishing and printing industries. Firms in these industries produce specialty services which are not greatly affected by price controls, as they are generally produced to customer specifications and needs. These services are performed for producers of discretionary products and services; therefore, prices in these industries have little direct effect on the economy as a whole.

Because this exemption covers the broadcasting industry, the special regulation for broadcasting (§ 150.206) is no longer necessary. Section 150.206 is deleted under these amendments.

Under §§ 150.11(e) and 150.161(b), a firm remains subject to the profit margin constraints and reporting provisions of the Phase IV program unless in its most recent fiscal year it derived both less than $50 million in annual sales or revenues from the sale or lease of nonexempt items and 90 percent or more of its sales and revenues from the sale of exempt items or exempt sales.

As a complementary action, the Council has also exempted pay adjustments affecting employees engaged on a regular and continuing basis in the operation of an establishment in most of the industries affected by the price exemption described above. However, because a number of important collective bargaining agreements are scheduled to be negotiated after the date of this regulation, a pay exemption has not been provided for employees working at newspaper establishments.

"Establishment in the printing, publishing, and publishing related industry" is defined in § 152.40x(b) as an establishment classified in the Standard Industrial Classification Manual, 1972 edition, under Major Group 27, except that establishments in Industry Number 2711 (Newspapers: Publishing; Publishing and Printing) are not within the scope of the exemption. "Establishment in the communications industry" is defined in § 152.40y(b) as an establishment under Group Number 483 (Radio and Television Broadcasting) or Group Number 489 (Communications Services Not Elsewhere Classified). "Establishment primarily engaged in providing certain business services" is defined in § 152.40z(b) as an establishment under Group Number 731 (Advertising); 733 (Mailing, Reproduction, Commercial Art and Photography, and Stenographic Services); 735 (News Syndicates); or Industry Number 7395 (Photofinishing Laboratories); the primary activity of which is providing a service described under such classifications. The business services pay exemption also applies to an establishment the primary activity of which is providing public relations services under Industry Number 7392.

The foregoing pay exemptions are not applicable to an employee who would otherwise be exempt, but receives an item of incentive compensation, or is a member of an executive control group. The exemptions are also inapplicable to any such employee whose duties and responsibilities are not of a type exclusively performed in or related to the particular industry exempted and whose pay adjustments are historically related to the pay adjustments of employees performing such duties outside such particular industry exempted and are not related to the pay adjustments of other employees that are within the particular industry exempted. The exemptions are further inapplicable to employees who are part of an appropriate employee unit where 25% or more of the members of such unit are not engaged on a regular and continuing basis in the operation of an establishment in the particular industry exempted or in support thereof. Because of an unsettled labor situation, the printing, publishing, and publishing related industry exemption is inapplicable to any appropriate employee unit subject to (a) a Decision and Order of the Council; (b) a Notice of Challenge issued by the Council pursuant to § 152.53 prior to [date of issuance of this regulation]; or (c) a prenotification requirement imposed by the Council pursuant to § 152.24 prior to [date of issuance of this regulation]. (However, the Council may by order withdraw any such limitations).

In cases of uncertainty of application, inquiries concerning the scope or coverage of any one of these pay exemptions should be addressed to the Administrator, Office of Wage Stabilization, P.O. Box 672, Washington, D.C. 20044.

As with all exemptions from Phase IV controls, firms subject to this amendment remain subject to review for compliance with appropriate regulations in effect prior to this exemption. A firm affected by this amendment will be held responsible for its pre-exemption compliance under all phases of the Economic Stabilization Program. A firm affected by this exemption alleged to be in violation of stabilization rules in effect prior to this exemption is subject to the same compliance actions as a non-exempt firm. These compliance actions include investigations, issuance of notices of probable violation, issuance of remedial orders requiring rollbacks or refunds and possible penalty of $2,500 for each stabilization violation.

The Council retains the authority to reestablish price and wage controls over the industry exempted by these amendments if price or wage behavior is inconsistent with the policies of the Economic Stabilization Program. The Council also has the power, under §§ 150.162 and 152.6, to require firms to file special or separate reports setting forth information relating to the Economic Stabilization Program in addition to any other reports which may be required under the Phase IV controls program.

Because the purpose of these amendments is to grant an immediate exemption from the Phase IV price and pay regulations, the Council finds that publication in accordance with normal rule making procedure is impractical and that good cause exists for making these amendments effective in less than 30 days. Interested persons may submit written comments regarding these amendments. Communications should be addressed to the Office of the General Counsel, Cost of Living Council, 2000 M Street NW., Washington, D.C. 20508.

(Economic Stabilization Act of 1970, as amended, Pub. L. 92-210, 85 Stat. 743; Pub. L. 93-28, 87 Stat. 27; E.O. 11695, 38 FR 19345; Cost of Living Council Order No. 14, 38 FR 1489.)

In consideration of the foregoing, Parts 150 and 152 of Title 6 of the Code of Federal Regulations are amended as set forth herein, effective March 15, 1974.

Issued in Washington, D.C., on March 15, 1974.

JAMES W. MCLANE,
Deputy Director,
Cost of Living Council.

1. In 6 CFR Part 150, § 150.54 is amended to add a new paragraph (ww) to read as follows:

§ 150.54 Certain price adjustments.

* * * * *

(ww) *Communications, Publishing, Printing and Related Services.* The prices which manufacturers of the following products and providers of the following services charge for those products and services are exempt: Products and services listed in the SIC Manual, 1972 edition, under Major Group No. 27; Group Nos. 483, 489, 731, 733, and 735; Industry No. 7395, and public relations services listed in Industry No. 7392.

§ 150.206 [Deleted]

2. In 6 CFR Part 150, § 150.206 is deleted.

3. In 6 CFR Part 152, Subpart D is amended by adding thereto new §§ 152.40x, 152.40y, and 152.40z to read as follows:

§ 152.40x Printing, publishing, and publishing related industry.

(a) *Exemption.* Pay adjustments affecting employees engaged on a regular and continuing basis in the operation of an establishment in the printing, publishing, and publishing related industry or in support of such operation are exempt from and not limited by the provisions of this title.

(b) *Establishment in the printing, publishing, and publishing related industry.* For purposes of this section, "Establishment in the printing, publishing, and publishing related industry" means an establishment classified in the Standard Industrial Classification Manual, 1972 edition, under Major Group 27 (Printing, Publishing, and Allied Industries) (but not including establishments classified under Industry Number 2711 (Newspapers: Publishing, Publishing and Printing)), and primarily engaged in activities traditionally associated with establishments classified under Major Group 27.

(c) *Covered employees.* For purposes of this section, an employee is considered to be engaged on a regular and continuing basis in the operation of an establishment in the printing, publishing, and publishing related industry or in support of such operation only if such employee is employed at an establishment in the printing, publishing, and publishing related industry and only if such employee is employed by the firm which operates such establishment.

(d) *Limitation.* The exemption provided in paragraph (a) of this section shall not be applicable to—

(1) Pay adjustments with respect to an appropriate employee unit which is subject to—

(i) A Decision and Order of the Council for the period covered by such Decision and Order;

(ii) A Notice of Challenge issued by the Council pursuant to § 152.53 prior to March 15, 1974; or

(iii) A prenotification requirement imposed by the Council pursuant to § 152.24 prior to March 15, 1974; although the Council may by order withdraw any of the limitations set forth in this subparagraph.

(2) An employee who receives an item of incentive compensation subject to the provisions of § 152.124, 152.125, or 152.126.

(3) An employee who is a member of an executive control group (determined pursuant to § 152.130).

(4) Employees whose occupational duties and responsibilities are of a type not exclusively performed in or related to the printing, publishing, and publishing related industry and whose pay adjustments are—

(i) Historically related to the pay adjustments of employees performing such duties outside the printing, publishing and publishing related industry; and

(ii) Not related to pay adjustments of another unit of employees engaged on a regular and continuing basis in the operation of an establishment in the communications industry or in support of such operation within the meaning of paragraph (c) of this section.

(5) Employees who are members of an appropriate employee unit if 25% or more of the employees who are members of such unit are not engaged on a regular and continuing basis in the operation of an establishment in the printing, publishing, and publishing related industry or in support of such operation.

(e) *Effective date.* The exemption provided in this section shall be applicable to pay adjustments with respect to work performed on and after March 15, 1974.

§ 152.40y Communications industry.

(a) *Exemption.* Pay adjustments affecting employees engaged on a regular and continuing basis in the operation of an establishment in the communications industry or in support of such operation are exempt from and not limited by the provisions of this title.

(b) *Establishment in the communications industry.* For purposes of this section, "Establishment in the communications industry" means an establishment classified in the Standard Industrial Classification Manual, 1972 edition, under Group Number 483 (Radio and Television Broadcasting) or Group Number 489 (Communication Services Not Elsewhere Classified) and primarily engaged in providing any of the communication services listed under such classifications.

(c) *Covered employees.* For purposes of this section an employee is considered to be engaged on a regular and continuing basis in the operation of an establishment in the communications industry or in support of such operation only if such employee is employed at an establishment in the communications industry and only if such employee is employed by the firm which operates such establishment.

(d) *Limitation.* The exemption provided in paragraph (a) of this section shall not be applicable to—

(1) An employee who receives an item of incentive compensation subject to the provisions of § 152.124, 152.125, or 152.126.

(2) An employee who is a member of an executive control group (determined pursuant to § 152.130).

(3) Employees whose occupational duties and responsibilities are of a type not exclusively performed in or related to the communications industry and whose pay adjustments are—

(i) Historically related to the pay adjustments of employees performing such duties outside the communications industry; and

(ii) Not related to pay adjustments of another unit of employees engaged on a regular and continuing basis in the operation of an establishment in the communications industry or in support of such operation within the meaning of paragraph (c) of this section.

(4) Employees who are members of an appropriate employee unit if 25% or more of the employees who are members of such unit are not engaged on a regular and continuing basis in the operation of an establishment in the communications industry or in support of such operation.

(e) *Effective date.* The exemption provided in this section shall be applicable to pay adjustments with respect to work performed on and after March 15, 1974.

§ 152.40z Certain business services.

(a) *Exemption.* Pay adjustments affecting employees engaged on a regular and continuing basis in the operation of an establishment which is primarily engaged in providing certain business services referred to in paragraph (b) of this section or in support of such operation are exempt from and not limited by the provisions of this title.

(b) *Exempted business services.* For purposes of this section, "Establishment primarily engaged in providing certain business services" means an establishment classified in the Standard Industrial Classification Manual, 1972 edition, under Group Number 731 (Advertising); 733 (Mailing, Reproduction Commercial Art and Photography, and Stenographic Services); 735 (News Syndicates); or Industry Number 7395 (Photofinishing Laboratories); the primary activity of which is providing a service listed under such classifications. Such term also means an establishment the primary activity of which is providing public relations services under Industry Number 7392.

(c) *Covered employees.* For purposes of this section, an employee is considered to be engaged on a regular and continuing basis in the operation of an establishment that provides the business services referred to in paragraph (b) of this section of in support of such operation only if such employee is employed at an establishment referred to in paragraph (b) of this section and only if such employee is employed by the firm which operates such establishment.

(d) *Limitation.* The exemption provided in paragraph (a) of this section shall not be applicable to—

(1) An employee who receives an item of incentive compensation subject to the provisions of § 152.124, 152.125, or 152.126.

(2) An employee who is a member of an executive control group (determined pursuant to § 152.130).

(3) Employees whose occupational duties and responsibilities are of a type not exclusively performed in or related to the business services referred to in paragraph (b) of this section and whose pay adjustments are—

V 39 54 MAR 19 74 XUM

(i) Historically related to the pay adjustments of employees performing such duties outside the industry within which such establishment is classified; and

(ii) Not related to pay adjustments of another unit of employees engaged on a regular and continuing basis in the operation of an establishment in such industry or in support of such operation within the meaning of paragraph (c) of this section.

(4) Employees who are members of an appropriate employee unit if 25 percent or more of the employees who are members of such unit are not engaged on a regular and continuing basis in the operation of an establishment which is primarily engaged in providing the business services referred to in paragraph (b) of this section or in support of such operation.

(e) *Effective date.* The exemption provided in this section shall be applicable to pay adjustments with respect to work performed on and after March 15, 1974.

Title 9—Animals and Animal Products

CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER C—INTERSTATE TRANSPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS; EXTRAORDINARY EMERGENCY REGULATION OF INTRASTATE ACTIVITIES

PART 73—SCABIES IN CATTLE

Areas Quarantined

This amendment quarantines portions of Cimarron County in Oklahoma because of the existence of cattle scabies. The restrictions pertaining to the interstate movement of cattle from quarantined areas as contained in 9 CFR Part 73, as amended, will apply to the area quarantined.

Accordingly, Part 73, Title 9, Code of Federal Regulations, as amended, restricting the interstate movement of cattle because of scabies is hereby amended as follows:

In § 73.1a, a new paragraph (d) relating to the State of Oklahoma is added to read:

§ 73.1a Notice of quarantine.

* * * * *

(d) Notice is hereby given that cattle in certain portions of the State of Oklahoma are affected with scabies, a contagious, infectious, and communicable disease; and therefore, the following areas in such State are hereby quarantined because of said disease:

(1) That portion of Cimarron County comprised of section 14, T. 4 N., R. 6 E.

(2) That portion of Cimarron County comprised of section 11, T. 3 N., R. 7 E.

(Sec. 4-7, 23 Stat. 32 as amended; secs. 1 and 2, 32 Stat. 791-792, as amended; secs. 1-4, 33 Stat. 1264, 1265, as amended; secs. 3 and 11, 76 Stat. 130, 132 (21 U.S.C. 111-113, 115, 117, 120, 121, 123-126, 134b, 134f); 37 FR 28464, 28477; 38 FR 19141.)

Effective date. The foregoing amendment shall become effective on March 14, 1974.

The amendment imposes certain further restrictions necessary to prevent the interstate spread of cattle scabies and must be made effective immediately to accomplish its purpose in the public interest. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to the amendment are impracticable and contrary to the public interest, and good cause is found for making it effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 14th day of March 1974.

J. M. HEJL,
Acting Deputy Administrator, Veterinary Services, Animal and Plant Health Inspection Service.

[FR Doc.74-6310 Filed 3-18-74;8:45 am]

Title 10—Energy

CHAPTER II—FEDERAL ENERGY OFFICE

PART 211—MANDATORY PETROLEUM ALLOCATION REGULATIONS

Monthly Reports by Refiners and Importers

Subpart L of the Mandatory Petroleum Allocation Regulations, concerning reports and recordkeeping, is revised to require that prime suppliers file their monthly reports with the Federal Energy Office at least ten (10) days prior to the commencement of the month to which the report related. This revision is made to assure that the Federal Energy Office will have sufficient time to complete the calculations necessary to establish the volumes of the several State set-asides described in Part 211. Therefore, the prime suppler's monthly report for the month of April is due in Box 2980, Washington, D.C. 20013, or in Room 512, Winder Building, 17th and F Streets NW., Washington, D.C., before the close of business March 21, 1974. The report itself is simplified, in that it is to be aggregated to the refiner, not the refinery, level.

Because the purpose of this revision is to provide immediate guidance and information with respect to the mandatory petroleum allocation and price regulations, the Federal Energy Office finds that normal rule-making procedure is impracticable and that good cause exists for making these amendments effective in less than 30 days.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, E.O. 11748, 38 FR 33575; Economic Stabilization Act of 1970, as amended, Pub. L. 92-210, 85 Stat. 743; Pub. L. 93-28, 87 Stat. 27; E.O. 11730, 38 FR 19345; Cost of Living Council Order 47, 39 FR 24)

In consideration of the foregoing, Part 211 of Chapter II, Title 10 of the Code of Federal Regulations is revised as set forth below, effective immediately.

Issued in Washington, D.C., March 18, 1974.

WILLIAM N. WALKER,
General Counsel, Federal Energy Office.

Section 211.222 is revised in paragraph (b) to read as follows:

§ 211.22 Monthly report by refiners and importers.

* * * * *

(b) Beginning with the month of March 1974 and thereafter, prime suppliers shall report monthly to the National FEO, appropriate Regional FEO, and appropriate State offices items (4) through (10) of § 211.222(a) by refiner, not by refinery. This report will be the basis of the State set-aside program. Notwithstanding the provisions of § 205.4 concerning constructive receipt of documents submitted by registered or certified mail, the prime supplier's monthly report must be delivered to the National FEO in Washington, D.C., on or before the tenth day prior to the commencement of the month described as "the following month" in § 211.222(a)(5).

[FR Doc.74-6501 Filed 3-18-74;10:57 am]

Title 12—Banks and Banking

CHAPTER II—FEDERAL RESERVE SYSTEM

SUBCHAPTER A—BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

PART 225—BANK HOLDING COMPANIES

PART 265—RULES REGARDING DELEGATION OF AUTHORITY

Bank Acquisitions by Holding Companies

The purpose of this amendment is to grant to the Federal Reserve Banks authority to approve under delegated authority the *retention* of bank stock acquired in a fiduciary capacity where a bank holding company undertakes unconditionally to dispose of such shares or the sole discretionary authority to vote such shares within a two-year period. This delegation provides that such applications shall be deemed to be approved 45 days after the application has been accepted by the Reserve Bank. To accompish this delegation, § 265.2(f)(29) is added and § 225.3 of Regulation Y is amended as set forth below.

1. Section 265.2(f)(29) is added to read as follows:

§ 265.2 Specific functions delegated to Board employees and Federal Reserve Banks.

* * * * *

(f) *Each Federal Reserve Bank* is authorized, as to member banks or other indicated organizations headquartered in its district, or under paragraph (f)(25) of this section as to its officers:

* * * * *

(29) Under the provisions of section 3(a) of the Bank Holding Company Act (12 U.S.C. 1842), to approve by a letter of notification without compliance with § 262.3(h) of the Board's Rules of Procedures, the retention of shares of bank stock acquired in a fiduciary capacity (with sole voting rights) for a two-year period from the date of such acquisition, provided that the Applicant undertakes unconditionally to dispose of such shares or its sole discretionary voting rights with respect to such shares within two years from the date of such acquisition.

2. Section 225.3 of Regulation Y (concerning acquisition of bank shares) is amended by adding § 225.3(c) to read as follows:

§ 225.3 Acquisition or retention of bank shares or assets.

* * * * *

(c) *Applications to retain shares acquired in a fiduciary capacity.* Applications under this subsection are processed on the basis of a letter of notification without compliance with section 262.3(h) of the Board's Rules of Procedure. Any application for the Board's approval to retain shares of bank stock acquired in a fiduciary capacity (with sole voting rights), which is accompanied by an unconditional undertaking by the Applicant to dispose of such shares or its sole discretionary voting rights with respect to such shares within two years from the date of such acquisition, shall be deemed to be approved 45 days after the Applicant has been informed by the Reserve Bank that said application has been accepted, unless the Applicant is notified to the contrary within that time or is granted approval at an earlier date.

* * * * *

3. The provisions of section 553 of title 5, United States Code, relating to notice and public participation and to deferred effective dates, are not followed in connection with the adoption of § 225.3(c), because the rule involved therein is procedural in nature and accordingly does not constitute a substantive rule subject to the requirements of such section.

Effective date. This amendment is effective with respect to applications received by the Reserve banks on and after March 19, 1974 and also to applications pending before the Board.

By order of the Board of Governors, March 14, 1974.

[SEAL] THEODORE E. ALLISON,
Assistant Secretary of the Board.

[FR Doc.74-6335 Filed 3-18-74;8:45 am]

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

SUBCHAPTER A—PROCEDURES AND RULES OF PRACTICE

[Docket No. C-2059]

PART 13—PROHIBITED TRADE PRACTICES

Procter & Gamble Co.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45) [Modifying order, The Procter & Gamble Company, Cincinnati, Ohio, Docket C-2059, February 26, 1974.]

In the matter of The Procter & Gamble Company, a corporation. Order reopening proceeding and modifying cease and desist order, 36 F.R. 22149, 79 F.T.C. 589, by deleting two (2) paragraphs of the order which require respondent to disclose the approximate numerical odds of winning each prize awarded in its promotional "sweepstakes" contests or the approximate number of recipients to whom the offer is directed where odds are not reasonably capable of calculation.

The modifying order is as follows:

The Commission, on January 22, 1974, having issued an order against respondent to show cause why the proceedings herein should not be reopened for the purpose of modifying the consent order to cease and desist entered on October 8, 1971; and

Respondent having answered that it has no objection to the reopening of the proceedings and the modification of the consent order, as set forth in the order to show cause.

Accordingly, *It is ordered*, That the matter be reopened, and that the order herein be modified in the following manner: strike section A(2); renumber sections A(3), A(4), A(5), and A(6) as, respectively, A(2), A(3), A(4), and A(5); strike section B(3); renumber sections B(4) and B(5) as, respectively, B(3) and B(4).

By the Commission.

Issued: February 26, 1974.

CHARLES A. TOBIN,
Secretary.

Title 17—Commodity and Securities Exchanges

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Release Nos. 33-5466, 34-10673, 35-18315, 40-8265]

PART 231—INTERPRETIVE RELEASE RELATING TO THE SECURITIES ACT OF 1933 AND GENERAL RULES AND REGULATIONS THEREUNDER

PART 241—INTERPRETIVE RELEASE RELATING TO THE SECURITIES EXCHANGE ACT OF 1934 AND GENERAL RULES AND REGULATIONS THEREUNDER

Corporation Finance Division; Views on Disclosure of Illegal Campaign Contributions

The Commission has noted that it has received a number of inquiries from issuers, stockholders, and other persons relating to whether disclosure should be made where the issuer and/or its officers or directors have been charged in an information or indictment with, or convicted of, making illegal campaign contributions in violation of 18 U.S.C. section 610. "Contributions or Expenditures by National Banks, Corporations or Labor Organizations." That section makes it unlawful, among other things, for "any corporation whatever * * * to make a contribution or expenditure in connection with any election at which Presidential and Vice Presidential electors or a Senator or Representative in * * * Congress are to be voted for, or in connection with any primary election or political convention or caucus held to select candidates for any of the foregoing offices * * *" and imposes a penalty of up to $5000 on the corporation making the contribution. 18 U.S.C. Section 610 also makes every officer or director who consents to the contribution guilty of a misdemeanor if the violation is not willful, and guilty of a felony if the violation is willful. In view of such inquiries, the Commission determined today to publish views and comments of its Division of Corporation Finance relating to these matters.

In the Division's view, the conviction of a corporation and/or its officers or directors for having made illegal campaign contributions in violation of 18 U.S.C. Section 610 is a material fact that should be disclosed to the public and specifically to shareholders, particularly in the context of a proxy statement where shareholders are being asked to vote for management. Such a conviction is material to an evaluation of the integrity of the management of the corporation as it relates to the operation of the corporation and the use of corporate funds.

It is the Division's position that disclosure of such a conviction, or of a plea of guilty or *nolo contendere* to an indictment or information alleging a violation of 18 U.S.C. section 610, should be made in a proxy or information statement relating to the election of directors, in the annual report on Form 10-K (17 CFR 249.310) under the Securities Exchange Act of 1934 (Exchange Act) in response to Item 5 or 12,[1] in a report filed on Form 8-K (17 CFR 249.308) under the Exchange Act in response to Items 3 or 13, and in response to appropriate items in the relevant form used for registration of any of the corporation's securities.[2] Such disclosure should include, in addition to a description of the details of the conviction or plea and the penalty imposed, and as appropriate, information as to whether any funds of the corporation used to make the contribution, directly or indirectly, will be paid back by the officer or director or by the contributee, whether the corporation or its insurers have paid or reimbursed, or intend to pay or reimburse, any officer or director for any fines imposed or legal fees or other expenses of his defense, whether the use of corporate funds for the illegal contributions involves any undisclosed tax consequences to the corporation, whether the corporation will seek reimbursement from the officer or director for its fines or expenses, and what steps, if any, the corporation is taking or will take to avoid recurrence of such activity.

The Division is also of the view that any pending indictment or information alleging violations of 18 U.S.C. section 610 should be disclosed. Questions have been raised about disclosure of campaign contributions that may be illegal but have not yet become the subject of a formal proceeding. In such cases, management is usually in the best position to inquire into, to examine and weigh

[1] In the case of issuers who file annual reports on different forms, see the corresponding item on such forms.

[2] Notwithstanding the absence of a required item of information in a particular form, see Rules 408 (17 CFR 230.408) under the Securities Act of 1933 and Rules 12b-20 (17 CFR 240.12b-20) and 14a-9 (17 CFR 240.14a-9) under the Exchange Act as to general requirements for additional disclosure of material information.

V 39 N 54 MAR 1974 XUM

the facts and circumstances and to determine whether disclosure is necessary.

By the Commission.

MARCH 8, 1974.

[FR Doc.74-6290 Filed 3-18-74;8:45 am]

PART 239—FORMS PRESCRIBED UNDER THE SECURITIES ACT OF 1933

Registration of Certain Offerings of Outstanding Securities; Correction

In Release No. 33-5265 dated June 27, 1972, which was published in the FEDERAL REGISTER for August 9, 1972 (37 FR 15989), the Commission announced certain revisions in the Instructions and items to Form S-16 (17 CFR 239.27). The effect of such revisions was not reflected in an amendment to § 239.27 in Chapter II of Title 17 of the Code of Federal Regulations through an oversight. Accordingly, current editions of Title 17 of the Code of Federal Regulations should be corrected by revising § 239.27 of Chapter II thereof to read as follows:

§ 239.27 Form S-16, optional form for registration of certain offerings of outstanding securities and for offerings to holders of certain convertible securities or for offerings to holders of certain outstanding warrants.

(a) Form S-16 may be used for registration under the Securities Act of 1933 of the following securities of any issuer which at the time of filing the registration statement meets the requirements for the use of Form S-7 (§ 236.26):

(1) Outstanding securities to be offered for the account of any person other than the issuer, if securities of the same class are listed and registered on a national exchange or are quoted on the automated quotation system of a national securities association;

(2) Securities to be offered upon the conversion of outstanding convertible securities of the issuer of the securities to be offered, or of an affiliate of such issuer, provided no commission or other remuneration is paid for soliciting the conversion of the convertible securities; or

(3) Securities to be offered upon the exercise of outstanding transferable warrants issued by the issuer of the securities to be offered, provided no commission or other remuneration is paid for soliciting the exercise of such warrants.

(b) Form S-16 may be used by closed end management investment companies for the registration of outstanding securities under the Securities Act of 1933 for the purposes specified in paragraph (a)(1) only (above) and subject to the applicable requirements of section 18(d) of the Investment Company Act of 1940. The form is available to a closed end management investment company provided that such company: (1) Is registered as a closed end management investment company under the Investment Company Act of 1940, (2) has been subject to and has complied in all respects including the timeliness of filings, with the requirements of sections 20(a) and 30 (a) and (b) of the Investment Company Act of 1940 for a period of at least three fiscal years prior to the filing of the registration statement on this form, and (3) meets the requirements of paragarphs (c) through (f) of the Rule as to the use of the Form S-7.

For the Commission pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS, *Secretary.*

Title 19—Customs Duties

CHAPTER I—UNITED STATES CUSTOMS SERVICE, DEPARTMENT OF THE TREASURY

[T.D. 74-94]

PART 6—AIR COMMERCE REGULATIONS

Permission for First Landing

On December 17, 1973, there was published in the FEDERAL REGISTER (38 FR 34668), a notice of a proposed amendment to § 6.2(a) of the Customs regulations to provide that permission for first landing of scheduled aircraft operated by scheduled airlines elsewhere than at an international airport shall be granted by the regional commissioner of Customs, or his designee, of the region where the place of first landing will occur.

After careful consideration of the comments received in response to the notice of the proposed amendment, no substantive changes in the proposed amendment were deemed necessary.

Accordingly, the third, fourth, and fifth sentences of § 6.2(a) of the Customs regulations are amended to read as follows:

§ 6.2 Landing requirements.

(a) *Place of landing.* * * *. In the case of scheduled aircraft operated by scheduled airlines, such permission shall be granted by the regional commissioner of Customs, or his designee, of the region where the place of first landing will occur, and in all other cases by the district director or other Customs officer in charge at the port of entry or Customs station nearest the intended place of first landing. For procedure to be followed in the case of emergency or forced landing, see paragraph (g) of this section. When permission is granted to land elsewhere than at an international airport, the Public Health Service, the Immigration and Naturalization Service, the Animal and Plant Health Inspection Service, and any other Agency likely to be concerned with the landing shall be immediately notified by the Customs officer granting the permission. * * *.

(R.S. 251, as amended, sec. 624, 46 Stat. 759, sec. 1109, 72 Stat. 799, as amended; 19 U.S.C. 66, 1624 (49 U.S.C. 1509))

Effective date. This amendment shall be effective April 18, 1974.

[SEAL] VERNON D. ACREE, *Commissioner of Customs.*

Approved: March 8, 1974.

JAMES B. CLAWSON, *Acting Assistant Secretary of the Treasury.*

Title 20—Employees' Benefits

CHAPTER III—SOCIAL SECURITY ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

[Reg. No. 22, further amended]

PART 422—ORGANIZATION AND PROCEDURES

Subpart B—General Procedures

ISSUANCE OF SOCIAL SECURITY NUMBERS

On August 7, 1973, a notice of proposed rulemaking was published in the FEDERAL REGISTER (38 FR 21271-21274) regarding the issuance of social security numbers. The proposed rules would implement that part of section 137 of the Social Security Amendments of 1972 (Pub. L. 92-603) which (1) directs the Secretary to take affirmative measures to assign social security numbers to aliens at the time of their lawful admission to the United States for permanent residence or under conditions permitting them to engage in employment in the United States, and (2) directs the Secretary to require applicants for social security numbers to furnish evidence to establish their age, true identity, citizenship or alien status. The proposed amendments to the regulations provided for the issuance of social security numbers to aliens who are not permanent residents but who need numbers for nonwork purposes. They also provided that the Social Security Administration would furnish to the Immigration and Naturalization Service, under specified conditions, certain information obtained in connection with an application for a social security number by an alien.

The period for comments ended on September 6, 1973, and 11 letters of comments were received in response to the proposal. While comments were varied, most were concerned with proposals for the issuance of numbers to aliens. There follows a discussion of the comments and the disposition thereof.

In the proposed § 422.103(c), it was set out that an applicant for a number will be required to furnish evidence to assist the Social Security Administration in establishing his age, citizenship, alien status, true identity, and previously assigned social security number(s), if any. One writer noted that it is not clear if, or how, an application submitted by mail can be processed. The applicant can submit his evidence by mail or by messenger, provided he is willing to relinquish the evidence. The Social Security Administration will cooperate, so far as possible; however, the evidence must be submitted.

There are no present requirements, either of statute or of regulations, of methods to be used by an individual to submit applications or evidence to the Social Security Administration. This is a matter the Social Security Administration considers better left to the discretion of the individual.

The same section notes that the completed application will be forwarded to the central office of the Social Security Administration for checking against the Administration's files. However, if the applicant requests a social security number card immediately, a temporary unnumbered card will be issued. One writer suggested that the issuance of the unnumbered card seems unnecessary and constitutes a nonproductive administrative effort and an unwise expenditure of trust fund moneys. Unnumbered cards are issued in those situations where a newly employed person must demonstrate to his employer that he has applied for a social security number. The issuance is done as a matter of public convenience with a minimum of administrative effort and costs. Therefore, there is no real reason to discontinue this procedure.

In § 422.104, there were set out certain groups to which the Social Security Administration shall assign numbers. Three such groups are:

(a) To aliens at the time of their lawful admission to the United States either for permanent residence or under other authority of law permitting them to engage in employment in the United States;

(b) Upon request, to aliens who are legally in the United States but not under authority of law permitting them to engage in employment, but only for a nonwork purpose; and

(c) To other aliens already in the United States at such time as their status is so changed as to make it lawful for them to engage in employment in the United States.

One writer suggested that numbers should not be assigned to persons in the first two categories unless prefixes or suffixes were included to identify the special status of the account number holder. He further suggested that numbers should not be assigned to persons in the third category until such time as they become citizens of the United States. It should be noted that the Congress has specifically directed the Secretary to take affirmative measures to assign numbers to persons in the first and third categories. Therefore, the suggestion that numbers not be assigned to persons in these categories is rejected. It must be recognized that aliens may need a social security number for purposes other than employment. As one example, section 6109 of the Internal Revenue Code provides in part that any person required to make a tax return shall include in the return the prescribed identifying number. This number has been set out in Internal Revenue Service regulations to be the social security number. Section 6109 has not been repealed, and thus there remains an obligation to assign a social security number to an alien who requires it for tax purposes. Further, section 137 of Pub. L. 92-603 does not contain an express prohibition against the issuance of numbers to aliens who are not permitted to work in this country. It is assumed that specific words of prohibition would have been used had Congress so intended.

The suggestion that distinctive prefixes or suffixes be used to identify aliens is not accepted. With minor exceptions, an alien employed in this country has the same obligation to contribute to the social security program as does a citizen. That being so, there is no reason to issue "second-class" numbers to the alien.

Several writers were concerned that the proposed regulations did not more precisely define aliens who were admitted under authority of law permitting them to engage in employment in the United States. The concern centered around students, temporary workers, and exchange visitors. Temporary workers are, of course, admitted to the United States specifically to engage in employment. Students are authorized to be employed on campus, and exchange visitors are authorized to accept work which is part of their program. Both may work in other circumstances, if authorized by the Immigration and Naturalization Service. Further, other persons are admitted to the United States specifically for employment purposes. Examples of such are treaty traders, entertainers, and representatives of foreign information media. In drafting the original proposals, it was not considered necessary to specify those nonimmigrants who were considered as admitted to the United States with authority to engage in employment. To alleviate public concern, though, there is set out in the final regulations a statement of presumptions regarding authority of certain nonimmigrants to accept employment. Under such presumptions, students and teachers need not demonstrate that they have specific authority to work.

Under arrangements with the Department of State, consular officers will obtain applications for social security numbers from immigrants entering the United States for permanent residence, from fiances of U.S. citizens, and from children of these fiances. One writer suggested that the regulations be amended to state that consular officers will obtain applications from nonimmigrant aliens who are authorized to work in the United States. This suggestion cannot be adopted due to the terms of the present understanding with the Department of State.

Several writers requested that this section be clarified as to where a nonimmigrant alien should apply for a social security number as it was implied that applications must be made through the Immigration and Naturalization Service. Language has been added to emphasize that the Immigration and Naturalization Service will be involved only when the status of an individual changes from nonimmigrant to alien lawfully admitted for permanent residence.

Applicants for social security numbers are required to submit evidence of their age, identity, and citizenship or alien status. The proposed § 422.107 deals with evidentiary requirements. One writer noted that some persons would not possess any of the documents listed as acceptable evidence of age and identity and asked whether the Department would accept affidavits from persons having first-hand knowledge of the facts in question. Affidavits will be accepted for consideration, but whether they would be regarded as convincing would depend upon the individual case. However, it is not proposed to revise the regulations to include affidavits among the examples of evidence. The omission of a piece of evidence from the examples does not preclude its consideration, and it is possible that the specific inclusion of affidavits might create an impression that an affidavit would be preferred over other types of evidence which were not included. The comment did cause a reexamination of the proposed language to ascertain whether a literal reading would convey an impression that the pro forma presentation of documents would satisfy the evidentiary requirement. There is no indication that the proposed regulations were so interpreted; nevertheless, the opening sentence of the section has been revised to refer to "evidence as the Secretary may regard as convincing." Two writers objected to the acceptance of a driver's license or voter registration card as evidence of identity. Since they gave no specific reasons for objecting to the use of these documents for such purpose, their objections are not accepted. In passing, it is noted that a driver's license is a preferred identity document in this country, often to the virtual exclusion from consideration of any other document.

The proposed § 422.107(d) deals with evidence of United States citizenship and notes that an allegation of citizenship by birth will generally be supported by the evidence of age and identity prescribed in the regulations. Upon request, however, additional evidence must be supplied. The meaning of the prior sentence was questioned by one writer who noted that a native-born citizen who had presented evidence of age and identity might be requested in any instance when that initially presented is not convincing; however, additional evidence of citizenship must be requested only in those instances where the evidence of age or identity does not show place of birth or disagrees with the applicant's allegation of birth in the United States. The section has been revised accordingly.

The same section refers to use of U.S. district court records to confirm the status of naturalized citizens. Several writers pointed out that State courts also have authority to grant naturalization. Therefore, the phrase "U.S. district" is deleted.

Section 422.107(d) deals with evidence of alien status. One writer objected to the term "alien status" and stated that this would require the individual to

V 39 54 MAR 19 74 XUM

establish his particular foreign nationality. There is nothing in the text that imposes such requirement, so no change in language has been made on this account. Another writer noted a restriction of acceptable evidence to possession of an Alien Registration Receipt Card (Form I–151) or an Arrival-Departure Record (Form I–94). It was stated that an alien might not be issued an I–151 until he had been in the United States for several months and that he might need a social security number before the document could be issued. It may have been overlooked that henceforth immigrants will apply for social security numbers as part of the visa process. Forms I–151 will be presented by those people who have already immigrated to the United States but who have had no previous need for a social security number. Sufficient time will have elapsed for those people to be in possession of Form I–151.

In various subsections of § 422.107, provisions were made for notice to Immigration and Naturalization Service in certain circumstances. Several writers objected to this. One felt that it violated the confidential nature of Social Security Administration records. Section 1106 of the Social Security Act directs the records in the possession of the Department shall not be disclosed, except as the Secretary may by regulations prescribe. Present regulations provide for disclosure of information to other Federal agencies and to agencies of State governments when such disclosure is reasonably related to the administration of the various programs authorized by the Social Security Act. It is considered that disclosure of information to the Immigration and Naturalization Service is reasonably necessary when verification of the alien status of an applicant for a social security number is at issue. Further, § 422.107(d)(5) requires that each applicant for a social security number be advised in advance of his executing an application that information may be referred to the Immigration and Naturalization Service. The applicant is then free to choose whether he wishes his application processed under those conditions. Another writer argued that the Social Security Administration should not take on the additional burden of enforcement of immigration laws. To an extent, the Social Security Administration already has this responsibility as section 290(c) of the Immigration and Nationality Act directs the Administration to supply information needed to locate certain aliens. Further, it is proposed to forward information to the Immigration and Naturalization Service only when the proper status of the applicant is at issue. Congress has specifically directed that affirmative action be taken to ascertain the citizenship or alien status of every applicant for a social security number, and notice will be given to the Immigration and Naturalization Service pursuant to this directive.

In § 422.107(d)(3), it is provided that the Immigration and Naturalization Service will be notified when an alien applicant refuses to comply with a request for evidence or where he furnished invalid or expired Immigration and Naturalization Service documents. One writer noted that the opening sentence of the section directed immediate referral while a subsequent sentence afforded the applicant a reasonable opportunity to submit the evidence. The point is well taken. The reference to immediate referral has been removed. Notice will be given to the Service only after the applicant has been given a reasonable time to submit evidence and only after the Social Security Administration has made an attempt to contact him to obtain the evidence.

Another writer suggested that more emphasis should be placed upon referrals for submission of invalid or expired documents. The Department agrees. A separate section now deals with this subject and is numbered § 422.107(d)(4); the proposed § 422.107(d)(4) is renumbered § 422.107(d)(5).

Another writer suggested that the term "invalid or expired Immigration and Naturalization Service documents" needed fuller definition. The term was intended to encompass forged documents purportedly issued by the Service, properly issued documents which were subsequently altered, and documents whose terms of validity have expired.

Accordingly, with these changes and additions, the proposed amendments are adopted as set forth below.

(Secs. 204 and 1102, 53 Stat. 1368, as amended, and 49 Stat. 647, as amended; 42 U.S.C. 405 and 1302)

Effective date. These amendments shall become effective on March 13, 1974.

(Catalog of Federal Domestic Assistance Program Nos. 13.800–13.807, Social Security)

Dated: November 20, 1973.

J. B. CARDWELL,
Commissioner of Social Security.

Approved: March 8, 1974.

CASPAR W. WEINBERGER,
Secretary of Health, Education, and Welfare.

Subpart B of Regulation No. 22 is amended as set forth below.

1. Section 422.103 is revised to read as follows:

§ 422.103 Social security numbers for employees and self-employed persons.

(a) *General.* The Social Security Administration maintains a record of the earnings reported for each individual. (When an individual obtains a social security number card, a social security earnings record is set up.) The individual's name, together with the number on the card, identifies the record so that the wages or self-employment income reported for or by the individual can be properly posted to such individual's record. Additional procedures concerning social security numbers may be found in Internal Revenue Service, Department of the Treasury regulation 26 CFR 31.6011(b)–2.

(b) *Applying for a number.* Every individual needing a social security number may apply for one by filing Treasury Department Form SS–5, "Application for Social Security Number," at any local social security office, or, if the individual is in the Philippines, at the Veterans' Administration Regional Office, Manila, Philippines. (See § 422.105 for special procedures for immigrants and certain nonimmigrants.) Form SS–5 may be obtained at:

(1) Any local social security office;

(2) The Social Security Administration, Baltimore, Maryland 21235;

(3) Offices of District Directors of Internal Revenue;

(4) U.S. Postal Service offices (except the main office in cities having a social security office);

(5) U.S. Employment Service offices in cities which do not have a social security office; and

(6) The Veterans' Administration Regional Office, Manila, Philippines.

Upon request, the social security office will distribute a quantity of application forms SS–5 to labor unions, employers, or other representative organizations.

(c) *Assignment procedure.* Social security numbers are assigned by the Central Office of the Social Security Administration in Baltimore, Maryland. Upon receipt of a completed form SS–5, the local social security office, or the Veterans' Administration Regional Office, Manila, Philippines, will require the applicant to furnish evidence, as necessary, to assist the Social Security Administration in establishing his or her age, citizenship, alien status, true identity, and previously assigned social security number(s), if any. (See § 422.107 for evidence requirements.) Upon satisfactory establishment of the pertinent items, the social security office or Veterans' Administration Regional Office forwards the application to the Social Security Administration Central Office for checking against the Administration's files. If the applicant requests a social security number card immediately, a temporary unnumbered card (form OAAN–5028) will be issued. If the investigation does not disclose a previously assigned number, the Central Office assigns a number and forwards to the applicant Form OA–702, "Social Security Number Card." If the investigation discloses a previously assigned number, a duplicate social security number card is issued to the applicant. For issuance of social security numbers to aliens and other groups or categories, see § 422.104.

(d) *Replacement of lost or damaged social security number card.* In case of loss of or damage to the social security number card, a duplicate card bearing the same number will be issued. If the individual has the "stub" portion of the card or the damaged card in legible condition, any local social security office or the Veterans' Administration Regional Office, Manila, Philippines will issue the duplicate card. In all other instances the individual should submit a properly completed application for a social security number (form SS–5).

2. Sections 422.104 and 422.104a are added to read as follows:

§ 422.104 Assignment of social security numbers.

Social security numbers may be assigned to the following:

(a) U.S. citizens, upon request;

(b) Aliens lawfully admitted to the United States for permanent residence or under other authority of law permitting them to engage in employment in the United States (see § 422.104a regarding presumption of authority of nonimmigrant alien to engage in employment); and

(c) Aliens who are legally in the United States but not under authority of law permitting them to engage in employment, but only for a nonwork purpose (see § 422.107(d)(1) and (2)).

§ 422.104a Presumption of authority of nonimmigrant alien to accept employment.

The nonimmigrant visa classifications assigned by the Department of State shall be used to determine whether a nonimmigrant alien is authorized to engage in employment. (See 22 CFR 41.12 for these classifications.) Permission to engage in employment shall not be presumed in the case of an alien who has not been issued a visa or whose visa shows any one of the following classification symbols: B–1, B–2, B–1 and B–2, C–1, C–2, C–3, F–2, H–4, and L–2. Holders of visas bearing other classifications will be presumed to have authorization to work.

3. Section 422.105 is added to read as follows (present §§ 422.105 and 422.110 are renumbered §§ 422.110 and 422.112 respectively):

§ 422.105 Obtaining applications from immigrants and certain nonimmigrant classes.

As a part of the visa process, United States consular offices throughout the world obtain applications for social security numbers from immigrants entering the United States for permanent residence, from fiances or fiancees of U.S. citizens and children of these fiances or fiancees. The consular office also verifies the age, identity, and alien status of these individuals. After verification of the age, identity, and alien status of the individual, the consular office forwards the application to the Central Office of the Social Security Administration. If investigation does not disclose a previously assigned number, the Central Office assigns a number and forwards a social security number card to the applicant at the United States address given on the application. The Immigration and Naturalization Service performs a similar function with respect to aliens who entered this country without immigration visas and who, subsequent to entry, acquired status as lawful permanent residents of the United States. The Immigration and Naturalization Service obtains from each such alien an application for a social security number and, after verifying the alien's age and identity, forwards the application to the Central Office of the Social Security Administration. If investigation does not disclose a previously assigned number, the Central Office assigns a number and forwards a social security number card to the applicant.

4. Section 422.107 is added to read as follows:

§ 422.107 Evidence requirements.

Applicants for social security numbers are required to submit such evidence as the Secretary may regard as convincing of their age, citizenship, or alien status, and true identity. An applicant is also required to submit evidence to assist the Administration in determining the existence and identity of any previously assigned number(s). In the case of a noncitizen, evidence is also required to establish whether the applicant, because of his alien status, is prohibited from engaging in employment in the United States. A social security number will not be assigned unless all of the evidence requirements are met. (For verification of age, identity, and alien status of immigrants and certain nonimmigrant classes entering the United States, see § 422.105.)

(a) *Evidence of age.* Upon request, all applicants for a social security number are required to submit evidence of age to support the date of birth alleged. Examples of the types of evidence which may be submitted are birth or baptismal certificates, school and church records, census records, insurance policies, marriage records, employment records, and passports.

(b) *Evidence of identity.* Upon request, all applicants for a social security number are required to submit corroborative evidence of their identity. Corroborative evidence of identity may consist of a driver's license, a voter registration card, a birth certificate, a passport, or other similar document serving to identify the individual. It is preferable that the document contain the applicant's signature for comparison with his signature on the application for a social security number.

(c) *Evidence of U.S. citizenship.* Generally, an allegation of U.S. citizenship by birth will be supported by the evidence of age and identity described in paragraphs (a) and (b) of this section. Additional evidence must be supplied when the evidence of age or identity does not show place of birth or where such evidence of age or identity does not agree with the applicant's allegation of birth in the United States. Where an applicant indicates that he is foreign born and that he is a U.S. citizen, he is required to present documentary evidence of U.S. citizenship. Any of the following is acceptable evidence of U.S. citizenship:

(1) Certificate of naturalization;

(2) Certificate of citizenship;

(3) U.S. passport;

(4) U.S. citizen identification card (INS form I–179 or I–197); or

(5) Consular report of birth (State Department form FS–240). If such required evidence is not available, and court records do, not confirm the allegation of U.S. citizenship, the Immigration and Naturalization Service will be contacted. If the Service has no record of the applicant's citizenship, a social security number will not be assigned until satisfactory evidence of U.S. citizenship is furnished.

(d) *Evidence of alien status—(1) Citizen of country other than Canada or Mexico.* Where the applicant is a foreign citizen (of a country other than Canada or Mexico), such applicant is required to have an Alien Registration Receipt Card (I–151) or an Arrival-Departure Record (I–94) and will be asked to produce such document. If the applicant fails to do so, a social security number will not be issued and the Immigration and Naturalization Service will be notified of these circumstances. If the applicant produces an Alien Registration Receipt Card, or produces an Arrival-Departure Record which contains an authorization to work, a social security number card will be issued. However, if the Arrival-Departure Record does not contain authorization to work and the social security number is for a work purpose, it will not be issued and the Immigration and Naturalization Service will be notified of the circumstances. If the applicant requests the number for a nonwork purpose, e.g., an Internal Revenue Service purpose, the number will be issued and the record will be annotated. In the latter case, if earnings are later reported to the Administration, the Immigration and Naturalization Service will be notified of such report.

(2) *Mexican or Canadian citizen.* If a Canadian or Mexican citizen has an Alien Registration Receipt Card or an Arrival-Departure Record, the rules in paragraph (d)(1) of this section apply. If a Canadian or Mexican citizen is legally in the United States with a border crossing card, a border visitor's permit (or, in the case of a Canadian citizen, without documentation), but does not have an Alien Registration Receipt Card or an Arrival-Departure Record, and wishes a social security number for a nonwork purpose, e.g., an Internal Revenue Service purpose, the Administration will assign a number to the applicant and issue a number card, except that the record will be annotated and, in addition, the Immigration and Naturalization Service will be notified if earnings are reported to the earnings record.

(3) *Failure to submit evidence.* If the applicant does not comply with a request for evidence or other information regarding alien status within a reasonable time, the Administration will again attempt to contact him. If there is still no response, the Immigration and Naturalization Service will be notified.

(4) *Invalid or expired documents.* The Administration will immediately notify the Immigration and Naturalization Service when an applicant presents invalid or expired Immigration and Naturalization Service documents. Invalid documents are forged documents purportedly issued by the Immigration and Naturalization Service or properly issued documents which were altered subsequent to issue. An expired document is one whose term of validity has expired.

V 39 54 MAR 1974 XUM

(5) *Notice to alien applicant.* An alien who applies for a social security number will be advised that information obtained by the Social Security Administration in connection with his application for, and issuance of, a social security number might be transmitted to the Immigration and Naturalization Service. If a number is to be issued for nonwork purposes, the applicant will be advised that the Immigration and Naturalization Service will be notified should earnings be reported to his earnings record.

5. Section 422.108 is added to read as follows:

§ 422.108 Criminal penalties.

A person may be subject to criminal penalties for furnishing false information in connection with earnings records or for wrongful use or misrepresentation in connection with social security numbers, pursuant to section 208 of the Social Security Act and sections of Title 18 of the United States Code (42 U.S.C. 408; 18 U.S.C. 1001 and 1546).

6. Renumbered § 422.110 (former § 422.105) is revised to read as follows:

§ 422.110 Individual's request for change in record.

Form OAAN–7003, "Request for Change in Social Security Records," should be completed by any person who wishes to change the name or other personal identifying information previously submitted. This form may be obtained from any local social security office or from one of the sources noted in § 422.103(b). The completed request for change in records may be submitted to any office of the Social Security Administration, or, if the individual is in the Philippines, to the Veterans' Administration Regional Office, Manila, Philippines. If the request is for a change in name, a new social security number card will be issued to the person making the request bearing the same number previously assigned.

7. Present § 422.110 is renumbered § 422.112 as follows:

§ 422.112 Employer identification numbers.

Title 29—Labor

SUBTITLE A—OFFICE OF THE SECRETARY OF LABOR

PART 70—EXAMINATION AND COPYING OF DEPARTMENT OF LABOR DOCUMENTS

Cost of Transcripts of Departmental and Advisory Committee Hearings

Section 11 of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770, 5 U.S.C. App.) provides that except where prohibited by contractual agreements entered into prior to the effective date of the Act (January 5, 1973), agencies and advisory committees shall make available to any person at the actual cost of duplication, copies of transcripts of agencies' proceedings or advisory committee meetings. Paragraph (g) of § 70.62 is revised to reflect this change in the law.

As this amendment reflects the present Departmental practice in connection with charges made for transcripts, and further it publicizes a benefit conferred upon the public by the Federal Advisory Committee Act, neither notice of proposed rulemaking nor delay in the effective date is necessary. Accordingly, this amendment shall be effective March 19, 1974.

Paragraph (g) of § 70.62 is hereby revised to read as follows:

§ 70.62 Special searching and copying services.

• • • • •

(g) *Transcripts of proceedings.* Copies of transcripts of hearings and other proceedings pertaining to matters within the purview of the Department of Labor or any of its programs or advisory committees and available for inspection and copying pursuant to the provisions of this part will be furnished upon payment of the actual cost of duplication. If however, the transcript was furnished to this Department under the provisions of a contract executed prior to January 5, 1973, the effective date of the Federal Advisory Committee Act, under contractual provisions which prohibit the Department from reproducing the transcript, copies of such transcripts prepared by persons or firms reporting the proceedings may be obtained upon application to the reporter and payment of the reporter's fees at the rate provided in the contract. The foregoing fees are not applicable to the furnishing of any copies of such transcripts to any person entitled to receive such copies without charge pursuant to a regulation or order issued by the Secretary or his authorized representative.

Signed at Washington, D.C. this 14th day of March, 1974.

PETER J. BRENNAN,
Secretary of Labor.

Title 32A—National Defense, Appendix

CHAPTER X—OFFICE OF OIL AND GAS, DEPARTMENT OF THE INTERIOR

[O. I. Reg. 1 (Rev. 5), Amdt. 64]

O. I. REG. 1—OIL IMPORT REGULATIONS

Miscellaneous Amendments

There appeared in the Federal Register on February 11, 1974 (39 FR 5193) a proposal to amend several sections of Oil Import Regulation 1 (Revision 5), as amended. A total of twenty six (26) responses were received each commenting on one or more of the changes proposed. The changes to the individual sections that were proposed are discussed below.

In addition to the changes related to the proposed rulemaking, a number of technical changes are being made at this time in preparation for the allocation period beginning May 1, 1974. Except for sections 9B and 32 all sections which have been changed for either substantive or technical reasons are published in their entirety. As an aid to the public several sections that are not changed in this amendment are also published in their entirety to update them through the many amendments that have been made to Oil Import Regulation 1 (Revision 5).

SECTIONS 9, 10, AND 11

It was proposed that for the allocation period beginning May 1, 1974 refiners and petrochemical plant operators would have the option of claiming either the inputs to their facilities during the 1973 calendar year or the inputs reported in their 1973 application. The comments received on this proposal were all favorable. Therefore the language of the proposal is incorporated into this amendment.

SECTIONS 12 AND 28

It was proposed that sections 12 and 28, which set forth the method of allocating imports of residual fuel oil into District I and District V respectively, be amended to make such allocations on the basis of terminal inputs. The comments on this proposal were almost completely negative with none taking a firm affirmative position. Therefore, in accordance with the comments, sections 12 and 28 are amended to allocate the levels of imports set by Presidential Proclamation 3279, as amended, on the same prorata basis as the allocations were made pursuant to these sections for the allocation period beginning January 1, 1973.

SECTION 29

It was proposed that section 29 be amended to abandon the historical basis for allocating imports from Canada in favor of a three tier system under which a facility would earn an allocation at a rate set by the percentage of Canadian inputs processed during the calendar year 1973. The comments were generally favorable but many persons expressed reservations about the exact method chosen for computing the allocations, about the effects either a change in the Canadian export program or the Federal mandatory crude oil allocation program would have on the proposed import allocations. The Federal Energy Office has published proposed rulemaking affecting the mandatory crude oil allocation program. In addition, a meeting has been scheduled for March 19, 1974 between representatives of the United States and Canadian governments to discuss the question of imports of Canadian oil into the United States. In view of these developments it has been decided to defer amendment of section 29 until after the meeting with the Canadians.

SECTION 30

It was proposed that section 30 be amended to abandon the historical basis for allocation of imports of No. 2 fuel oil into District I in favor of an allocation system based on terminal inputs. With one exception, comments on this proposal were negative and advocated continuation of the present historical pattern of allocation. Accordingly, only technical amendments are made to section 30.

SECTION 33

It was proposed that section 33 be amended to make allocation of Canadian imports into District V on the same pro rata basis that each applicant received in the calendar year 1973 allocation period. The only comment received on the proposal suggested that "Refiners located in District V should be treated the same as refineries located in Districts I–IV for allocation of Canadian crude." As with section 29 amendment of section 33 will be deferred until after the March 19, 1974 meeting referred to in the discussion of section 29.

This Amendment 64 shall become effective on March 19, 1974.

WILLIAM A. VOGELY,
Acting Deputy Assistant Secretary of the Interior.

WILLIAM E. SIMON,
Deputy Secretary of the Treasury.

Sections 1 and 2 are not amended and shall continue to read as follows:

Section 1. Purpose.

These regulations implement Presidential Proclamation 3279, "Adjusting Imports of Petroleum and Petroleum Products into the United States," dated March 10, 1959, as amended, by providing for the discharge of the responsibilities imposed upon the Secretary of the Interior.

Sec. 2. Administration of program.

The Director, Office of Oil and Gas has been empowered to exercise, pursuant to regulations, the authority conferred upon the Secretary by Proclamation 3279, as amended.

Paragraphs (a), (b), (c), and (d) of Section 3 are amended so that Section 3 in its entirety reads as follows:

Sec. 3. Allocation periods.

(a) Except for allocations made pursuant to section 9A all allocation periods beginning on or after January 1, 1973, but before December 31, 1973 shall be extended to expire April 30, 1974.

(b) Supplemental allocations not subject to license fees will be made by the Director for the extended portion of the allocation period for which an allocation has not been made. Such supplemental allocations shall be computed so as to provide allocations for the extended portion of the allocation period at the same daily average as the base allocations.

(c) Effective May 1, 1974, the allocation periods for all allocations except allocations issued pursuant to section 9A will be made for periods of twelve months beginning May 1 of each year.

(d) Allocation periods for allocations made pursuant to section 9A will be as provided for in that section.

(e) Notwithstanding the provisions of paragraph (1) of section 9B the initial allocation period pursuant to section 9B will be for a period of twelve months beginning May 1, 1974. Subsequent allocations will be made for periods of twelve months beginning May 1 of each year.

Section 4 is amended in its entirety to read as follows:

Sec. 4. Eligibility for allocations not subject to license fees.

(a) To be eligible for an allocation not subject to license fees of imports into Districts I–IV, into District V, Puerto Rico, Guam, American Samoa, the Virgin Islands, or a foreign trade zone of crude oil and unfinished oils, a person must (1) have either refinery capacity or a petrochemical plant in the respective districts, Puerto Rico, territories or foreign trade zone and (2) have had refinery inputs or petrochemical plant inputs in the respective districts, Puerto Rico, territories, or foreign trade zone for the year ending three months prior to the beginning of the allocation period for which the allocation is requested.

(b) To be eligible for an allocation not subject to license fees of imports into Puerto Rico of crude oil and unfinished oils pursuant to section 15, a person must have had refinery capacity in Puerto Rico during the calendar year 1964.

(c) [This paragraph revoked by Amendment 26.]

(d) [This paragraph revoked by Amendment 26.]

(e) To be eligible for an allocation not subject to license fees of imports into Puerto Rico of finished products, other than residual fuel oil to be used as fuel, a person must have imported such products into Puerto Rico during the last half of the calendar year 1958.

(f) To be eligible for an allocation not subject to license fees of imports into Puerto Rico of residual fuel oil to be used as fuel, a person must have imported residual fuel oil used as fuel into Puerto Rico during the last half of the calendar year 1958.

(g) A person is not eligible individually for an allocation not subject to license fees of imports of crude oil and unfinished oils or finished products if the person is a subsidiary or affiliate owned or controlled, by reason of stock ownership or otherwise, by any other individual, corporation, firm, or other business organization or legal entity. The controlling person and the subsidiary or affiliate owned or controlled will be regarded as one. Allocations will be made to the controlling person on behalf of itself and its subsidiary or affiliate but, upon request, licenses will be issued to the subsidiary or affiliate.

Section 5 is amended in its entirety to read as follows:

Sec. 5. Applications for allocations and licenses.

(a) Applications for all allocations not subject to license fee of imports of crude oil, unfinished oils, or finished products for the allocation period May 1, 1974 through April 30, 1975, except for applications made pursuant to section 9A, must be filed with the Director in such form as he may prescribe, not later than March 31, 1974.

(b) Applications for allocation pursuant to section 9A must be filed as provided for in paragraph (c) of section 9A.

Sections 6, 7, and 8 are not amended and shall continue to read as follows:

Sec. 6. Records and inspections.

All persons receiving allocations pursuant to these regulations shall maintain complete records of imports, refinery inputs, petrochemical plant inputs and the outputs of such plants. These records shall be maintained on a current basis so that they will be available for inspection by a representative of the Office of Oil and Gas. All records required to be maintained pursuant to this section shall be retained for a period of three (3) years. In connection with the performance of the Office of Oil and Gas' responsibility for assuring full compliance with these regulations and Proclamation 3279, as amended, the person shall permit representatives of the Office of Oil and Gas to enter upon his office, property, plants and facilities to examine such records and, if deemed necessary in order to verify such records, to inspect the refinery, petrochemical plant, or terminal and all operations being performed within the facilities which include, but are not necessarily limited to refining, receiving, shipping, testing and storage. If requested by the Office of Oil and Gas representatives, the person shall be required to assign an employee to accompany the representatives of the Office of Oil and Gas in all inspections, record evaluations, and verification operations. The Office of Oil and Gas representatives shall not be required to sign any releases prior to entering upon a person's property or installation.

Section 7. Licenses.

(a) When an allocation has been made to a person under this regulation, the Director shall issue a license or licenses based on the allocation; specifying the amount of crude oil and unfinished oils or finished products which may be imported, the period of time such license shall be in effect, and the districts (District I, Districts I–IV, Districts II–IV, District V or Puerto Rico) into which the importation may be made. The director may amend such licenses.

(b) No license issued pursuant to this section may be sold, assigned, or otherwise transferred.

Sec. 8. Small quantities.

(a) District Directors of Customs are authorized to permit without a license an entry for consumption of not to exceed 550 U.S. gallons of crude oil, unfinished oils, or finished products which are certified as samples for testing or analysis or which are included in shipments of machinery or equipment and are certified as intended for use in connection therewith, and baggage entries. Unless notified by the Director to the contrary, District Directors of Customs are authorized to permit without a license the entry for consumption of bonded fuel aboard an aircraft diverted from an international flight.

V 39 54 MAR 1974 XUM

(b) A person desiring to import small quantities of crude oil, unfinished oils, or finished products in circumstances not covered by paragraph (a) of this section shall file with the Director a written request for authorization for entry without a license for each shipment, describing the oil and the quantity thereof proposed to be imported and the circumstances which would justify an entry without a license, the date when the shipment is scheduled to arrive or upon which it has arrived, and the port of entry. If the Director determines that the entry without a license is consonant with the purposes of Proclamation 3279, as amended, he may authorize such an entry.

Section 9 is amended in its entirety to read as follows:

Sec. 9. Allocations; petrochemical plants; District I–IV, District V.

(a) For the allocation period May 1, 1974, through April 30, 1975, each eligible person with a petrochemical plant in Districts I–IV shall receive an allocation not subject to license fee of imports of crude oil and unfinished oils equal to the average barrels per day of petrochemical plant inputs to his petrochemical plants in these districts during the calendar year 1973 or the year ending September 30, 1972, whichever is greater, multiplied by 11.2 percent × .90.

(b) For the allocation period May 1, 1974, through April 30, 1975, each eligible person with a petrochemical plant in District V shall receive an allocation not subject to license fee of imports of crude oil and unfinished oils equal to the average barrels per day of petrochemical plant inputs to his petrochemical plants in this district during the calendar year 1973 or the year ending September 30, 1972, whichever is greater, multiplied by 11.9 percent × .90.

(c) No allocation for Districts I–IV made pursuant to this section shall entitle a person to a license which will allow the importation of unfinished oils in excess of 15 percent of the allocation, and no allocation for District V made pursuant o this section shall entitle a person to a license which will allow the importation of unfinished oils in excess of 25 percent of the allocation However, a person obtaining an allocation of imports of crude oil and unfinished oils pursuant to this section may petition the Director to adjust the percentage of imports of unfinished oils upward to 100 percent of such person's allocation if the petitioner certifies that the additional imported unfinished oils will not be exchanged, that the additional unfinished oils will be processed entirely in the petitioner's own petrochemical plant, and that more than 50 percent of the yields (by weight) from the unfinished oils will be petrochemicals or that more than 75 percent (by weight) of recovered product output will consist of petrochemicals.

(d) No allocation made pursuant to this section may be sold, assigned, or otherwise transferred.

(e) Applications for allocations pursuant to this section must be filed in accordance with provisions of section 5.

(f) Pursuant to section 3A of Presidential Proclamation 3279, as amended by Proclamation 4175, interim allocations were made for the allocation period January 1, 1973 through December 31, 1973 to all persons who had received an allocation under section 9 for the allocation period January 1, 1972 through December 31, 1972. To the extent that such interim allocations were not charged against and deducted from the regular allocation made to a person pursuant to section 9 for the allocation period starting January 1, 1973 and extending through April 30, 1974, such interim allocation will be charged against and deducted from the allocation made under this section for the period May 1, 1974 through April 30, 1975.

Subparagraphs (a)(3), (e)(2) and paragraphs (b) of Section 9A are amended so that Section 9A in its entirety will read as follows:

Sec. 9A. Allocations based on exports.

(a) For the purposes of this section:

(1) "Eligible petrochemicals" means the following materials produced in the person's facilities in Districts I–IV or District V and falling into the following Trade Classification of Schedule B of the current Department of Commerce Statistical Classifications of Domestic and Foreign Commodities Exported from the United States.

Trade Classification Schedule B Number	*Description*
231.2	Synthetic rubber and rubber substitutes except compounded, semiprocessed, and manufactures; e.g., SBR type rubber, butyl rubber.
266.2–266.3	Manmade fibers suitable for spinning except glasses, e.g., nylon staple, polyester staple.
	CHEMICAL ELEMENTS AND COMPOUNDS
512	Organic chemicals; e.g., ethylene glycol, acetic acid.
513.27	Carbon black.
521.4024	Ortho-Xylene.
521.4025	Para-Xylene.
521.4027	Mixed Xylenes.
554.2022–554.2026	Detergents, synthetic organic bulk; e.g., alkyl aryl sulfonate, sodium toluene sulfonated.
554.2032–544.2036	Surface-active agents, except detergents, acid type cleaners, and textile and leather-finishing agents.
581.1005–581.1055 581.2002–581.2058	Plastic materials and artificial resins; e.g., polyamide, phenolic, polyethylene.
581.3230	Cellulose ester molding and extrusion compositions; e.g., cellulose acetate.
581.3242	Cellulose esters (except molding and extrusion compositions) in unfinished forms; e.g., granules, powder.
581.3260	Chemical derivatives of cellulose unplasticized e.g., cellulose acetate-butyrate (flake, powder, waste or scrap).
599.7100	Artificial waxes e.g., solidified polyethylene glycol, glyceryl tri-(12 Hydroxy stearate).
599.7505–599.7507	Antiknock mixtures.
599.7515–599.7530	Additives for lubricating oils, fuel oils, liquid gum inhibitors.
599.9960	Reagents for ore recovery.
621.0105	Carbon black masterbatch.
629.1010–629.1050	Rubber tires for vehicles and aircraft.
651.6–651.7	Yarn (including monofil and strip), thread, tire cord, and tire cord fabric of noncellulosic and cellulosic manmade fibers.

(2) "Broker" and "Export Agent" mean a person whose occupation includes the transaction of business relating to the exportation of goods.

(3) Each six months of a calendar year (e.g. January to June) shall constitute a base period.

(b) Subject to provisions of this section a person who holds an allocation of imports into Districts I–IV or into District V under section 9 or section 25A during all or part of the base period to which the application for an allocation under this section 9A relates shall also be entitled to receive under this section 9A an allocation of imports of crude oil into Districts I–IV or into District V (as the case may be) based on his exports during the base period of eligible petrochemicals produced by him.

(c) An application for an allocation under this section must be filed with the Director no later than 60 days after the last day of the base period to which the application relates. Amendments to applications resulting in upward adjustments of allocations under this section must be filed with the Director no later than the last day of the base period following the base period to which the allocation applies. An application shall be in such form as the Director may prescribe.

(d) Licenses issued under an allocation made pursuant to this section shall expire 12 months after the respective base period ends.

(e)(1) The Director shall determine the weight (in pounds) of eligible petrochemicals (i) which were produced in the person's facilities in Districts I–IV or in District V, and (ii) which were exported from the Customs territory of the United States during the base period whether by the person, another person, a broker or an export agent or a domestic or a foreign purchaser thereof in the form produced by and without value added and without further processing. The producer shall furnish such evidence as the Director may require to establish that the export was, in fact, made including a letter from the exporter that his records may be inspected by the Director or his agents for the purpose of verifying that the export was made.

(2) The Director shall ascertain the hydrogen and carbon content (in pounds) of that part of the weight of the eligible petrochemicals determined pursuant to paragraph (e)(1) of this section, which was (i) produced by chemical reaction in the person's facilities and (ii) derived from crude oil or unfinished oils produced or manufactured in Districts I–IV or in District V or imported into Districts I–IV or District V pursuant to an allocation. The weight thus ascertained shall be divided by 200; and the applicant shall receive an allocation of barrels of imports of crude and unfinished oils equal to the resulting quotient. Where a person produced an eligible petrochemical from a combination of inputs which qualify under clause (ii) of this subparagraph (2) and inputs which do not so qualify, and a portion of such eligible petrochemical was exported, the hydrogen and carbon content of the exported portion shall be deemed to have been derived entirely from the qualified inputs to the full extent of such qualified inputs except that such hydrogen and carbon shall not be deemed to have been derived from a qualified input from which the hydrogen and carbon could not actually have been derived.

(f) A shipment of eligible petrochemicals from Districts I–IV or from District V to a foreign country or to the Virgin Islands, Guam, American Samoa, or the Trust Territory of the Pacific Islands constitutes an export for the purposes of this section. A shipment of eligible petrochemicals from Districts I–IV or from District V to Puerto Rico or to a foreign trade zone shall not constitute an export for the purposes of this section. If eligible petrochemicals are returned after having been exported, the total weight of such eligible petrochemicals so returned, whatever the form of the import, shall either be excluded or deducted as appropriate from the applicant's base in computing an allocation under paragraph (e) of this section.

(g) An allocation made pursuant to this section shall entitle a person to a license or licenses which will allow the importation of unfinished oils in an amount not exceeding, in the aggregate, 15 percent of the person's allocation. However, the Director shall permit a person holding such an allocation to import unfinished oils in an amount up to 100 percent of such person's allocation upon certification by him to the Director that such imported unfinished oils will not be exchanged, that such unfinished oils will be processed entirely in the person's petrochemical plant, and that more than 50 percent by weight of the yields from such unfinished oils will be converted into petrochemicals of which petrochemicals methane is not more than 50 percent by weight or that more than 75 percent by weight of recovered product output will consist of petrochemicals but of which output not more than 50 percent by weight is methane.

(h) A person who imports crude oil or unfinished oils under an allocation made under this section may, except as provided in paragraph (g) of this section, exchange his imported crude oil either for domestic crude oil or for domestic unfinished oils or exchange his imported unfinished oils for domestic unfinished oils or for domestic crude oil. All such exchanges shall be governed by the provisions of paragraph (b) (2), (3), (5), and (6) of section 17 of this regulation.

(i) No allocation made pursuant to this section may be sold, assigned or otherwise transferred.

Paragraph (a)(6), paragraph (b) and paragraph (d) of Section 9B are amended to read as follows:

Sec. 9B. Allocations of imports of crude oil and unfinished oils for conversion of heavy liquid feedstocks to petrochemicals—Districts I–IV and District V.

(a) • • • (6) The term "base period" means the period of 12 months ending on December 31 preceding the allocation period for which an application for an allocation under this section 9B is filed.

• • • • •

(b) Except as provided in paragraph (1) allocations under this section shall be made for periods of twelve months beginning May 1.

• • • • •

(d) A person who receives an allocation under this section 9B may not receive an allocation pursuant to section 9 based on any feedstock stream processed in the person's heavy liquid plant or plants. The hydrocarbon content of materials upon which an allocation under section 9, section 9A, or section 25A of this regulation is based will not qualify as a basis for an allocation under this section 9B. Hydrocarbon materials upon which an allocation under this section 9B is based will not qualify as a basis for an allocation under section 9, section 9A, or section 25A of this regulation. No hydrocarbon material upon which an allocation under this section 9B is based may serve as a basis for another allocation under this section 9B.

Paragraph (a), (b), and (e) of Section 10 are amended and paragraph (g) of Section 10 is deleted so that Section 10 in its entirety reads as follows:

Sec. 10. Allocation; refiners; Districts I–IV.

(a) For the allocation period May 1, 1974 through April 30, 1975, the Director shall make allocations not subject to license fee as provided in paragraph (b) of this section and within the quantities available under applicable levels established in Proclamation 3279, as amended, of imports into Districts I–IV among eligible persons having refinery capacity in these districts or the Virgin Islands. With respect to the Virgin Islands qualified refinery inputs shall be limited to crude oil charged to the refinery.

(b) Each eligible applicant shall receive an allocation not subject to license fee of imports of crude oil based on refinery inputs for the calendar year ending December 31, 1973, or the 12 month period ending September 30, 1972, whichever is greater. The allocation shall be computed according to the following schedule:

Average barrels per day input	Percent of input		Number of days
0 to 10,000	21.7	×	365
10 to 30,000	13.0		
30 to 100,000	7.6		
100,000 plus	3.8		

In addition, any imports of crude oil available for allocation pursuant to this section but not allocated pursuant to the above schedule shall be allocated to each eligible applicant in the same proportion that each eligible applicant's allocation as determined pursuant to the above schedule bears to the total of imports of crude oil allocated pursuant to the above schedule; however, no person shall receive an allocation in excess of 100 percent of such person's refinery inputs.

(c) Except as provided for allocations based on inputs to refineries located in the Virgin Islands, under an allocation made pursuant to paragraph (b) of this section, unfinished oil may be imported, but imports of such oils shall not exceed 15 percent of the allocation. Within such 15 percent, a maximum quantity of imports not exceeding one percent of the total allocation may be imported in the form of finished products, provided that prior written notification is given to the Director of each entry proposed to be made. Finished products imported pursuant to this paragraph may not be exchanged.

(d) No allocation made pursuant to this section may be sold, assigned, or otherwise transferred, and except as this regulation may provide otherwise no license issued under such an allocation shall permit the importation of Canadian imports as defined in section 15(j) of Proclamation 3279, as amended.

(e) Pursuant to section 3A of Presidential Proclamation 3279, as amended by Proclamation 4175, interim allocations were made for the allocation period January 1, 1973 through December 31, 1973 to all persons who had received an allocation under section 10 for the allocation period January 1, 1972 through December 31, 1972. To the extent that such interim allocations were not charged against and deducted from the regular allocation made to a person pursuant to section 10 for the allocation period starting January 1, 1973 and

V 39 54
MAR 19 74
XUM

extending through April 30, 1974, such interim allocation will be charged against and deducted from the allocation made under this section for the period May 1, 1974 through April 30, 1975.

(f)(1) For the purpose of allocating imports of unfinished oils and unfinished products produced by refineries in the Virgin Islands, allocations claimed on account of such refineries shall be computed in accordance with the sliding scale set out in paragraph (b) of this section but inputs to such refineries shall be treated as the last increment of the aggregate of inputs at the highest applicable level in the sliding scale.

(2) Allocations made pursuant to this section 10 to persons for refinery capacity located in the Virgin Islands shall be for import into Districts I–IV or Puerto Rico of unfinished oils or finished products manufactured in the facility earning the allocation. Unfinished oils imported from the Virgin Islands pursuant to an allocation granted under this section 10 cannot be counted as qualified refinery inputs in Districts I–IV or District V.

(g) Applications for allocations pursuant to this section must be filed in accordance with provisions of section 5.

Paragraphs (a), (b), (e) and (g) of Section 11 are amended so that Section 11 in its entirety reads as follows:

Sec. 11. Allocations, refiners, District V.

(a) For the allocation period May 1, 1974, through April 30, 1975, the Director shall allocate, as provided in paragraph (b) of this section and within the quantities available under applicable levels established in Proclamation 3279, as amended, imports into District V among eligible persons having refinery capacity in that district, Guam or American Samoa. With respect to Guam or American Samoa qualified refinery inputs shall be limited to crude oil charged to the refinery.

(b) Each eligible applicant shall receive an allocation not subject to license fee of imports of crude oil based on refinery inputs for the calendar year ending December 31, 1973, or the 12 month period ending September 30, 1972, whichever is greater. The allocation shall be computed according to the following schedule:

Average barrels per day input		Percent of input		Number of days
0 to 10,000	×	67.5	×	365
10 to 30,000		16.9		
30,000 plus		5.6		

In addition, any imports of crude oil available for allocation pursuant to this section but not allocated pursuant to the above schedule shall be allocated to each eligible applicant in the same proportion that each eligible applicant's allocation as determined pursuant to the above schedule bears to the total of imports of crude oil allocated pursuant to the above schedule; however, no person shall receive an allocation in excess of 100 percent of such person's refinery inputs.

(c) Except as provided for, allocations based on inputs to refiners located in Guam or American Samoa, under an allocation made pursuant to paragraph (b) of this section, unfinished oils may be imported, but imports of such oils shall not exceed 25 percent of the allocation. Within such 25 percent, a maximum quantity of imports not exceeding one percent of the total allocation may be imported in the form of finished product, provided that prior written notification is given to the Director of each entry proposed to be made. Finished products imported pursuant to this paragraph may not be exchanged.

(d) No allocations made pursuant to this section may be sold, assigned, or otherwise transferred.

(e) Pursuant to section 3A of Presidential Proclamation 3279, as amended by Proclamation 4175 interim allocations were made for the allocation period January 1, 1973 through December 31, 1973 to all persons who had received an allocation under section 11 for the allocation period January 1, 1972 through December 31, 1972. To the extent that such interim allocations were not charged against and deducted from the regular allocation made to a person pursuant to section 11 for the allocation period starting January 1, 1973 and extending through April 30, 1974, such interim allocation will be charged against and deducted from the allocation made under this section for the period May 1, 1974 through April 30, 1975.

(f)(1) For the purpose of allocating imports of unfinished oils and finished products produced by refineries in Guam or American Samoa, allocations claimed on account of such refineries shall be computed in accordance with sliding scale set out in paragraph (b) of this section, but inputs to such refineries shall be treated as the last increment of the aggregate of inputs at the highest applicable level in the sliding scale.

(2) Allocations made pursuant to this section 11 to persons for refinery capacity located in Guam or American Samoa shall be for import into District V of unfinished oils or finished products manufactured in the facility earning the allocation. Unfinished oils imported from Guam or American Samoa pursuant to an allocation granted under section 11 cannot be counted as qualified inputs in Districts I–IV or District V.

(g) Applications for an allocation pursuant to this section must be filed in accordance with the provisions of section 5.

Section 12 is amended in its entirety to read as follows:

Sec. 12. Allocations of residual fuel oil—District I.

(a) This section provides for the making of import allocations not subject to license fee for the allocation period beginning May 1, of each year, of imports into District I of residual fuel oil to be used as fuel in District I.

(b) To be eligible for an import allocation not subject to license fee of residual fuel oil pursuant to this section a person must:

(1) Be in the business in District I of selling residual fuel oil to be used as fuel and have under his management and operational control a deepwater terminal located in District I into which there has been delivered residual fuel oil to be used as fuel which he owned at the time of delivery, or

(2) Be in the business in District I of selling residual fuel oil to be used as fuel and have a throughput agreement (warehouse agreement) with a deepwater terminal operator under which agreement the person has delivered to the terminal residual fuel oil to be used as fuel which he owned when it was so delivered. For the purpose of this section, "throughput agreement" means an agreement which provides for the delivery to a deepwater terminal by a person of residual fuel oil which he owns and for a right in such person to withdraw on call an identical quantity of such oil from the terminal. A bona fide throughput agreement will be deemed to exist only if the person operating under the agreement owns the oil at the time it is delivered to the terminal.

(c) A person seeking an import allocation not subject to license fee pursuant to this section must file an application with the Director on such form as he may prescribe. The application shall disclose such information as the Director may deem necessary in such detail as he may require. Applications must be filed in accordance with the provisions of section 5 of this regulation.

(d) For the allocation period May 1, 1974, through April 30, 1975, each eligible applicant under this section shall receive an allocation not subject to license fee to import residual fuel oil into District I to be used as fuel in District I computed according to the following formula:

$$\frac{\text{Applicant's average B/D allocation made pursuant to section 12 for the allocation period April 1, 1973 through April 30, 1974}}{\text{Average B/D allocations made pursuant to section 12 to all applicants for the allocation period April 1, 1973 through April 30, 1974.}} \times 2{,}610{,}000 \text{ B/D}$$

(e) No allocation made pursuant to this section may be sold, assigned or otherwise transferred. Licenses issued under allocations made pursuant to this section shall permit the importation only of residual fuel oil into District I for use as fuel oil in District I.

Section 13 is amended in its entirety to read as follows:

Sec. 13. Finished products.

(a) For the allocation period May 1, 1974 through April 30, 1975 there is allocated to the Department of Defense 18,000 average barrels per day of imports of finished products not subject to license fee into Districts I–IV and 6,750 average barrels per day of imports of finished products not subject to license fee into District V. For the same allocation period there is allocated 15,000 average barrels per day of imports of finished products not subject to license fee into Districts I–IV pursuant to paragraph (b) of section 12 of Presidential Proclamation 3279, as amended.

(b) No allocation made pursuant to this section may be sold, assigned, or otherwise transferred.

Section 14 is amended in its entirety to read as follows:

Sec. 14. Maximum levels of imports—Puerto Rico.

The levels are those established in Proclamation 3279, as amended.

Section 15 is amended in its entirety to read as follows:

Sec. 15.—Allocations of crude oil and unfinished oils—Puerto Rico.

(a)(1) This paragraph provides for the making of import allocations not subject to license fees other than those described as "long-term allocations" in paragraphs (k) (1), (2), (3), and (4) of Proclamation 3279, as amended, for the allocation period beginning May 1, of each year, of imports into Puerto Rico of crude oil and unfinished oils.

(2) For the allocation period May 1, 1974, through April 30, 1975, each eligible applicant under this paragraph shall receive an allocation not subject to license fees to import crude and unfinished oils into Puerto Rico computed according to the following formula:

$$\frac{\text{Applicant's Allocation pursuant to Section 15(a) Not Subject To License Fees of Imports of Crude and Unfinished Oils Into Puerto Rico for the Allocation Period April 1, 1973, to April 30, 1974, Expressed in B/D}}{\text{Total Allocations pursuant to Section 15(a) Not Subject to License Fees of Imports of Crude and Unfinished Oils Into Puerto Rico for the Allocation Period April 1, 1973, to April 30, 1974, Expressed in B/D}} \times 204{,}499 \text{ B/D}$$

(b) No allocation made pursuant to this section may be sold, assigned or otherwise transferred.

Section 16 is amended in its entirety to read as follows:

Sec. 16. Allocations of finished products—Puerto Rico.

(a)(1) This paragraph provides for the making of import allocation not subject to license fees for the allocation period beginning May 1, of each year, of imports into Puerto Rico of finished products (other than residual fuel oil to be used as fuel in Puerto Rico).

(2) For the allocation period May 1, 1974, through April 30, 1975, each eligible applicant under this paragraph shall receive an allocation not subject to license fees to import finished products, other than residual fuel oil to be used as fuel in Puerto Rico, into Puerto Rico, computed according to the following formula:

$$\frac{\text{Applicant's Allocation pursuant to Section 16(a) Not Subject To License Fees of Imports Into Puerto Rico of Finished Products (Other Than Residual Fuel Oil To Be Used As Fuel in Puerto Rico) During the Calendar Year 1973, Expressed in B/D}}{\text{Total Allocations pursuant to Section 16(a) Not Subject To License Fees of Imports Into Puerto Rico of Finished Products (Other Than Residual Fuel Oil To Be Used As Fuel in Puerto Rico) During the Calendar Year 1973, Expressed in B/D}} \times 1{,}293 \text{ B/D}$$

(b)(1) This paragraph provides for the making of import allocations not subject to license fees for the allocation period beginning May 1, of each year, into Puerto Rico of residual fuel oil to be used as fuel in Puerto Rico.

(2) For the allocation period May 1, 1974, through April 30, 1975, each eligible applicant under this paragraph shall receive an allocation not subject to license fees to import residual fuel oil to be used as fuel in Puerto Rico, into Puerto Rico, computed according to the following formula:

$$\frac{\text{Applicant's Allocation pursuant to Section 16(b) Not Subject to License Fees of Imports Into Puerto Rico of Residual Fuel Oil to be Used as Fuel in Puerto Rico During the Calendar Year 1973, Expressed in B/D}}{\text{Total Allocations pursuant to Section 16(b) Not Subject to License Fees of Imports Into Puerto Rico of Residual Fuel Oil to be Used As Fuel in Puerto Rico During the Calendar Year 1973, Expressed in B/D.}} \times 1{,}484 \text{ B/D}$$

(c) No allocation made pursuant to this section may be sold, assigned, or otherwise transferred.

Paragraphs (a), and (b) (1) and (4) of Section 17 are amended, and a new paragraph (c) is added so that Section 17 in its entirety reads as follows:

Sec. 17. Use of imported crude oil and unfinished oils.

(a) Except as provided in paragraphs (b) and (c) of this section, each person who imports crude oil or unfinished oils under a license issued pursuant to an allocation made under sections 9, 10, 11, 15, 25, or 25A of this regulation must process the oils so imported in his own refinery, petrochemical plant, or petrochemical capacity.

(b)(1) Subject to the provisions of this paragraph (b), a person who imports crude oil or unfinished oils under an allocation made under sections 9, 10, 11, 25, 25A, or paragraph (a) of section 15 of this regulation, may exchange his imported crude oil either for domestic crude oil or domestic unfinished oils or exchange his imported unfinished oils either for domestic unfinished oils or for domestic crude oil. However, a person receiving an allocation under section 9 or 25A may be restricted in the exchange of imported unfinished oils, as provided in paragraph (c) of section 9 and paragraph (j) of section 25A.

(2) A proposed agreement for each such exchange must be reported to the Director before any action involved in the exchange is taken.

(3) Each such exchange must be effected on a ratio of not less than 1 barrel of domestic oil for each barrel of imported oil unless a different exchange ratio is approved by the Director.

(4) In any such exchange, the person who is exchanging oil imported pursuant to an allocation under sections 9, 10, 11, 15, 25, or 25A for domestic oil must take delivery of the domestic oil and process it in his own refinery or petrochemical plant, located in the same district for which the allocation is granted, not later than 150 days after the end of the allocation period in which the exchange is made. If requested the Director may extend this period if it is shown that the person receiving the domestic oil cannot process the oil in the allotted time.

(5) Each such exchange must be on an oil-for-oil basis; however, settlements, credits, monetary, or accounting adjustments reflecting the relative values of the oils involved in the exchange are permissible.

(6) Any such exchange must not be otherwise unlawful.

(c) Imported crude oil or unfinished oils which are sold to meet the requirements of other Regulations published by the Federal Energy Office shall not be subject to the provisions of paragraph (a) of this section.

Paragraph (b), (e)(3) and (4), and (l) of section 25 are amended so that section 25 in its entirety reads as follows:

Sec. 25. Allocations of crude oil, unfinished oils and finished products—Districts I–IV, District V, Puerto Rico, the Virgin Islands, Guam, American Samoa, and Foreign Trade Zones—new, expanded or reactivated refinery capacity based upon estimated and actual inputs.

(a)(1) The Director may make allocations not subject to license fees of imports of crude oil, unfinished oils, and finished products with respect to new, expanded or reactivated refinery capacity as provided in this section.

The plant additions and modifications which have resulted in the new, expanded, or reactivated refinery capacity need not when taken independently meet the definition of refinery capacity as defined in section 22 of this Regulation: *Provided*, That such additions and modifications are an integral part of a facility that does qualify as refinery capacity.

(2) A person seeking such an allocation must file an application in the form prescribed by the Director. The applica-

V 39 N 54 MAR 19 74 XUM

tion shall disclose in detail such information as the Director may require, including—

(i) The nature of the facility,

(ii) The location of the facility,

(iii) The products and the quantity of each product to be produced,

(iv) The capital outlay involved,

(v) The expected average barrels per day of qualified feedstocks inputs of such facility,

(vi) The identification of the feedstocks, and the source thereof,

(vii) The date that the facility went on-stream, or is scheduled to go on-stream,

(viii) Whether the application is for a new facility, an expansion or reactivation,

(ix) Whether this facility will replace an existing facility which is to be or has been shut down,

(x) In the case of an expansion, the certified inputs for the last three years to the particular refinery or identifiable crude processing facility for which the expansion is claimed.

(b)(1) Each increment of new, expanded or reactivated refinery capacity will be treated as a separate entity under this paragraph (b) for a total of sixty months.

(2) If the new, expanded or reactivated refinery capacity is scheduled to come on-stream during the allocation period for which the allocation is requested, the allocation shall be computed on the basis of inputs (divided by 365), which it is estimated will be made to such capacity during that allocation period. In the event the new, expanded or reactivated refinery capacity comes on-stream after January 31 of the allocation period for which the allocation is requested, the Director may, if requested by the applicant, extend the expiration date of the license or licenses to 120 days after the start-up date. An applicant who receives an allocation for a particular allocation period pursuant to this subparagraph (2) may be eligible for an allocation pursuant to paragraph (b)(3), (4), or (5) of this section for the succeeding allocation periods.

(3) If the new, expanded or reactivated refinery capacity has come on-stream during the allocation period immediately preceding the allocation period for which the allocation is requested, the allocation shall be computed on the basis of the sum (divided by 365) of (i) the refinery inputs actually made to the new, expanded or reactivated refinery capacity during the first eight months of the allocation period immediately preceding the allocation period for which the allocation is requested and (ii) the inputs which it is estimated will be made to such capacity during the next number of months which, when combined with the months in clause (i), will constitute a period of twelve months.

(4) If the new, expanded or reactivated refinery capacity has been on-stream for at least one year as of December 31, of the allocation period immediately preceding the allocation period for which the allocation is requested, the allocation shall be based on actual inputs (divided by 365) to the facility during the preceding twelve months ending December 31; *Provided*, That the facility will not have been on-stream in excess of sixty months during the allocation period for which the allocation is requested.

(5) If the new, expanded or reactivated refinery capacity has not been on-stream for a period of sixty months after earning an allocation under paragraph (b)(4) of this section, an allocation will be made for the next allocation year based on actual inputs (divided by 365) for the year ending December 31 of the previous allocation year. In computing the allocation, the Director will determine the number of days which, when added to the actual operating period in the previous allocation years, will constitute a period of sixty months. The facility will, for this number of days, earn an allocation under this section 25.

(c) Allocation with respect to new, expanded or reactivated refinery capacity shall be computed at seventy-five percent of estimated or actual qualified inputs to such facility as determined in paragraph (b)(2), (3), (4), or (5) of this section 25.

(d) With regard to the Virgin Islands, Guam, American Samoa, and foreign trade zones "qualified inputs" shall be limited to crude oil charged to the refinery.

(e)(1) If an allocation based in whole or in part on estimated inputs is made to an applicant pursuant to this section, the actual inputs submitted by the applicant as a basis for allocations in the next succeeding allocation period or periods for which the applicant applies for an allocation or allocations under this regulation shall be adjusted upward or downward to compensate for the difference between the estimated inputs and the actual inputs made during the period for which inputs were estimated.

(2) If the estimated inputs upon which an allocation is based exceed the actual inputs made by more than five percent of the estimated inputs, then, in addition to the adjustment downward provided by paragraph (e)(1) of this secton, the applicant shall be penalized for the overestimate as provided in this subparagraph (2). As a penalty, the actual inputs submitted by the applicant as a basis for allocation for the next succeeding period or periods for which the applicant applies for an allocation or allocations under this regulation shall be further reduced by the number of barrels by which the estimated inputs exceed the actual inputs by more than five percent. However, to the extent that an applicant demonstrates to the satisfaction of the Director that the excess of estimated inputs over actual inputs was attributable to acts of God, fire, government action, explosion, labor disputes, or other similar circumstances beyond the applicant's control, the Director may waive the penalty or reduce the number of barrels of excess for which the penalty will be imposed. Persons applying for and receiving allocations under this section whose new, expanded or reactivated refinery fails to come on-stream within the allocation period may be denied any allocation for the next succeeding period. The Director may elect not to apply this penalty in those cases where the applicant demonstrates to the satisfaction of the Director that a substantial effort was made to complete and to start-up such a facility and that the person's failure was attributable to acts of God, fire, government action, explosion, labor disputes, or other similar circumstances beyond the applicant's control.

(3)(i) Any person who has been granted an allocation for a new, expanded or reactivated refinery in Districts I–IV may avoid the penalty prescribed in paragraph (e)(2) of this section by returning on or before January 31 of the period for which the allocation was granted such a license or licenses, for a downward adjustment, or, in lieu of returning such license or licenses, returning for downward adjustment a license issued to the person under section 10.

(ii) Any person who has been granted an allocation for a new, expanded, or reactivated refinery in District V may avoid the penalty prescribed in paragraph (e)(2) of this section by returning on or before January 31 of the allocation period for which the allocation and license were granted such a license for a downward adjustment, or, in lieu of returning such license, returning for downward adjustment a license issued in District V to the person under section 11.

(iii) Any person who has been granted an allocation for a new, expanded, or reactivated refinery in Puerto Rico, the Virgin Islands, Guam, American Samoa or a foreign trade zone may avoid the penalty prescribed in subparagraph (2) by returning on or before January 31 of the allocation period for which the allocation and license were granted such a license for a downward adjustment.

(iv) A request by an applicant who has received an allocation and license under this section for a downward adjustment shall be made in writing to the Director on or before January 31 of the allocation period for which the allocation and license were granted.

(4) The Director shall not issue a license under an allocation made pursuant to this section until (i) an on-the-spot evaluation of the new, expanded or reactivated refinery capacity has been conducted by the compliance representatives of the Office of Oil and Gas and (ii) a written determination has been made by the Director that the facility is a bona fide refinery capacity as certified in the application, and that construction or reactivation has so far progressed that, in the Director's judgment, the plant will within the calendar quarter following the date of such determination be ready for start-up and trials.

(f) No license issued for allocations made under this section may be sold, assigned, or otherwise transferred.

(g)(1) As used in this section 25, "expanded refinery capacity" includes expansion of existing facilities by the addition of equipment, such as, but not limited to, stills, towers, pumps, and conversion units, or such additions to or modification of an existing refinery or identifiable crude processing capacity within an existing refinery as have resulted in an increased processing capability of not less than fifteen percent above the base capacity established for the particular refinery capacity under consideration. This base capacity will be the average certified inputs to the particular refinery or identifiable crude processing facility being expanded for the highest two of the last three input years.

(2) As used in this section 25, "reactivated refinery capacity" means restoration to operation of refinery capacity which had been shut down for not less than twelve months immediately preceding its reactivation.

(h) An applicant to whom an allocation is made under this section shall not receive an allocation for the same refinery capacity under section 10 or 11.

(i)(1) Except as provided in subparagraph (2) of this paragraph, an allocation made pursuant to this section 25 will be for crude oil only.

(2) Allocations made pursuant to this section 25 to persons for new, expanded or reactivated refinery capacity located in American Samoa, Guam, the Virgin Islands or foreign trade zones shall be for import into Districts I–V or Puerto Rico of unfinished oils or finished products. Such unfinished oils or finished products must have been manufactured in the facility earning the allocation. Unfinished oils imported pursuant to an allocation covered by this subparagraph cannot be counted as qualified refinery inputs in Districts I–IV, District V, or Puerto Rico.

(j) An applicant may not receive an allocation under this section 25 for new, expanded, or reactivated refinery capacity for which inputs were included in applications filed pursuant to section 10 or 11 for allocation periods beginning on or before January 1, 1973.

(k) An applicant may not receive an allocation under this section 25 for new, expanded or reactivated refinery capacity if the same refinery capacity is subject to a long term allocation as defined in Presidential Proclamation 3279, as amended.

(l) Persons wishing to qualify for an allocation under this section 25 must file an application in accordance with the provisions of section 5.

Paragraphs (a)(1), and (3), (e)(2), (3), (4), and (5), (g)(3), and (4), (i)(1), and (k) of section 25A are amended so that section 25A in its entirety reads as follows:

Sec. 25A. Allocations of crude oil and unfinished oils—Districts I–IV, District V, and Puerto Rico—new, expanded or reactivated "petrochemical capacity" based upon estimated and actual inputs.

(a)(1) The Director may make allocations not subject to license fees of imports of crude oil and unfinished oils with respect to new, expanded or reactivated "petrochemical capacity" as provided in this section. The plant additions and modifications which have resulted in the new, expanded, or reactivated "petrochemical capacity" need not when taken independently meet the definition of "petrochemical capacity" as defined in paragraph (b) of this section: *Provided*, That such additions and modifications are an integral part of the facility that does qualify as "petrochemical capacity."

(2) A person seeking such an allocation must file an application in the form prescribed by the Director. The application shall disclose in detail such information as the Director may require, including—

(i) The nature of the facility.

(ii) The location of the facility.

(iii) The petrochemicals and the pounds of each petrochemical produced or to be produced.

(iv) The pounds of carbon and hydrogen in the petrochemicals produced from qualified "petrochemical capacity" inputs.

(v) The capital outlay involved.

(vi) The identification of each feedstock and the source thereof.

(vii) The date that the facility went onstream or is scheduled to go onstream.

(viii) Whether the application is for a new facility, an expansion, or reactivation.

(ix) Whether this facility will replace an existing facility which is to be or has been shut down.

(x) In the case of an expansion, the certified pounds of each petrochemical produced for the last three years in the particular "petrochemical capacity" for which the expansion is claimed.

(3) Applications for allocations under paragraph (e) of this section must be filed in accordance with the provisions of section 5.

(b) For purposes of this section "petrochemical capacity" means a facility or plant complex:

(1) Which includes equipment for converting hydrocarbons to petrochemicals.

(2) Which manufactures for plant use or sale one or more separate and distinct petrochemicals by conversion of each separate "petrochemical capacity input" feedstock stream which is claimed by an applicant as a basis for obtaining an allocation.

(c) For purposes of this section "petrochemical capacity inputs" means feedstocks charged to a "petrochemical capacity."

(1) And include only:

(i) Crude oil,

(ii) Unfinished oils (except those unfinished oils specifically excluded in paragraph (e)(2) of this section) produced in Districts I–IV and District V and Puerto Rico and unfinished oils imported pursuant to an allocation.

(2) But do not include:

(i) Unfinished oils which are produced in a "petrochemical capacity" or petrochemical plant in the manufacture of petrochemicals and subsequently charged to a unit which is part of the same "petrochemical capacity" or petrochemical plant in which they were produced or to any other "petrochemical capacity" or petrochemical plant which is owned or controlled by the same person who claims the initial "petrochemical capacity inputs" or petrochemical plant inputs from which the unfinished oils are derived.

(ii) Unfinished oils which are obtained by transactions such as sales, purchases, or exchanges which are designed to avoid the exclusion specified in paragraph (c)(2)(i) of this section, and

(iii) Benzene which met the ASTM standards for nitration grade or cumene, ethylbenzene, isoprene, meta-xylene, ortho-xylene or para-xylene which had a purity of 95 percent or more by weight but which subsequently has been recycled and mixed with other hydrocarbons, commingled, or purposely debased.

(d) For purposes of this section each item on the schedule in paragraph (k) of section 9B of this regulation with the exception of changes in the "condition" of several items listed and additions made, as noted below, is a petrochemical if and only if, it conforms to any notation opposite the item in column 2 and to the condition specified opposite the item in column 3. The "conditions" amended and additions made to the schedule in paragraph (k) of section 9B are as follows:

D—ASTM nitration grade.
E—Petrochemical must be recovered in a state of 95 percent purity or more.

Petrochemical	Limitations	Conditions
Benzene	D	
Cumene	E	
Ethylbenzene	E	
Isoprene	E	
Meta-xylene	E	
Ortho-xylene	E	
Para-xylene	E	

(e)(1) Each increment of new, expanded or reactivated "petrochemical capacity" which has come onstream on or after January 1, 1972, will be treated as a separate entity under this paragraph (e) for a total of sixty months.

(2) If the new, expanded or reactivated "petrochemical capacity" is scheduled to come onstream during the allocation period for which the allocation is requested, the allocation shall be computed on the basis of inputs (divided by 365), calculated as in paragraph (f)(1) of this section, which it is estimated will be made to such capacity during the allocation period. In the event the new, expanded or reactivated "petrochemical capacity" comes onstream after January 31, of the allocation period for which the allocation is requested, the Director may, if requested by the applicant, extend the expiration date of the license or licenses to 120 days after the start-up date. An applicant who receives an allocation for a particular allocation period pursuant to this subparagraph (2) may be eligible for an allocation pursuant to paragraph (e)(3), (4), or (5) of this section for the succeeding allocation periods.

(3) If the new, expanded or reactivated "petrochemical capacity" has come onstream during the allocation period immediately preceding the allocation

V 39 54 MAR 19 74 XUM

period for which the allocation is requested, the allocation shall be computed on the basis of the sum (divided by 365) of (i) the "petrochemical capacity inputs" calculated as in paragraph (f)(1) of this section, actually made to the new, expanded or reactivated "petrochemical capacity" during the first eight months of the allocation period immediately preceding the allocation period for which the allocation is requested and (ii) the inputs, calculated as in paragraph (f)(1) of this section which it is estimated will be made to such capacity during the next number of months which, when combined with the months in paragraph (e)(3)(i) of this section, will constitute a period of twelve months.

(4) If the new, expanded or reactivated "petrochemical capacity" has been onstream for at least one year as of December 31, of the allocation period immediately preceding the allocation period for which the allocation is requested, the allocation shall be based on actual inputs (divided by 365), calculated as in paragraph (f)(1) of this section, to the facility during the preceding twelve months ending September 30: *Provided*, That the facility will not have been onstream in excess of sixty months during the allocation period for which the allocation is requested.

(5) If the new, expanded or reactivated "petrochemical capacity" has not been onstream for a period of sixty months after earning an allocation under subparagraph (4) of this paragraph (e), an allocation will be made for the next allocation year based on actual inputs (divided by 365), calculated as in paragraph (f)(1) of this section, for the year ending December 31 of the previous allocation year. In computing the allocation, the Director will determine the number of days which, when added to the actual operating period in the previous allocation years, will constitute a period of sixty months. The facility will for this number of days, earn an allocation under this section 25A.

(f)(1) The Director shall issue allocations with respect to new, expanded or reactivated "petrochemical capacity" based on inputs which will be calculated in the following manner:

$$\frac{\text{Total weight in pounds of actual and estimated carbon and hydrogen from qualified "petrochemical capacity inputs" contained in petrochemicals produced during any applicable allocation period}}{200} = \text{Qualified inputs for the allocation period in barrels}$$

(2) The allocation shall be equal to the qualified inputs, calculated as in paragraph (f)(1) of this section, to such facilities as determined in paragraph (e)(2), (3), (4) or (5) of this section 25A, whichever is applicable.

(3) For purposes of this section, where a person produced a petrochemical from a combination of inputs which qualify, under paragraph (c) of this section and inputs which do not so qualify, the hydrogen and carbon content of the produced petrochemical shall be deemed to have been derived entirely from the qualified inputs to the full extent of such qualified inputs except that such hydrogen and carbon shall not be deemed to have been derived from a qualified input from which the carbon and hydrogen could not actually have been derived.

(g)(1) If an allocation based in whole or in part on estimated inputs, calculated as in paragraph (f)(1) of this section, is made to an applicant pursuant to this section, the actual inputs calculated as a basis for allocations in the next succeeding allocation period or periods for which the applicant applies for an allocation or allocations under this regulation shall be adjusted upward or downward to compensate for the difference between the calculated estimated inputs and actual inputs made during the period for which inputs were estimated.

(2) If the calculated estimated inputs upon which an allocation is based exceed the calculated actual inputs made by more than ten percent of the calculated estimated inputs, then, in addition to the adjustment downward provided by paragraph (g)(1) of this section, the applicant shall be penalized for the overestimate as provided in this subparagraph (2). As a penalty, the calculated actual inputs submitted by the applicant as a basis for allocation for the next succeeding period or periods for which the applicant applies for an allocation or allocations under this regulation shall be further reduced by the number of barrels by which the calculated estimated inputs exceeded the calculated inputs by more than ten percent. However, to the extent that an applicant demonstrates to the satisfaction of the Director that the excess of calculated estimated inputs over calculated actual inputs was attributable to acts of God, fire, government action, explosion, labor disputes, or other similar circumstance beyond the applicant's control, the Director may waive the penalty or reduce the number of barrels of excess for which the penalty will be imposed. Persons applying for and receiving allocations under this section whose new, expanded or reactivated "petrochemical capacity" fails to come on stream within the allocation period may be denied any allocation for the next succeeding period. The Director may elect not to apply this penalty in those cases where the applicant demonstrates to the satisfaction of the Director that a substantial effort was made to complete and to start up such facility and that the person's failure was attributable to acts of God, fire, government action, explosion, labor disputes or other similar circumstance beyond the applicant's control.

(3)(i) Any person who has been granted an allocation for a new expanded or reactivated "petrochemical capacity" in Districts I–IV, District V or Puerto Rico may avoid the penalty prescribed in paragraph (g)(2) of this section by returning on or before January 31 of the period for which the allocation was granted such a license or licenses for a downward adjustment, or, in lieu of returning such license or licenses, returning for downward adjustment a license issued to the person under section 9.

(ii) A request by an applicant who has received an allocation and license under this section for a downward adjustment shall be made in writing to the Director on or before January 31 of the allocation period for which the allocation and license were granted.

(4) The Director shall not issue a license under an allocation made pursuant to this section until (i) an on-the-spot evaluation of the new, expanded or reactivated "petrochemical capacity" has been conducted by compliance representatives of the Office of Oil and Gas and (ii) a written determination has been made by the Director that the facility is a bona fide "petrochemical capacity" as certified in the application, and that construction or reactivation has so far progressed that, in the Director's judgment, the plant will within the calendar quarter following the date of such determination be ready for start-up and trials.

(h) No license issued for allocation made under this section may be sold, assigned, or otherwise transferred.

(i)(1) As used in this section 25A "expanded petrochemical capacity" includes expansion of existing facilities by the addition of equipment, such as, but not limited to, stills, towers, pumps, and conversion units, or such additions to or modification of existing "petrochemical capacity" or petrochemical plant or identifiable "petrochemical capacity" or petrochemical plant capacity within an existing "petrochemical capacity" or petrochemical plant as have resulted in an increased petrochemical production capability of not less than fifteen percent above the base capacity established for the particular "petrochemical capacity" or petrochemical plant under consideration. The base capacity will be the average of the sums of the certified production of each petrochemical produced in the particular "petrochemical capacity" or petrochemical plant or identifiable "petrochemical capacity" or petrochemical plant capacity being expanded for the highest two of the last three input years.

(2) As used in this section 25A, "reactivated petrochemical capacity" means restoration to operation of "petrochemical capacity" which had been shut down for not less than twelve months immediately preceding its reactivation.

(j) An allocation made pursuant to this section shall entitle a person to a license or licenses which will allow the importation of unfinished oils in an amount not exceeding, in the aggregate, 15% of the person's allocation. However, the Director shall permit a person holding such an allocation to import unfinished oils in an amount up to 100% of the allocation upon certification by him to the Director that such imported unfinished oils will not be exchanged, that such unfinished oils will be processed entirely in the petitioner's "petrochemical facilities," that the person will not charge to anyone of his plants a quantity of such unfinished oils in excess of the allocation made with respect to each such plant. The Director may, in special circumstances, permit a person holding such an allocation to import up to 100% of his allocation in the form of unfinished oils and to exchange such imports for like domestic material to be run entirely in the petitioner's "petrochemical facilities" in an amount not in excess of the allocation made with respect to each such plant. Annually beginning May 1, 1974, the maximum amount of the person's allocation which may be imported under this section as unfinished oil will be reduced by the following percentage.

For Year Commencing	Percent Reduction of Person's Allocation of Unfinished Oils Imported Under This Section
May 1, 1974	10
May 1, 1975	20
May 1, 1976	35
May 1, 1977	50
May 1, 1978	65
May 1, 1979	80
May 1, 1980	100

(k) A person who imports crude oil or unfinished oils under an allocation made under this section, except as provided in paragraph (j) of this section, may exchange his imported crude oil either for domestic crude oil or for domestic unfinished oils or exchange his imported unfinished oils either for domestic unfinished oils or for domestic crude oil. All such exchanges shall be governed by the provisions of sevtion 17 of this regulation.

(l) The hydrocarbon content of materials upon which an allocation under section 9 or section 9B of this regulation is based will not qualify as a basis for an allocation under this section.

(m) An applicant may not receive an allocation under this section 25A for new, expanded or reactivated "petrochemical capacity" for which inputs have been included in applications fined pursuant to section 9.

Section 28 is amended in its entirety to read as follows:

Sec. 28. Allocations of low sulphur residual fuel oil—District V.

(a) This section provides for the making of allocations of imports, not subject to license fee, into District V of low sulphur residual fuel oil to be used as fuel in District V. As used in this section 28, "low sulphur residual fuel oil" means (1) residual fuel oil to be used as fuel which is manfactured or produced in a foreign area and which contains not more than five-tenths of one percent (0.5%) sulphur by weight, or (2) residual fuel oil to be used as fuel which is manufactured by facilities in a foreign trade zone located in District V and which has a sulphur content not exceeding the percent by weight required by local government requirements.

(b) To be eligible for an allocation not subject to license fee of low sulphur residual fuel oil under this section a person must:

(1) Be in the business in District V of selling residual fuel oil to be used as fuel and have under his management and operational control a deepwater terminal located in District V into which there has been delivered low sulphur residual fuel oil to be used as fuel which he owned at the time of delivery, such delivery being the first delivery of that oil into a deepwater terminal in District V; or

(2) Be in the business in District V of selling residual fuel oil to be used as fuel and have a throughput agreement (warehouse agreement) with a deepwater terminal operator under which agreement the person has delivered to the terminal low sulphur residual fuel oil to be used as fuel which he owned when it was so delivered, such delivery being the first delivery of that oil into a deepwater terminal in District V. For the purposes of this section, "throughput agreement" means an agreement which provides for the delivery to a deepwater terminal by a person of residual fuel oil

(i) Is on waterways that permit the which he owns and for a right in such person to withdraw on call an identical quantity of such oil from the terminal. A bona fide throughput agreement will be deemed to exist only if the person operating under the agreement owns the oil at the time it is delivered to the terminal and only if that delivery is the first delivery of that oil into a deepwater terminal in District V.

(c) A person seeking an import allocation not subject to license fee pursuant to this section must file an application with the Director on such form as he may prescribe. The application shall disclose such information as the Director may deem necessary in such detail as he may require. Applications must be filed in accordance with the provisions of section 5 of this regulation.

(d) For the allocation period May 1, 1974, through April 30, 1975, each eligible applicant under this section shall receive an allocation not subject to license fee to import low sulphur residual fuel oil into District V to be used as fuel in District V computed according to the following formula:

$$\frac{\text{Applicant's average B/D allocation made pursuant to section 28 for the allocation period January 1, 1973 through April 30, 1974}}{\text{Average B/D allocations made pursuant to section 28 to all applicants for the allocation period January 1, 1973 through April 30, 1974}} \times 68{,}040 \text{ B/D}$$

(e) No allocation made pursuant to this section may be sold, assigned, or otherwise transferred. Licenses issued under allocations made pursuant to this section shall permit the importation only of residual fuel oil into District V for use as fuel oil in District V.

Paragraphs (b), (d) and (e) of Section 30 are amended so that Section 30 in its entirety reads as follows:

Sec. 30. Allocations of No. 2 fuel oil—District I.

(a) For the purposes of this section:

(1) The term "No. 2 fuel oil" means a finished product which has the following physical and chemical characteristics:

Closed cup flashpoint, degrees Fahrenheit.	Minimum 100.
Pour point, degrees Fahrenheit.	Maximum 20.
Water and sediment, percent.	Maximum 0.10.
Carbon residue on 10 percent residuum percent.	Maximum 0.35.
Distillation temperature degrees Fahrenheit, 90 percent point.	Maximum 675, Minimum 540.
Viscosity, Saybolt Universal seconds at 100° F.	Maximum 40.0, Minimum 33.0.
Gravity API	Minimum 30.0.

(2) The term "Western Hemisphere" means North America, Central America, South America, and the West Indies.

(3) The term "deepwater terminal" means a permanent land installation which:

(i) Consists of bulk storage tanks having not less than 100,000 barrels of op-

(ii) Is on waterways at permit operational capacity, pumps and pipelines used for storage, transfer and handling of No. 2 fuel oil;

safe passage to the installation of a tanker rated 15,000 cargo deadweight tons, drawing not less than 25 feet of water; and

(iii) Has a berth that will permit the delivery of No. 2 fuel oil into the installation by direct connection from a tanker rated at 15,000 cargo deadweight tons, drawing not less than 25 feet of water, and moored in berth. Cargo deadweight tons represent the carrying capacity of a tanker, in tons of 2,240 pounds, less the weight of fuel, water, stores and other items necessary for use on a voyage.

(4) The term "throughput agreement" means a written agreement which provides for the delivery to a deepwater terminal by a person of No. 2 fuel oil which he owns at the time of delivery to the terminal and for a right in such person to withdraw on call an identical quantity of such oil from the terminal. Any transaction between persons involving sales, purchases, or exchanges of No. 2 fuel oil which were designed to gain allocation benefits for a person who would not otherwise be eligible shall not be deemed to constitute a throughput agreement.

(b) For the allocation period May 1, 1974, through April 30, 1975, 45,000 barrels per day of imports of No. 2 fuel oil, which is manufactured in the Western Hemisphere from crude oil produced in

V 39 I 54 MAR 19 74 XUM

the Western Hemisphere,[1] will be available for allocations in District I to eligible persons having qualified terminal inputs of No. 2 fuel oil in this district.

(c) (1) Except as provided in paragraph (c) (2) of this section, a person shall be eligible for an allocation of imports into District I of No. 2 fuel oil under paragraph (e) of this section:

(i) If he is in the business in District I of selling No. 2 fuel oil, has under his management and operational control a deepwater terminal which is located in District I and in which No. 2 fuel oil is handled, does not have a crude oil import allocation into Districts I–V or Puerto Rico under sections 9, 10, 11, 15, 25 or 25A of this Regulation and who, in the allocation period beginning prior to January 1, 1973, had received from the Secretary an allocation of imports into District I of No. 2 fuel oil.

(ii) If he is in the business in District I of selling No. 2 fuel oil and has a throughput agreement with a deepwater terminal operator in District I who does not have a crude oil import allocation into Districts I–V or Puerto Rico under sections 9, 10, 11, 15, 25, or 25A of this Regulation and who in the allocation period beginning prior to January 1, 1973, had received from the Secretary an allocation of imports into District I of No. 2 fuel oil.

(2) No person who has an allocation of imports into Districts I–V or Puerto Rico of crude oil under sections 9, 10, 11, 15, 25 or 25A of this Regulation shall be eligible for an allocation under paragraph (e) of this section.

(d) Persons seeking an allocation under this section must file an application with the Director on such form as he may prescribe. Applications must be filed in accordance with the provision of section 5 of this Regulation.

(e) For the allocation period May 1, 1974 through April 30, 1975, each eligible applicant under this section shall receive an allocation of imports into District I of No. 2 fuel oil equal to 90 percent of the quantity allocated to him during the allocation period beginning January 1, 1973. Any volume of No. 2 fuel oil available for allocation but not allocated pursuant to the first sentence of this subparagraph shall be allocated among eligible applicants in the proportion each eligible applicant's allocation bears to the total allocated pursuant to the first sentence of this subparagraph.

(f) (1) An eligible applicant may count as qualified terminal inputs quantities of No. 2 fuel oil:

(i) Which were delivered during the period into a deepwater terminal in District I which was under his management and operational control or into a deepwater terminal with which the eligible applicant had a throughput agreement before the oil was delivered if he owned the oil when it was placed in the terminal and if the delivery constituted the first delivery of that oil to a deepwater terminal in District I, or;

(ii) Which the applicant owned, sold to a Federal agency or to an agency of a State or a political subdivision of a State, and delivered during the base period to a deepwater terminal in District I for the account of such agency, providing such delivery constituted the first delivery of that oil to a deepwater terminal in District I; or

(iii) Which was delivered to applicant's deepwater terminal in District I as a first delivery into a deepwater terminal in District I under a written agreement to purchase such oil and to which, pursuant to such agreement, the applicant took title, during the base period upon its withdrawal by him from the terminal.

(2) For the purpose of this paragraph (f), storage of No. 2 fuel oil at a refinery in which the oil was produced or delivery of No. 2 fuel oil into a deepwater terminal under the management and operational control of a person who has an allocation of imports of crude oil into Districts I–IV, District V or Puerto Rico under sections 9, 10, 11, 15, 25, or 25A of this regulation shall not be deemed to be a first delivery to a deepwater terminal in District I.

(g) No allocation made pursuant to this section may be sold, assigned, or otherwise transferred. Except as provided in paragraph (h) of this section, licenses issued under allocations made pursuant to this section shall permit the importation only of No. 2 fuel oil. No. 2 fuel oil imported under an allocation made pursuant to this section shall be sold for use as fuel in District I.

(h) A person holding an allocation under this section may obtain from the Director a license which will permit him to import crude oil into Districts I–IV in quantity not exceeding the amount of such allocation, upon a certification to the Director, in such form as he may prescribe, that the allocation holder has entered into an agreement with a refiner in Districts I–IV under which the allocation holder will receive No. 2 fuel oil (in a ratio of not less than 1 barrel of No. 2 fuel oil for each barrel of crude oil) in exchange for such crude oil so that an amount of No. 2 fuel oil at least equal to that covered by the license will be used in District I. Any license so issued shall be charged against the allocation made under this section. No such crude oil license may be sold, assigned, or otherwise transferred. However, settlements, credits, and accounting adjustments reflecting the relative values of No. 2 fuel oil and the crude oil involved in the exchange are permissible.

Paragraph (c) of section 32 is amended to read as follows:

Sec. 32. Allocations and fee-paid licenses for imports of crude oil, unfinished oils, and finished products—Districts I–IV, District V, Puerto Rico.

* * * * *

(c) (1) Except as provided in paragraph (c) (2) of this section applications for allocations and licenses under this section, to be issued at the rates prescribed in this section for a particular period and postmarked not later than midnight of the date in which such period expires, will qualify for issuance at the rate for the period in effect at the time the application was mailed. Any application for an allocation under this section postmarked later than midnight of the date upon which such period expires may at the option of the applicant be subject to the license fee applicable during the following license fee period or withdrawn. If the date upon which the period expires is a Saturday, Sunday, or holiday, the application will nevertheless qualify if it is postmarked not later than midnight of the next succeeding business day.

(2) With respect to imports from Canada of finished products made from Canadian crude or natural gas produced in Canada no import license is required and no license will be issued for the period prior to May 1, 1974. Persons wishing to import such finished products from Canada in the period beginning May 1, 1974 may file applications with the Director at any time beginning April 1, 1974. The effective date of licenses issued pursuant to such applications filed in April shall be May 1, 1974 or the actual date of issue, whichever is later, and the applicable license fees will be as shown in paragraph (i) (1) (ii) of this section for the period beginning May 1, 1974.

* * * * *

Paragraphs (a) and (c) of Section 34 are amended so that Section 34 in its entirety reads as follows:

Sec. 34. Mexican imports, Districts I–IV and District V.

(a) For the allocation period May 1, 1974 through April 30, 1975, the Director shall allocate, as provided in paragraph (c) of this section, approximately 29,250 average barrels daily of Mexican imports into Districts I–IV and District V.

(b) As used in this section, the term "Mexican imports" means imports from Mexico of crude oil which has been produced in Mexico and unfinished oils except ethane, propane, and butanes which have been derived from crude oil or natural gas liquids produced in Mexico.

(c) The Director shall make allocations to each eligible applicant for the allocation period May 1, 1974 through April 30, 1975 and subsequent allocation periods on the basis of the pro rata share of Mexican imports made by each applicant during the calendar year 1972, relative to the total of all Mexican imports made by all applicants during the calendar year 1972.

(d) Each eligible applicant shall make applications for an allocation under this section by letter only signed by an officer of the company. Applications will be in accordance with the provisions of section 5.

(e) No allocation made pursuant to this section shall be sold, assigned, or otherwise transferred.

Section 35 is amended in its entirety to read as follows:

Sec. 35. Imports of Canadian natural gas products—Districts I–IV.

(a) For each twelve month allocation period beginning May 1, of each year the Director shall in accordance with paragraph (c) of this section make allocations for the importation into Districts I–IV of natural gas products derived from Canadian natural gas.

(b) To be eligible for an allocation of imports under paragraph (c) of this section, a person must have imported Canadian natural gas products into Districts I–IV during the calendar year 1973.

(c) For the allocation period May 1, 1974, through April 30, 1975, the Director shall make allocations not subject to license fees to eligible applicants in accordance with the following formula:

$$\frac{\text{Eligible applicant's imports of Canadian natural gas products imported in 1973}}{\text{Total of Canadian natural gas products imported by all eligible applicants in 1973}} \times 101{,}700 \text{ B/D}$$

(d) Applications for an allocation under this section must be filed in accordance with section 5.

Medicaid Eligibility

Correction

In FR Doc. 74-5349 for the issue of Monday, March 1, 1974 appearing on page 9512, § 248.80, paragraph (c), second sentence should read as follows:

"Disability may be considered as continuing until the review team establishes the fact that the recipient's disability is no longer within the State's definition of permanent total disability, except that a determination by the Social Security Administration that a title XVI recipient's disability is no longer within the Federal definition of disability may be utilized by the State in lieu of a State review team's determination for individuals who are determined to be eligible for payments under title XVI on the basis of disability unless the State's title XIX plan includes a different definition of disability as described in paragraph (a) (1) of this section.

CHAPTER X—OFFICE OF ECONOMIC OPPORTUNITY

PART 1068—COMMUNITY ACTION PROGRAM GRANTEE FINANCIAL MANAGEMENT

Subpart—Valuation of Volunteered Personal Services for Purposes of Computing the Non-Federal Share

BACKGROUND. Since 1967 OEO has required the use of nationally-set rates for various skills and professions when computing the non-Federal share. In the early years of OEO, these rates were an administrative benefit to both grantees and OEO, i.e., each grantee could use the OEO rates as a ready reference and thus was not required to produce a time-consuming comparability study; and this system demanded the least amount of time for a limited OEO staff to administer. The prior policy statement on this subject was issued as OEO Instruction 6802–1, dated December 28, 1971.

However, in keeping with the practices of other relevant Federal agencies and the Office of Management and Budget's proposed policy on this subject, OEO's policy on valuation of volunteered personal services, as stated in OEO Instruction 6802–1, is superseded by this subpart. The new policy eliminates the requirement that grantees use the nationally-set rates and now requires them to use rates consistent with those regular rates paid for similar work in the local labor market in which they compete for the kind of services involved.

Sec.
1068.9–1 Applicability of this subpart.
1068.9–2 Policy.
1068.9–3 Procedures.
1068.9–4 Maintenance of effort.
1068.9–5 Required documentation.

AUTHORITY: Sec. 602(n), 78 Stat. 530 (42 U.S.C. 2942).

§ 1068.9–1 Applicability of this subpart.

This subpart applies to all grants and contracts under Titles II and VII of the Economic Opportunity Act, as amended, in which non-Federal share is required.

§ 1068.9–2 Policy.

As of the effective date of this subpart, all rates for volunteers should be consistent with those regular rates paid for similar work in the labor market in which the grantee competes for the kind of services involved. However, if OEO has already approved rates for an existing grant and the rates are higher than the rates would be if the grantee implemented this new policy, the grantee has the option of using the old rates.

§ 1068.9–3 Procedures.

(a) *Valuation of volunteered services—general.* Each hour of volunteered services may be counted as non-Federal share if the service is an integral and necessary part of the OEO-approved program (e.g., the time donated by a lawyer who voluntarily contributes his services free-of-charge in a Legal Services program). Applicants must demonstrate in their budget documents that the in-kind services volunteered will make a meaningful and desirable contribution to the grant program. Applicants covered by OEO Instruction 6710–1, Change 6, need only to maintain such budget documentation on file for OEO review as requested.

(b) *Valuation of volunteer services—grantee staff and members of boards and advisory committees.* (1) Services of persons regularly employed by grantees may not be counted as non-Federal share.

(2) Time spent by members of a governing board, administering board, area board or council, county board, or advisory committee of the grantee or delegate agency may or may not be included as a contribution to the non-Federal share as follows:

(i) it may not be included when the time is spent on the development, conduct, and administration of the program; and

(ii) when the board or committee members are acting in their capacity as members of such bodies.

(iii) It may be included if they are volunteering their services for work on the program which someone would otherwise have to be hired to perform.

§ 1068.9–4 Maintenance of effort.

Voluntary services for which non-Federal share is claimed must be in addition to similar services that were volunteered before the inauguration of assisted activity and must not be diverted from other services to the poor.

§ 1068.9–5 Required documentation.

All volunteered services claimed as non-Federal share must be substantiated by time cards or records that are signed by both the volunteer and his supervisor as is required for all other employees. Such records must show the actual hours worked and the specific duties performed. They should also indicate the basis for determining the rate of volunteer's contribution and such documentation must be available for audit.

This subpart is effective April 18, 1974.

ALVIN J. ARNETT,
Director.

[FR Doc.74-6202 Filed 3-15-74;8:45 am]

[1] The Chairman of the Oil Policy Committee has advised that, because of supply, price, and other considerations, he finds that the requirement, contained in section 2(a) (1) of Proclamation 3279, as amended, that No. 2 fuel oil be manufactured in the Western Hemisphere from crude oil produced in the Western Hemisphere, is unduly restricting the availability of such oil for importation into District I and is not required for the national security. Accordingly, such requirement is hereby suspended. On September 1 of each year that this suspension continues, the Deputy Secretary of the Treasury, in accordance with his surveillance responsibilities, shall examine the imports by deepwater terminal operators to determine whether Western Hemisphere imports have equalled 16,425,000 total barrels or exceeded the equivalent of 45,000 barrels per day on an annual basis, and, if not, whether supply, price, and other considerations warrant reimposition of the Western Hemisphere preference requirements. He shall so advise the Secretary who shall then take such steps as are necessary to insure that, to the extent available, license fee-exempt imports of No. 2 fuel oil from Western Hemisphere sources shall equal the annual equivalent of this amount.

Title 49—Transportation

CHAPTER X—INTERSTATE COMMERCE COMMISSION

[Ex Parte Nos. MC-5, 159]

PART 1043—SURETY BONDS AND POLICIES OF INSURANCE

PART 1084—SURETY BONDS AND POLICIES OF INSURANCE

Limits of Liability

Order. At a session of the Interstate Commerce Commission, the Insurance Board, held at its office in Washington, D.C., on the 11th day of March 1974.

It appearing, that notice was given by notice of proposed rulemaking, dated January 7, 1974, published in FR page 2276, dated January 18, 1974, pursuant to section 4(a) of the Administrative Procedure Act (60 Stat. 237, 5 U.S.C. 1003) of the proposed amendment of § 1043.2(a) of Part 1043 (49 CFR 1043.2 (a) of the Code of Federal Regulations governing the filing of insurance or other security for the protection of the public, under the authority contained in Section 215 of the Interstate Commerce Act (49 Stat. 557, as amended; 49 U.S.C. 315), and the proposed amendment of § 1084.3 (b) of Part 1084 (49 CFR 1084.3(b)) of the Code of Federal Regulations governing the filing of insurance or other security for the protection of the public, under the authority contained in section 403(d) of the Interstate Commerce Act (56 Stat. 285; 49 U.S.C. 1003);

It further appearing, that interested parties were requested to file with the Commission, within thirty days from the publication of the notice of proposed rulemaking, written statements of facts, opinions, or arguments concerning the proposed amendments;

It further appearing, that a statement was received from Auto Driveaway Company within thirty days from the publication date opposing the proposed amendments and requesting that they not be adopted;

And it further appearing, that the petition of Auto Driveaway Company has been given consideration and has not been found to warrant any change in the amendments as proposed and good cause appearing therefor;

It is ordered, that § 1043.2(a) of Title 49 of the Code of Federal Regulations be, and it is amended to read as follows:

§ 1043.2 Insurance, minimum amounts.

• • • • • •

(a) *Motor carriers: bodily injury liability, property damage liability.*

(1) Kind of equipment	(2) Limit for bodily injuries to or death of one person	(3) Limit for bodily injuries to or death of all persons injured or killed in any one accident (subject to a maximum of $100,000 for bodily injuries to or death of one person)	(4) Limit for loss or damage in any one accident to property of others (excluding cargo)
Passenger equipment (seating capacity): 12 passengers or less	$100,000	$300,000	$50,000
More than 12 passengers	160,000	500,000	50,000
Freight equipment: All motor vehicles used in the transportation of property	100,000	300,000	50,000

• • • • • •

(Sec. 215, 49 Stat. 557, as amended (49 U.S.C. 315))

It is further ordered, That § 1084.3(b) of Title 49 of the Code of Federal Regulations be, and it is hereby, amended to read as follows:

§ 1084.3 Limits of liability.

• • • • • •

(b) Public liability and property damage. Limits for bodily injury to or death of any person, or loss of or damage to property, except property referred to in paragraph (a) of this section:

(1) For bodily injuries to or death of one person—$100,000.

(2) For bodily injuries to or death of all persons injured or killed in any one accident subject to a maximum of $100,000 for bodily injuries to or death of one person—$300,000.

(3) For loss of or damage in any one accident to property, excluding cargo, of others—$50,000.

(Sec. 403(c), 56 Stat. 285; (49 U.S.C. 1003))

It is further ordered, That the rules herein prescribed, are hereby prescribed to become effective July 1, 1974;

And it is further ordered, That notice of this order shall be given to the general public by depositing a copy thereof in the Office of the Secretary of the Commission for inspection, and by filing a copy with the Director, Office of the Federal Register.

By the Commission, Insurance Board.

[SEAL] ROBERT L. OSWALD, *Secretary.*

[FR Doc.74-6289 Filed 3-18-74;8:45 am]

Proposed Rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rulemaking prior to the adoption of the final rules.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[15 CFR Part 922]

MARINE SANCTUARIES

Program Guidelines

The following guidelines setting forth the procedures by which areas may be nominated as marine sanctuaries and the policies and procedures for the selection, designation, and operation of a marine sanctuary are proposed by the Administrator of the National Oceanic and Atmospheric Administration pursuant to the authority of Title III of the Marine Protection, Research, and Sanctuaries Act of 1972 (Pub. L. 92-532; 86 Stat. 1061) hereinafter referred to as the Title, and the delegation of authority of the Secretary of Commerce dated March 13, 1974, authorizing the Administrator of the National Oceanic and Atmospheric Administration to exercise the authority under the Title.

The Title recognizes that certain areas of the ocean waters, as far seaward as the outer edge of the Continental Shelf, or other coastal waters where the tide ebbs and flows, or of the Great Lakes and their connecting waters need to be preserved or restored for their conservation, recreational, ecological or esthetic values.

The Secretary of Commerce, after consultation with the Secretaries of State, Defense, the Interior, Transportation, the Administrator of the Environmental Protection Agency, other interested Federal Agencies, the State(s) involved and with the approval of the President, may designate a marine sanctuary.

Prior to designating a marine sanctuary which includes waters lying within the territorial limits of any state or subjacent to the subsoil and seabed within the seaward boundary of a coastal state, the Secretary shall consult with and give due consideration to the view of the responsible state officials involved. A designation under this section shall become effective sixty days after it is published, unless the governor of any state involved shall, before the expiration of the sixty day period, certify to the Secretary that the designation, or a specified portion thereof, is unacceptable to his state, in which case the designated sanctuary shall not include the area certified as unacceptable until such time as the governor withdraws his certification of unacceptability.

Where areas outside the territorial sea are involved, the State Department is to take whatever action is necessary to negotiate with other Governments to assure protection of a sanctuary.

Prior to a designation of a marine sanctuary, public hearings must be held in the coastal areas most affected by the designation. Regulations are to be promulgated for each such designation.

These guidelines set forth the concepts and procedures under which marine sanctuaries will be designated and managed.

Pursuant to the Office of Management and Budget (OMB) memorandum of October 5, 1971, which established a procedure for improving interagency coordination of proposed agency regulations, standards and guidelines pertaining to environmental quality, the following guidelines have been circulated to all interested Federal agencies for their review and comment. Comments submitted will be reviewed before final guidelines are published.

Prior to adoption of the proposed guidelines as final guidelines, consideration will be given to comments which are submitted in writing to the Office of Coastal Environment, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, Rockville, Maryland 20852, before May 1, 1974.

ROBERT M. WHITE, *Administrator.*

March 14, 1974.

922.23 Consultation Process.
922.24 Designation.
922.25 Operation.

Subpart A—General

§ 922.1 Policy and objectives.

(a) The Marine Sanctuaries Program shall be conducted under the expressed policy of the Title which is to designate areas from the near high tide line to the outer edge of the continental shelf, as defined in the Convention of the Continental Shelf (IS U.S.T. 74; TIAS SS78), of other coastal waters where the tide ebbs and flows, or of the Great Lakes and their connecting waters, which the Administrator determines necessary for the purpose of preserving or restoring such areas for their conservation, recreational, ecological, or esthetic values.

(b) Multiple use of marine sanctuaries as defined in this subpart will be permitted to the extent the uses are compatible with the primary purpose of the sanctuary.

(c) It is anticipated that the marine sanctuaries program will be conducted in close cooperation with section 312 of the Coastal Zone Management Act of 1972, Pub. L. 92-583, which recognizes that the coastal zone is rich in a variety of natural, commercial, recreational, industrial and esthetic resources of immediate and potential value to the present and future well-being of the nation and which authorizes the Secretary of Commerce to make available to a coastal State grants of up to 50 percent of the costs of acquisition, development and operation of estuarine sanctuaries.

§ 922.2 Programmatic objectives.

Marine Sanctuaries may be designated to preserve or restore areas for their conservational, recreational, ecological, or esthetic values in coastal waters. Anticipated examples include:

(a) Areas necessary to protect valuable, unique or endangered marine life, geological features, and oceanographic features.

(b) Areas to complement and enhance public areas such as parks, national seashores and national or state monuments and other preserved areas.

(c) Areas important to the survival and preservation of the nation's fisheries and other ocean resources.

(d) Areas to advance and promote research which will lead to a more thorough understanding of the marine ecosystem and the impact of man's activities.

Subpart B—Classifications of Marine Sanctuaries

§ 922.10 Classifications.

Marine sanctuaries will be established for one, or a combination of, the following purposes:

(a) *Habitat Preserves.* Preserves established under this concept are for the preservation, protection and management of essential or specialized habitats representative of important marine systems. Management emphasis will be toward preservation or restrictive use. This does not necessarily mean all human activity will be prohibited. However, the quantity and type of public use will be limited and controlled to protect the

V 39 54 MAR 19 74 XUM

values for which the preserve was created.

(b) *Species Preserves.* Preserves established under this concept are for conservation of genetic resources. Management emphasis will be to maintain species, populations and communities for restocking other areas and for reestablishment purposes in the future. The result will be a contribution to the goal stated by the Council on Environmental Quality, that is, "the widest possible diversity of and within species should be maintained for ecological stability of the biosphere and for use as natural resources." The orientation envisaged will be toward species preservation by protection of such areas as migratory pathways, spawning grounds, nursery grounds, and the constraints on these areas will be those necessary to achieve these purposes. Uses which are compatible with protection of the selected species will be permitted.

(c) *Research Areas.* Areas established under this concept will exist for scientific research and education and will be of two types: natural areas and field laboratories. Research natural areas will be left essentially undisturbed.

(1) In field laboratories certain manipulative research to ascertain the response to specific human modification may be permitted.

(2) The purpose of both types of research areas is to establish ecological baselines against which to compare and predict the effect of man's activities, and to develop an understanding of natural processes. Research areas will be chosen according to the biota they support and to include representative samples of the significant ecosystems in the nation. The use of the marine sanctuary authority for research purposes will insure that the area will be relatively unaffected for a long period of time, thus adding a measure of stability to a research program.

(d) *Recreational and Esthetic Areas.* Areas established under this concept will be based on esthetic or recreational value. These may be used to augment public lands already set aside by local, state or Federal government.

§ 922.11 Definitions.

As used in this part, the following terms shall have the meanings indicated below:

(a) "Administrator" means the Administrator of the National Oceanic and Atmospheric Administration.

(b) "Marine Sanctuary" means those areas of the ocean waters as far seaward as the outer edge of the Continental Shelf, as defined in the Convention of the Continental Shelf (IS U.S.T. 74, TIAS SS78), of other coastal waters where the tide ebbs and flows, of the Great Lakes and their connecting waters for the purpose of preserving or restoring such areas for their conservation, recreational, ecological or esthetic values.

(c) The term "multiple use" as used in this section shall mean the contemporaneous utilization of an area of resource for a variety of compatible purposes or to provide more than one-benefit. The term implies the long-term, continued uses of such resources in such a fashion that one use will not interfere with, diminish, or prevent other permitted uses.

(d) "Ocean waters" means those waters of the open seas lying seaward of the baseline from which the territorial sea is measured, as provided for in the Convention of the Territorial Sea and the Contiguous Zone (IS U.S.T. 1606, TIAS S639).

(e) "Person" means any private person or entity, or any officer, employee, agent, department, agency, or instrumentality of the Federal Government, or any state or local unit of government.

(f) "Secretary" means the Secretary of Commerce.

§ 922.12 Effect of Marine Sanctuary Designation for Waters Outside of U.S. Jurisdictional Limits.

The designation of a marine sanctuary and the regulations pertaining to it will be binding on United States citizens. In accordance with international law, the United States has exclusive jurisdiction over resources within the territorial sea and the contiguous zone and exercises sovereignty in the territorial sea subject only to the right of innocent passage. As to marine sanctuaries beyond the contiguous zone, U.S. regulations would be binding on foreign citizens in accordance with international law, including the 1958 Geneva Convention on the Continental Shelf. The extent that foreign citizens would otherwise be bound to follow regulations relating to sanctuaries beyond the contiguous zone would be dependent upon the State Department reaching agreements with the foreign nation involved. It is not anticipated by the Administrator that use restrictions would be imposed on U.S. citizens beyond the contiguous zone without also restricting the use of the same area to foreign citizens who have access to such use.

§ 922.13 Effect on International Principles involving Freedom of the Seas.

The designation of a marine sanctuary will not infringe upon the normal rights of innocent passage in territorial waters, the rights of navigation through international straits, or the freedoms of the high seas, including freedom of navigation.

Subpart C—Nomination of Candidates

§ 922.20 Nomination of Candidates.

The nomination of a given marine area for consideration as a designated marine sanctuary may result from studies carried out by Federal, State or local officials or from any other interested persons. Nominations should be addressed to:

Director, Office of Coastal Environment
National Oceanic and Atmospheric Administration
U.S. Department of Commerce
Rockville, Maryland 20852

The nomination for designation as a marine sanctuary must contain the following information:

(a) A general description of the area including the following information:

(1) Purpose for which the nomination is made;

(2) Geographic coordinates of the site;

(3) Plant and animal life in the area;

(4) Geological characteristics of the area;

(5) Present and prospective uses and impacts on the area.

§ 922.21 Analysis of Nomination.

(a) If a preliminary review demonstrates the feasibility of the nomination a more in depth study will be required. Factual information will be gathered to obtain an understanding of the:

(1) Animal and plant life;

(2) Geological features;

(3) Weather and oceanographic conditions and features;

(4) Present and potential recreational and economic uses;

(5) Present and potential adjacent land uses;

(6) Laws and programs of Federal, State and local government that apply to the area.

(b) An analysis will be made of how the sanctuary will impact on the present and potential uses and *vice versa* how these uses will impact on the primary purpose for which the sanctuary is being considered.

(c) The factual information and the results of the analysis activity will be used in preparation of a draft environmental impact statement and proposed regulations.

§ 922.22 Hearings.

(a) Before a marine sanctuary is designated under this section, the Administrator shall hold public hearings in the coastal areas which would be most directly affected by such designation, for the purpose of receiving and giving proper consideration to the views of any interested party. Such hearings shall be held no earlier than thirty days after the publication of a public notice thereof.

(b) The purpose of this section is to ensure that all interested parties have the opportunity to express their views. Public hearings need not be held on each proposal or nomination but only when sufficient facts and data are available to the Administrator which indicate that designation action appears to be feasible.

§ 922.23 Consultation Process.

The consultation process is designed to coordinate the interests of the state and various Federal departments and agencies, including the management of fisheries resources, the protection of national security and transportation interests, and the recognition of responsibility for the exploration and exploitation of mineral resources. All interests will be considered, and no sanctuary will be designated without complete coordination in this regard. In case of serious disagreement, among Federal departments, the Secretary, in cooperation with the Executive Office of the President, will seek to mediate the differences.

§ 922.24 Designation.

Subsequent to completion of the in depth study by the Administrator, a draft Environmental Impact Statement will be prepared and circulated for review in compliance with the Natural Environmental Policy Act of 1969 and implementing CEQ guidelines. The designation by the Administrator will clearly state the purpose for which the sanctuary is designated and regulations and guidelines promulgated under which it will operate.

§ 922.25 Operation.

The designation of a marine sanctuary establishes the basis for a continuous operating program designed to maintain the purpose for which the sanctuary is designated. This involves a program of continuous scientific evaluation, surveillance, and enforcement to insure the integrity of the system. An interpretative program may be conducted to aid in public understanding and enjoyment of the sanctuary. The mechanisms for this will be specific regulations established for each designated marine sanctuary.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

[45 CFR Part 127]

GRANTS FOR DEMONSTRATION PROJECTS TO IMPROVE SCHOOL HEALTH AND NUTRITION SERVICES FOR CHILDREN FROM LOW-INCOME FAMILIES

Notice of Proposed Rule Making

In accordance with section 503 of the Education Amendments of 1972 (P.L. 92-318) and pursuant to the authority contained in section 808 of the Elementary and Secondary Education Act of 1965, as amended, 20 U.S.C. 887a, the Commissioner of Education, with the approval of the Secretary of Health, Education, and Welfare, proposes to add a new part 127 to Title 45 of the Code of Federal Regulations to read as set forth below.

1. *Program purpose.* The proposed regulations govern a program of grants to local educational agencies and under extraordinary circumstances, to nonprofit private educational organizations, to support demonstration projects designed to improve health, nutrition and related educational services provided to elementary school children from low-income families. The projects, funded at yearly intervals for up to 36 months, would coordinate already available federally-funded health and nutrition services in the area, and provide supplementary services not otherwise available.

2. *Section 503 procedures and effect.* Section 503 of the Education Amendments of 1972 requires the Commissioner to study all rules, regulations, guidelines, or other published interpretations or orders issued by him or by the Secretary after June 30, 1965, in connection with, or affecting, the administration of Office of Education programs; to report to the Committee on Labor and Public Welfare of the Senate and the Committee on Education and Labor of the House of Representatives concerning such study; and to publish in the FEDERAL REGISTER such rules, regulations, guidelines, interpretations, and orders, with an opportunity for public hearing on the matters so published. The regulations proposed below reflect the results of this study as it pertains to the program under Section 808 of the Elementary and Secondary Education Act. Upon publication of Part 127 in final form, after comments and hearings, all preceding rules, regulations, guidelines, and other published interpretations and orders issued in connection with or affecting the program will be superseded effective thirty days after such publication. At present there will be no guidelines for the program. If guidelines should be issued in the future, they will be limited to recommendations and suggestions for program operation and management.

3. *Citations of legal authority.* As required by section 431(a) of the General Education Provisions Act (20 U.S.C. 1232(a)) and section 503 of the Education Amendments of 1972, a citation of statutory or other legal authority for each section of the regulations has been placed in parentheses on the line following the text of the section.

On occasion, a citation appears at the end of a subdivision of the section. In that case, the citation applies to all that appears in that section between the citation and the next preceding citation. When the citation appears only at the end of the section it applies to the entire section.

4. *Opportunity for public hearing.* Pursuant to section 503(c) of the Education Amendments of 1972, the Commissioner will provide interested parties an opportunity for a public hearing on these regulations as follows:

A hearing will take place at the U.S. Office of Education on April 16, 1974, in the auditorium of Regional Office Building Three (ROB-3) located at 7th and D Streets, SW., Washington, D.C. beginning at 10 a.m.

The purpose of the hearing is to receive comments and suggestions on the published materials.

Parties interested in attending the hearing should notify the Chairman of the Office of Education Task Force on section 503, 400 Maryland Avenue, SW., Room 2079-G of Federal Office Building Six (FOB-6), Washington, D.C. 20202, and are urged to submit a written copy of their comments with such notification. Each party planning to make oral comments at the hearing is urged to limit his presentation to a maximum of fifteen minutes.

Interested parties may also submit written comments and recommendations to the Chairman of the Education Task Force on section 503 at the above address. All relevant material received prior to the date of the hearing will be considered. Comments and suggestion submitted in writing will be available for review in the above office between the hours of 9:00 a.m. and 4:30 p.m., Monday through Friday of each week.

(Catalog of Federal Domestic Assistance Program Number 13.523, Demonstration Projects in School Health and Nutrition Services for Children from Low-Income Families.)

Dated: January 24, 1974.

JOHN OTTINA,
U.S. Commissioner of Education.

Approved: March 8, 1974.

CASPAR W. WEINBERGER,
Secretary of Health, Education, and Welfare.

PART 127—GRANTS FOR DEMONSTRATION PROJECTS TO IMPROVE SCHOOL HEALTH AND NUTRITION SERVICES FOR CHILDREN FROM LOW-INCOME FAMILIES

Sec.
127.1 Scope and purpose.
127.2 Definitions.
127.3 Eligibility for grants.
127.4 Children who may be served.
127.5 Applications.
127.6 Review and disposition of applications.
127.7 Advisory committee.
127.8 Use of funds.
127.9 Health services.
127.10 Mental health services.
127.11 Nutritional services.
127.12 Educational services.

AUTHORITY: Sec. 164 of P.L. 91-230, 84 Stat. 153 (20 U.S.C. 887a), unless otherwise noted.

§ 127.1 Scope and purpose.

(a) The regulations set forth in this part are applicable to demonstration project grants under Section 808 of the Elementary and Secondary Education Act of 1965, as amended, to improve school health and nutrition services and activities for children from low-income families.

(b) Grants may be made under this part to local educational agencies and, under exceptional circumstances, to nonprofit private educational organizations to support demonstration projects designed to improve health and nutrition services in public and private schools serving areas with high concentrations of children from low-income families.

(c) Projects assisted under this part shall be designed to demonstrate exemplary methods of organizing a system of health, nutrition and related educational services,

(1) By more effectively coordinating programs providing such services so that:

(i) Project target school personnel, parents, and community service providers jointly develop a comprehensive school based system of assessment and response to the health, nutrition and related educational needs of children from low-income families;

(ii) The school plays a major role in implementing a design for the early detection and removal of health- and nutrition-related barriers to a child's optimum development; and

(iii) The community service providers, particularly federally-assisted health, mental health, and nutrition programs, become an integral part of the response system by more effectively focusing the delivery of their services to children from low-income families; and

V 39 54 MAR 1974 XUM

(2) By providing supplemental health and nutrition services when necessary.

(d) Projects assisted under this part shall be designed for continuous operation throughout the calendar year, except where local conditions warrant a partial reduction of services under the program during the summer months.

(e) Assistance provided under this part is subject to applicable provisions contained in Subchapter A of this chapter (relating to fiscal, administrative, property management, and other matters).

(20 U.S.C. 887a; Sen. Rept. No. 634, 91st Cong. 2d Sess. 60 (1970))

§ 127.2 Definitions.

As used in this part:

"Children and Youth Project" means a center providing pediatric services supported by the Department of Health, Education, and Welfare under the authority of section 509 of Title V of the Social Security Act, 42 U.S.C. 709.

(20 U.S.C. 887a; Sen. Rept. No. 634, 91st Cong. 2d Sess. 60 (1970))

"Community Mental Health Center" means community mental health service providers supported by Federal, State or local agencies, university departments of medicine, psychiatry, psychology or special education, or learning disability clinics.

(20 U.S.C. 887a; Sen. Rept. No. 634, 91st Cong. 2d Sess. 60 (1970))

"Comprehensive Health Center" means a health center supported by the Department of Health, Education, and Welfare under the authority of 42 U.S.C. 246.

(20 U.S.C. 887a; Sen. Rept. No. 634, 91st Cong. 2d Sess. 60 (1970))

"Local educational agency" means a public board of education or other public authority legally constituted within a State for either administrative control or direction of, or the performance of a service function for, public elementary or secondary schools in a city, county, township, school district, or other political subdivision of a State, or such combinations of school districts and counties as are recognized in a State as an administrative agency for its public elementary or secondary schools. The term also includes any public institution or agency having administrative control and direction of a public elementary or secondary school.

(20 U.S.C. 881f)

"Neighborhood Health Center" means a health center supported by the Office of Economic Opportunity or the Department of Health, Education, and Welfare under the authority of section 222(a)(4) of Title II of the Economic Opportunity Act of 1964, 42 U.S.C. 2809.

(20 U.S.C. 887a; Sen. Rept. No. 634, 91st Cong. 2d Sess. 60 (1970))

"Project target school" means a public elementary school serving an area with high concentrations of children from low-income families, which school is eligible to be served by a project under Title I of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 241a, *et seq.*)

(20 U.S.C. 887a; Sen. Rept. No. 634, 91st Cong. 2nd Sess. 60 (1970))

"Service area" means the geographic area served by a Neighborhood Health Center, Comprehensive Health Center, Children and Youth Project Center, Community Mental Health Center, or other federally supported comprehensive health program.

(20 U.S.C. 887a; Sen. Rept. No. 634, 91st Cong. 2nd Sess. 60 (1970))

§ 127.3 Eligibility for grants.

(a) The Commissioner may award grants to local educational agencies and under exceptional circumstances to nonprofit private educational organizations to organize a system of health, nutrition and related educational services which shall serve at least one project target school. That system shall effectively coordinate various Federal, State, local, and private health, mental health and nutrition services available to those children. The project services shall also be made available to children eligible under § 127.4, who are attending nonpublic elementary schools and reside in the attendance area of a project target school to be served by the project proposed for assistance under this part. A project shall be designed to serve during its first period of support no more than four project target schools and no more than 1500 students.

(b) The project target schools shall be—

(1) Located in the service area of at least one of the following:

(i) A Neighborhood Health Center,

(ii) A Comprehensive Health Center,

(iii) A Children and Youth Project, or

(iv) A similar federally supported comprehensive health program; and

(2) Capable of providing free and/or reduced priced food programs which assist in meeting the nutritional needs of the students in attendance at that school.

(c) The exceptional circumstances under which a grant under this part may be awarded to a nonprofit private educational organization rather than to a local educational agency include, but are not necessarily limited to—

(1) Those circumstances, ordinarily occurring in rural areas, where a single organization can better serve children attending the schools of two or more local educational agencies, or

(2) Those circumstances where a local educational agency wishes to be served by a private organization. In this event, the application of the private organization shall include a statement by the appropriate local educational agency to that effect.

(20 U.S.C. 887a; Sen. Rept. No. 634, 91st Cong. 2d Sess. 60 (1970))

§ 127.4 Children who may be served.

A child attending a project target school or a nonpublic school serving an area with high concentrations of children from low-income families shall be eligible to participate in a project assisted under this part if, at the time such project is to be carried out such child is determined to be a member of a family whose income is at or below the low-income level established under one of the following standards which has been designated by the grantee in its application as the standard to be applied for the purpose of its project under this part—

(a) The Office of Economic Opportunity Income Poverty Guidelines (45 CFR 1060.2–1060.3);

(b) The income level established by the State under Title XIX of the Social Security Act, (42 U.S.C. 1396 *et seq.*); or

(c) The appropriate statewide standard for financial assistance adopted by the appropriate State welfare agency.

(20 U.S.C. 887a)

§ 127.5 Applications.

(a) An applicant for a grant under this part shall submit a preapplication containing such information as may be required by the Commissioner. An applicant whose preapplication has been approved will be invited to submit an application meeting the requirements of paragraph (b) of this section. The cutoff dates for submission of preapplications and applications for initial grants will be published in the FEDERAL REGISTER.

(b) An application for assistance under this part shall include:

(1) Evidence that the project proposal has been developed in consultation with representatives of appropriate community health agencies, the local educational agency (if the applicant is a nonprofit private educational organization) and the local educational agency advisory group described in § 127.7;

(2) A description of the health, mental health and nutrition services in the target area, evidence that the application has the concurrence of those agencies and organizations providing the health, mental health and nutrition services under agreements described in §§ 127.9–127.11, and evidence of the extent to which such services will become available to the applicant if a grant is awarded (including letters of intent);

(3) A description of the manner in which the applicant proposes to use the funds under this part for which application is made;

(4) A description of the manner in which the applicant proposes to coordinate, or provide for the coordination of, the available health care facilities and resources and nutrition resources in the target area in order to insure that a comprehensive program of physical and mental health and nutrition services are available to children from low-income families in the area to be served, including a description of the arrangements which the applicant proposes to make in accordance with §§ 127.9–127.11.

(5) A description of the applicant's plan to develop new or utilize existing health and nutrition curriculum materials related to the specific needs of persons involved with the project and to new and improved approaches to health services and food technology;

(6) A description of the plans of the applicant to train, or provide for the training of:

(i) School administrators, teachers, and school health and nutrition personnel in order to assist them in meeting the health and nutritional needs of children from low-income families, and

(ii) Professional and subprofessional personnel for service in school health and nutrition programs;

(7) A description of a plan to evaluate the project as required by Part 100a of this chapter;

(8) A description of plans to include eligible private school children in the project;

(9) The standard of income selected by the applicant in accordance with § 127.4.

(c) Applications for grantees to continue an existing project are to be submitted in accordance with the Reports Schedule contained in the current grant award document.

(d) Assistance under this part will not be provided for a period in excess of 36 months.

(20 U.S.C. 887a)

§ 127.6 Review and disposition of applications.

(a) All preapplications and applications will be reviewed by a panel of Office of Education personnel, by representatives of other appropriate Federal agencies and by a panel of experts who are not employees of the Federal Government.

(b) Final decisions on preapplications and applications will be made by the Commissioner and will be based on consideration of the following criteria (in addition to the criteria set forth in § 100a.26(B) of this chapter):

(1) The degree to which the proposed project will achieve the delivery of services through the coordination of community resources and thus minimize the need for direct purchase of services;

(2) The adequacy of the proposed relationship between the regular education programs in the project target school or schools to be served by the project, and the health and nutrition needs of the project target children;

(3) The adequacy of plans for effective and meaningful parental involvement; and

(4) The likelihood of the continuation of project activities beyond the end of the funding period.

(20 U.S.C. 887a)

§ 127.7 Advisory committee.

(a) An applicant shall, prior to the submission of an application under the program, consult with a district-wide advisory committee formed in accordance with paragraph (b) of this section and shall afford such committee (1) a reasonable opportunity to participate in the designation of project target schools for that school district and (2) at least 15 days in which to review and comment upon such application. In connection with the review, such agency shall furnish to each member of such committee: a copy of the statute and regulations applicable to the program, and all other pertinent information necessary for involvement of the committee in the planning, operation, and evaluation of the project.

(b) Membership of the committee shall consist of either:

(1) The local parent council if one has been established pursuant to § 116.17(o) of this chapter or a subcommittee of that group, or

(2) parents of eligible public and private schoolchildren, school personnel from the project target school or schools, representatives from the affected health and nutrition agencies, and representatives from civic or community organizations from the community at large.

(c) If the committee is to consist of the local parent council, a technical advisory committee shall be established to advise the committee. The technical advisory committee shall consist of professional personnel from the project target school or schools, and representatives from the affected health, nutrition, and other interested agencies.

(d) The applicant shall involve the committee in—

(1) The planning of the project from its initial phase;

(2) The establishment of criteria for the selection of project personnel;

(3) The establishment of priorities for the delivery of services;

(4) The ongoing operations of the project through such steps as conducting periodic committee meetings with project personnel;

(5) The evaluation of suggestions and complaints from parents of eligible children;

(6) The evaluation of the project; and

(7) The design of future plans for the project if the project is to be continued with assistance under this part.

(20 U.S.C. 1231d; 20 U.S.C. 887a)

§ 127.8 Use of funds.

Funds made available under a grant pursuant to this part shall be used for—

(a) Coordination of the nutrition and health resources in the area to be served by the approved project;

(b) The provision of supplemental health, nutrition, and mental health services (as described in § 127.9–127.11) to children to be served by such project, where:

(1) The service in question is designed to overcome specifically identified health- and nutrition-related problems of such children;

(2) The service is not ordinarily provided by an agency serving the school attendance area of the appropriate project target school;

(3) The service is not provided under the regular school program in that project target school, and

(4) Funds for the provision of the service are not available under any other program;

(c) The planning, establishment, and carrying out of nutrition and health education programs designed to train professional and other school personnel to provide health and nutrition services to meet the needs of children from low-income families for those services where such training programs are not ordinarily provided by another agency serving the school attendance area of the project target school or as part of the regular school program;

(d) Evaluation of the project in accordance with § 100a.276 of this chapter; and

(e) Supplementing funds presently available for health, mental health, nutrition and related educational services for the target population from Federal, State, local and private agencies, and in no case to supplant such funds.

(20 U.S.C. 887a)

§ 127.9 Health services.

(a) (1) The grantee shall, upon receipt of the grant, enter into agreements in accordance with the applicable provisions of subchapter A of this chapter with Neighborhood Health Centers' Comprehensive Health Centers, Children and Youth Projects, or other similar federally supported comprehensive health programs whose service areas include the project target schools, for the provision of health services to children eligible to participate in this program.

(2) These health services shall include—

(i) Complete physical examinations for all children upon entering school, for incoming transferring students, and for others whenever necessary;

(ii) Follow-up treatment including ambulatory and, where necessary, inpatient hospital care;

(iii) Consultation; and

(iv) Periodic dental examinations and care.

(3) These health services may include—

(i) Placement of additional health staff in the school; and

(ii) In-service training of professional and para-professional personnel.

(b) An agreement specified in this section shall provide that where possible the expenses of the health services shall be borne by the agency providing the services or by payments under the Medicaid program, Title XIX of the Social Security Act, or other third party payment mechanisms.

(20 U.S.C. 887a)

§ 127.10 Mental health services.

(a) (1) The grantee shall, upon receipt of the grant, enter into agreements in accordance with the applicable provisions of Subchapter A of this chapter with community mental health service providers, whose service area includes the project target school, for the provision of mental health services.

(2) These services shall include—

(i) Diagnostic services;

(ii) Consultation with educational personnel concerning the emotional problems of the children;

V 39 54 MAR 19 74 XUM

(iii) Counseling; and

(iv) Preventive mental health education or psychological education.

(3) These services may include—

(i) Individual treatment;

(ii) Special programs for children with psychological, or behavioral problems;

(iii) Placement of mental health workers in the schools; and

(iv) In-service training and workshops for professional and paraprofessional personnel.

(b) An agreement specified in this section shall provide that where possible the expenses for providing the mental health services shall be borne by the agency providing the services or by payments under the Medicaid program, Title XIX of the Social Security Act, or other third party payment mechanisms.

(20 U.S.C. 887a)

§ 127.11 Nutritional services.

A project target school served under this part shall participate in the Department of Agriculture Child and Family Feeding programs, shall provide to those children participating in the project free or reduced price breakfasts and lunches, and shall develop nutrition education curricula that are integrated into the school feeding programs. The grantee may provide food or dietary supplements for meeting special dietary needs and may institute programs to educate, families obout nutrition and inform them of Federal food programs.

(20 U.S.C. 887a)

§ 127.12 Educational services.

The grantee shall require that the project target schools, in consultation with professional staff members from appropriate community agencies—

(a) Develop learning activties designed to assist eligible children having health and nutrition problems to participate more fully in the regular instructional program;

(b) Provide assistance for eligible children with diagnosed health-related learning disabilities;

(c) Provide sequenced nutrition education experiences at each grade level;

(d) Provide sequenced health education experiences at each grade level; and

(e) Develop ways to improve the emotional climate of schools, including preventive mental health education.

(20 U.S.C. 887a)

Social Security Administration

[20 CFR Part 405]

[Reg. No. 5]

FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

Limitations on Coverage of Costs Under Medicare

Notice is hereby given, pursuant to the Administrative Procedure Act (5 U.S.C. 553), that the amendments to the regulations set forth in tentative form are proposed by the Commissioner of Social Security, with the approval of the Secretary of Health, Education, and Welfare. Pursuant to section 223 of P.L. 92-603, the proposed amendments to Regulations No. 5 of the Social Security Administration (20 CFR Part 405), provide for the establishment of limitations on reasonable cost reimbursement based on estimates of the costs necessary for the efficient delivery of covered services. Limitations for various types of providers will be separately published in the Federal Register prior to the reporting period for which the limits are effective. References in the proposed regulations to § 405.455 are to such section as published with a notice of proposed rulemaking on September 13, 1973 (38 FR 25448) but which has not been promulgated in final as yet.

Prior to the final adoption of the proposed amendments to the regulations, consideration will be given to any views and comments pertaining thereto which are submitted in writing in triplicate to the Commissioner of Social Security, Department of Health, Education, and Welfare Building, Fourth and Independence Avenue, SW., Washington, D.C. 20201, on or before April 18, 1974.

Copies of all comments received in response to this notice will be available for public inspection during regular business hours at the Washington Inquiries Section, Office of Public Affairs, Social Security Administration, Department of Health, Education, and Welfare. North Building, Room 4146, 330 Independence Avenue, SW., Washington, D.C. 20201.

The prosposed amendments are issued under the authority contained in sections 1102, 1861(v), 1866(a), and 1871; 49 Stat. 647, as amended; 79 Stat. 313, as amended; 79 Stat. 327, as amended; 79 Stat. 331; 42 U.S.C. 1302, 1395x, 1395cc, and 1395hh.

(Catalog of Federal Domestic Assistance Program No. 13.800, Health Insurance for the Aged—Hospital Insurance.)

Dated: January 28, 1974.

J. B. CARDWELL,
Commissioner of Social Security.

Approved: March 12, 1974.

CASPAR W. WEINBERGER,
Secretary of Health, Education, and Welfare.

Part 405 of Chapter III of Title 20 of the Code of Federal Regulations is amended as follows:

1. In § 405.401, paragraph (a) is revised to read as follows:

§ 405.401 Introduction.

(a) Under the health insurance program for the aged and disabled, the amount paid to any provider of services—i.e., hospital, skilled nursing facility, or home health agency—for the covered services furnished to beneficiaries is required by section 1814(b) and section 1833(a)(2) of the Act to be the reasonable cost of such services subject to the provisions of §§ 405.455 and 405.460. Nothing in this part shall be construed as precluding the application of regulations issued by the Cost of Living Council (or other Government agency) pursuant to the Economic Stabilization Act.

* * * * *

2. In § 405.402, paragraph (a) is revised to read as follows:

§ 405.402 Cost reimbursement: General.

(a) In formulating methods for making fair and equitable reimbursement for services rendered beneficiaries of the program, payment is to be made on the basis of current costs of the individual provider, rather than costs of a past period or a fixed negotiated rate. All necessary and proper expenses of an institution in the production of services, including normal standby costs, are recognized. Furthermore, the share of the total institutional cost that is borne by the program is related to the care furnished beneficiaries so that no part of their cost would need to be borne by other patients. Conversely, costs attributable to other patients of the institution are not to be borne by the program. Thus, the application of this approach, with appropriate accounting support, will result in meeting actual costs of services to beneficiaries as such costs vary from institution to institution. However, payments to providers of services for services rendered health insurance program beneficiaries are subject to the provisions of §§ 405.455 and 405.460.

3. In § 405.455, paragraph (d) is revised to read as follows:

§ 405.455 Amount of payments where customary charges for services furnished are less than reasonable cost.

* * * * *

(d) *Accumulation of unreimbursed costs and carryover to subsequent periods.* To determine the accumulation of unreimbursed costs and carryover to subsequent periods, see § 405.462.

4. Section 405.460 is added to read as follows:

§ 405.460 Limitations on coverage of costs.

(a) *Principle.* In the determination of the allowability of provider costs, costs estimated to be in excess of those necessary in the efficient delivery of needed health services are excluded. Such estimates may be made with respect to direct or indirect overall costs or costs of specific items or services, or groups of items or services and upon publication in the FEDERAL REGISTER will constitute limits on amounts otherwise payable under the program. These limits may be imposed prospectively on a per diem, per visit, or other basis.

(b) *Application.* In determining the limits to be applied, providers may be classified by type of provider (e.g., hospitals, skilled nursing facilities, and home health agencies) and within each provider class by such factors as the Secretary shall find appropriate and practical, such as:

(1) Type of services rendered;

(2) Geographical area where services are rendered, allowing for grouping of noncontiguous areas having similar demographic and economic characteristics;

(3) Size of institution;

(4) Nature and mix of services rendered; or

(5) Type and mix of patients treated.

(c) *Data.* In establishing limits, the estimates of the costs necessary for efficient delivery of health services may be based on cost reports or other data providing indicators of current costs, with current and past period data being adjusted to arrive at estimated costs for the prospective periods to which limits shall be applied.

(d) *Notice of limits to be imposed.* Prior to the onset of a cost period to which a limit shall be applied, a notice shall be published in the Federal Register establishing the limits to be applied to an identified cost and type and class of provider of service.

(e) *Provider rights to review.* A request by a provider for review of the determination of an intermediary concerning classification for, exceptions to, or exemptions from the cost limits imposed under the provisions of this section shall be made to the intermediary under the provisions of §§ 405.490–405.499.

(f) *Exceptions, exemptions, and adjustments.* The following types of exceptions, exemptions, and classification adjustments may be granted under this section but only upon the provider's demonstration that the conditions indicated are present:

(1) *Reclassification.* A provider shall be entitled to obtain adjustment of its classification by the intermediary for the purpose of cost limits applied under this section on the basis of evidence that such a classification is at variance with the criteria specified in promulgating limits under paragraph (d) of this section.

(2) *Exception of cost of atypical services.* Where the actual cost of items or services furnished by a provider exceeds the applicable limit by reason of the provision of items or services that are atypical in nature and scope as compared to the services generally provided by institutions similarly classified and appropriate reason exists for the provision of such items or services, the limits may be adjusted upward to reflect any added costs flowing from the delivery of such items or services. Such adjustments may only be made where the provider demonstrates: (i) The provision of the atypical items or services were by reason of the special needs of the patients treated and necessary in the efficient delivery of needed health care, or (ii) the added costs flow from approved educational activities (as described in § 405.421) to the extent such costs are atypical (although reasonable) for providers in the comparison group. In addition, such adjustments may be made only to the extent that such justified costs are separately identified by the provider and can be verified by the intermediary.

(3) *Exception because of extraordinary circumstances.* Where a provider's costs exceed the limits due to extraordinary circumstances beyond the control of the provider, the provider may request an exception from the cost limits to the extent that the provider shows such higher costs result from the extraordinary circumstances. These circumstances may include increased costs attributable to strikes, fire, earthquake, flood, or similar unusual occurrences with substantial cost effects.

(4) *Exemption as sole community provider.* The limitation on costs imposed under this section shall not be applicable where a provider by reason of factors such as isolated location or absence of other providers of the same type, is the sole source of such care reasonably available to beneficiaries.

(g) *Carryover of unreimbursed costs to subsequent periods for new providers.* Where costs of a new provider exceed the cost limits and are (1) unreimbursed under this section, and (2) are not charged to patients, such costs may be reimbursed in subsequent cost reporting periods. For purposes of this section a new provider is defined as one which has furnished services at its certified level of participation for less than 3 years, taking account of present and previous ownership. For application of carryover of costs to such a provider, see § 405.462.

5. Section 405.461 is added to read as follows:

§ 405.461 Limitation on coverage of costs; charges to beneficiaries where cost limits are applied to services.

(a) *Principle.* Where a provider of services customarily furnishes an individual items or services which in accordance with § 405.460, are more expensive than the items or services determined to be necessary in the efficient delivery of needed health services under title XVIII of the Act, such provider may charge such individual or other person for such more expensive items or services, whether or not requested by the individual, to the extent that the costs of (or, if less, the customary charges for) such more expensive items or services experienced by such provider in the second fiscal period immediately preceding the fiscal period in which such charges are imposed (except in the case of new providers, see paragraph (b) of this section) exceed the cost of such items or services determined to be necessary in the efficient delivery of needed health services, but only if:

(1) The intermediary has approved such charges; and

(2) The services are not emergency services as defined in paragraph (d) of this section; and

(3) The admitting physician has no direct or indirect financial interest in such provider; and

(4) The Social Security Administration has provided notice to the public of any charges the provider is authorized to impose on individuals entitled to benefits under title XVIII of the Act on account of costs in excess of the costs determined to be necessary in the efficient delivery of needed health services under such title; and

(5) The provider has, in the manner described in paragraph (e) of this section, identified such charges to such individual or person acting on his behalf as charges to meet the costs in excess of the costs determined to be necessary in the efficient delivery of needed health services under title XVIII of the Act; and

(6) The provider makes such charges as described in paragraph (a)(4) of this section or their equivalents to all individuals utilizing the related services.

(b) *Provider request to charge beneficiaries for costs in excess of limits.* Where a provider's actual costs (or, if less, the customary charges) in the second preceding cost period exceed the prospective limits established for such costs, the intermediary may, at the provider's request, approve charges to the beneficiaries for the excess. Where a provider does not have a second preceding cost period and is a new provider, as defined in § 405.460(g), the provider, subject to approval by the intermediary, will estimate the current cost of the service to which a limit is being applied. Such amount (or, if less, the customary charge) shall be adjusted to an amount equivalent to costs in the second preceding year by use of a factor to be developed actuarially based on cost increases during the preceding 2 years and published in the FEDERAL REGISTER. The amount thus derived will be used in lieu of the second preceding cost period amount in determining the charge to the beneficiary. To obtain consideration of such a request, the provider must submit to the intermediary a statement indicating the charge for which it is seeking approval and providing the data and method used to determine the amount. Such statement should include:

(1) Provider name and number;

(2) Identity of class and prospective cost limit for the class in which the provider has been included;

(3) Amount of charge and cost period in which the charge is to be imposed; and

(4) The cost of and customary charge for services rendered to beneficiaries; and

(5) The cost period ending date of the second reporting period immediately preceding the cost period in which the charge is to be imposed. The intermediary may request such additional information as it finds necessary to make a determination with respect to the request.

(c) *Provider charges*—(1) *Establishing the charges.* If the actual cost incurred (or, if less, the customary charges) in the prior period determined under paragraph (a) of this section exceeds the limits applicable to the pertinent period, the provider may charge the patient an amount not to exceed such excess. (Data from the most recently submitted appropriate cost report will be used in determining the actual cost.) For example, if a limit of $58 per day is applied to the cost of general routine services, for the provider's cost reporting period starting in calendar year 1975 and if the provider's actual general routine cost in the second preceding reporting period, i.e.,

V 39 N 54 MAR 19 74 XUM

the reporting period starting in calendar year 1973, was $60 per day, the provider (upon intermediary approval and subject to the considerations and requirements specified in paragraph (a) of this section) may charge hospital insurance beneficiaries $2 per day for general routine services.

(2) *Adjusting cost.* Program reimbursement for the costs to which limits imposed under § 405.460 are applied in any cost reporting period shall not exceed the lesser of the provider's actual cost or the limits imposed under §405.460. If program reimbursement for items or services to which such limits are applied plus the charges to beneficiaries for such items or services imposed under this section exceed the provider's actual cost for such items or services, the amount of program reimbursement to the provider will be reduced by this excess. For example, in the situation described in paragraph (c)(1) of this section, if the provider's actual cost for general routine services in 1975 was $57,000 and billed charges to hospital insurance beneficiaries were $2,000, the provider would receive $55,000 from the program ($57,000 actual cost minus the $2,000 in charges to the beneficiaries).

(d) *Definition of emergency services.* For purposes of paragraph (a)(2) of this section, emergency services are those services which are necessary to prevent the death or serious impairment of the health of the individual, and which, because of the threat to the life and health of the individual, necessitate immediate treatment. Where an individual has been admitted to a provider as an inpatient because of an emergency, the emergency is deemed to continue throughout his confinement.

(e) *Identification of charges to individual.* For purposes of paragraph (a)(5) of this section, a provider shall give or send to the individual or his representative, a schedule of all items and services which the individual might need and for which the provider imposes charges under this section, and the charge for each. Such schedule shall specify that the charges are necessary to meet the costs in excess of the costs determined to be necessary in the efficient delivery of needed health services under title XVIII of the Act and shall include such other information as the Social Security Administration considers necessary to protect the individual's rights under this section. The provider, in arranging for the individual's admission, first service, or start of care, shall give or send this schedule to the individual or his representative when arrangements are being made for his admission, or if this is not feasible, as soon thereafter as is practicable.

6. Section 405.462 is added to read as follows:

§ 405.462 Carryover of unreimbursed costs to subsequent periods.

(a) *General.* Under the provisions of §§ 405.455 and 405.460, certain costs of providers in a cost reporting period may be unreimbursed. Under circumstances described in this section, such unreimbursed costs may be recovered by a participating provider in subsequent cost reporting periods.

(b) *Carryover of unreimbursed costs for new providers.* A new provider of services (as defined in §§ 405.455(b)(5) and 405.460(g) may carry forward for five succeeding cost reporting periods costs attributable to program beneficiaries which are unreimbursed under the provisions of §§ 405.455 and 405.460. If such five succeeding cost reporting periods combined include fewer than 60 full calendar months, the provider may carry forward such unreimbursed costs for one additional reporting period.

Example. A provider begins its operations on March 5, 1973. However, it begins to participate in the health insurance program as of January 1, 1974, and reports on a calendar year basis. The provider would be permitted to accumulate any unreimbursed costs incurred during reporting periods ending prior to March 5, 1976. Because the calendar year 1975 cost reporting period ends before the end of the third year of operation, its carryover period will be the succeeding five cost reporting periods ending with December 31, 1980. (Had this provider begun its operations on July 1, 1973, and become a participating provider as of the same date (with a fiscal year ending June 30), it would have been able to accumulate any unreimbursed costs for the two cost reporting periods ending June 30, 1975, and June 30, 1976. Its carryover period would then be the five cost reporting periods ending no later than June 30, 1981, in the case of costs unreimbursed in either of the reporting periods ending June 30, 1975, or June 30, 1976.)

(c) *Carryover of unreimbursed costs for other providers.* A provider of services (except a new provider as defined in § 405.455(b)(5)) that has unreimbursed costs resulting from the application of § 405.455 in any cost reporting period, may carry forward costs attributable to health insurance program beneficiaries which are unreimbursed under the provisions of § 405.455 for the two succeeding reporting periods. If such two succeeding cost reporting periods combined include fewer than 24 full calendar months, the provided may carry forward costs unreimbursed under this section for one additional reporting period.

(d) *Limitations on recovery of unreimbursed amounts.* The amounts of unreimbursed costs which a provider may recover during any cost reporting period in the carry-forward period is limited to the lesser of the amount by which the provider's cost ceiling exceeds the provider's actual costs of operation during such period or the amount by which the customary charges applicable to health insurance program beneficiaries during any such period exceeds the costs applicable to such beneficiaries during that period.

7. In § 405.607, paragraph (a) is revised to read as follows:

§ 405.607 Essentials of agreements with providers of services.

Under the terms of the agreement (see § 405.606) the provider agrees:

(a) Not to charge any individual, or other person (except as described in §§ 405.608–405.610 and 405.461):

• • • • •

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Low Rent Public Housing

[24 CFR Part 1278]

[Docket No. R–74–260]

SECTION 23 HOUSING ASSISTANCE PAYMENTS PROGRAM; STATE AGENCY PARTICIPATION

Notice of Proposed Rulemaking

Notice is hereby given that the Department of Housing and Urban Development proposes to amend 24 CFR Chapter VIII by adding a new Part 1278. The proposed amendments sets forth the policies and procedures applicable to State housing finance and development agencies participating in the Section 23 Housing Assistance Payments Program. Because such agencies constitute a special class of participants having unique statewide capacities and functions to meet statewide housing needs, the policies and procedures applicable to the Section 23 Housing Assistance Payments Programs for New Construction, Existing Housing (Without Substantial Rehabilitation), and Substantial Rehabilitation, 24 CFR Parts 1272, 1274 and 1276, respectively, are modified in this regulation as applied to such agencies.

Interested parties are invited to submit written comments, suggestions and objections regarding the proposed amendment by April 19, 1974, addressed to the Rules Docket Clerk, Office of the General Counsel, Room 10256, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, D.C. 20410. All relevant material will be considered before adoption of a final rule. A copy of each communication will be available for public inspection during regular business hours at the above address.

It is accordingly proposed to amend Title 24 by adding Part 1278 as set forth below.

PART 1278—SECTION 23 HOUSING ASSISTANCE PAYMENTS PROGRAM—STATE AGENCY PARTICIPATION

Subpart A—Applicability and Scope

Appendix I. Section 23 Housing Assistance Payments Program—New Construction—Applicability of Appendices to State Agencies.

Appendix II. Section 23 Housing Assistance Payments Program—Existing Housing—Applicability of Appendices to State Agencies.

Appendix III. Section 23 Housing Assistance Payments Program—Substantial Rehabilitation—Applicability of Appendices to State Agencies.

AUTHORITY: Sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)); sec. 10(b) of the U.S. Housing Act of 1937 (42 U.S.C. 1410(b)); sec. 23 of the U.S. Housing Act of 1937 (42 U.S.C. 1421(b)).

Subpart A—Applicability and Scope

§ 1278.1 Purpose.

Various States have established statewide agencies to encourage the provision of housing for low and moderate income persons and families. To enable State agencies to effectively develop programs to meet statewide housing needs, set-asides under the section 23 Housing Assistance Payments Program may be provided to these agencies. Some State agencies also finance the construction and rehabilitation of housing and assume the risks of default and foreclosure on developments they finance. To allow these agencies flexibility in developing programs to meet statewide housing needs, the policies and procedures of the Housing Assistance Payments Programs for New Construction, Existing Housing, and Substantial Rehabilitation, 24 CFR Parts 1272, 1274 and 1276, respectively, are modified as provided in this Part.

§ 1278.2 Eligibility for set-asides under section 23 Housing Assistance Payments Programs.

State agencies with statewide responsibility for housing development, and qualified to act as "public housing agencies" as denfied in the U.S. Housing Act of 1937, as amended, are eligible to receive set-asides under a Section 23 Housing Assistance Payments Program.

§ 1278.3 Applicability of modified procedures.

(a) *Eligible State Agencies.* The procedures set forth in Subparts B, C, and D of this part apply solely to State agencies which (1) will provide permanent financing for housing projects without Federal mortgage insurance and (2) are qualified to act as "public housing agencies."

(b) *Other State Agencies.* State agencies other than those qualifying under paragraph (a) above may apply for a set-aside but may not use the processing procedures set forth in Subparts B, C, and D of this part. Such agencies shall proceed under the procedures contained in the Housing Assistance Payments Program Regulations for New Construction, Existing Housing, and Substantial Rehabilitation, 24 CFR Parts 1272, 1274 and 1276, respectively.

§ 1278.4 Participation.

In order to qualify for a set-aside, or for a set-aside and the modified procedures set forth in this part, a State agency must qualify as a public housing agency, as defined in the U.S. Housing Act of 1937 (see 24 CFR §§ 1272.3(h), 1274.3(d), and 1276.3(h)) and shall submit a letter requesting participation to HUD. Enclosed with the letter shall be two copies of: (a) the relevant enabling legislation, (b) any rules and regulations adopted or to be adopted by the agency to govern its operation, and (c) an opinion from the agency counsel that the agency is legally qualified and authorized to participate in the Section 23 program. This opinion shall include an explanation of the basis and extent of the State agency's legal authority, if any, for housing development and administration (covering all aspects including authority to establish income limits) in the areas of operation of any existing Local Housing Authorities. After prompt review, State agencies shall be notified whether or not, and in what respects, they are qualified to participate in the Section 23 program. Copies of the notification shall be provided to the HUD Regional Office and appropriate field office(s).

§ 1278.5 Set-asides.

(a) *Notification of Availability of Contract Authority.* Upon receipt of an allocation of contract authority for Section 23 Housing Assistance Payments Programs, HUD shall notify eligible participating State agencies that set-aside will be available if a State agency submits a request for such set-aside in accordance with paragraph (b) below.

(b) *Applying for Set-Asides.* In order to receive a set-aside, a participating State agency must submit a letter to HUD requesting a set-aside. Such letter shall include information sufficient to enable a determination of the amount of the set-aside upon the basis of the criteria outlined in paragraph (c) below. The letter shall indicate any changes in the scope of the agency's legal authority to participate.

(c) *HUD Allocation of Set-Asides.* HUD shall set aside a portion of the contract authority not required for prior commitments for use by participating State agencies. The set-aside for each agency shall indicate the portion of the set-aside to be used for: (1) new construction and substantial rehabilitation, which may be apportioned between these two programs as the State agency deems appropriate, and (2) existing housing (without substantial rehabilitation). Any allocation to a State agency shall be made by HUD within fifteen business days after State agencies have been notified of the availability of set-asides (see paragraph (a) above).

(d) *Determination of Amount of Set-Asides.* The amount of the set-aside shall be determined on the basis of the following criteria:

(1) the extent to which statewide housing needs have been evaluated, a program has been developed to provide housing in those localities with the most critical needs, and the State agency is prepared to use the set-aside to implement that program;

(2) the agency's ability and willingness to serve both central city and rural non-farm housing needs;

(3) the degree of the agency's expertise in connection with the development of housing;

(4) the agency's ability and willingness to provide permanent financing without Federal mortgage insurance;

(5) the agency's ability and willingness to limit the number of units leased by assisted families of 20 percent or less of the units in any single multifamily structure or complex of five or more dwelling units in the projects to be undertaken using Section 23 set-asides; and

(6) the extent to which the agency's program complements the allocation system established by HUD.

(e) *Additional Set-Aside Authority.* It is expected that, wherever possible, State agencies will limit the percentage of subsidized families in a single multifamily structure or in a complex of five or more dwelling units. If this percentage is 20 percent or less, the State agency will receive an additional set-aside when subsequent allocations of contract authority are made. This additional set-aside shall be determined as follows: HUD will authorize a set-aside of one additional unit for every four units which were committed for leasing by assisted families as of

V 39 N 54 MAR 19 74 XUM

the preceding June 30 of each fiscal year in accordance with the 20 percent guideline. A unit shall be deemed committed if (1) in the case of existing housing, an owner-family lease and a Housing Assistance Payments Contract have been executed with respect to such unit and (2) in the case of new construction or substantial rehabilitation, an Agreement to Enter Into Housing Assistance Payments Contract has been executed with respect to such unit: For example, if a State agency has entered into an Agreement to Enter Into Housing Assistance Payments Contract (see § 1278.113) with a developer for a structure of 100 units, of which 20 units are to be leased by assisted families, the set-aside for the next fiscal year will include an additional five units. A unit may be counted only once in determining the amount of additional set-aside.

(f) *Termination of Set-Asides.* Set-asides not committed to projects on or before May 31st of each fiscal year[1] are automatically terminated as of that date. For purposes of this paragraph, set-aside authority is deemed committed on the date HUD issues a notification of application approval for a specific number of units and a specific amount of annual contributions for new construction or substantial rehabilitation projects or, in the case of existing housing programs, when an annual contributions contract list is approved by HUD. However, with respect to any new construction or substantial rehabilitation project, unless an Agreement to Enter Into Housing Assistance Payments Contract is executed within six months of the date of notification of application approval, the Notification shall expire and the units not covered by such Agreement(s) are automatically cancelled.

Subpart B—Program Development—New Construction Programs

§ 1278.101 General.

The procedures of this chapter apply only to participating State agencies as defined in § 1278.3(a) this part, (herein referred to as "State agencies"), and except as specifically modified by this Part, such State agencies shall be subject to the policies and procedures of the Housing Assistance Payments Program—New Construction, 24 CFR Part 1272.

§ 1278.102 Responsibility for program development.

Subject to certain HUD reviews to ensure compliance with basic national objectives, State agencies will assume primary responsibility for program development. Housing will be privately owned and owners will be responsible for all management and maintenance functions. In submitting a program, the State agency shall include any special procedures for tenant selection.

[1] No set-aside shall be automatically terminated prior to May 31, 1975.

§ 1278.103 Equal opportunity requirements.

Each State agency shall submit to HUD on or before March 31 of each year signed assurances of compliance with Title VI of the Civil Rights Act of 1964, Executive Order 11063, Title VIII of the Civil Rights Act of 1968 and where appropriate, certifications required pursuant to Executive Order 11246. Such assurances and certifications shall specifically be made applicable to all projects assisted under Section 23 Housing Assistance Payments Programs. In addition, each agency shall submit (a) a statement describing the actions taken or to be taken by the agency to comply with the above statutes and executive orders and (b) schedules indicating the minority composition in each of the agency's projects.

§ 1278.104 Preapplication.

(a) *Determination of need and survey of housing market.* For each locality for which it plans to submit an application, the State agency shall make a determination that there is a need for housing assistance for low-income families and survey the housing market of the locality to determine whether there is a sufficient supply of dwelling units that are suitable or may be made suitable to meet all or part of this need.

(b) *Conditions for submitting an application for new construction.* A State agency may apply for a Section 23 new construction project:

(1) if there is not, and there is not likely soon to be, an adequate supply of existing housing which, with the aid of housing assistance payments, can meet the housing needs of low-income families; or

(2) in certain areas in which the proposed housing is required and the project is specifically approved by HUD in accordance with priorities established from time to time by the Secretary.

§ 1278.105 Submission of application.

(a) *Application.* A separate application for each new construction project shall be submitted by the State agency to HUD in accordance with the requirements of § 1272.102(a)(1) (Submission of Application) of 24 CFR Part 1272.

(b) *Income limits and rent schedules* must be submitted with the application. In communities in which an LHA has established income limits for Section 23 leased housing, those limits, or limits as amended by the LHA, should be used. If the State agency has grounds for seeking a modification of the established income limits, it shall submit its proposal for modified income limits together with justification to HUD. In communities in which there is no LHA or the LHA has not established income limits in connection with the Section 23 program, the State agency may establish such income limits if it is within its statutory authority to do so.

(c) *Local governing body approval.* § 1272.3(f) (Local governing body approval) of 24 CFR 1272 is applicable to participating State agencies. However, evidence of local governing body approval shall be submitted with the development proposal (see § 1278.109 below) rather than with the application.

§ 1278.106 HUD review and approval of application.

(a) *Review of Application.* HUD shall review the application in accordance with the procedures set forth in § 1272.103(a) (Review of Application) of 24 CFR Part 1272. However, the unit limitation described in § 1272.3(k)(2) (Limitation on number of units in single structure) of 24 CFR 1272 is inapplicable with respect to priorities for approval of applications from State agencies.

(b) *Notification to State Agency.* Upon completion of its review, HUD shall notify the State agency, in the manner prescribed in § 1272.103(b) (Approval or disapproval of applications) of 24 CFR 1272 as to whether its application is approved. However, if the application is approved, the "notification of application approval" shall not include a provision requiring the State agency to prepare an invitation for proposals.

§ 1278.107 Obtaining development proposals.

Because State agencies will be financing the housing development and assuming responsibility for the risks of default and foreclosure, such agencies shall not be required to invite proposals or submit such proposals to HUD for review prior to developer selection. State agencies should establish their own procedures for obtaining development proposals. The following sections of 24 CFR 1272 are inapplicable to participating State agencies:

§ 1272.104 Preparation and contents of developer's packet.
§ 1272.105 Invitation for proposals.
§ 1272.106 Submission of proposals.

Although § 1272.104 is inapplicable, each agency should carefully consider furnishing prospective developers with the type and scope of information set forth in that section.

§ 1278.108 Selection of developer.

The State agency shall select the proposed developer and site in accordance with its own procedures. However, in selecting a developer or site, the State agency shall make the following determinations:

(a) that the site and neighborhood standards set forth in § 1272.108 (Site and Neighborhood Standards) of 24 CFR 1272 are satisfied;

(b) that all applicable equal opportunity and affirmative action requirements, including Section 3 of the Housing and Urban Development Act of 1968 and the regulations issued pursuant thereto, can be satisfied;

(c) that the design and construction quality will satisfy the standards set forth in § 1278.112, below;

(d) that the rents to the owner are reasonable and that the maximum gross rents do not exceed the HUD established fair market rents, except where approved by HUD in accordance with § 1272.3(e) of 24 CFR 1272;

(e) that the developer, builder, and owner are responsible for purposes of meeting all the obligations of the prescribed agreement to enter into housing assistance payments contract.

§ 1278.109 Development proposals.

(a) *Proposal contents.* Once a developer and site have been chosen by the State agency, the agency shall submit to HUD a proposal which shall contain the following:

(1) The names of the developer, builder and owner/lessor.

(2) A description of the housing proposed.

(3) A neighborhood map showing the location(s) of the site(s).

(4) A statement as to whether the proposed project will displace site occupants and the number of families, individuals, and business concerns to be displaced (identified by race or minority group status) and a statement that the owner and/or developer recognizes the relocation requirements that apply if the proposed project will cause displacement and will assume full responsibility for the funding of all costs incurred in providing to displaced persons the full relocation payments and services authorized by the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970.

(5) The gross rents required by unit size, the portion of such rents attributable to each utility, and which utilities, if any, are to be paid directly by the families.

(6) The anticipated date for completion of construction.

(7) An Affirmative Fair Housing Marketing Plan on the form prescribed by HUD.

(8) A completed HUD Environmental Information Form.

(9) An affirmative action plan pursuant to Section 3 of the Housing and Urban Development Act of 1968 and regulations issued pursuant thereto with regard to utilization of project area businesses and residents.

(10) Evidence of local governing body approval as described in § 1272.3(i) (Local governing body approval) of 24 CFR 1272.

(b) *Certifications.* The State agency shall submit, with the proposal, a certification that the proposed site(s) meets the conditions specified in § 1272.108(b) (accessibility to facilities and services) and § 1272.108(c) (commutation to employment) of 24 CFR 1272.

§ 1278.110 HUD evaluation of proposals.

(a) *Evaluation criteria.* HUD's evaluation of proposals submitted by State agencies shall be limited to determining whether the following requirements are satisfied:

(1) The proposal submission contains all elements required in § 1278.109 above.

(2) The proposed maximum gross rents do not exceed the HUD-established fair market rents, except as approved by HUD as provided in § 1272.3(e) of 24 CFR 1272.

(3) The proposed site meets the site and neighborhood requirements of § 1272.108(a) (equal opportunity and environmental aspects) and § 1272.108(d) (relocation requirements) of 24 CFR 1272.

(4) The proposal satisfies the requirements of the National Environmental Policy Act. In determining whether this requirement is met, HUD shall complete all appropriate environmental reviews as required pursuant to the HUD regulation "Protection and Enhancement of Environmental Quality," 24 CFR 50.

(5) The affirmative action plan, required by § 1278.109(a)(9), satisfies the requirements of Section 3 of the Housing and Urban Development Act of 1968 and regulations issued pursuant thereto.

(b) The following sections of 24 CFR Part 1272 are inapplicable to State agencies:

§ 1272.109 Evaluation of proposals.
§ 1272.110 Notification of developer selection.
§ 1272.111 Submission of architect's certificate.

§ 1278.111 Notification of acceptability of proposal.

HUD shall advise the State agency by letter as to the acceptability of the proposal. The letter of acceptability shall be conditioned upon the agency's submission of the certification required in § 1278.112 below.

§ 1278.112 Design and construction quality.

Before an Annual Contributions Contract may be executed, working drawings and specifications shall be prepared and HUD must receive a certification from the design architect of the project, who must be a registered architect, that the working drawings and specifications meet the following:

(a) all applicable State and local laws, codes, ordinances, and regulations as modified by any waivers obtained from the apropriate officials;

(b) the appropriate HUD Minimum Property Standards (see § 1272.104(d)(2) of 24 CFR 1272.

§ 1278.113 Execution of annual contributions contract and agreement.

After receipt of the certification required in § 1278.112 above, HUD shall prepare: (i) the Annual Contributions Contract, in accordance with Appendix III of 24 CFR 1272, as modified by Appendix I of this part which shall be transmitted by HUD to the State agency for execution and return to HUD and (ii) an Agreement to enter into Housing Assistance Payments Contract, which shall be prepared in conformance with § 1272.112 (Agreement to enter into Housing Assistance Payments Contract) of 24 CFR 1272, as modified by Appendix I of this part. After receipt of the executed Annual Contributions Contract from the State agency, HUD shall transmit to the State agency an executed copy, together with the Agreement. A copy of the Agreement, executed by the State agency and the owner, shall be returned to HUD.

§ 1278.114 Project completion.

Upon completion of the project, the State agency shall transmit to HUD a certification that the completed project has been inspected by a representative of the State agency and that (a) there are no defects or deficiencies in the project; (b) all work has been completed in accordance with the requirements of the Agreement; and (c) the project is in good and tenantable condition. If HUD determines that the State agency's certification is in conformance with the requirements of this paragraph, it will authorize execution of the Housing Assistance Payments Contract.

§ 1278.115 HUD review of contract compliance.

No later than six months after execution of the Housing Assistance Payments Contract for the project and periodically thereafter, not less than annually, HUD will review project operations to ensure that the State agency and the owner/lessor are in full compliance with the terms and conditions of the Contract, in accordance with HUD processing procedures for the New Construction Program.

Subpart C—Program Development—Existing Housing

§ 1278.201 Program development.

The policies and procedures of the Section 23 Housing Assistance Payments Program—Existing Housing, 24 CFR 1274, are applicable to participating State agencies, with the exceptions of § 1274.3(g)(2) as it applies to priority for application approval and the modifications described in Appendix II of this part.

Subpart D—Program Development—Substantial Rehabilitation Programs

§ 1278.301 General.

The procedures of this chapter apply only to participating State agencies as defined in § 1278.3(a) of this part, (herein referred to as "State agencies") and except as specifically modified by this part, such State agencies shall be subject to the policies and procedures of the Housing Assistance Payments Program—Substantial Rehabilitation, 24 CFR 1276.

§ 1278.302 Responsibility for program development.

Subject to certain HUD reviews to ensure compliance with basic national objectives, participating agencies will assume primary responsibility for program development. Housing will be privately owned and owners will be responsible for all management and maintenance functions. In submitting a program, the State agency shall include any special procedures for tenant selection.

V 39 N 54 MAR 19 74 XUM

§ 1278.303 Equal opportunity requirements.

Each agency shall submit to HUD on or before March 31 of each year signed assurances of compliance with Title VI of the Civil Rights Act of 1964, Executive Order 11063, Title VIII of the Civil Rights Act of 1968, and, where appropriate, certifications required pursuant to Executive Order 11246. Such assurances and certifications shall specifically be made applicable to all projects assisted under Section 23 Housing Assistance Payments Programs. In addition, each agency shall submit (a) a statement describing the actions taken or to be taken by the agency to comply with the above statutes and executive orders and (b) schedules indicating the minority composition in each of the agency's projects.

§ 1278.304 Preapplication.

(a) *Determination of need and survey of housing market.* For each locality for which it plans to submit an application, the State agency shall make a determination that there is a need for housing assistance for low-income families and survey the housing market of the locality to determine whether there is a sufficient supply of dwelling units that are suitable or may be made suitable to meet all or part of this need.

(b) *Conditions for submitting an application for substantial rehabilitation.* A State agency may apply for a Section 23 substantial rehabilitation project:

(1) If there is not, and there is not likely soon to be, an adequate supply of existing housing which, with the aid of housing assistance payments, can meet the housing needs of low-income families; or

(2) In certain areas in which the proposed housing is required and the project is specifically approved by HUD in accordance with priorities established from time to time by the Secretary.

§ 1278.305 Submission of application.

(a) *Application.* A separate application for each substantial rehabilitation project shall be submitted by the State agency to HUD in accordance with the requirements of § 1276.102(a)(1) (Submission of application) of 24 CFR 1276.

(b) *Income limits and rent schedules* must be submitted with the application. In communities in which an LHA has established income limits for Section 23 leased housing, those limits, or limits as amended by the LHA, should be used. If the State agency has grounds for seeking a modification of the established income limits, it shall submit its proposal for modified income limits together with justification to HUD. In communities in which there is no LHA or the LHA has not established income limits in connection with the Section 23 program, the State agency may establish such income limits, if it is within its statutory authorization to do so.

(c) *Local governing body approval.* § 1276.3(i) (Local governing body approval) of 24 CFR 1276 is applicable to State agencies. However, evidence of local governing body approval shall be submitted with the development proposal (see § 1278.309 below) rather than with the application.

§ 1278.306 HUD review and approval of application.

(a) *Review of application.* HUD shall review the application in accordance with the procedures set forth in § 1276.103(a) (Review of application) of 24 CFR 1276. However, the unit limitation described in § 1276.3(k)(2) (Limitation on number of units in single structure) of 24 CFR 1276 is inapplicable with respect to priorities for approval of applications from participating State agencies.

(b) *Notification to State Agency.* Upon completion of its review, HUD shall notify the State agency, in the manner prescribed in § 1276.103(b) (Approval or disapproval of application) of 24 CFR 1276 as to whether its application is approved. However, if the application is approved, the "Notification of application approval" shall not include any provision requiring the State agency to prepare an invitation for proposals.

§ 1278.307 Obtaining proposals.

State agencies shall not be required to invite proposals for rehabilitation or to submit such proposals to HUD for review prior to selection of a proposal. State agencies should, however, establish their own procedures for obtaining proposals if they consider it necessary. The following sections of 24 CFR 1276 are inapplicable to participating State agencies:

§ 1276.104 Invitation for proposals.
§ 1276.105 Submission of proposals.

Although § 1276.104 is inapplicable to State agencies, each agency should carefully consider furnishing prospective participants in a substantial rehabilitation program with the type and scope of information set forth in that paragraph.

§ 1278.308 Selection of rehabilitator.

The State agency shall select the proposed rehabilitator and structure or structures in accordance with its own procedures. However, in selecting a rehabilitator and structure or structures, the State agency should make the following determinations:

(a) That the site and neighborhood standards set forth in § 1276.107 (Site and neighborhood standards) of 24 CFR 1276 are satisfied;

(b) That all applicable equal opportunity and affirmative action requirements, including Section 3 of the Housing and Urban Development Act of 1968 and the regulations issued pursuant thereto, can be satisfied;

(c) That the quality of rehabilitation will satisfy the standards set forth in § 1278.312;

(d) That the rents to the owner are reasonable and that the maximum gross rents do not exceed the HUD established fair market rents, except where approved by HUD in accordance with § 1276.3(e) of 24 CFR 1276; and

(e) That the rehabilitator, prime contractor, and owner are responsible for purposes of meeting all the obligations of the prescribed Agreement to enter into housing assistance payments contract.

§ 1278.309 Rehabilitation proposal.

(a) *Proposal contents.* Once a rehabilitator and the location of an existing structure or structures have been chosen by the State agency, the agency shall submit to HUD a proposal which shall contain the following:

(1) The names of the rehabilitator/prime contractor and owner/lessor.

(2) The number of units, by unit size (number of bedrooms), proposed to be rehabilitated and made available for leasing by eligible families.

(3) A map showing the location of the housing.

(4) A description of the rehabilitation proposed.

(5) The anticipated date for completion of the rehabilitation.

(6) The gross rents required by unit size, the portion of such rents attributable to each utility, and which utilities, if any, are to be paid directly by the families.

(7) A statement as to whether the proposed project is expected to displace site occupants and, if so, the number of families, individuals, and business concerns to be displaced (identified by race or minority) and a statement that the owner and/or rehabilitator recognizes the relocation requirements that apply if the proposed project will cause displacement and will assume full responsibility for the funding of all costs incurred in providing to displaced persons the full relocation payments and services authorized by the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970.

(8) A completed Affirmative Fair Housing Marketing Plan on the form prescribed by HUD.

(9) A completed HUD Environmental Information Form.

(10) An affirmative action plan pursuant to Section 3 of the Housing and Urban Development Act of 1968 and regulations issued pursuant thereto with regard to utilization of project area businesses and residents.

(11) Evidence of local governing body approval as described in § 1276.3(i) (Local governing body approval) of 24 CFR 1276.

(b) *Certifications.* The State agency shall submit, with the proposal, a certification that the proposed site(s) meets the conditions specified in § 1276.107(b) (accessibility to facilities and services) and § 1276.107(c) (commutation to employment) of 24 CFR 1276.

§ 1278.310 HUD evaluation of proposals.

(a) *Evaluation criteria.* HUD's evaluation of proposals submitted by State agencies shall be limited to determining whether the following requirements are satisfied:

(1) The proposal submission contains all elements required in § 1278.309 above.

(2) The maximum gross rents do not exceed the HUD-established fair market rents, except as approved by HUD as provided in § 1276.3(e) of 24 CFR 1276.

(3) The site and neighborhood requirements of § 1276.107(a) (equal opportunity and environmental aspects) and § 1276.107(d) (relocation requirements) of 24 CFR 1276 are met.

(4) The proposal satisfies the requirements of the National Environmental Policy Act. In determining whether this requirement is met, HUD shall complete all appropriate environmental reviews as required pursuant to the HUD regulation "Protection and Enhancement of Environmental Quality," 24 CFR 50.

(5) The affirmative action plan, required by § 1278.309(a)(10), satisfies the requirements of Section 3 of the Housing and Urban Development Act of 1968 and regulations issued pursuant thereto.

b. The following sections of 24 CFR Part 1276 are inapplicable to participating State agencies:

§ 1276.108 Invitation for proposals.
§ 1276.109 Submission of proposals.

§ 1278.311 Notification of acceptability of proposal.

HUD shall advise the State agency by letter as to the acceptability of the proposal(s). The letter of acceptability shall be conditioned upon submission by the agency of the certification required in § 1278.312.

§ 1278.312 Standards for rehabilitation.

Before an annual contributions contract may be executed, HUD must receive a certification from the State agency that the proposed rehabilitation meets all applicable State and local laws, codes, ordinances, and regulations as modified by any waivers obtained from the appropriate officials. In cases where working drawings and specifications have been prepared, the State agency shall also certify that the proposed rehabilitation meets the appropriate HUD Minimum Property Standards (see § 1276.104(b)(2) of 24 CFR 1276).

§ 1278.313 Execution of annual contributions contract and agreement.

After receipt of the certification required in § 1278.312 above, HUD shall prepare: (a) the annual contributions contract, in accordance with Appendix II of 24 CFR 1276, as modified by Appendix III of this part, which shall be transmitted by HUD to the State agency for execution and return to HUD, and (b) an agreement to enter into housing assistance payments contract, which shall be prepared in conformance with § 1276.111 (Agreement to enter into housing assistance payments contract) of 24 CFR 1276, as modified by Appendix III of this part. After receipt of the executed annual contributions contract from the State agency, HUD shall transmit to the State agency an executed copy, together with the Agreement. A copy of the Agreement, executed by the State agency and the owner, shall be returned to HUD by the State agency.

§ 1278.314 Project completion.

Upon completion of the rehabilitation, the State agency shall transmit to HUD a certification that the completed project has been inspected by a representative of the State agency and that (a) there are no defects or deficiencies in the project; (b) all work has been completed in accordance with the requirements of the Agreement; and (c) the project is in good and tenantable condition. If HUD determines that the State agency's certification is in conformance with the requirements of this paragraph, it will authorize execution of the housing assistance payments contract.

§ 1278.315 HUD review of contract compliance.

No later than six months after execution of the Housing Assistance Payments Contract for the project and periodically thereafter, not less than annually, HUD will review project operations to ensure that the State agency and the owner/lessor are in full compliance with the terms and conditions of the contract, in accordance with HUD processing procedures for the substantial rehabilitation program.

APPENDIX I.—SECTION 23 HOUSING ASSISTANCE PAYMENTS PROGRAM NEW CONSTRUCTION

APPLICABILITY OF APPENDICES TO STATE AGENCIES

Appendices I–VII of the New Construction Regulation, 24 CFR 1272, are applicable to State agencies as defined in § 1278.3(a) of this part, except as provided below:

1. Appendix I, Invitation for proposals, is not applicable.

2. Appendix II, Notification of developer selection, is not applicable.

3. Appendix III, Annual contributions contract, is modified as follows:

a. Delete Part II, Section 2.12(d)

b. Delete Part II, Section 2.13 and substitute the following:

"2.13 *Procurement.* In the purchasing of equipment, materials, and supplies, and in the award of contracts for services, the State Agency shall comply with all applicable State Laws."

4. Appendix IV, Agreement to enter into housing assistance payments contract is modified as follows:

Delete Section 4 and substitute the following:

"4. *Project Completion.* Upon completion of the Project, the LHA shall transmit to the Government a certification that the completed Project has been inspected by a representative of the LHA and that (a) there are no defects or deficiencies in the Project, (b) all work has been done in accordance with the requirements of the Agreement, and (c) the project is in good and tenantable condition. If the Government determines that the certification is in conformance with the requirements of this paragraph, it will authorize execution of the Housing Assistance Payments Contract."

5. With respect to all prescribed forms which are utilized by State agencies, as defined in § 1278.3(a) of this part, the term "State Agency" may be substituted for the following terms: "Local housing authority," "LHA," "Local Housing Authority."

APPENDIX II.—SECTION 23 HOUSING ASSISTANCE PAYMENTS PROGRAM; EXISTING HOUSING

APPLICABILITY OF APPENDICES TO STATE AGENCIES

Appendices I–IV of the Existing Housing Regulation, 24 CFR 1274, are applicable to State agencies as defined in § 1278.3(a) of this part, except as provided below:

1. Appendix I, Annual contributions contract, is modified as follows:

a. Delete Part II, Section 2.12(d)

b. Delete Part II, Section 2.13 and substitute the following:

"2.13 *Procurement.* In the purchasing of equipment, materials, and supplies, and in the award of contracts for services, the State Agency shall comply with all applicable State Laws."

2. With respect to all prescribed forms which are utilized by State agencies, as defined in § 1278.3(a) of this Part, the term "State Agency" may be substituted for the following terms: "Local housing authority," "LHA," "Local Authority."

APPENDIX III.—SECTION 23 HOUSING ASSISTANCE PAYMENTS PROGRAM; SUBSTANTIAL REHABILITATION

APPLICABILITY OF APPENDICES TO STATE AGENCIES

Appendices I–VI of the Substantial Rehabilitation Regulation, 24 CFR 1276, are applicable to State agencies as defined in § 1278.3(a) of this part, except as provided below:

1. Appendix I, Notification of developer selection, is not applicable.

2. Appendix II, Annual contributions contract, is modified as follows:

a. Delete Part II, Section 2.12(d)

b. Delete Part II, Section 2.13 and substitute the following:

"2.13 *Procurement.* In the purchasing of equipment, materials, and supplies, and in the award of contracts for services, the State Agency shall comply with all applicable State Laws."

3. Appendix III, Agreement to enter into housing assistance payments contract, is modified as follows:

Delete Section 4 and substitute the following:

"4. *Project Completion.* Upon completion of the project, the LHA shall transmit to the Government a certification that the completed Project has been inspected by a representative of the LHA and that (a) there are no defects or deficiencies in the Project, (b) all work has been done in accordance with the requirements of the Agreement, and (c) the project is in good and tenantable condition. If the Government determines that the certification is in conformance with the requirements of this paragraph, it will authorize execution of the Housing Assistance Payments Contract."

4. With respect to all prescribed forms which are utilized by State agencies, as defined in § 1278.3(a) of this Part, the term "State Agency" may be substituted for the following terms: "Local housing authority," "LHA," "Local Authority."

Issued at Washington, D.C., March 12, 1974.

SHELDON B. LUBAR,
Assistant Secretary for Housing Production and Mortgage Credit—FHA Commissioner.

[FR Doc.74-6177 Filed 3-18-74;8:45 am]

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[49 CFR Part 230]

[Docket No. LI-4, Notice 2]

LOCOMOTIVE SPEED INDICATORS, SPEED RECORDERS AND WHEEL SLIP/SLIDE INDICATORS

Notice of Extension of Comment Period

On February 4, 1974, the Federal Railroad Administration (FRA) issued an

V 39 54 MAR 19 74 XUM

Advance Notice of Proposed Rule Making to require additional safety equipment on locomotives (39 FR 4929). Written comments responding to that notice were requested by March 18, 1974.

At the request of the Association of American Railroads, the period for filing of written comments has been extended to April 30, 1974. Communications received by that date will be considered in development of a Notice of Proposed Rule Making. Comments received after that date will be considered only as far as practicable.

This notice is issued under authority of sections 2, 5, 36 Stat. 913, 914, 45 U.S.C. 23, 28, section 6(e) and (f), 80 Stat. 939, 940, 49 U.S.C. 1655, 49 CFR 1.49(c)(5), and sections 202, 209, 84 Stat. 975, 45 U.S.C. 431, 438, 49 CFR 1.49(n).

Issued in Washington, D.C. on March 14, 1974.

DONALD W. BENNETT,
Chief Counsel.

[FR Doc.74-6217 Filed 3-18-74;8:45 am]

National Highway Traffic Safety Administration

[49 CFR Part 571]

[Docket No. 74-13; Notice 1]

PART 571—FEDERAL MOTOR VEHICLE SAFETY STANDARDS

Seating Systems

This notice proposes the amendment of Standard 207, *Seating systems*, 49 CFR 571.207, to establish barrier crash testing for passenger car, multipurpose passenger vehicle (MPV), and light truck seating systems manufactured after September 1, 1976, and to extend the applicability of Standard 202, *Head restraints*, 49 CFR 571.202, to MPV's, light trucks, and bus driver seats by incorporation of that standard, with several changes, in Standard 207.

Consolidation of Standards 202 and 207 logically reflects the relationship of the seat and its head restraint and would improve the possibilities of eventually testing the whole seating system with dynamic test procedures. It also has the beneficial effect of extending the head restraint standard to MPV's, trucks, and buses whose broad and increasing use as passenger vehicles on the highway requires that they be well-equipped with passenger-car-type safety systems.

The head restraint requirement would be modified to ensure proper utilization, by preventing its misadjustment and removal. Permanent attachment to the seat, minimum height and several minor modifications would be added to guarantee the benefits of a well-designed and adjusted device. The NHTSA recognizes the need to maintain a balance between head restraint height and driver visibility by permitting an adjustable head restraint on the right outboard seat. Docket No. 70-7, Fields of Direct View, addressed the effect of head restraint design on driver visibility, noting that some current designs of bulky head restraints can adversely affect the driver's view to the sides and rear and can interfere with visibility through the inside rearview mirror. Comments on the rearward visibility problem inherent in higher head restraints is solicited.

At the same time an alternative test procedure found in the present Standard 202 (the acceleration test in S4) would be eliminated. This would avoid possible enforcement problems, by ensuring that NHTSA compliance test results and manufacturer certification test results refer to the same basic requirements, and therefore are directly comparable.

The seat system requirements of present Standard 207 would remain a part of the standard except for the acceleration test, of the seat back latch mechanism. There would be a new test of forward-facing seat backs that measures the seat back's resistance to collapse under front-end impact. The proposal groups the tests together to specify clearly how many of the test requirements a particular vehicle or seating component must meet. In addition to these changes, a new moving barrier crash test would be established to test the forward-facing seats in passenger cars, and in MPV's and trucks having a gross vehicle weight rating of 10,000 pounds or less. Unlike a static test, the crash test measures the forces exerted on the seat by impact transmitted through the vehicle, permitting the different crush rates of vehicles to be utilized in the design of seats.

The rear moving barrier crash test would be conducted in the same way as that proposed for Standard 301, *Fuel system integrity*, 49 CFR 571.301. The similar loading, test conditions, and test procedures would permit simultaneous testing which lowers the cost and complexity of certification programs. This test and one other utilize mannikin installation procedures proposed in an earlier NHTSA notice on the vehicle seating reference point (38 F.R. 1645, January 17, 1973) with minor modifications in response to that docket. Further comment on the installation procedure is solicited as it applies to the determination of torso line for seating systems tests.

The present requirement that components simply "withstand" an amount of force would be clarified by assigning quantifiable measures where possible to the concept.

A proposed effective date of September 1, 1976, allows 18 months of lead time following issuance of the final rule.

In consideration of the foregoing, it is proposed that Part 571 of Title 49, Code of Federal Regulations, be amended by revising Standard 202, *Head restraints*, 49 CFR 571.202, and Standard 207, *Seating systems*, 49 CFR 571.207, as a consolidated standard to read as set forth below.

Interested persons are invited to submit comments on the proposal. Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5221, 400 Seventh Street SW., Washington, D.C. 20590. It is requested but not required that 10 copies be submitted.

All comments received before the close of business on the comment closing date indicated below will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. However, the rulemaking action may proceed at any time after that date, and comments received after the closing date and too late for consideration in regard to the action will be treated as suggestions for future rulemaking. The NHTSA will continue to file relevant material as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Comment closing date: June 17, 1974.

Proposed effective date: September 1, 1976.

(Secs. 103, 119, Pub. L. 89-563, 80 Stat. 718, 15 U.S.C. 1392, 1407; delegations of authority at 49 CFR 1.51 and 49 CFR 501.6.)

Issued on March 14, 1974.

ROBERT L. CARTER,
Associate Administrator,
Motor Vehicle Programs.

§ 571.207 Standard 207-76; seating systems.

S1. *Scope.* This standard establishes performance and labeling requirements for seats, head restraints, seat back latch mechanisms and seat anchorages.

S2. *Purpose.* The purpose of this standard is to reduce the number of deaths and the severity of injuries that result from the failure of seats and seat components to withstand crash forces.

S3. *Applicability.* This standard applies to passenger cars, multipurpose passenger vehicles, trucks, and buses.

S4. *Definitions.*

"Occupant seat" means a seat that provides at least one designated seating position.

"Head restraint" means a device that limits rearward displacement of the occupant's head relative to his torso line.

S5. *Requirements.* Each vehicle shall be capable of meeting any of the requirements set forth under this heading, when tested in accordance with the procedures of S6. and the conditions of S7., except that any vehicle which is capable of meeting the requirements of S5.3(e) is not required to be capable of meeting S5.3(b), S5.5.1(b), or S5.3(c) as applied to forward-facing seats. However, a particular vehicle (i.e., a test specimen) need not meet further requirements after having been subjected to any one of the following groups of requirements:

Group I: S5.2, S5.3(a), S5.3(b), S5.3(d), S5.5.1(b), and S5.5.1(a).
Group II: S5.2, S5.3(c), and S5.3(e).
Group III: S5.2 and all S5.4 requirements.

S5.1 *Driver's seat.* Each vehicle shall be equipped with an occupant seat for the driver.

S5.2 *Seat adjustment requirements.* Each occupant seat shall remain in the position to which it was adjusted prior to testing during the application of forces specified in S5.3, S5.4, and S5.5, except for vertical movement of non-locking suspension-type occupant seat components in trucks and buses.

S5.3 *Seat performance requirements.* Each occupant seat other than a side-facing seat and a passenger seat in a bus shall be capable of withstanding the following forces, applied in accordance with the procedures noted in parentheses:

(a) 20 times the weight of the seat applied in a forward longitudinal direction, plus, in the case of forward-facing seats to which seat belt assemblies are attached, the additional force specified for testing seat belt assemblies by S4.2 of Standard No. 210 (49 CFR 571.210), applied simultaneously at the belt anchorage points, without release or failure of the seat adjusters or anchorages (S6.1.1, S6.1.2, S6.1.3);

(b) 20 times the weight of the seat applied in a rearward longitudinal direction, plus, in the case of rearward-facing seats to which seat belt assemblies are attached, the additional force specified for testing seat belt assemblies by S4.2 of Standard No. 210 (49 CFR 571.210), applied simultaneously at the belt anchorage points, without release or failure of the seat adjusters or anchorages (S6.1.1, S6.1.2, S6.1.3);

(c) A force that produces a 3,300-inch-pound moment about the seating reference point for each designated seating position that the seat provides, applied to the upper seat back or to the upper cross-member of the seat back in a rearward longitudinal direction for forward-facing seats and in a forward longitudinal direction for rearward facing seats, with not more than 40° displacement of the seat back line (B–B) rearward of the vertical established in accordance with S6.1.5.2 (S6.2.1).

(d) In the case of front forward-facing seats, 20 times the weight of the seat back applied in a forward longitudinal direction to the seat back with not more than 10° displacement of the seat back line (B–B) forward of the vertical established in accordance with S6.1.5.2 (S6.1.5); and

(e) In the case of forward-facing seats in passenger cars, and in multipurpose passenger vehicles and trucks having a gross vehicle weight rating of 10,000 pounds or less, a force exerted on the occupied seat by the impact of a moving barrier perpendicularly against the rear of the vehicle at any speed up to 30 mph without release or failure of the seat adjusters or anchorages and with not more than 40° of displacement of the seat back line (B–B) rearward of the vertical established in accordance with S6.1.5.2 (S6.2.2).

S5.4 *Head restraint requirements.* Except in vehicles whose gross vehicle weight rating exceeds 10,000 pounds, the front outboard designated seating positions of each vehicle shall be equipped with a head restraint.

S5.4.1 *Head restraint performance requirements.*

S5.4.1.1 When a force that produces a moment about the seating reference point in accordance with S6.3 is applied through a head form to a head restraint adjusted to its fully-extended design position, the rearmost portion of the head form shall not move more than 4 inches perpendicularly rearward of the extended torso line before—

(a) The seat or seat back fails; or

(b) 200 pounds is applied (S6.3).

S5.4.1.2 Each head restraint shall withstand any force up to 50 pounds applied in a horizontal rearward longitudinal direction by a 6½ inch diameter sphere at any point more than 2½ inches below the top of the head restraint in its fully-extended design position, and within 3 inches of its vertical centerline.

S5.4.1.3 Each adjustable head restraint shall be equipped with a latch mechanism and latch release control that restrains movement of the head restraint without operation of the latch release control. The latch mechanism shall not release or fail when any force up to 10 times the movable weight of the head restraint is applied to the head restraint in any direction in which it is adjustable.

S5.4.2 *Head restraint height.* The top of the head restraint in its fully-depressed design position shall not be less than—

(a) In the case of the left front outboard designated seating position (driver's seat), 31 inches above the seating reference point measured parallel to the torso line;

(b) In the case of the right front outboard designated seating position, 27.5 inches above the seating reference point measured parallel to the torso line. The head restraint shall be capable of adjustment to a height of not less than 31 inches above the seating reference point measured parallel to the torso line.

S5.4.3 *Head restraint width.* The lateral width of each head restraint, when measured 2.5 inches below the top of the head restraint shall be—

(a) Not less than 10 inches in the case of bench-type occupant seats; and

(b) Not less than 8 inches in the case of occupant seats other than bench-type seats.

S5.4.4 *Head restraint attachment.* Each head restraint shall be attached to the seat so that it can be removed only by disassembly of the seat back, or shearing of metal.

S5.5 *Seat back restraint requirements.* Each occupant seat with a hinged or folding seat back other than a side-facing seat or a seat back adjustable only for the comfort of its occupants shall be equipped with a latch mechanism and latch release control that restrains movement of the seat back without operation of the latch release control.

S5.5.1 The latch mechanism shall not release or fail when—

(a) In the case of a forward facing seat, 20 times the weight of the hinged or folding seat back is applied in a forward longitudinal direction (S6.1.5); or

(b) In the case of a rearward facing seat, 8 times the weight of the hinged or folding seat back is applied in a rearward longitudinal direction relative to the vehicle longitudinal centerline (S6.1.4).

S5.5.2 The latch release control shall be accessible to the occupant of the seat equipped with the latch mechanism and to the occupant of the designated seating position immediately behind the seat if operation of the control is required for that occupant's exit from the vehicle. The release control shall be located on the side of the seat, facing and next to the exit door within 2 inches of a horizontal plane passing through the H point of a seated SAE manikin. The latch release control shall protrude at least one-half inch from the surrounding surface and be operable by a force of not more than 20 pounds applied in an upward or inward direction.

S5.6 *Labeling of non-designated seating.* Any vehicle seating other than an occupant seat shall be conspicuously marked with the following in letters three-eighths of an inch high:

NOT FOR OCCUPANCY WHILE VEHICLE IS IN MOTION

S6. *Test procedures.* Each vehicle shall be capable of meeting the requirements of S5. when tested in accordance with the procedures and in the sequence set forth below.

S6.1 *Group I.* With the occupant seat in the vehicle and only as much padding, cushions, and upholstery removed as is necessary to secure struts and cross-members used in testing, apply in sequence the forces specified in S5.3(a), S5.3(b), S5.3(d), and S5.5.1(a) and S5.5.1(b) as follows:

S6.1.1 If the seat back and the seat bench are attached to the vehicle by the same attachments, secure a strut on each side of the seat from a point on the outside of the seat frame in the horizontal plane of the seat's center of gravity to a point on the frame as far forward as possible of the seat anchorages. Between the upper ends of the struts place a rigid cross-member, in front of the seat back frame for the application of rearward force and behind the seat back frame for the application of forward force. Apply the force specified by S5.3(a) and S5.3(b) horizontally through the rigid cross-member as shown in Figure 1. In the case of seats to which seat belt assemblies are attached, apply simultaneously at the belt anchorage points the additional force specified by S4.2 of Standard No. 210 (49 CFR 571.210).

S6.1.2 If the seat back and the seat bench are attached to the vehicle by different attachments, attach to each component a fixture capable of transmitting a force to that component. Apply force equal to 20 times the weight of the seat back horizontally through the center of gravity of the seat back, as shown in Figure 2, and apply force equal to 20 times the weight of the seat bench horizontally through the center of gravity of the seat bench, as shown in Figure 3. In the case of seats to which seat belt assemblies are attached, apply simultaneously, at the belt anchorage points, the additional force specified by

V 39 54 MAR 19 74 XUM

S4.2 of Standard No. 210 (49 CFR 571.210).

S6.1.3 In the case of pedestal-type seats with a center of gravity below the level of the seat bench—

(a) If the seat is non-adjustable or only vertically adjustable, apply the forces specified by S5.3(a) or S5.3(b) at the entire seat's center of gravity without the attachment of struts;

(b) If the seat is horizontally adjustable above its center of gravity, apply the forces specified by S5.3(a) and S5.3(b) at the entire seat's center of gravity without attachment of struts and apply 20 times the weight of the horizontally adjustable portion at its center of gravity in the manner specified in S6.1.1.

S6.1.4 In the case of rearward-facing hinged or folding seats, remove the struts and cross members used in S6.1.1 through S6.1.3, secure a rigid cross-member behind the seat back frame in the horizontal plane of the seat back's center of gravity as shown in Figure 4, and apply the forces specified in S5.5.1 (b) in a rearward longitudinal direction.

S6.1.5 In the case of forward-facing front seats, remove the struts and cross members used in S6.1.1 through S6.1.3 and secure a rigid cross-member behind the seat back frame in the horizontal plane of the seat back's center of gravity as shown in Figure 4.

S6.1.5.1 Establish the H point and the torso line of a weighted SAE manikin installed in any front outboard designated seating position as follows:

(a) Place the vehicle on a level surface at unloaded vehicle weight with the tires at the vehicle manufacturer's specified cold tire pressure.

(b) Place the driver's seat in the manufacturer's rearmost and lowest design riding position. If the seat has an adjustable back, place the seat back in the manufacturer's nominal design riding position. If the seat has independently adjustable bottom pad angles and vertical positioning, place the bottom pad at the lowest angle and elevation.

(c) Place two pieces of 20-gauge stainless steel plate on the floor carpet in front of the driver's seat to permit the manikin's heels to slide on them throughout the remainder of the procedure.

(d) Place muslin cloth over the seat area and seat back directly behind the steering wheel.

(e) Adjust the thigh and leg segments of the manikin to the length of the 95th percentile. Adjust the foot angle of the manikin's feet to 87 degrees.

(f) Attach the right foot and lower leg assembly to the manikin's T-bar. Place the manikin in the driver's seating position and center the assembly laterally on the longitudinal centerline of the seating position. If the steering wheel has more than one operating position, place the steering wheel in the locked position nearest the middle of its adjustment range. Attach the left foot and lower leg assembly to the manikin's T-bar.

(g) Elevate the leg segment to release friction on the floor, and lower the leg segments until the manikin's heels make contact with the stainless steel plates. No attempt should be made to prevent the manikin's foot from depressing the accelerator and/or brake pedal throughout S6.

(h) Pull the manikin's back and pan assembly away from the seat back, using the T-bar, and tilt the back pan forward. Maintain the rearmost portion of the manikin at approximately 1 inch from the seat back through step (1).

(i) Attach the lower leg and thigh weights.

(j) Adjust the knee separations so that the manikin's right foot is laterally midway between the centers of the accelerator and brake pedal, and the right edge of the left foot is one-half inch outboard of the outermost extremity of the brake pedal, or the clutch pedal if so equipped. Adjust the stainless steel plates as needed.

(k) Place the forward lateral portion of the T-bar parallel to the ground and perpendiculwar to the vehicle's vertical longitudinal plane to assure that the H point buttons on the seat pan assembly are properly aligned.

(l) Repeat the procedure specified in step (g) to release friction on the floor.

(m) Reposition the manikin assembly by sliding the seat pan rearward, gradually applying a force of 50 pounds in the direction of the thigh bar longitudinal centerline, then gradually removing the force.

(n) Move the back pan rearward so that the upper portion of the back pan contacts the seat.

(o) Repeat the procedure specified in step (k).

(p) Move the head probe forward and install the right and left buttock weights. Place the eight torso weights, one by one on alternate sides.

(q) While maintaining the seat pan level in a lateral direction, tilt the back pan forward until the torso weights are over the H point to release any seat back friction. Without changing the position of the manikin, tilt the back pan forward and hold the thigh bar to prevent the manikin from sliding forward. Reposition the back pan and the head probe to their original positions.

(r) Gradually, apply a horizontal force of 5 pounds in a rearward direction to the back pan at the screw located at the base of the graduated scale on the headroom probe with the probe in full down position to vertically reposition the manikin, and gradually remove the force. Repeat once. Level the manikin assembly laterally.

(s) Determine the longitudinal and vertical location of the manikin's H point.

S6.1.5.2 Determine the seat back line and the vertical as shown in Figure 5 by locating a point B1 2.5 inches below the top of the head restraint or seat back, constructing a horizontal plane A–A through the H point, constructing the seat back line B–B parallel to the manikin torso reference line and through B1, and constructing a vertical plane through the intersection of A–A and B–B, designated B2.

S6.1.5.3 Apply the forces specified in S5.3(d) and S5.5.1(a) in a forward longitudinal direction to the rigid cross-member.

S6.2 *Group II test procedure.* Use one of the two following test procedures as specified in S5.3(c) and S5.3(e).

S6.2.1 *3,300 inch-pound moment test procedure.*

S6.2.1.1 With the seat in the vehicle, establish the H point and torso reference line of a weighted SAE manikin in accordance with the procedures of S6.1.5.1 installed in any front outboard designated seating position of the vehicle.

S6.2.1.2 Establish points B1 and B2 in accordance with S6.1.5.2.

S6.2.1.3 Remove the manikin and apply the force specified in S5.3(c) to a rigid cross-member secured to the seat back as shown in Figure 6.

S6.2.2 *Rear moving barrier crash test procedures.*

S6.2.2.1 Establish the H point and torso reference line of a weighted SAE manikin in accordance with the procedures of S6.1.5.1 installed in any front outboard designated seating position of a vehicle conditioned in accordance with S7.1.

S6.2.2.2 Establish points B1 and B2 in accordance with S6.1.5.2.

S6.2.2.3 Remove the manikin and load the vehicle in accordance with S8.1 of Standard 208, *Occupant crash protection*, including a 50th percentile anthropormorphic test device that conforms to Part 572 of this chapter positioned at each front outboard designated seating position, restrained only by means that require no action by the vehicle occupant.

S6.2.2.4 Impact the rear end of the test vehicle with the moving crash barrier at 30 mph so that the face of the moving barrier is perpendicular to the longitudinal centerline of the vehicle, and a vertical plane through the geometric center of the barrier impact surface and perpendicular to that surface coincides with the longitudinal centerline of the vehicle.

S6.3 *Group III test procedures.*

S6.3.1 Following the test of the seat's head restraint mechanism in accordance with the requirements of S5.4.1.3 in the case of adjustable head restraints, and the test of the head restraint's configuration by the application of a 6½-inch-diameter sphere in accordance with S5.4.1.2, establish the H point and torso line of a weighted SAE manikin installed in the seat in accordance with the procedures of S6.1.5. Position the centerline of the head room probe in full back position and, in the case of an adjustable head restraint, position the head restraint in its fully extended design position.

S6.3.2 Establish the displaced torso line by applying a rearward moment of 3,300 inch-pounds about the H point to the seat back through the test device back pan.

S6.3.3 Remove the back pan and, using a cylindrical head form having a 6.5-inch diameter in plan view and a 6-inch height in profile view, apply a rearward initial load perpendicular to the displaced torso reference line and 2.5 inches below the top of and displaced 3 inches laterally from, the vertical centerline of the head restraint or upper seat back, that produces a 3,300 inch-pound moment about the seating reference point.

S6.3.4 Gradually increase the initial load to 200 pounds or until the seat or seat back fails.

S7. *Test conditions.* The following conditions apply to the tests conducted in satisfaction of the requirements specified in S5.

S7.1 Test conditions for the rear moving barrier crash specified in S5.2 (e) are in accordance with S8.2 of Standard No. 208, *Occupant Crash Protection*, 49 CFR 571.208, except for the positioning of the barrier and the vehicle. The barrier and test vehicle are positioned so that at impact—

(a) The vehicle is at rest in its normal attitude.

(b) The barrier is traveling at 30 mph with its face perpendicular to the longitudinal centerline of the vehicle; and

(c) A vertical plane through the geometric center of the barrier impact surface and perpendicular to the surface coincides with the longitudinal centerline of the vehicle.

S7.2 Static loading is applied as follows—

(a) The specified load is reached in 5 seconds.

(b) The load is held for 5 seconds.

(c) The specified load is released to zero load in 5 seconds.

S7.3 The center of gravity of a seat or seat component is determined with all cushions and upholstery in place and with all adjustable head restraints in their fully extended design position.

S7.4 The seat back is in the manufacturer's nominal design riding position and the seat is in any horizontally adjusted position. Seats adjustable with electromechanical, vacuum or hydraulic adjusters are in the most upright position, fully down, and in any horizontal position.

S7.5 The weight of a seat or component is the weight of seat structure, cushions, adjusters, and head restraints that constitute the assembled seat or component installed in the vehicle.

S7.6 The ambient temperature is any level between 15° F. and 110° F.

[Docket No. 74-14; Notice 1]

MOTOR VEHICLE SAFETY STANDARDS

Occupant Crash Protection

This notice proposes new occupant crash protection requirements for the period beginning September 1, 1976, and proposes to extend the present three options, including the belt interlock system requirements, until that date.

Standard No. 208, *Occupant Crash Protection*, 49 CFR 571.208, has in its present form been in effect since January 1, 1972. It requires either the furnishing of seat belts with or without use-inducing systems, or the meeting of quantitative injury criteria in crash tests performed with instrumented dummies, or both. The requirements have been imposed in sequential phases, with the current phase for passenger cars beginning on September 1, 1973, and extending until August 15, 1975. On that date, as the standard was issued, all passenger cars were to have crash protection that was "passive," i.e., required no action by vehicle occupants such as the fastening of a seat belt.

On December 5, 1972, the U.S. Court of Appeals for the Sixth Circuit in *Chrysler v. DOT*, 472 F.2d 659 (6th Cir. 1972) upheld the basic validity of Standard 208, but required the agency to issue more specific dummy specifications, and suspended the mandatory passive requirements that were to come into effect on August 15, 1975. New dummy specifications were published on August 1, 1973 (38 FR 20449) as Part 572 of Title 49, Code of Federal Regulations. In this notice, the NHTSA proposes requirements for occupant crash protection that will begin when the current phase is over and extend indefinitely, thus completing the action made necessary by the *Chrysler* decision.

The action proposed would extend the current options for passenger cars 1 year to August 31, 1976. After that date, passenger cars would be required to provide passive protection in frontal and angular (in the front designated seating positions) and lateral crash modes, by the same criteria as in the present "first option." If they could meet the rollover test by passive means, no front-seat belt systems would be required, although they would of course be available as options, with anchorages provided. If they could not meet the passive rollover test, they would be required to have lap belts at all designated seating positions, meet the crash-test criteria additionally with the belts fastened, and have a sequential warning system for the belts at all frontal positions. Vehicles other than passenger cars would essentially be phased 2 years behind passenger cars as at present.

The experience to date with lap-and-shoulder belts continues to bear out this agency's judgment, as set forth in the rulemaking actions that were contested in *Chrysler v. DOT*, that such systems fall short of providing the best universal crash protection that can be practicably

V 39 54 MAR 19 74 XUM

achieved with today's technology. Public resistance to the belt-starter interlock system currently required (except on vehicles providing passive protection) has been substantial, with current tallies of proper lap-shoulder belt usage on 1974 models running at or below the 60% level. Even that figure is probably optimistic as a measure of results to be achieved, in light of the likelihood that as time passes the awareness that the forcing systems can be disabled, and the means for doing so, will become more widely disseminated, and also that accident-prone drivers tend to be overconcentrated in the non-user group.

The accumulating field experience with air-cushion restraint systems, on the other hand, continues to bear out earlier indications that they provide excellent frontal and angular crash protection with reliability extremely close to 100%. Passive belt systems that show promise of achieving close to 100% usage are also in advanced stages of development. The NHTSA therefore finds on the basis of this evidence that passive systems, which do not depend on the knowledge or cooperation of the driving public, are practicable and will provide substantially greater levels of life- and injury-saving protection than active belt systems.

Of course, crash protection technology involves much more than the interior restraint system. Lateral crash protection, for example, depends mainly on vehicle structure and glazing characteristics, and other aspects covered in other standards such as seat strength and configuration and fuel system integrity are also critically important. Rollover protection can also be provided as part of vehicle structure, and the NHTSA is of the opinion that much can yet be achieved in this area. Where passive rollover protection is provided, as evidenced by meeting the standard's dynamic rollover test without allowing any part of the test dummies to move outside the passenger compartment, lap belt wearing would not be so critical, and under the proposed requirements belt systems would not have to be provided in the front seating positions. Where it is not provided, there would be front-seat belts with sequential warning systems, whereby a visible and audible warning would activate if, after sitting in the vehicle, a person did not operate the lap belt by the time the vehicle was started and placed in forward gear. NHTSA tests indicate that such a system should be an effective inducement to belt usage, and it would avoid some of the interlock's inconveniences.

It is proposed that the Part 572 dummy presently in effect be retained for testing these requirements. As noted in the notice issuing that part (August 1, 1973, 38 FR 20449), the specification and the drawings incorporated into it constitute a very detailed description of the test dummy, which is further elaborated by set-up procedures and calibrating performance tests. The NHTSA finds that this dummy fully qualifies as an objective measuring instrument as required by the Court in *Chrysler v. DOT*, and that it remains the best available dummy for the purposes of this standard. Although the NHTSA is sponsoring a program to create improved simulations of the human body, no dummy that would be a significant improvement over Part 572 has yet been developed.

The Court in *Chrysler* ordered that "the effective date for the implementation of passive restraints be delayed until a reasonable time after such test specifications are issued." The NHTSA in this proposal is delaying the effective date for passive protection 1 year to September 1, 1976. Although it fully expects that many manufacturers will begin to install passive systems before that date, as General Motors is presently doing in three of its makes, the 1977 model year is in this agency's judgment the earliest time that passive protection system can be installed in all passenger cars sold in this country.

The *Chrysler* Court gave specific relief to "sports cars and convertibles," citing the difficulties that convertibles would in its judgment have in meeting the rollover requirement. In light of the alternative provided in this proposal to passive dynamic rollover protection, it does not appear on the basis of evidence before the NHTSA that sports cars and convertibles would have more difficulty meeting these proposed requirements than any other vehicles of comparable size. Comments and data are specifically requested on this point.

The proposed amendments would not require crash-deployed restraint devices for rear-seat occupants, since the passive frontal crash requirements would only apply to front designated seating positions. The limited data available indicate that such devices would not be cost-effective for rear-seat occupants, who are naturally protected by the back of the front seats. These occupants would, however, receive the benefit of the passive lateral crash test, which requires a dummy in both front and rear positions, and would have lap belts in any case.

In light of the foregoing, it is proposed that Standard No. 208, *Occupant Crash Protection*, 49 CFR 571.208, be amended as follows:

1. In S4.1.2, the date "August 14, 1975" would be changed to "August 31, 1976".

2. S4.1.3 would be revised to read as follows:

S4.1.3 *Passenger cars manufactured on or after September 1, 1976.* Each passenger car manufactured on or after September 1, 1976, shall—

(a) At each front designated seating position meet the frontal crash protection requirements of S5.1 by means that require no action by vehicle occupants;

(b) Meet the lateral crash protection requirements of S5.2 by means that require no action by vehicle occupants;

(c) At each rear designated seating position have a Type 1 seat belt assembly (which may, at the manufacturer's option, be the pelvic portion of a Type 2 seat belt assembly with a detachable upper torso belt) that conforms to S7.1 and S7.2; and

(d) Either—

(1) Meet the rollover crash protection requirements of S5.3 by means that require no action by vehicle occupants; or

(2) At each front designated seating position have a Type 1 seat belt assembly that conforms to S7.1 and S7.2 with a sequential belt warning system that conforms to S7.5, and meet the requirements of S5.1 and S5.2 with front test dummies restrained by the Type 1 seat belt assemblies.

3. A new S7.5 would be added to read as follows:

S7.5 *Sequential belt warning system.* A sequential belt warning system shall activate a continuous or intermittent audible signal and a continuous or flashing warning light, visible to the driver, displaying the words "Fasten Seat Belts" or "Fasten Belts" when the following conditions (a) and (b) exist simultaneously:

(a) The vehicle's engine is operating and the transmission gear selector is in any forward position.

(b) The seat belt assembly for a seating position has not been operated after a person at least as heavy as a 50th-percentile adult male has been seated at that position. Belt operation for the purpose of this requirement shall be, at the manufacturer's option, either the extension of the belt assembly at least 4 in from its stowed position, or the fastening of the belt latch mechanism.

S7.5.1 A sequential belt warning system shall conform to S7.3.3 and S7.3.4, and shall not activate when the belt operation specified in S7.5(b) is performed after an occupant is seated.

4. In the second sentence of S5.3, the date "August 15, 1977" would be changed to "September 1, 1976".

5. S8.1.8 would be amended by changing the words "S4.1.2.1 and S4.1.2.2" to "S4.1.2.1, S4.1.2.2, or S4.1.3".

6. In S4.2.2, the date "August 14, 1977" would be changed to "August 31, 1978".

7. S4.2.3 would be revised to read as follows:

§4.2.3 *Trucks and multipurpose passenger vehicles, with GVWR of 10,000 pounds or less, manufactured on or after September 1, 1978.* Each truck and multipurpose passenger vehicle with a gross vehicle weight rating of 10,000 lb or less manufactured on or after September 1, 1978, shall meet the requirements of § 4.1.3 (as specified for passenger cars), except that forward control vehicles may instead meet the requirements of § 4.2.-1.2, and convertibles, open-body vehicles, walk-in van-type trucks, motor homes, and vehicles carrying chassis-mounted campers may instead meet the requirements of § 4.1.2.2.

Interested persons are invited to submit comments on the proposal. Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5221, 400 Seventh Street SW., Washington, D.C. 20590. It is requested but not required that 10 copies be submitted.

All comments received before the close of business on the comment closing date indicated below will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. However, the rulemaking action may proceed at any time after that date, and comments received after the closing date and too late for consideration in regard to the action will be treated as suggestions for future rulemaking. The NHTSA will continue to file relevant material as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Comment closing date: May 3, 1974.

Proposed effective date: August 15, 1975.

(Sec. 103, 119, Pub. L. 89-563, 80 Stat. 718 (15 U.S.C. 1392, 1407); delegation of authority at 49 CFR 1.51.)

Issued on March 15, 1974.

JAMES B. GREGORY,
Administrator.

[49 CFR Part 571]

[Docket No. 74-15; Notice 1]

MOTOR VEHICLE SAFETY STANDARDS

Advance Notice Concerning Higher Speed Protection Requirements

This is an advance notice of proposed rulemaking, to advise the public that the NHTSA is considering upgrading the requirements of Standard No. 208 to provide protection for occupants in crashes at higher speeds. No rule on this subject will be issued without further notice and opportunity for comment.

In a notice published today, 39 FR 10271, the NHTSA proposes requirements for passive protection in all passenger cars manufactured on or after September 1, 1976. The frontal and angular barrier crash speeds at which vehicles would have to meet the injury criteria as measured with test dummies are up to 30 mi/h.

Based on the research conducted to date on occupant crash protection and vehicle structure, which is extensively documented in the dockets on Standard No. 208, the NHTSA is of the opinion that the relevant technology has advanced to the point where protection can be afforded occupants in crashes equivalent to those into a fixed barrier at more than, 40 mi/h. Such a range of crash severities would include a large percentage of those experienced in the field, and that level of protection would work a manifold increase in the lifesaving capability of occupant crash protection systems.

This agency is therefore considering amending Standard No. 208, effective September 1, 1980, to require either 45 or 50-mi/h crash protection. Comments are invited from the interested public. Specific areas of interest are the injury criteria that would be most effective for protection across the wider range of speeds; the levels of lateral, rollover, and rear-end crash protection that would be most appropriate to accompany a 45 or 50-mi/h frontal and angular capability; detail changes in the procedures that would be desirable in testing systems with such higher speed capabilities; changes in other standards or corollary requirements in other areas that would be called for; the projected costs and benefits of meeting the higher-speed requirements, including the costs correlated with the suggested effective date of September 1980 as contrasted with earlier or later dates; and projected collateral effects of the higher-speed protective capability on consumption of energy, cost of operation, and environmental protection factors.

Interested persons are invited to submit comments on this advance notice. Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5221, 400 Seventh Street SW., Washington, D.C. 20590. It is requested but not required that 10 copies be submitted.

All comments received before the close of business on the comment closing date indicated below will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. However, the rulemaking action may proceed at any time after that date, and comments received after the closing date and too late for consideration in regard to the action will be treated as suggestions for future rulemaking. The NHTSA will continue to file relevant material as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Comment closing date: September 19, 1974.

(Secs. 103, 119, Pub. L. 89-563; 80 Stat. 718 (15 U.S.C. 1392, 1407); delegation of authority at 49 CFR 1.51.)

Issued on March 15, 1974.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

PROPOSED COMPLIANCE SCHEDULES FOR TENNESSEE

Approval and Promulgation of State Implementation Plans

Section 110 of the Clean Air Act, as amended, and the implementing regulations of 40 CFR Part 51 require each State to submit a plan which provides for the attainment and maintenance of the national ambient air quality standards throughout the State. On May 31, 1972 (37 FR 10842), pursuant to section 110 of the Clean Air Act and 40 CFR Part 51, the Administrator approved portions of Tennessee's State Implementation Plan.

On March 23, May 15, July 3, July 18, July 20, October 15, and October 16, 1973, pursuant to 40 CFR § 51.15 and § 51.6, the State of Tennessee submitted for the Environmental Protection Agency's approval additional compliance schedules. This publication proposes that certain of the revisions be approved. Each proposed revision establishes a new date by which an individual air pollution source must attain compliance with an emission limitation of the State implementation plan. This date is indicated in the succeeding table under the heading "Final Compliance Date." In many cases the schedule includes incremental steps toward compliance, with interim dates for achieving those steps. While the tables below do not list these interim dates, the actual compliance schedules do.

The schedules in table (c)(1) of this notice are additions to the table published in the FEDERAL REGISTER of June 20, 1973 (38 FR 16144) as satisfying the compliance schedule requirements for State implementation plans. This list of June 20 is also amended in this publication by the addition of certain schedules for which the State has granted a variance. This group of schedules is here presented in a new table (e) as satisfying the requirements for revisions in State implementation plans. All of the compliance schedules listed here are available for public inspection at the following locations:

Air Programs Office
Environmental Protection Agency
Region IV
1421 Peachtree Street, N.E.
Atlanta, Georgia 30309

Division of Air Pollution Control
Tennessee Department of Public Health
C2-212 Cordell Hull Building
Nashville, Tennessee 37219

City of Memphis-Shelby County Health Department
814 Jefferson Avenue
Memphis, Tennessee 38105

Chattanooga-Hamilton County Air Pollution Control Bureau
Room 201
City Hall Annex
Chattanooga, Tennessee 37402

Air Pollution Control Division
Metropolitan Health Department of Nashville and Davidson County
311-23rd Avenue
Nashville, Tennessee 37203

Each compliance schedule has been adopted by the Tennessee Air Pollution Control Board or by the local agency authority and submitted to EPA after notice and public hearing in accordance with the procedural requirements of 40 CFR Part 51. Each also satisfies the substantive requirements of 40 CFR Part 51 pertaining to compliance schedules, and has been determined to be consistent with the approved control strategies for the State of Tennessee.

An evaluation of the Tennessee compliance schedule submittal is available for public inspection at the Atlanta location listed above.

All interested parties are encouraged to submit written comments on the proposed plan revisions. These comments will be weighed carefully by EPA before the agency decides to approve or disapprove these changes in the Tennessee Plan. Comments will be accepted through April 18, 1974. These should be addressed to the Director, Air and Water Programs Division, Environmental Protection Agency, Region IV, 1421 Peachtree Street NE., Atlanta, Georgia 30309.

V 39 54 MAR 19 74 XUM

Attention: Mr. Thomas A. Strickland.

(42 U.S.C. 1857c-5)

Dated: March 11, 1974.

RUSSELL E. TRAIN,
Administrator.

It is proposed to amend Part 52 of Chapter I, Title 40 Code of Federal Regulations as follows:

Subpart RR—Tennessee

Section 52.2223 is amended by adding new lines to the table in paragraph (c)(1) and by adding a new paragraph (e), as follows:

§ 52.2223 Compliance schedules.

[40 CFR Part 52]

KENTUCKY

Approval and Promulgation of Implementation Plans

On February 8, 1972, the Governor of Kentucky initially submitted to the Administrator of the Environmental Protection Agency the State's "Implementation Plan for the Attainment and Maintenance of the National and State Ambient Air Quality Standards." This plan has been adopted by the State following a public hearing held on January 11, 1972, in Frankfort, Kentucky. The plan was submitted pursuant to section 110 of the Clean Air Act, as amended, and the implementing regulations of 40 CFR Part 51, which require States to adopt implementation plans to achieve and maintain the national ambient air quality standards set forth in 40 CFR Part 50.

On May 31, 1972 (37 FR 10842), the Administrator approved the Kentucky plan with one exception, which arose from a deficiency in the State's legal authority to allow public release of emission data. This deficiency was subsequently resolved on July 27, 1972 (37 FR 15080), when the Administrator delegated to the State the required legal authority.

On June 28, 1973, a decision of the U.S. Court of Appeals for the Sixth Circuit in the case of *Buckeye Power Co., et al.*, v. *Environmental Protection Agency*, 481 F.2d 162, and two related cases, vacated the Administrator's approval of the Kentucky plan and remanded the case to the Agency for compliance with Section 553 of the Administrative Procedure Act, as articulated in the court's opinion, viz., to take comments, data, or other evidence from interested parties, and to express the basis for administrative actions.

Consequently, on December 5, 1973, Governor Wendell Ford resubmitted to the Administrator the Kentucky implementation plan. In accordance with the court's order, the Administrator is hereby setting forth this plan as a proposed rulemaking, and is providing opportunity for public comment. The Administrator's decision to approve or disapprove the plan will be based on his determination as to whether the plan's control strategies and associated emission limits meet the requirements of section 110(a)(2)(A)–(H) of the Clean Air Act and of 40 CFR Part 51.

The Kentucky plan presents a control strategy to achieve the national standards for particulate matter. Two example Air Quality Control Regions were used in developing the strategy, the Louisville Interstate AQCR (Priority I) and the Appalachian AQCR (Priority II). The governing emission standards developed pursuant to this control strategy exercise apply to fuel combustion sources, industrial processes, solid waste disposal (including control of open burning), and fugitive dust control.

To develop a control strategy to achieve national standards for sulfur oxides, two example AQCR's were chosen, the Louisville Interstate AQCR (Priority I) and the Paducah-Cario Interstate AQCR (Priority II). The governing emission standards developed apply principally to fuel combustion sources and to industrial processes.

With respect to carbon monoxide, the plan indicates that the major contributing sources are in the area of transportation. All the State's AQCR's are classified Priority III for this pollutant. The plan, which considered the Louisville Interstate and Metropolitan Cincinnati AQCR's, indicates further that the Federal Motor Vehicle Control Program is more than adequate to meet the national standard for carbon monoxide. However, regulations for the control of carbon monoxide from stationary sources were included to provide additional protection and enhancement of air quality. These apply to grey iron cupolas, blast furnaces, basic oxygen furnaces, and petroleum refining processes.

The plan demonstrates the attainment of the national standards for hydrocarbons and photochemical oxidants by 1975, but both mobile and stationary sources must be controlled in order to meet this goal. Again, the control strategy exercise was developed for the Metropolitan Cincinnati Interstate and the Louisville Interstate AQCR's, the only regions classified Priority I for these pollutants.

With respect to the nitrogen oxides control strategy, the plan indicates that emissions of this pollutant will increase by 1975 because of increased automobile emissions. This is true in both the Louisville Interstate and Metropolitan Cincinnati AQCR's. To comply with Federal guidelines, emission limiting regulations were applied to such stationary sources as gas and oil-fired fuel-burning installations and nitric acid plants.

All of the emission limiting regulations implementing the control strategies discussed above are the same regulations which were submitted in the original Kentucky plan.

These emission limits are immediately effective except for sections of AP–4, which defer dates for final compliance with sulfur oxide emission limits as follows: Priority I AQCR's—July 1, 1977; Priority II AQCR's—July 1, 1978; and Priority III AQCR's—July 1, 1979.

Individually negotiated compliance schedules submitted by the State will be offered for public comment in a subsequent publication.

The plan also describes procedures which the Kentucky Department of Natural Resources and Environmental Protection will follow in air quality monitoring and surveillance, emission surveillance, review of new sources and modifications to existing ones, emergency episode control, and intergovernmental relations.

The Administrator's initial approval of the Kentucky plan included the granting of two-year extensions for attainment of the national primary standards for sulfur dioxides in the Louisville and Cincinnati Interstate Air Quality Control Regions, pursuant to section 110(e) of the Act and 40 CFR 51.30, in response to a formal request by the Governor. The Agency considers the Governor's request to continue in effect. In connection with this resubmission of the plan for approval, the Agency specifically invites comment on the issue of extensions of the attainment date for up to two years for the two air quality control regions involved.

On June 18, 1973 (38 FR 15834), pursuant to an order of the U.S. Court of Appeals for the District of Columbia Circuit in the case of *National Resources Defense Council, Inc. et al.*, v. *Environmental Protection Agency*, 475 F.2d 968, and seven related cases, the Administrator promulgated additional implementation plan requirements with respect to the maintenance of the national standards. To satisfy these new requirements, Kentucky held a public hearing on October 23, 1973, and subsequently adopted a new regulation, AP–11, providing for the review of new or modified sources of air pollution. This regulation, with supportive information, was submitted to the Administrator on December 5, 1973, as a proposed portion of the State plan. It is hereby proposed for public comment as the indirect source review provision of the Kentucky plan.

Kentucky's indirect source regulation requires that State approval be obtained prior to construction or modification of any of the following sources or classes of sources:

(1) Any new indirect source which:

(a) Is a new unenclosed parking lot with a parking capacity of 1500 or more motor vehicles, or has a new associated unenclosed single level parking area with a capacity of 1500 or more motor vehicles; or

(b) Is a new partially or completely enclosed parking area with a parking capacity of 750 or more motor vehicles, or has a new associated partially or completely enclosed parking area with a capacity of 750 or more motor vehicles; or

(c) Induces an additional 2000 or more vehicle trips per hour in an existing roadway.

(2) Any modified indirect source which:

(a) Increases existing parking capacity in an unenclosed single level parking area from less than 1500 motor vehicles to 1500 or more

V 39 54 MAR 19 74 XUM

motor vehicles, or has an associated unenclosed parking area being modified to increase parking capacity by more than 1500 motor vehicles, or

(b) Increases existing parking capacity in a partially or completely enclosed parking area from less than 750 motor vehicles to 750 or more motor vehicles, or has an associated partially or completely enclosed parking area being modified to increase parking capacity by more than 750 motor vehicles;

(c) Is an existing unenclosed single level parking area which has a capacity of 1500 motor vehicles being modified to increase parking capacity by more than 25 percent or by 1500 or more motor vehicles, whichever is less, or has an existing associated unenclosed single level parking area which is in excess of 1500 motor vehicles being modified to increase parking capacity by more than 25 percent or by 1500 or more motor vehicles, whichever is less;

(d) Is an existing partially or completely enclosed parking area which is in excess of 750 motor vehicles being modified to increase parking capacity by more than 25 percent, or by 750 or more motor vehicles, whichever is less, or has an existing associated partially or completely enclosed parking area which is in excess of 750 motor vehicles being modified to increase parking capacity by more than 25 percent or by 750 or more motor vehicles, whichever is less; or

(e) Induces an additional 2000 or more vehicle trips per hour in an existing roadway.

(3) Airports served by a regularly scheduled commercial air carrier(s).

(4) New or modified roads located in one of the standard metropolitan statistical areas identified by the U.S. Bureau of the Census or in a County with a city of 20,000 or more inhabitants, and expected to have within ten years a design traffic volume of:

(a) 2,000 or more vehicles per hour, in the case of a new road;

(b) 2,000 or more vehicles per hour, in the case of modification of an existing road with a current volume of less than 2,000 vehicles per hour; or

(c) 2,000 or more vehicles per hour in excess of the current volume or an increase of 25 percent over the current volume, whichever is less, in the case of modification of an existing road with a current volume of more than 2,000 vehicles per hour.

The State will approve the construction or modification of the foregoing sources only after the applicant provides information adequate to show that the facility involved will not indirectly interfere with the attainment and maintenance of the national ambient air quality standards.

Copies of Kentucky's proposed implementation plan, including the indirect source regulation, are available for public inspection during normal business hours at the locations given below:

SECURITIES AND EXCHANGE COMMISSION

[17 CFR Part 231]

[Release Nos. 33-5465, 34-10663]

PREPARATION AND FILING OF REPORTS AND REGISTRATION STATEMENTS

Proposed Guides

The Commission today published for comment proposed Guide 60, "Preparation of Registration Statements Relating to Interests in Real Estate Limited Partnerships," of the Guides for Preparation and Filing of Registration Statements under the Securities Act of 1933 ("Act"). The Commission noted the significant number of registration statements relating to public offerings of interests in limited partnerships that intend to invest in real estate that have been filed under the Act and the questions that have arisen in connection with processing such filings.[1] Processing of some of these filings has been time consuming for both registrants and the Commission's staff.

The proposed Guide 60 is intended to minimize delays in the review of registration statements relating to real estate limited partnerships and also to assist issuers, accountants, attorneys and others in the preparation of such filings. The proposed Guide contains comments and suggestions that the Division of Corporation Finance has developed in its processing of such registration statements. Attention is particularly directed to the paragraphs of the proposed Guide dealing with conflicts of interest, specifically where the proceeds of the offering are not committed to properties at the effective date (paragraph 5), sales literature (paragraph 20) and the undertakings to file reports after effectiveness (paragraph 21). The Division of Corporation Finance has been applying the substance of the proposed Guide and will continue to apply said substance during the comment period and thereafter, unless the Guide is adopted in an amended form.

The staff of the Commission is considering the feasibility of drafting guidelines relating to financial statements required in real estate limited partnership filings. If such guidelines are developed, they would be published for comment at a later date.

The text of the proposed Guide 60 is as follows:

GUIDE 60. PREPARATION OF REGISTRATION STATEMENTS RELATING TO INTERESTS IN REAL ESTATE LIMITED PARTNERSHIPS

References to the General Partner and its affiliates are intended to include references to the General Partner(s), promoters of the partnership, and all persons that directly or indirectly, through one or more intermediaries, control or are controlled by or are under common control with, such General Partner(s) or promoters.

It is suggested that the information in the prospectus be presented in the same order as the following comments.

1. COVER PAGE

A. The cover page should set forth, in addition to basic information about the offering (see Guide 5), the termination date of the offering, any minimum required purchase and any arrangements to place the funds received in an escrow, trust or similar arrangement.

B. The cover page should contain a tabular presentation of the per partnership interest cost, and the total maximum and minimum interests to be offered, with price to the public, selling commissions and proceeds to the partnership clearly indicated.

C. The cover page should also contain, as noted in Guide 5(g), a brief identification of the material risks involved in the purchase of the securities with cross-reference to further discussion in the prospectus. The following

[1] In the calendar year 1973, 67 registration statements covering over $700,000,000 of interests in real estate limited partnerships were filed with the Commission.

risk factors should be identified, where applicable:

(i) *Tax status.* (a) If the program has not applied for a tax ruling from the Internal Revenue Service (IRS) as to partnership tax status, or is otherwise relying on opinion of counsel as to tax status, the following disclosure is suggested: The program has received an opinion of counsel as to its status as a partnership for tax purposes and intends to rely upon such opinion. The opinion of counsel is not binding on the Internal Revenue Service. There can be no assurance that the program will not at some later date be found to be an association taxable as a corporation, in which case the tax benefits associated with this offering would not be available.

(b) If the program has requested a ruling, but the IRS proposes not to rule, or has notified registrant that it will rule adversely to the program, this should be disclosed and should be discussed in the opinion of counsel.

(c) If the program has applied for a ruling from the Internal Revenue Service as to partnership tax status, but the ruling has not been received prior to effectiveness, the cover page should disclose that there is a pending ruling request before the IRS as to partnership tax status, that without such tax status there can be no tax shelter, and that the registrant will proceed with the offering without a favorable ruling, or will put the funds received in an escrow, trust or similar arrangement pending receipt of the ruling, or whatever else the registrant proposes to do.

(ii) *Use of Proceeds.* If the proceeds of the offering are insufficient to meet the requirements for funds as set forth in the program's investment objectives, disclosure of this fact should be made.

(iii) *Conflicts of Interest.* If this offering involves transactions between the partnership and the General Partner or its affiliates which involve conflicts of interest, disclosure should be made.

2. SUITABILITY STANDARDS

Standards to be utilized by the registrant ("suitability standards") in determining the acceptance of subscription agreements should be described immediately following the cover page. Suitability standards should include those established by the registrant, self-regulatory organizations or state agencies having jurisdiction over the offering of the securities. Registrant should disclose the method(s) it intends to employ to assure adherence to the suitability standards by persons selling the interests and should briefly discuss the factors pertaining to the need for such standards, such as lack of liquidity (resale or assignment of securities), importance of the investor's Federal income tax bracket in terms of the tax benefits to be derived, the long term nature of the investment and adverse tax consequences of premature sale. If suitability standards apply to resale of the interests, this restriction should be discussed.

3. SUMMARY OF THE PROGRAM AND USE OF PROCEEDS

A two part, concise outline summary relating to the program and a tabular summary of use of proceeds should follow the Suitability section of the prospectus. These summaries may replace the Introductory Statement and Use of Proceeds sections required by the relevant Form if such sections would merely repeat the information in the summaries. In connection with this and other tabular presentations, registrant may want to consider obtaining copies of recent effective prospectuses.

A. *Summary of the program.* The following information should be disclosed in outline form with apropriate cross-references, where applicable:

(i) Name, address and telephone number of the General Partner and name of persons making investment decisions for the program;

(ii) The termination date of the program;

(iii) Compensation and fees: State, if true, that the General Partner and its affiliates will receive substantial fees and profits in connection with the offering;

(iv) Investment objectives and policies: If current distributions are an investment objective, state the estimated maximum time from the closing date that the investor must wait to receive such distributions;

(v) Properties: Describe briefly the properties to be purchased. If a material portion of the minimum net proceeds of the offering (allowing for reserves) is not committed to specific properties, so indicate;

(vi) Depreciation: Describe the depreciation method to be used;

(vii) Leverage: State the maximum leverage to be used; and

(viii) Glossary: Include a cross-reference to the Glossary.

B. *Use of proceeds.* The use of proceeds tabular summary will vary according to the program but should include, where appropriate, estimates of the public offering expenses (both organizational and sales), the amount available for investment, non-recurring initial investment fees, prepaid items and financing fees, cash down payments, and reserves. Amounts to be paid to the General Partner and its affiliates should be identified. The summary should include both dollar amounts and percentages of the maximum and minimum proceeds of the offering.

4. COMPENSATION AND FEES

A. This section should include a summary tabular presentation, itemizing by category and specifying dollar amounts where possible, of all compensation, fees, profits and other benefits (including reimbursement of out-of-pocket expenses) which the General Partner and its affiliates may earn or receive in connection with the offering or operation of the program. If more detailed information is required, it should be located in the Summary of Partnership Agreement section, with cross-reference to that Summary. The presentation should identify the person, including any affiliation with the General Partner, who will receive such compensation, fees, profits or benefits and the services to be performed by such person.

The summary should be organized so as to indicate clearly whether the compensation relates to the offering and organizational stage, the developmental or acquisition stage, the operational stage or the termination and liquidation stage of the program. Separate subcaptions are recommended.

The type of compensation, fees, profits or other benefits that should be disclosed includes but is not limited to, the following: Fees and disbursements incident to the purchase and sale of the limited partnership interests, including sales commissions and reimbursements for expenses; real estate commissions; finders fees; property acquisition fees; fees for "marketing" or renting up of properties; financing or refinancing fees; management fees; insurance and miscellaneous service fees; commissions and other fees to be paid upon sale of the partnership's properties; participation by the General Partner in cash flow or profits and losses or capital gains and losses arising out of the operation, refinancing or sale of properties; fees or builder's profits, overhead absorption, and/or land write-ups; and all profits on the purchase of investments for the program from the General Partner or its affiliates. If the partnership agreement limits the losses the General Partner and its affiliates can sustain, this should be discussed.

B. Maximum aggregate dollar front end fees to be paid during the first fiscal year of operation should be disclosed based upon the assumption that the program's maximum leverage is utilized.

C. If material amounts of compensation or fees are to be paid to persons not affiliated with the General Partner, a separate heading should be provided entitled "Fees and Compensation Arrangements with Unaffiliated Persons," and a tabular presentation describing such fees presented.

D. Where compensation arrangements are based upon a formula or percentage, the assumptions underlying the dollar figures should be disclosed and the calculations underlying the figures should be submitted to the staff supplementally with the initial filing. Compensation based upon a given return (percentage of contributed investor capital) to investors should disclose whether such return is cumulative or non-cumulative.

E. Where the General Partner or an affiliate receives a disproportionate interest in the program in relation to its own contribution, registrant's attention is directed to Guide 6. A bar chart comparison of the various interests and contributors should be provided.

5. CONFLICTS OF INTEREST

A. This section should include a summary of each type of transaction which may result in a conflict between the interests of the public investors and those of the General Partner and its affiliates, and of the proposed method of dealing with such conflict. The types of conflicts of interest which should be disclosed and discussed, if appropriate, include, but are not limited to:

(i The General Partner is a general partner or an affiliate of the general partner in other investment entities (public and/or private) engaged in making similar investments or otherwise makes or arranges for similar investments.

(ii) The General Partner has the authority to invest the program's funds in other programs in which the General Partner or an affiliate is the general partner or has an interest.

(iii) Properties in which the General Partner or its affiliates have an interest are bought from or partnership properties are sold to the General Partner or its affiliates or entities in which they have an interest. Where appraisals are used in connection with any such transactions, it should be made clear that appraisals are only estimates of value and should not be relied on as measures of realizable value. If the General Partner might buy for the partnership any properties in which it or any of its affiliates have a material interest prior to the effective date, such properties should be appropriately described in the prospectus along with the investment objectives of the partnership (see paragraph 10, Investment Objectives and Policies). If it is disclosed in the prospectus that the partnership may purchase properties in which the General Partner or its affiliates have a material interest, but no properties are described, and such properties are thereafter purchased for the partnership, the General Partner will have the heavy burden of demonstrating that it did not intend to purchase such property at the time the registration statement became effective.

(iv) Affiliates of the General Partner who act as underwriters, real estate brokers or managers for the program, act in such capacities for other programs or entities.

(v) The same counsel will represent both the partnership and the General Partner after the closing of the offering.

V 39 54 MAR 19 74 XUM

(vi) An affiliate of the General Partner receives compensation as insurance agent for placing insurance on the program's properties.

(vii) An affiliate of the General Partner places mortgages for the program or otherwise acts as a finance broker, receiving commissions for such services.

(viii) An affiliate of the General Partner acts as underwriter for the offering, creating conflicts in performance of the underwriter's due diligence obligations under the Securities Act.

B. An organization chart should be included in this section showing the relationship between the various organizations managed or controlled by the General Partner or its affiliates that will do business with the program where the relationships are so complex that a graphic display would assist investors in understanding such relationships.

6. FIDUCIARY RESPONSIBILITY OF THE GENERAL PARTNER

A. A discussion of the fiduciary obligation owned by the General Partner to the Limited Partners should be set forth. The following disclosure is suggested with appropriate modification for the laws of the state of organization:

A General Partner is accountable to a limited partnership as a fiduciary and consequently must exercise good faith and integrity in handling partnership affairs. This is a rapidly developing and changing area of the law and Limited Partners who have questions concerning the duties of the General Partner should consult with their counsel.

B. Where the limited partnership agreement contains an exculpatory provision, the following disclosure is suggested, as modified to reflect the substance of the exculpatory provision:

The General Partner may not be liable to the Partnership or Limited Partners for errors in judgment or other acts or omissions not amounting to wilful misconduct or gross negligence, since provision has been made in the Agreement of Limited Partnership for indemnification of the General Partner. Therefore, purchasers of the interests may have a more limited right of action than they would have absent the limitation in the Partnership Agreement. To the extent that the exculpatory provisions purport to include indemnification for liabilities arising under the Securities Act of 1933, in the opinion of the Securities and Exchange Commission, such indemnification is contrary to public policy and therefore unenforceable.

Registrant's attention is also directed to Note A of Rule 460 under the Act relating to disclosure of indemnification agreements.

7. RISK FACTORS

A. This section should include a carefully organized series of short, concise subcaptioned paragraphs, with cross-references to fuller discussion where appropriate, summarizing the principal risk factors applicable to the offering and to the program's particular plan of operation. See Guide 6 of the Guides. The risk factor section should be no more than two pages of the prospectus.

B. Risk factors relating to the specific program should be discussed first. Such risks might include, where applicable:

(i) where a ruling has been applied for, but not received as of the effective date, and an escrow or similar arrangement has been established, the fact that the investor's money cannot be put to productive use and the risk that such situation may continue for an indefinite period;

(ii) where registrant has been advised by the IRS that it is going to rule adversely, the increased risk that the investor may lose all tax benefits associated with the investment;

(iii) where no ruling from the IRS as to partnership tax status is sought, the greater risk resulting from the greater uncertainty as to the tax status of the partnership and as to the availability of tax benefits to the investor;

(iv) management's lack of relevant experience, or management's lack of success with similar programs or other real estate investments;

(v) where the proceeds of the offering will be insufficient to meet the requirements of the program's investment objectives, a discussion of the additional sources of capital for the program and of the risk of not being able to satisfy the program's objectives as a result of not obtaining additional necessary funds;

(vi) where the program has high risk investment objectives, including high leveraging, these should be explained;

(vii) risks associated with contemplated rent stabilization programs, fuel or energy requirements or regulations, and construction in areas that are subject to environmental or other federal, state or local regulations, actual or pending;

(viii) where a material portion of the minimum net proceeds of the offering is not committed to specific properties, disclosure of the particular risks associated with an investment in such an offering, including the increased uncertainty and risk to investors since they are unable to evaluate the manner in which the proceeds are to be invested and the economic merit of the particular real estate projects prior to investment, and since there may be a substantial period of time before the proceeds of the offering are invested, and therefore a delay to investors in receiving a return on their investment;

(ix) the potential exposure of the Limited Partners to unlimited liability as general partners in situations where the partnership agreement provides certain rights (majority votes) to Limited Partners, such as the right to remove the General Partner, the right to cause dissolution of the partnership, the right to amend the partnership agreement, the right to sell all or substantially all the partnership assets, and other specified rights.

C. Risk factors relating to real estate limited partnership offerings in general should be briefly discussed after those relating to the specific program. Such risks might include, where applicable:

(i) the risks associated with the ownership of real estate, including: uncertainty of cash flow to meet fixed and maturing obligations; adverse local market conditions; risks of "leveraging," and uninsured losses.

(ii) the principal federal income tax risks, including (a) the investor's likely exposure to substantial taxes upon a disposition of his interest (whether voluntary, as in a sale, or involuntary, as in a bankruptcy or other insolvency or on foreclosure), (b) that under certain circumstances an investor's tax liabilities may exceed his share of cash proceeds upon a sale of program property, (c) that an audit of the partnership information return may result in an audit of an investor's tax return.

8. PRIOR PERFORMANCE OF THE GENERAL PARTNER AND AFFILIATES

A. A tabular presentation providing a reasonable summary of the experience of the General Partner and its affiliates during the last five years in the investment of investor funds (all registered or exempted offerings, including private placements and intrastate offerings) in real estate. Where the investment objectives of any such prior programs were different from those of the program being registered, this should be disclosed.

B. The information required by Item 16(e) of Form S–1 as it applies to the General Partner (its officers and directors, if a corporation) or any of its affiliates who may be doing business with the partnership should be included.

C. Where any of such prior programs is experiencing an operating cash flow deficit, the "Annualized Deficit" for such program (the shortage of cash flow to pay for operating expenses and debt service before any cash distributions to participants) should be disclosed.

D. The amount of and reason for any contingent liabilities of the General Partner with regard to prior programs now in existence should be disclosed.

9. MANAGEMENT

If a material portion of the maximum net proceeds (allowing for reserves) is not committed to specific properties, disclosure should be made of the identity of the individuals who will make the investment decisions, with appropriate background information, including that required by Item 16(e) of Form S–1.

10. INVESTMENT OBJECTIVES AND POLICIES

A. If a material portion of the maximum net proceeds (allowing for reserves) is not committed to specific properties, disclosure should be made of the nature of the property intended to be purchased (e.g., commercial, residential) and the criteria (e.g., cash return objective, method of depreciation, location) to be utilized in evaluating proposed investments.

B. Disclosure should be made of any provisions of the partnership agreement, or any other agreement, which would allow a change in management or in investment objectives. A description of how such change could be made should be included.

C. If a program has as an investment objective a specific yield on the invested proceeds, such yield figures should be qualified to reflect the fact that they represent yield to the partnership, not on the cash investment of the issuer. It should be pointed out that the yield to the investor will be reduced substantially by the fees and expenses incurred prior to the purchase of properties and by the expenses of operation and maintenance of the properties. Where practical, the effective yield to the investor should be quantified. (See Guide 25.)

11. DESCRIPTION OF REAL ESTATE INVESTMENTS

A. Risks associated with specified properties, such as competitive factors, environmental regulation, rent control regulation, fuel or energy requirements and regulation should be noted.

B. If a material portion of the maximum net proceeds (allowing for reserves) is not committed to specific properties, registrant should clearly indicate in the prospectus that the promoters have not identified any specific investments (other than any described in the prospectus). In the event specific property has been identified and there is a letter of intent, deposit agreement, or other agreement in principle to purchase the property, appropriate disclosure should be made. Further, if there is a written or oral plan to proceed with purchase of specific identifiable properties after effectiveness, appropriate disclosure should be made.

12. FEDERAL TAX CONSEQUENCES

A. *General instructions.* This section should summarize under a series of appropriate headings all relevant federal and state tax aspects of the program. Proper citations should be used whenever reference is made to sections of the Internal Revenue Code ("The Code"), the Treasury of Regulations, decided cases or other sources. Any opinion of tax counsel should be supported by an appropriate legal memorandum and should be filed as an exhibit to the original filing. Tax counsel should be aware that their opinion speaks as of the effective date. Such opinion should be updated for any material tax changes or events occurring subsequent to filing and prior to the effective date. Ruling requests (including amendments) and rulings should also be filed as exhibits with the original filing, or by amendment as soon thereafter as available. If in response to a request for ruling, the IRS proposes not to rule or to rule adversely, this must be disclosed. Any tax risk that has been disclosed in the risk factor section should be explained under the appropriate heading in this section.

B. *Partnership status.* This subsection should state whether an IRS ruling has been requested as to the entity's classification as a partnership for Federal income tax purposes. The contents of any ruling, including any conditions therein, should be summarized. It should be disclosed how the General Partner proposes in the future to maintain the net worth and other requirements which must be maintained in order for an entity to preserve its partnership tax status. (IRS Rev. Proc. 72–13). If no IRS ruling has been requested, the opinion of counsel as to partnership tax status should be summarized, and the risk of reclassification on audit by the IRS should be disclosed.

C. *Taxation of limited partners.* This subsection should summarize basic rules of partnership taxation, e.g., that a partnership is not a taxable entity, that each partner will be required to report on his Federal income tax return his distributive share of partnership income, gain, loss, deduction or credit and that a partner may be subject to tax on his distributive share of partnership income even if no cash is distributed. If the partnership agreement provides a special allocation among partners with respect to their distributive shares of any item of (1) income, gain, loss, deduction or credit or (2) overall taxable income or loss, an opinion of counsel should be submitted that the principal purpose of the special allocation is not tax avoidance or evasion under Section 704(b)(2) of the Code.

D. *Basis.* This subsection should explain how the adjusted basis of a limited partner's partnership interest is computed. The importance to basis of a partner's proportionate share of the partnership's nonrecourse loans should be explained. Whether or not the indebtedness incurred or to be incurred by the partnership will be nonrecourse should be stated. If there is a question as to whether particular nonrecourse loans will enter into basis of the partnership interest because they may be treated as capital rather than debt, or for other reasons, this should be disclosed. The limitation under Code Section 704(d) on the allowance of partnership losses should also be explained.

Where appropriate, the treatment of a reduction of partnership liabilities as a distribution of money to the partners should be noted.

If a partnership acquires real estate from its General Partner, it should be disclosed that the mortgage indebtedness may be unavailable to step-up the basis of the Limited Partner's interest even though the partnership purchased the real estate without assuming any personal liability on the indebtedness, if the General Partner assumed personal liability thereon when he purchased the real estate and retains such liability upon its sale to the partnership.

If a nonrecourse loan to the partnership is guaranteed by the General Partner or its affiliates, disclosure should be made that such loan may on audit be treated as a nonrecourse loan which does not enter into basis of the partnership interests.

E. *Depreciation and recapture.* This subsection should explain the method or methods, of depreciation to be used by the partnership on its depreciable property. Depreciation recapture may be explained here with appropriate cross-reference to sections on Sale of Partnership Property and Sale of Partnership Interests.

F. *Deductibility of prepaid and other expenses.* As to prepaid interest, Rev. Rul. 68–643 should be summarized to the extent applicable. It should be explained that if a partnership takes a large deduction for prepaid interest in its first year of operation, having little or no income in such year, the IRS may determine that the prepayment created a material distortion of income at the partnership level and require that it be allocated over the term of the loan.

As to construction expenses for real estate, it should be explained which expenses are deductible (e.g., interim commitment fees, rent up fees, FHA mortgage insurance premiums). Similarly, the nondeductibility of certain permanent mortgage fees should be disclosed. As to management fees, it should be explained to what extent they are deductible by the partnership.

G. *Section 183.* The possible impact of this Code section on investors lacking a profit objective in investing in any tax shelter program which is expected to generate annual net losses for tax purposes for a period of years should be discussed. The discussion should note that the section may apply to the Limited Partners of a partnership notwithstanding any profit objective the partnership itself may be deemed to have.

H. *Sale or foreclosure of partnership property.* There should be an explanation of the tax treatment of a sale, at a gain or loss, of partnership property, including appropriate reference to depreciation recapture.

If appropriate, the tax treatment of dealer property should be explained. Should the sale of condominium units in which the partnership has an interest be contemplated, it should be pointed out that such units may be treated as dealer property.

Where appropriate, it should be emphasized that the amount realized on a sale of partnership property includes liabilities encumbering the property from which the partnership is relieved as a result of the sale, and that the partner's tax liabilities resulting from such sale may exceed any cash proceeds distributed from the sale.

The tax treatment of a foreclosure of partnership property should be explained.

In the case of subsidized housing, it should be noted that the partnership may elect nonrecognition of gain under Code Sec. 1039 on a sale to approved tenant groups.

I. *Sale or redemption of partnership interests.* The frequently adverse tax consequences to a selling Limited Partner resulting from the ordinary income treatment of any sales proceeds attributable to unrealized receivables or substantially appreciated inventory under Code Sec. 751 should be explained. It should be noted that depreciation recapture is an unrealized receivable.

The tax treatment of sales by a transferee Limited Partner should also be explained. Whether or not the partnership will make the election under Code Section 754 should be stated, together with the possible adverse tax consequences to a transferee Limited Partner should the Section 754 election not be made.

J. *Distribution or liquidation of the partnership.* The tax consequences to a Limited Partner of partnership dissolution should be explained.

K. *State and local taxes.* It should be disclosed whether nonresident Limited Partners will be subject to tax and/or have to file tax returns in the State or States where the partnership will be registered or where it owns properties. In the event that nonresident investors may be subject to tax in such State or States, the tax rates which may be applicable should be noted.

L. *Tax returns and tax information.* It should be disclosed what kind of tax information will be supplied to Limited Partners and when, and whether the same kind of information will also be supplied to assignees who are not substitute limited partners.

It should be explained that the information return filed by the partnership may be audited and that such audit may result in adjustments. Any adjustment of the partnership information return would at a minimum require a partner to file an amended return and possibly may result in an audit of the partner's own return. Any audit of a partner's return could result in adjustments of nonpartnership as well as partnership income and losses.

13. GLOSSARY

Definitions should be provided for all terms that are used in the prospectus which are technical in nature or which are susceptible to varying methods of computation, e.g., acquisition fees, book value, capital contribution, cash flow, cash available for distribution, construction fees, cost of property, development fee, net worth, organizations and offering expenses, profit, program management fee and property management fee. For purposes of uniformity, it is suggested that these definitions conform to those that appear in the *Rules for the Offer and Sale of Real Estate Programs of the Midwest Securities Commissioners' Association*, or that any variations, and the economic effect thereof, be disclosed.

14. SUMMARY OF PARTNERSHIP AGREEMENT AND REPORTS TO INVESTORS

A brief summary of the material provisions of the Limited Partnership Agreement should be included.

15. REPORTS TO INVESTORS

The registrant should disclose all reports and other documents that will be furnished to Limited Partners as required by the program's Limited Partnership Agreement and the undertakings to the registration statement. In particular, registrant should disclose: (1) Whether the financial information contained in such reports will be prepared on an accrual basis in accordance with generally accepted accounting principles, with a reconciliation with respect to information furnished to investors for income tax purposes; (2) whether certified independent public accountants will certify the annual report; (3) whether the annual report will be provided to investors within 90 days following the close of the partnership's fiscal year; (4) that a detailed statement of any transactions with the General Partner or its affiliates, and of fees, commissions, compensation and other benefits paid, or accrued to the General Partner or its affiliates for the fiscal year completed, showing the amount paid or accrued to each recipient and the services performed, will be furnished to each investor at least on an annual basis pursuant to the registrant's undertaking; (5) that the information specified by Form 7–Q (if such report is required to be filed with the Commission) will be furnished to investors within 45 days of the close of each quarterly fiscal period pursuant to the registrant's undertaking; and (6) if the registrant has applied for, but not received an IRS ruling as to the tax status at the time of effectiveness of the registration statement, that the registrant will promptly notify each investor, in writing, pursuant to its undertaking, of the receipt of the ruling or of an adverse ruling or refusal to rule by the IRS.

V 39 N 54 MAR 19 74 XUM

16. THE OFFERING—DESCRIPTION OF THE UNITS

In addition to the disclosure required by the relevant items of Form S–1 or S–11, disclosure should be made of all restrictions on transfer of the interests, including those in the Partnership Agreement, those imposed by state suitability standards or blue sky laws, and those resulting from the tax laws.

17. REDEMPTION, REPURCHASE AND RIGHT OF PRESENTMENT AGREEMENTS

There should be a discussion of any provisions in the program that allow the General Partner or its affiliates to redeem or repurchase the offered security or that allow the investor to seek redemption or repurchase. The conditions or formulae used, e.g., purchase price less capital returns, should also be disclosed. Registrant should be careful to appropriately describe the investor's right—whether it be redemption, repurchase, or merely a right of presentment. The discussion should include the following factors:

(1) That appraisals are simply estimates of value and may not necessarily correspond to realizable value;

(2) The order in which redemption requests will be honored (post mark or other objective standard);

(3) Whether the General Partner and its affiliates will defer their redemption requests until requests for redemption by the Limited Partner public investors have been met;

(4) The source and amount of funds (together with any legal or practical limitations) available for this purpose;

(5) The circumstances under which a later request will be honored, while an earlier request is still pending;

(6) Tax consequences related to redemption;

(7) The period of time during which a redemption request may be pending prior to its being granted or rejected;

(8) Whether there is to be an allocation of funds among partners requesting redemption in circumstances where redemption requests exceed funds available for this purpose;

(9) Whether the Limited Partner must hold an interest in the partnership for a specified period prior to making a redemption request; and

(10) A detailed statement of the procedure that must be followed in order to redeem or seek repurchase of the interest, including the forms that must be presented, and whether signature guarantees will be required.

18. CAPITALIZATION

Disclosure should be made in accordance with Form S–1 (17 CFR 239.11) or S–11, (17 CFR 239.18) as appropriate.

19. PLAN OF DISTRIBUTION

A. If there is an understanding or arrangement, whether written or oral, between the registrant and any broker or dealer, relating to the distribution of the interests, which is intended to be finalized after effectiveness of the registration statement, such understanding or arrangement should be disclosed.

B. If, after the registration statement becomes effective, the registrant enters into any selling arrangement which calls for the payment of more than the usual and customary compensation, a sticker supplement (Rule 424(c)) (17 CFR 230.424(c)) describing such arrangement should be filed.

C. It should be disclosed whether registrant intends to pay referral or similar fees to any accountants, attorneys, or other persons in connection with the distribution of the interests.

D. If the General Partner or its affiliates intend to purchase interests, and such interests will be included in satisfying the minimum offering requirements, it should be disclosed whether such interests will be held for investment or resold.

20. SUMMARY OF PROMOTIONAL AND SALES MATERIAL

A. The sales material should present a balanced discussion of both risk and reward.

B. A section which identifies all selling materials proposed to be transmitted to prospective investors should be included. The selling material should be appropriately identified by title and character and should be separately categorized either as the registrant's material or that of another person. If material provided by the latter is to be used, state the name of the author and publication and the date of prior publication, if any, identify any persons who are quoted without being identified, and, except in the case of a public official document or statement, state whether or not the consent of the author and publication have been obtained for the use of the material as sales literature. Selling materials include memoranda, summary descriptions, graphics, supplemental exhibits, media advertising, charts and pictures relating to the offering of the security.

C. For material developed subsequent to the effective date, a "sticker" supplement (424(c) prospectus) should be filed to describe any new sales material.

D. Any material that is intended to be furnished to investors orally or in writing, other than that which is used for internal purposes of the registrant, and including all material described in paragraph B above, should be submitted to the staff supplementally, prior to its use. For purposes of this paragraph, the definition of sales material includes all marketing memoranda that are sent to broker/dealers or other sales personnel. Staff comments, if any, will be made orally. Registrant is advised to check with the staff before using sales material that has been submitted to the staff.

E. Wherever public sales meetings or seminars are to be employed to discuss the offering, individually or in conjunction with other tax sheltered offerings, the staff should be provided, as supplemental information, copies of any written scripts or outlines which are prepared for use in such meetings a reasonable time prior to their use.

F. The contents of the above sales material or sales meetings should be consistent with the representations in the prospectus. Reference in such sales material or at such sales meetings to Federal income tax treatment of the program and its investors should refer to either a ruling of the IRS or an opinion of counsel. Counsel should be named, his acknowledgment furnished with respect to such use, and any qualification contained in counsel's opinion included in such material. Where the program has not sought a ruling as to the tax status (partnership) from the IRS and is relying on an opinion of counsel, it should be clearly indicated that an opinion of counsel is not binding on the IRS and that the absence of a ruling may expose an investor to greater risk than would be in the case if a ruling had been obtained.

21. UNDERTAKINGS

A. The following undertaking with appropriate modifications to suit the particular case should be included in the registration statement if the securities to be registered are to be offered in a continuous offering over an extended period of time:

The registrant undertakes (a) to file any prospectuses required by section 10(a)(3) as post-effective amendments to the registration statement, (b) that for the purpose of determining any liability under the Act each such post-effective amendments may be deemed to be a new registration statement relating to the securities offered therein and the offering of such securities at that time may be deemed to be the initial bona fide offering thereof, (c) that all post-effective amendments will comply with the applicable forms, rules and regulations of the Commission in effect at the time such post-effective amendments are filed, and (d) to remove from registration by means of a post-effective amendment any of the securities being registered which remain at the termination of the offering.

B. The following undertaking should be included in every registration statement:

The registrant undertakes to send to each limited partner at least on an annual basis a detailed statement of any transactions with the General Partner or its affiliates, and of fees, commissions, compensation and other benefits paid, or accrued to the General Partner or its affiliates for the fiscal year completed, showing the amount paid or accrued to each recipient and the services performed.

C. The following undertaking should be included in every registration statement:

The registrant undertakes to send to the limited partners, within 45 days of the close of each quarterly fiscal period, the information specified by Form 7–Q (17 CFR 249.307a), if such report is required to be filed with the Commission.

D. The following undertaking relating to investment of the proceeds of an offering in which a material portion of the maximum net proceeds (allowing for reserves) is not committed to specific properties should be included in the registration statement:

The registrant undertakes to file a current report on Form 8–K to reflect each commitment involving the use of 15% or more (on a cumulative basis) of the net proceeds of the offering and to provide the information contained in such report to the Limited Partners at least once each quarter. The report to Limited Partners will contain the full financial statements required by Form 8–K, or, at the discretion of the registrant, a summary of the full financial statements with a statement that the full financials will be sent upon request.

The registrant should undertake to file a sticker supplement pursuant to Rule 424(c) under the Act to reflect each such commitment made during the offering period and to consolidate all such stickers into a post-effective amendment filed at least once every three months. Such sticker supplement should also disclose all compensation and fees received by the General Partner(s) or its affiliates in connection with any such acquisition.

NOTE: Offers and sales of the interests may continue after the filing of a post-effective amendment containing information previously disclosed in sticker supplements to the prospectus, as long as the information disclosed in the sticker supplements was complete.

E. If the registrant has applied for a ruling from the IRS as to tax status, and has not received it at the time of effectiveness:

The registrant undertakes to promptly notify each investor, in writing, of the receipt of the ruling or of an adverse ruling or refusal to rule by the IRS, and undertakes to file with the Commission a Form 8–K describing such event.

The Commission hereby proposes Guide 60, "Preparation of Registration Statements Relating to Interests in Real Estate Limited Partnerships," for comment pursuant to sections 7 and 10 of the Act. All interested persons are invited to submit their views and comments on the foregoing proposal in writing to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Washington, D.C. 20549, on or before April 15, 1974. Such communications should refer to File No. S7–517 and will be available for public inspection.

(Sections 7, 10, 48 Stat. 78, 81; sec. 205, 48 Stat. 906; sec. 8, 68 Stat. 685; (15 U.S.C. 77g, 77j.))

By the Commission.

[SEAL] GEORGE A. FITZSIMMONS, *Secretary.*

Notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 19544; FCC 74-195]

PUBLIC COAST RADIOTELEGRAPH STATIONS

Second Notice of Inquiry

1. The proceeding in Docket No. 19544 was initiated pursuant to section 403 of the Communications Act of 1934 by the Commission's notice of inquiry (37 FR 15197, 38 FR 3003, 36 FCC 2d 620) released July 20, 1972. The purpose of this proceeding is to conduct an overall review of the operations of public coast radio stations providing common carrier radiotelegraph services with the view towards the establishment of a policy framework in which to resolve the matters described in the Notice of Inquiry which are presently pending before the Commission.

2. As requested in Appendix A to the notice of inquiry, the major carriers presently operating public coast radiotelegraph stations (ITT World Communications Inc., RCA Global Communications, Inc., and TRT Telecommunications Corporations) have submitted a substantial amount of useful detailed information concerning the operations of their existing coast stations. Comments and reply comments have also been filed by other interested parties. In addition, a study contract was entered into by the Commission with Advanced Technology Systems, Inc. (ATS) so that we could have the benefit of an independent analysis of the problems facing the industry, as contrasted to the comments filed in response to the Notice of Inquiry. The final report resulting from this study, which was completed and submitted to the Commission in December 1973, is attached as the Appendix to this document.

3. The findings and recommendations in the ATS study are extensive as well as being novel in some respects to the present operations of public coast radiotelegraph stations. While we have not completed our review of the contents of this report, we do believe that its usefulness will be enhanced with the filing of comments by other parties interested in this proceeding. In particular, the three alternative coast station configurations listed in the ATS report are not the only ones that will be examined in the course of this proceeding. The examination of any potentially feasible alternative and decisions relating to the final arrangement of public coast radiotelegraph stations will be based primarily on the quality and scope of the maritime services to be rendered by the particular configuration and will not be limited solely to cost-revenue considerations. With respect to the landline system described by ATS to interconnect coast stations, there are a number of policy and practical questions relating to assuring the nondiscriminatory distribution of traffic between stations and to the equitable distribution between users of the costs of such a system which have to be resolved before the Commission can decide if such a system should be implemented.

4. The pending applications of the major carriers for authority to discontinue the services presently provided at certain of their public coast stations constitute one of the most pressing matters with which this proceeding is concerned. These carriers take the position that the closure of these stations will improve the financial viability of the remaining stations and that the current demand for maritime radiotelegraph services can be adequately satisfied by the remaining coast stations. The ATS report points to certain deficiencies in the cost-revenue data submitted by these carriers, and certain portions of the financial statements submitted by the carriers have been challenged by the Communications Workers of America in its reply comments to which these carriers have not had an opportunity to respond. Since the financial viability of the industry is one of the most basic of the issues in this proceeding, an accurate picture of the current financial status of the industry should be further developed. Variations in the accounting procedures and cost allocations employed by the different carriers preclude the direct comparison of cost-revenue relationships between coast stations or carriers. Therefore, for each coast station which is collocated with another radio station in a different service, such as point-to-point, we request that the carrier provide as part of this proceeding the following information for each such station by service for each year from 1966 through 1973: The revenue derived for each service, the direct costs of each service, the allocated cost for each service, the allocated net book value for each service, and the methodology used to arrive at these costs. We also request that each carrier specify for each coast station for the years 1966 through 1973 the revenues derived from the landline charges associated with the receipt and forwarding of marine messages and whether these amounts were included in the revenue figures previously submitted in this docket. Finally, in this regard and after receipt of the above information, we are directing the staff to pursue any matters relating to the financial aspects of coast stations which have not been clarified in this proceeding and to request the carriers to provide such additional information or clarification as may be necessary for a detailed examination of the financial statements submitted in this inquiry. This information will be placed in the official file of this docket and will be available for inspection by all interested parties.

5. Of equal concern in this proceeding is the technical updating and operational improvement of public coast radiotelegraph stations to improve the quality and efficiency of the maritime services provided to ships at sea, as well as the upgrading of coast stations necessary for the implementation of a high quality radioteleprinter service and the introduction of a selective calling system. We do not believe that the closure of certain coast stations as presently requested is in and of itself an achievement of these goals. Therefore, we are requesting that proposals be prepared by carriers seeking closures and submitted to the Commission for the implementation of an improved public coast radiotelegraph service with fewer stations from the standpoint of their remaining facilities. In this context, information regarding new equipment, services and/or facilities that would be required, the additional staffing required at the remaining stations, and methods to be employed in providing an improved quality of service to maritime users should be examined by the current licensees in light of the total system concept and other improvements discussed in the ATS report. The resulting coast station configuration must not only have the capability to handle the volume of maritime traffic currently handled by a carrier's existing coast stations on a coast-by-coast basis, but must also be capable of providing a higher quality of present maritime service offerings with greater efficiency, as well as providing for the implementation of a high quality radioteleprinter service. Such an affirmative plan, together with supporting technical and financial information, should be submitted to the Commission as a part of this inquiry.

6. It appears to be the general tenor of the comments filed in this proceeding to date, that competition on each coast with stations capable of handling comparable volumes of maritime radiotelegraph traffic is the most desirable of the feasible industry structures. We have no reason at this time to believe that the public interest in high quality maritime radiotelegraph services could be better served either by establishing a monopoly by selecting, either by choice or by default, a single licensee to operate all public coast radiotelegraph stations on each or all coasts, or through the entry of limited coast radiotelegraph stations. We also believe it desirable for maritime users and shipboard operators to have available a meaningful choice of coast stations from which to obtain service and that messages be routed through the coast station which can provide the quickest and most efficient service at any particular time. In this connection, we will examine the extent to which the existing ship station licensing arrangement of granting ship licenses to RCA Global Communications and ITT World Communications, instead of the ship owners, restricts the availability of such a freedom of choice in actual practice. Comments regarding this matter are requested.

7. In this regard, it is also noted that, apart from some general statements that there is a need for high quality maritime radiotelegraph services, there is no clear definition of the desired volume or quality of the services wanted by the customers of the existing public coast stations. Without such a clear definition of maritime user requirements, we cannot be in a position to assure that any affirmative plans proposed by the major carriers for the reconfiguration of their existing coast station networks will in fact provide the type, quality, and level of the services actually desired by the maritime users. We therefore urge the users or user associations to submit their requirements in terms of desired volume and quality of service that should be provided by public coast radiotelegraph stations at specific ports or by geographic area.

8. The Commission considers this proceeding a matter of urgency and feels that the public interest requires our prompt resolution of this matter. The time afforded for the filing of comments on the ATS report and the filing of the affirmative plans of the major carriers and a definition of user requirements appears sufficient for interested parties to prepare and submit the necessary items. The reply comment period may be utilized to modify carrier plans to accommodate stated requirements not previously addressed. Any request for extension of time to file these items or reply comments must clearly establish that the comments to be filed are of such consequence to the resolution of the problems in the proceeding that the public interest requires us to extend the time period.

9. In view of the foregoing, a second notice of inquiry in Docket No. 19544 is hereby adopted. Authority for this action is contained in sections 4(i) and 403 of the Communications Act of 1934, as amended. Interested persons may file comments on or before April 15, 1974 and reply comments on or before May 1, 1974. Comments and reply comments shall be filed pursuant to § 1.419(b) which requires, among other things, an original and 14 copies of all filings. All relevant and timely comments and reply comments filed in this Docket will be considered by the Commission before further action is taken. The Commission may also take into account other pertinent information before it in addition to specific comments elicited by the notice in this proceeding. Responses will be available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters in Washington, D.C. Service of comments and reply comments on other parties to the proceeding as required in the first notice of inquiry will not be required with respect to filings in the second notice of inquiry.

Adopted: February 27, 1974.

Released: March 8, 1974.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

FINAL REPORT

THE PUBLIC COAST RADIO TELEGRAPH STATION STUDY

TABLE OF CONTENTS

SECTION 0 EXECUTIVE SUMMARY

A. Background.
B. The stature of the coastal telegraph industry.
C. A plan for restructuring the coastal telegraph service.
D. Summary of findings.
E. Conclusions.
F. Recommendations.

SEC. I INTRODUCTION

A. Background.
B. ATS approach to a solution.

SEC. II INDUSTRY PROFILES PRESENT

A. Traffice patterns.
B. Cost/revenue considerations.
C. Operations—present.

SEC. III OVERVIEW—CONSIDERATIONS RELATING TO IMPROVEMENTS

A. Improved viability is realizable—programmed improvements are warranted.
B. Improvements needed in message handling.
C. Subtantial improvement can derive from networking of an implemented system.

SEC. IV INDUSTRY PROFILES—ALTERNATIVE STATION CONFIGURATIONS

A. Three alternative station reconfigurations.
B. Traffic patterns under the alternatives.
C. Cost/revenue considerations.

APPENDIX A

Parties contacted during study.

APPENDIX B

Maritime radiotelegraph public and limited cost stations.

SECTION 0

EXECUTIVE SUMMARY

A. *Background.* The study was initiated by the FCC to review the wide spectrum of replies to Docket No. 19544 which sought comments from companies operating the public coastal radiotelegraph (PCRT) stations, labor unions, those served by this industry and other interested parties. The comments covered financial statements, quality of service, and recommendations on how to continue and improve the service. A specific question facing the FCC was whether it should permit certain stations to be closed, as requested by three major carriers. A second question was the disposition of waivers of outstanding requirements imposed by the FCC on the carriers to make technical improvements in the existing facilities. These were the specific questions that prompted the FCC to issue its Notice of Inquiry. These questions, however, were symptomatic of a much more fundamental problem—the financial viability of the industry.

Advanced Technology Systems, Inc. (ATS) was selected as the FCC contractor to perform the review and analyze the industry's replies to the docket. ATS considered the specific issues of current and future operations, closure and technical improvements and evaluated these issues relative to the more basic issues that relate to the viability of the service as a whole. The study examined the requirements of the Maritime Industry and identified reasonable improvements that will bring about financial viability and operational effectiveness. ATS followed an approach which emphasized a detailed analysis of maritime radiotelegraph operations. Its objective was the identification of ways and means by which the carriers, the vessel owners, and operators may cooperate in the establishment of a system that benefits all through improved communications.

B. *The stature of the coastal telegraph industry.* The present coastal telegraph service is provided by 18 stations. Thirteen are operated by 3 major communications carriers, ITT, RCA, and TRT, and 5 independent carriers have one station each. Two of the independents are located on the Great Lakes—and have no real pertinence to this study. The concern of this study is service to vessels on the high seas.

The traffic handled by the stations of interest totals about one million messages per year for a total revenue of about $5 million per year.

The breakdown in percentage of traffic handled (1972) by individual stations and by each coastal area is given in the Table which follows. Figure 1 shows the location of each station and the volume of traffic each handled in 1972.

DISTRIBUTION OF PRESENT TELEGRAPH TRAFFIC

Station	Percentage of 1972 traffic (percent)
EAST COAST	
RCA—Chatham (WCC)	22
RCA—Tuckerton (WSC)	3+
ITT—Long Island (WSL)	16
ITT—New York City (WSF)	0
MPA—Baltimore (WMH)	1+
Percent of Industry Total	43
WEST COAST	
ITT—Seattle (KLB)	2
ITT—San Francisco (KFS)	10
ITT—Los Angeles (KOK)	5
RCA—San Francisco (KPH)	16
Percent of Industry Total	33
GULF COAST	
TRT—Hialeah (WAX)	5
TRT—New Orleans (WNU)	6
RCA—Lantana (WOE)	5
ITT—Arcadia (KLC)	3
MMR—Mobile (WLO)	1
Wood—Tampa (WPD)	½
RCA—Port Arthur (WPA)	3
Percent of Industry Total	24

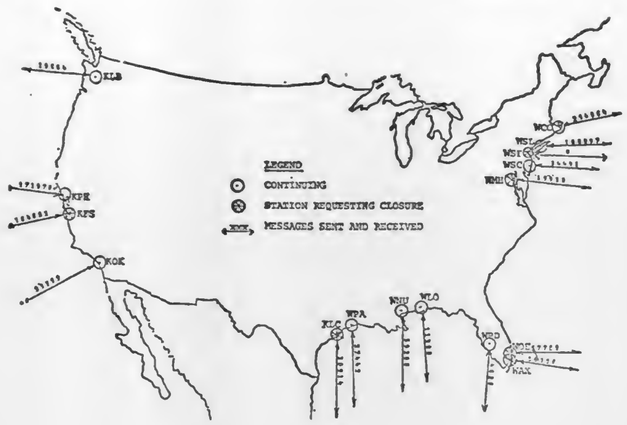

FIGURE 1

COASTAL STATION TRAFFIC PATTERN (1972)

From the preceding tabulation, it can be seen that 64 percent of the total traffic is handled by four stations: These are East Coast stations WCC(RCA), WSL(ITT), and West Coast stations KPH(RCA), KFS(ITT). Only 12 percent of traffic is handled by the remaining five stations on the East and West Coasts. The Gulf-Florida area has 24 percent of the total traffic—which is spread among seven stations, none of which has more than 6 percent of the total traffic.

The three major carriers, ITT, RCA, TRT, have expressed concern with the financial structure of the present coastal telegraph service. All three have requested the right to close stations to improve their financial position. While the best stations to close would be the smaller stations this conclusion does not appear to be supported by some of the applications for closure now on file. It must, however, be recognized that the present requests for closure differ from earlier requests. Thus, the principal objective of the applications on file is to emphasize the need for this form of relief. The notice of inquiry and this study have been accepted by the carriers and interested parties as an appropriate way to establish a basis for planning. It is to be expected that the carriers will welcome an opportunity to modify their applications should this study provide a better basis for accomplishing their fundamental objective—improved financial viability.

C. *A plan for restructuring the coastal telegraph service.* It is the opinion of ATS, based upon its study, that ITT and RCA should each retain their best station on both the East and West Coasts, and that TRT should retain its best station on the Gulf. This approach would retain the five best sited and best equipped stations in operation today. This would also provide for competition among major carriers on the East and West Coasts—a feature that vessel operators favor. The Gulf Coast presents a more complex problem. All of the stations operated by either ITT or RCA on the Gulf Coast are small, poorly equipped stations. Both carriers would like to close these stations. TRT, on the other hand, has a very good station at New Orleans and is interested in continuing this station provided it can close its station in Florida.

It would be beneficial to the financial viability of WNU (New Orleans) to allow ITT and RCA to close their stations in this area. It would also be helpful to the development of two independents in the Gulf area; WLO at Mobile and WPD at Tampa. Both of these stations are in a position to provide additional coverage and competition for traffic in the Gulf-Florida area. Thus, there is merit in allowing RCA and ITT to close their Gulf-Florida stations, and to favor expansion of the capabilities of stations operated by TRT at New Orleans and the independents at Mobile and Tampa.

ATS recognizes that there may be concern on the part of some interested parties in permitting the closure of both major carrier stations in Florida and both major carrier stations in Texas. Accordingly, it has in this study analyzed a configurstion of stations which includes retention of one major carrier station in Florida (RCA's) and one in Texas (ITT's). Such a plan would differ from the one described above in that it would retain competition among all three major carriers in the Gulf-Florida area. This would detract from the opportunity for expansion of TRT and independent operators, otherwise presented by closure of ITT and RCA Gulf operations.

ATS recognizes the importance of restructuring the coastal telegraph service to permit an improvement in financial viability. However, it is of the strong opinion that the most important improvement to the coastal telegraph service will derive from a networking of stations into a common carrier maritime communications network. This network would have the purpose of making available to the maritime community, the capabilities of all stations and all services. It would assure a means of access to the system for all maritime areas, including those that would lose a "local" station due to closure.

The common carrier landline network concept proposed in this report would solve another problem that exists at the present time. This is the lack of a properly tariffed procedure or procedures for handling of messages over landlines. It is estimated by ATS that better than 65 percent of the revenue accruing from the use of land lines covers handling of messages by the coastal stations or carriers over carrier provided landlines and/or TWX, TELEX, or telephone. Western Union is used as a connecting domestic carrier in less than 15 percent of the cases. The proposed common carrier maritime network would treat all carriers and coastal station operators as connecting carriers. It would take advantage of the highly modern landline and message handling capabilities of the three major carriers, ITT, RCA, and TRT. These facilities are used today by each carrier to handle its own traffic. A system that would take advantage of these facilities on a common carrier system basis would be more economical and would have the advantage of providing for exchange of traffic among stations and carriers to facilitate delivery.

This report presents a concept of operation under which traffic lists for vessels would be transmitted on a common channel by all stations. Each station would give priority to the traffic it holds; but it would also broadcast lists for traffic being held (for example, 4 hours or more) at other stations. Thus, if a vessel cannot reach a station that has its traffic, it could request its traffic from a station with which it has contact without waiting for conditions that would permit it to get through directly to the station holding that traffic. Similarly, a vessel originating traffic could transmit it to any station it chooses, on the basis of availability, and be assured that the message will reach it destination expeditiously. At the present time, there is a tendency for vessels to use those stations and/or carriers with which it has made special arrangements for message handling. The common system would not preclude the exercise of a preference for use of a particular station and/or carrier but would permit a customer a means for clearing traffic expeditiously over the best, or only routing available at any time.

The establishment of a common landline network is considered essential to the development and use of improved system techniques. It is also essential to the establishment of a system that will utilize other modes of transmission. For example, there would be provision for transmission of messages by radiotelephony or in the future by satellite. The proposed network should be a common means for serving all of the communication needs of vessels and those that communicate with vessels. It should be possible through a common maritime network to utilize any of the available means for establishing contact with a vessel. This is not to preclude the opportunity provided by the telephone company for direct telephone contact, but rather to extend on a positive service basis the availability of such circuits for use by a communications center of the common system. The combination of a restructuring of stations to improve financial viability, and the establishment of a common carrier landline network are considered to be necessary features of an improved maritime communications system.

The following is a list of specific findings, conclusions and recommendations that derive from this study.

D. *Summary of findings.* 1. The PCRT industry has not improved the technical characteristics of its equipment to comply with the FCC standards identified in Docket No. 18577. The industry position is that the revenue derived from coastal telegraph operations does not support the substantial investments in equipment required to meet the FCC standards being "imposed" on them.

2. Industry traffic volume, and hence revenue, has remained at essentially the same level (1,000,000 messages and $5,000,000 per year) for the four years 1969–1972.

3. A reduction of staff and operating personnel has occurred at many of the stations due to attrition. Because of increases in cost of labor, this reduction has not resulted in a decrease in operating costs.

4. The PCRT industry has made only minimal use of technological improvements (teleprinters and other forms of data transmissions) in station operations. The industry is highly dependent upon manual operation.

5. The PCRT industry does not report direct costs and allocated expenses on a uniform FCC approved basis. Wide variances in some important cost items occur from company to company in the industry. For example, ITT's allocated costs, as a percent of direct cost, greatly exceed those of other companies in the industry. RCA's salary costs at station KPH, as a percentage of direct cost, greatly exceeds that of any other similar sized station in the industry.

6. Substantial revenues accrue to the carriers from collection and delivery of messages over landlines.

7. The charges for the collection and delivery of coastal telegraph messages over landlines are handled differently by the PCRT principals. RCA and TRT do not include such charges in the revenue they report from operation of coastal stations; ITT does.

8. Financial statements submitted by the industry indicate, on face value, that the industry is not financially viable.

9. In recent years, increased costs have been allocated to coastal station operations at sites shared with point-to-point facilities. This is attributable in part, at least, to the removal of revenue producing point-to-point operations to other sites that are not shared. This is in accord with a management program to shift point-to-point operations from the use of radio to the use of cable and satellite.

10. An analysis of costs that are directly related to maritime communications indicates that the industry would be financially viable, though on a marginal basis, if the costs of facilities shared with point-to-point operations were reallocated to show only costs that are actually required for maritime.

11. The industry would be financially viable and could provide improvements in equipment and service if certain small stations were allowed to close.

E. *Conclusions.* 1. The closure of small stations by the major carriers would permit the industry an opportunity to establish viability and to provide improvements in equipment and service.

2. There will be a continuing need for manual telegraphy into the foreseeable future even though other forms of communications are made available. Existing terrestrial facilities should be improved to provide additional forms of communications, particularly printing and data. Voice grade channels should be utilized to provide facsimile and high speed data as well as voice.

3. The closing of stations should be conditional upon the restructuring of the public telegraph service into a common carrier network of landlines and message handling facilities that will assure service to all maritime areas from the remaining stations.

4. Three communication centers (one for each coast) should be established to handle the exchange of traffic within the coastal telegraph system. These should also provide an interface that facilitates the use of radiotelephony through terrestrial or satellite facilities when use of these will best serve the communication needs of the maritime service.

5. The FCC should encourage the public maritime carriers to cooperate as connecting carriers in providing a total common communications service to the maritime industry.

6. Coastal stations participating in the restructured coastal telegraph service should be required by the FCC to install new equipment complying with standards identified in Docket No. 18577, and should be encouraged in installing such equipment to include the capability for providing both telegraph and teleprinter operation.

7. The promotion of satellite communications services for commercial ships at sea by MARAD and COMSAT should not be allowed to become a deterrent to the immediate improvement in viability and services offered by terrestrial facility operators.

8. The international point-to-point carriers should be required to restructure the cost allocation procedures for shared radio facilities so as to relieve the coastal stations of a burden that now results from removal of point-to-point service from these sites. The point-to-point carriers should be encouraged to organize their landline and message handling capabilities to provide a common maritime network that effectively ties together the various coastal stations (including satellite terminals) as a maritime communications system.

9. The FCC should require the establishment of standard procedures for the handling of messages over landlines and make it the responsibility of the international carriers, subject to FCC approval, to utilize domestic carriers or the systems of domestic carriers when such can be used to the benefit of the customers being served.

F. *Recommendations.* It is recommended that: 1. Pending its decision in Docket No. 19544, the Federal Communications Commission (FCC), establish a moratorium for complying with Docket No. 18577 and, during this period, not allow the opening of any new public or limited coast station.

2. The FCC initiate a study leading to an FCC approved cost allocations manual for the PCRT industry.

3. The FCC ask the carriers, vessel operators, and representatives of operators to review this report and comment on the feasibility of cooperating in the development of a program for implementing the total system concept and/or other improvements discussed in this report.

4. The FCC hold such meetings or establish such procedures as may be appropriate to develop and implement a program for improvement.

SECTION I

INTRODUCTION

A. *Background: Basic question is how to achieve a viable coastal telegraph system.* The study seeks to answer the fundamental objective of Docket No. 19544, which is to continue and improve the service now provided by public radiotelegraph stations. A specific question facing the FCC is whether it should permit certain stations to be closed, as requested by three major carriers. A second question is the disposition of waivers of outstanding requirements imposed by the FCC on the carriers to make technical improvements in the existing facilities. These are the specific questions that prompted the FCC to issue its Notice of Inquiry. These questions, however, are symptomatic of a much more fundamental problem—the viability of the industry.

The responses to the notice of inquiry reflect some of the more fundamental questions. They clearly indicate differences in opinion as to the adequacy of service and what should be done to improve the situation. Serious criticisms are made of the carriers by the vessel owners and radio operators. The carriers emphasize data that supports their positions for closure.

ATS considered the specific issues of closure and technical improvements and evaluated these issues relative to the more basic issues that relate to the viability of the service as a whole. The study examined the requirements of the Maritime Industry and identified reasonable improvements that will bring about financial viability and operational effectiveness. ATS followed an approach which emphasized a detailed analysis of maritime radiotelegraph operations. Its objective was the identification of ways and means by which the carriers, the vessel owners, and operators may cooperate in the establishment of a system that benefits all through improved communications.

Fundamental weakness in radiotelegraph service is its inability to accommodate improvements. The existing radiotelegraph service is structured around a dependence upon the manual transmission of morse code. The structure reflects an era of labor abundance. It has fostered an historic competition among manned telegraph stations that operate without the benefit of modern technology and without a coordinated industry structure. The industry is aware that it is facing an increasing competition from those who offer new technologies in the form of voice and data systems that emphasize automatic operation. Yet the existing public telegraph structure is not financially strong enough or properly organized to support the changes that are necessary to counter the new competition by offering new services to its customers. This lack of action by the PCRT industry is encouraging the formulation of new competitive entities which plan to introduce improvements that derive from improved technology and hence capture some of the maritime traffic currently handled by the public coast stations.

FCC has recognized a need for the implementation of satellite service. An example of the application of new technology to the maritime mobile service is reflected in current planning for the use of satellite technology. The world is anxious to develop this new technology for maritime use. In this country COMSAT would like to be the supplier of such service. The Maritime Administration (MARAD) is supporting an experimental program for development of a maritime satellite communications system. There are fundamental differences between the U.S. and others as to who should own and operate an international satellite. Within the U.S. there is a serious question as to what effect satellites will have on the operations of the existing carriers. The FCC has attempted to alleviate the immediate problem in the U.S. by requiring COMSAT to permit existing carriers to participate with it on an ownership basis in the establishment of a maritime service. The outcome of this venture is not yet clear. It is, however, quite clear that there is a problem in programming improvements in maritime communications so as to accommodate the needs of the present PCRT industry structure.

Competition exists between modes of communication. The issue of competition between new and old in providing services to the maritime industry includes an increasing need for accommodating the use of different modes of communications; Telephone, printer, data and telegraph. Radiotelegraph, using public coast stations, is still the workhorse for providing high seas communications, and hand-keyed international morse code the mode of transmission most relied upon. While some segments of the PCRT industry have offered improvements in telegraph technology that point to the use of teleprinters, and other forms of data transmission, these techniques have not achieved a significant degree of use up to the present. There is no correlation of service or planning for improvements among the telegraph carriers or among the telephone and telegraph carriers. As already mentioned, there is some recognition of need for correlation among carriers in the planning for use of satellites—but the mechanism for such coordinated planning of improvements to the PCRT service does not yet exist.

Implementation of system changes or improvements in the PCRT industry have been difficult to achieve. The accomplishment of

V 39 I 54 MAR 19 74 XUM

improvements in existing PCRT communication services have been difficult due to the lack of agreement among carriers and users on the changes to be made and on the precise form in which to make the changes. This is particularly true when the changes require an investment in new equipment and/or new service offerings. Without an indication from the users that they will equip their ships to take advantage of the new service offerings, it is difficult for any of the PCRT industry leaders to justify the investment that is necessary on their part to bring about the changes. This difficulty is more pronounced by the fact that the change must occur within a regulated industry that is subject to international agreement. Foreign vessels are recipients of a substantial part of the service provided by U.S. radiotelegraph carriers. Planning improvements in consort with foreign shipping interests under these circumstances has been extremely difficult and time consuming.

The difficulties encountered in achieving standardization on a selective-calling and on printer systems illustrative of the problem. Representatives of the Maritime Industry have been trying for many years to achieve a standardized selective-calling system. The tone system now favored by International Agreement is not acceptable to the U.S. For this reason, an important U.S. program is presently being sponsored by the Maritime Administration (MARAD) to develop a different system based on the use of digital techniques. It is the hope of U.S. interests that the MARAD program will produce data in time to encourage international support of the U.S. position at the forthcoming Maritime Conference (1974).

The U.S. has no specific system that it recommends for use of printers. There are several different systems in use throughout the world. Systems used in other countries are different from the one system which is receiving limited use by U.S. carriers. There has not been adequate progress in the development of either an international position or a national position. Such progress is needed before there can be substantial progress in implementation of printers by U.S. carriers and/or U.S. vessel operators.

Delays in planning improvements in the present coastal telegraph system has encouraged the implementation of private systems. There is an increasing interest in the use of private systems by some vessel companies. Better than 90 percent of the ship-shore traffic is business related. The personal traffic of the crew and passengers makes up the remaining portion of the traffic. Vessel companies are attracted to private operation because it provides direct company control over the large percentage of their ship related communications and the right to use a selective-calling system of their own choice. The use of private stations for radiotelephony is now authorized under the FCC rules. There is an outstanding request for authorization of a privately operated teleprinter and/or data service. The argument is made that private systems are necessary and desirable to afford operators the opportunity for implementing improvements on their own—thus relieving them of dependence upon common carriers, and the problems involved in achieving national and international acceptance.

The proliferation of private systems using HF could become a problem on the high seas just as it has been a problem on the inland rivers. Without coordination of usage there will be an increasing potential for interference as the number of private systems increases. There is in addition the danger (cited by the FCC in its notice of inquiry) that widespread use of private systems will detract from the revenue base needed by the PCRT industry to assure adequate services to those commercial interests remaining dependent upon the PCRT carriers for radiotelegraph communications. Both the common carriers and those they serve can be harmed by the widespread use of private systems. These are questions that confront the FCC as it proceeds toward a solution of the fundamental problems of concern in this study.

The FCC must consider closure and other improvements in the light of the effect which such changes will or could have on viability of the industry. The FCC and the PCRT industry are aware that they are responsible for assuring the continued availability of maritime communications. Both concern themselves with the fundamental problems that confront the industry as a whole. Both seek solutions that will satisfy more than the single question of closure of specific stations or the requirement for technological improvement. What is needed is an answer to the fundamental question of how to provide adequate service to the user in a business environment that has viability in adapting to new needs and opportunities for improvement.

The question of what constitutes financial viability is readily answered and is discussed more fully in later sections. It will be shown that a proper allocation of costs to marine communications would show the present PCRT industry to be financially viable though a marginal operation. With appropriate closures and realignment of stations, the industry can be made financially strong and capable of supporting needed programs to improve operations and service. The question of what constitutes adequate service has not been clearly specified within the industry. Those who serve attest to the adequacy of their services. Those who are served comment on the inadequacies of the services provided. ATS has considered the question of service adequacy and suggests the following criteria subject to refinements which reflect the many possible communication situations under which service must be provided.

Basically, using present day maritime radiotelegraph communication methods and techniques, shore-to-ship service should be deemed adequate if the shore station can make contact with 95 percent of the ship stations on its traffic list within two transmissions of the traffic list (4 hours under present tariffs), provided the traffic lists are broadcast during a period when the ship's radio operator is on watch. Ship-to-shore service should be deemed adequate provided any ship with adequate radio facilities can make contact and start message transmission on 95 percent of its calls within 30 minutes of their initiation of the calls.

Naturally these guidelines will and can become more stringent as new methods and technologies become operational in the industry. And they should be relaxed to cover communication situations which encounter transmission difficulties over long distances.

B. *ATS approach to a solution.* ATS approached its study with a full recognition of the background discussed in section I A. It has been sensitive to the importance of establishing factual data on both industry operations and the financial viability of coastal station operations. Thus it set forth at the outset to establish a clear and factual understanding of both the operational and financial status of individual stations and of the industry as a whole. Its preliminary analyses of responses to the FCC Inquiry indicated that data on facilities and operational matters was reasonably complete. Data on cost and revenue were less than adequate. It was determined that the industry profile in both areas—operations and finances—should be prepared on a comparative basis and that data from the responses to the FCC Inquiry should be supplemented by (1) a comprehensive survey of facilities, and (2) a request for more information on cost/revenue relationships, followed by personal contacts with management.

ATS visited[1] five radio sites on the West Coast, eight on the East Coast, and five sites on the Gulf Coast. This provided an extensive coverage of radio sites operated by the three major carriers, ITT, RCA, and TRT. It included in addition a survey of sites operated by WLO in the area of Mobile. Operating centers in San Francisco and New York were also visited. Several meetings were held with carrier management personnel, and representatives of operator unions. Contact was made with the U.S. Coast Guard and Maritime Administration as well as the FCC. The attitude of all those contacted was cooperative. While the carriers did not provide all of the supplementary data requested of them, they made available sufficient information to provide a good basis for making the most important judgments relative to station operations and financial viability. Each financial statement submitted was reviewed for completeness and conformity. The important cost categories in all financial statements were analyzed to uncover operating norms from which typical financial models of typical station operations could be constructed. These models were used as a basis for determining unusual costs in specific financial statements. The financial model was also used to estimate operating costs and return on revenues in the PCRT industry for the various station realignments analyzed in Section IV of this report as a basis for evaluating the effect of closures on system viability.

Section II contains the results of analyses of present operations of the coastal telegraph stations. Section III is an overview of the existing operations and the opportunities that exist for introducing improvements. Section IV compares the effect of granting outstanding requests for closure with alternative plans for achieving system viability. Since it became clear from the survey that the applications for closure do not reflect the only alternatives considered reasonable by the various parties, several other alternative system configurations were also analyzed. For example, RCA suggests that one large PCRT station on each coast may be the best answer to the industry's problems. ITT Worldcom believes that industry costs could be reduced—without adversely affecting the availability of the service to the public—by closing redundant stations and by consolidating stations serving the same area. On the other hand there was an expression of a need for competition by representatives of vessel operators. The analyses of alternatives in section IV take account of these views, and also include certain other important changes. These are modifications in operating procedures and a plan for the networking of stations. Particular emphasis is given to the need for introduction of a network that would tie all coastal stations together in a single common carrier system.

ATS recognized from the outset that the handling of traffic over landlines within the U.S. and the accounting for costs and revenue related thereto differ from station to station and among carriers. This was recognized to be a particularly complex area that would require special attention in the study. The study has considered a modification of the coastal telegraph service that would make the telegraph carriers responsible for the entire process of handling messages including the responsibility for collection and delivery in the U.S. This would not preclude the use of other carrier facilities but would put such use at the discretion of the maritime radio carriers.

[1] See Appendix A for a list of the stations visited and the industry personnel contracted.

As indicated in its proposal for conduct of this study, ATS has felt it desirable to explore the possibility of providing a common interface between users and all of the radio systems that are available for communication with vessels. Accordingly, the study identifies a network structure that is susceptible to such expansion, a structure that affords the PCRT industry an opportunity for future improvement in the handling of overall maritime operations. The network would utilize a common landline network and common communication centers as the means for distribution and reception of radio traffic by means of telegraph, printer, data, or voice through either the media of terrestrial or satellite radio. Sections III and IV discuss the networking arrangements in more detail. Appendix B lists twenty Marine Radiotelegraph Public and Limited Coast Stations.

SECTION II

INDUSTRY PROFILES—PRESENT

A. *Traffic patterns.* The response to the Commissions notice of inquiry, Docket No. 19544, indicates that the existing 18 PCRT stations handled a total of approximately one million messages sent and received for the year of 1972. Of the one million total, approximately one-fourth was sent and the remaining three-fourths received. The traffic was distributed in the ratio of one to three to five between the Gulf, West and East Coasts, respectively, with the bulk going to the large stations. Figure 1 shows the location of the coastal stations and total number of messages sent and received at each station. Graph 1 shows the total number of messages sent and received for the period of 1966 through 1972, and the estimate for the year 1973. The message traffic total handled by each of the principal carriers is also indicated. Graph 2 shows the distribution of total message traffic sent and received for each of the coastal areas. As indicated, there has been very little, if any, increase in message traffic during the period 1966 through 1972. Two opposing factors contribute to this stagnancy in traffic volume. The first is that the world's merchant vessel population is decreasing. The second is that the number of larger ships (over 10,000 gross tons) is increasing. The larger ships have a vital need for more communications. The two factors, up to this point in time, have been offsetting each other to yield a constant traffic level. By the year 1980, the communication needs for the larger number of larger ships will more than offset the decrease in merchant vessel population. The larger oil tankers, containerized cargo vessels, fishing vessels, etc. will have a vital need for voice and data communications to improve the vessels utilization factor through reduced in-port time. If this service is not offered by the PCRT industry, the merchant vessels will look to private systems and satellite services to satisfy their increased communication needs.

It is safe to predict, based on past communication experiences, that any new service offering in voice and data will capture a fair share of the existing maritime traffic and induce an increased use of this preferred form (by the user) of communications. The Automated Marine International Study on Maritime Mobile Satellites anticipates at least a doubling in maritime traffic by 1980 through improved satellite service offerings.

The current PCRT industry can be characterized as being widely dispersed with respect to locations and fractionated in distribution of traffic carried by the various stations. For example, one station carries 22.3 percent of the total messages, while four stations each carry 2 percent or less of the total volume. Figure 2 is illustrative of the traffic distribution by stations in the PCRT industry. A redistribution of traffic to a fewer number of larger stations is indicated to meet the communication needs of a changing but more demanding user.

B. *Cost/revenue consideration.* Of the many problems confronting the PCRT industry, it is the request for closure of stations that has forced a regulatory review. The carriers give many reasons for requesting closure, the principal ones being unprofitable operations and lack of growth potential in the industry. The desire to reassign investments in the PCRT industry to other better revenue producing business interest must also be recognized as a factor. As stated previously, indiscriminate closure of PCRT stations without consequential benefits in the form of improved service is not in the best interests of the public. However, selected station closures, in consort with provisions for the remaining stations to provide improved service, could have considerable merit.

Before it can be determined whether closures of Coastal Stations are in the public interest, the reasons for and alternatives to closure must be identified and analyzed with regard to many factors. These include the effect of such changes upon:

1. Financial viability of stations and industry.
2. Opportunity to provide improvements in station and system characteristics.
3. Improvement in services provided.
4. Increased operational efficiency.
5. Opportunities for Federal and Industry support for improvements.

This section describes the *existing financial condition* of the PCRT industry and its impact on the closure problem now facing the industry. The other factors listed are covered in other sections of this report.

The current financial condition of the PCRT industry is reflected in the financial statements submitted by them for fiscal year 1972 (FY72). The financial statements provided by RCA, ITT, and TRT are given in Tables 1, 2, and 3, respectively. Financial statements from the remaining PCRT stations are not included since these stations account for only a small percentage of the industry's total revenue and do not materially change the observations made or conclusions drawn.

All financial submissions to FCC Docket No. 19544 were reviewed. The four submissions of most significance in the determination of financial viability are ITT's Summary of Annual Costs, RCA's Profit and Loss Statement Summary, and the Profit and Loss Statement for the individual RCA stations WCC and KPH. These statements are reproduced here as Tables 4, 5, 6, and 7, respectively.

A comparative financial analysis of all station operations based upon the submissions by the carriers in FCC Docket No. 19544 and subsequent letter requests, dated August 22, 1973, results in the following observations:

1. WCC, which is an exclusively maritime station operated by RCA, is the only station which the carriers show to be meeting revenue requirements as defined in the FCC's letter of August 22, 1973. Its excess revenue is $240,000. See Table 1.

2. The combined operations for FY72 of all RCA PCRT stations meet revenue requirements with a total revenue of $2,362,000. Because of the high amount of excess revenue received from WCC, this revenue for all RCA stations is $81,000 in excess of the revenue requirement ($2,282,000) for an adequate return (6.5 percent) on investment. See Table 1.

TABLE 1.—*RCA Global Communications, public coast stations financial data, fiscal year 1972*

[In thousands of dollars]

Account name	Chatham, WCC	Tuckerton, WSC	Lantana, WOE	Port Arthur, WPA	San Francisco, KPH	Total
Station revenue	$1,086.8	$153.8	$228.3	$121.8	$772.1	$2,362.8
Operating costs	626.6	181.2	199.8	121.2	608.6	1,737.4
Allocated costs	155.3	36.0	42.7	25.1	133.8	392.9

Separation Study having no official standing with the FCC. See Table 4. In their response to the letter request of August 22, 1973. ITT reported for FY72 an Allocated Expense of $986,000 against Direct Costs of $1,477,000. See Table 8. This percentage is approximately 67 percent.

6. RCA's Allocated Costs (Marine Administration and General Administration) totalled $393,000 against Direct Costs of $1,737,000. The RCA ratio of Allocated Costs to Direct Costs is 23 percent compared with the 72.23 percent and 67 percent reported by ITT and identified in 5 above.

7. TRT's reply to the FCC's letter request gave a Comparison of Revenue and Operating Expenses for FY 72. This submission has been restated and reordered by ATS for direct comparison with the RCA and ITT submissions. The restatement is given in Table 3. This statement shows that operating costs exceed revenue at station WAX. Operating Costs are covered marginally at WNU.

8. Allocated Costs for the total TRT operation is stated at $221,000 against operating costs of $483,000 resulting in an operating ratio of approximately 45 percent. This is 22 percent above RCA's but at least 21 percent below ITT's reported ratio. TRT also uses stations with point-to-point service. As with RCA and ITT, TRT has shifted revenue producing fixed operations from the use of radio to the use of cable and/or satellite.

9. The ratio of salaries and benefits for operating personnel to revenue are high at TRT station WAX (90 percent) when compared with TRT station WNU and other RCA or ITT stations. RCA's salary and benefits to revenue ratio is 60 percent for FY71. RCA did not report salary and benefit figures for FY72. ITT reports a ratio of 53 percent for FY71 and 50 percent for FY72.

10. Marine revenue has had a modest upward trend for the three major carriers in the industry. A graph of this trend is shown in figure 3 for the three major carriers. A major factor contributing to direct cost is employee salaries and benefits. As figure 3 shows, this factor has remained essentially level at ITT indicating a reduction of personnel related expenses to account for increases in salaries and benefits. The cost of salaries and benefits at RCA follows the upward trend with revenue except for FY68-69 when FPH was heavily burdened with employee costs, and in FY71-72 when revenue remained level but employee costs increased $151,000.

The employee costs at TRT have grown in concord with revenue growth until FY72. In FY 72, revenue at TRT stations increased by $68,000 but salaries and benefits increased by $208,000.

FIGURE 3
COST AND REVENUE TRENDS

11. Of much importance in the analyses of cost/revenue data is a distinct difference in the manner in which different carriers handle revenues and costs associated with the use of land line for collection and delivery of messages. ITT shows for its stations those revenues and costs for messages that it handles in lieu of Western Union. RCA does not. TRT's practice is not clearly indicated. For purposes of this Section the data is used just as provided by the carrier. Accordingly, RCA data reflects no revenue or costs for its handling of landline services. ITT includes both revenue and costs associated with this service. Indications are that TRT follows a practice more closely related to the RCA practice than the ITT practice. The subject of landline revenue and costs will be discussed in more detail in later Sections and operation accounts. There appear tions (particularly Section IV) of this report.

Areas warranting special attention are identifiable. From the comparative analysis of the cost/revenue information submitted by the carriers, certain factors affecting the financial viability of the individual stations and the industry as a whole become evident. Briefly, these are:

1. The industry is labor intensive and the cost of labor is increasing faster than revenue. Reduction in personnel to reduce labor costs is no longer possible without materially degrading an already questionable quality of service. Increases in productivity per personnel dollar are required.

2. There is no industry or FCC approved standard for the allocation of costs to investment and operation accounts. There appear

V 39 N 54 MAR 19 74 XUM

to be no procedures for relieving maritime of burdens that result from decrease in point-to-point operations at shared sites.

3. Large variances exist in costs from station-to-station and carrier-to-carrier. Largest variances occur in salary and benefit costs and allocated costs at stations shared with the international fixed service.

4. If the cost/revenue submissions of the carriers are accepted at face value, the industry, as it currently operates, is not financially viable. However, a question exists as to whether or not the carriers are in effect placing a burden on the maritime service in those cases where maritime shares sites with a point-to-point service that has shifted its revenue producing operation from the use of radio at those sites to the use of other facilities at other sites. Analyses performed in this study indicate that the present method of allocating costs to marine is burdensome and that a more appropriate allocation of costs would result in a showing that the industry is viable.

5. It appears that too many PCRT stations (18) are competing for the PCRT industry revenue base of approximately $5,000,000. This leads to operating inefficiencies and a fractionalization of service provided. Implementation of improvement is discouraged. The closure of carefully selected stations and the realignment of others to improve service and financial viability is indicated.

Section IV provides a comparative analyses of the financial aspects of three alternative schemes for reconfiguring the coastal telegraph station complement. To provide a basis for such comparative analysis of different alternatives, the following model of a PCRT station has been prepared using costs considered appropriate for Marine only stations. The costs for operation of WCC provide the best source of such data as is explained below.

Financial model of cost/revenue factors for a viable PCRT station. To compare the financial viability of those PCRT stations which survive a realignment and closure program, it is desirable to have a financial model of station costs and related revenues. From the financial data provided in the Docket 19544, this is not easy to do. First, many anomalies exist in the data. For example, ITT allocated costs are high relative to the industry and allegedly include costs from other operations which are not contributory to PCRT station operations. Similarly, the salary and benefit costs quoted for Maritime at RCA's station KPH, which is a combined Maritime and Point-to-Point Station, are high (since FY69) when compared with these items for WCC which is exclusively Marine.

The procedure employed in this study to obtain estimates for the major financial factors which enter into the operations of a PCRT station include the following steps:

(1) A review of all submissions to the Docket 19544;

(2) A determination of normal operating factors for Marine operations;

(3) A separating out of anomalies in the financial statements, due to burdens from non-marine, and

(4) An estimation of percentages for operating ratios which would be typical for PCRT stations under new station alignments or combinations.

The operation of WCC was used as a primary guide for obtaining operating ratios for a typical large maritime station for the following reasons:

(1) WCC facility is dedicated to PCRT.

(2) Volume is high and representative of volume expected for the combinations to be considered in alternative realignments.

(3) WCC is a profitable operation.

(4) WCC provides reasonably good service to its customers.

The operating ratios of other stations were used to adjust the WCC figures upward to make allowances for differences in station size and other related characteristics such as revenue, staffing, equipment quality, etc.

The financial factors and operating ratios which are considered appropriate for modeling of alternate station configurations are as follows:

Factor 1: operating costs. Using WCC as a basis, approximately 60 percent of revenue, for stations having revenues of one million or more, is the operating ratio used for direct costs in this report. If a surviving station has a revenue below one million dollars, then this operating ratio is scaled upward linearly to 70 percent of expected revenue for a station having one-half million in revenue. The 70 percent figure is obtained from the operations of KFS and KPH with adjustments made for anomalies in KPH's salary costs. Typical operating cost ratios are given below (based on 1972 figures):

RCA Station WCC: Operating Costs=56% Revenue.

Total For All RCA Stations: Operating Costs=73% Revenue.

ITT Station WSL: Operating Costs=66% Revenue.

Total For All ITT Stations: Operating Costs=72% Revenue.

Factor 2: allocated expenses. An estimate of allocated expenses for RCA stations has been derived from the allocated expenses reported in the summary P&L statement for all of RCA's stations. This operating ratio, which includes marine administration and G&A, is 17 percent of Revenue (1972). The RCA operating ratio for allocated expenses is the ratio used in the financial model employed in section IV. The allocated expenses derived from ITT data were considered but not used since they contained allocations which were taken under a non-FCC approved allocation manual. They are not considered representative for the type of PCRT station operations considered in the model. A comparison of typical ranges of allocated expenses for RCA and ITT as reported in 1971 is as follows:

RCA Station WCC: Allocated Costs=14% Revenue.

RCA Station KPH: Allocated Costs=17% Revenue.

RCA Station—Total Allocated Costs=17% Revenue.

Each ITT Station Allocated Costs=54% Revenue.

Factor 3: net book value. This factor is estimated directly from the net land, building and equipment values provided by the carriers. The Net Book value for the combined operations of stations is obtained by apportioning, on the basis of the revenue to be transferred to the surviving station, the value of the land, building and equipment needed to operate the surviving station at the resulting revenue level. There is no representative Net Book operating ratio (factor) which will serve all stations. Hence, this factor must be obtained specifically for each station and each combination of stations considered.

Factor 4: rate base. The rate base for the PCRT stations is the sum of the net book value (investment), one percent of Net Book value (to cover the cost of materials and supplies normally kept on hand), and twelve and one-half percent of Operating Costs (to cover an average of forty-five day operating expenses which the station must carry prior to receipt of revenues).

Factor 5: taxes and return on rate base. Assuming a 52 percent tax rate on profits and a return of 8.5 percent of the rate base, the return before taxes should be:

$$\text{Return on Rate Base (before taxes)} = \frac{0.085}{0.480}\text{Rate Base.}$$

Return on Rate Base (before taxes) = 17.7 Rate Base. A return, before taxes, equal to 18 percent of the rate base is assumed.

Factor 6: revenue requirement. The five factors described above enter into the determination of a sixth factor, the Revenue Requirement. This is the revenue a station must achieve to cover all costs and make a return of 8½ percent on its investment in the operations and facilities producing the revenue. This factor is the sum of the Operating Costs, Allocated Expenses and the Return on the Rate Base.

The six principal operating ratios for PCRT stations are summarized below:

Operating Costs=60% to 70% of Revenue.

Allocated Expenses=17% of Revenue.

Net Book Value=Land, Building and equipment value at each station. No fixed factor applicable.

Rate Base=Sum of net book value, one percent of net book value and 12½% of operating costs.

Return on Rate Base=18% of rate base.

Revenue Requirement=Sum of Operating Costs, Allocated Expenses, and Return on Rate Base.

The six operating ratios described provide a basis for structuring an estimated financial statement for any alternative PCRT station configuration. For example, Table 9 shows the results of estimating the cost/revenue relationship for West Coast station operations if KFS (ITT station at San Francisco) were closed and resulting traffic redistributed among the remaining stations. KPH (RCA San Francisco), KOK (ITT Los Angeles), and KLB (ITT Seattle) would be the remaining stations. It is assumed that 75 percent of the traffic handled by KFS will be handled by KPH after the closure. KOK (ITT) and KLB (ITT) will handle 15 percent and 10 percent respectively. With these percentages operative, the estimated revenue and operating ratios are summarized in Table 9.

The effect of restructuring the West Coast Stations in the manner described above can be illustrated by the improvement that would be realized at KPH. The financial statement for the enhanced operations at KPH indicates a revenue requirement of $958,000 to provide a rate of return of 8.5 percent on the investment in the operation. The excess revenue for the enhanced operations is $129,000 compared to an $18,900 debit shown for existing operations in Table 1. The excess revenue could be applied to improvement of equipment, facilities, and/or services.

TABLE 9.—*Proposed alternative combination public coast stations financial data*

[In thousands of dollars]

Account name	Operating ratio basis	Station combination (docket)		
		KPH and 75 percent revenue from KFS	KLB and 10 percent revenue from KFS	KOK and 15 percent revenue from KFS
Station revenue		$1,150	$163	$375
Operating costs	60 percent revenue: KPH, 70 percent revenue: KLB, 70 percent revenue: KOK.	690	114	263
Allocated costs	17 percent revenue	196	28	64
Net book value	100 percent KFS to KPH	311	45	103
Rate base	101 percent net book plus 12½ percent operating costs.	400	60	137
Gross return	18 percent rate base	72	11	25
Revenue requirement		958	153	340
Excess (deficit) revenue		192	10	15

The effect of investing a portion of the estimated excess in revenue from the enhanced operation of KPH can be seen from the following example in which it is assumed that $500,000 is invested in a station improvement program.

Assume a $500,000 station improvement program that has a 20 year depreciation schedule. For the first year, $25,000 will be assigned to depreciation charges under operating costs and Net Book value will be increased by $475,000. The financial statement listed in Table 9 is modified to reflect these changes and is repeated below:

	Thousands of dollars
Resulting Revenue	1150
Operating Costs	715
Allocated Costs	196
Net Book Value	786
Rate Base	883
Gross Return	159
Revenue Requirement	1070
Excess Revenue	80

From this example it may be concluded that the enhanced KPH could stand an investment of $500,000 and still meet a rate of return requirement of (8.5 percent) with an excess in revenue of $80,000.

The preceding example illustrates how the factors described in this Section may be used for financial analyses of alternate station configurations. These factors and this procedure for analyses are used to evaluate specific alternatives considered in section IV.

C. *Operations—present.* Coastal radiotelegraph stations have been providing radio service to and from ships for many years using Morse code. The dependence upon the manual transmission of ship-shore and shore-ship message traffic is a contributing factor to the problems confronting the PCRT industry today. This type of operation, at its best, is a slow, tedious process requiring that the message from the ship operator be received and transcribed by the station operator and then manually prepared for delivery to the addressee. Delivery to the addressee may involve transmission over a landline network provided by the carrier to a message center or direct delivery from the PCRT stations using Western Union, TELEX, or Telephone. There are some cases where the message is placed upon a terminal equipment provided by the customer at the PCRT station.

The present method of operation of coastal telegraph traffic is dependent upon the proficiencies of the radio operators at both ends of the circuit and the effectiveness of the procedures used for message handling on shore. In the opposite direction—that of delivering messages to ships, there are additional factors. Of major importance is the problem of contacting a vessel without undue delay. The proficiency of the ships radio operator, the condition of shipboard equipment, the location of the ship in relation to the shore station, radio propagation and interference from other stations on the circuit, are all factors that effect the efficiency of message handling on the radio circuit. The information submitted by the carriers in response to Docket 19544 indicates that a coastal station operator can handle an average of eight messages per hour and the average speed of transmission is twelve words per minute. However, only 3 to 4 messages per hour are currently being handled at the larger coastal station.

All coastal station message traffic received by landline from its customers is filed at the coastal station until the next period for the transmission of the traffic list occurs. This list, which is transmitted every two hours in accordance with international regulations, contains the call signs arranged in alphabetical order of all ships for which the coastal station has traffic. At the conclusion of the transmission, the various ship calling channels in each band are scanned by the shore operator for response from the called ship stations. Calls relating to messages originating from aboard ship are also received through use of this scanning procedure. Since a vessel may use any one of several calling channels, the system requires that the coastal stations scan through a band of calling frequencies to select calls for them from individual ships. The present method of using traffic lists and the requirement for scanning of the ship calling frequencies are the major reasons, according to the radio operators, for dissatisfaction with establishment of contact and delivery of messages to and from ships at sea.

The carriers report three phases in the handling of traffic which introduce delay in the receipt, transmission and delivery of messages from coastal stations to ships at sea. Messages originating on shore for ships at sea and delivered by TWX, TELEX, or Telephone from a land point to a coastal station for transmission normally reach the coast station immediately or within an hour of origination. Those sent from a land point to a coast station by Western Union meet with an average delay in handling of several hours to a maximum delay of a few days.

The second delay is the time elapsed between receipt of the message at a coast station and its first transmission on the traffic list. This normally is less than the two hour interval between transmission of traffic lists. The average delay is less than an hour. On the other hand the first listing of a message in a traffic list occasionally gets no response from the ship. The period between traffic lists then increases the delay an additional two hours for each traffic list that is missed by a ship station operator.

The third delay is the time elapsed from the receipt of a call on a traffic list to the actual reception of the message by the ship's station. This time delay has two components. The first component is the time it takes the ship's station to establish contact with the coast station that has its message. This delay normally runs less than one hour if the ship operator carefully monitors the working channel of the shore station holding the traffic. However, the delay is dependent upon the availability of the coastal station. If the coastal station is handling traffic, it will not be receptive to a call from a ship. The second component delay is the time required for the shore station operator to send the message after receiving the ship's call. This too depends upon traffic conditions at the shore station and can involve a queing up procedure if traffic is backed up.

In summary, there are delays in practice that result from a failure of the operator to hear a call on the first traffic list and then in clearing traffic with the shore station. These delays are affected by many factors including the fact that a shipboard operator is on duty only eight hours of the day. Thus, on the average, it takes anywhere from fifteen minutes to many hours to make contact and exchange traffic. Total delays of several days have been noted. For example, station KFS (ITT) reports a maximum delay of fifteen days. Some exceptional cases at WSL required several weeks.

Messages originating at the ship's station for delivery to shore meet with two delays. The first delay results from the fact that the radio operator is on watch for only eight hours a day. When on watch, the radio operator will attempt to make radio contact within a few minutes of receipt of a message and continues his attempts until contact with the shore station is made. In this regard, he meets with the same delays as those described above. However, the delays may be accentuated since the shore station is not expecting the call.

Very little delay is introduced in the handling of messages by shore stations when special landline procedures for delivery are specified by the customer. This is the general case for regular customers, in which case ship messages received by shore stations are dispatched over landline to their destinations within an average time of twenty minutes. However, stations such as WCC (RCA) have noted delays of several days in cases where delivery instructions have not been specified. This class of message is normally assigned to Western Union for delivery.

Improvement in the techniques and procedures for establishing contact between coast station and vessel and in delivery of messages by radio is essential if there is to be significant improvement in service. Good methods of achieving improved service would increase the productivity of manpower and expand the capabilities of existing operators.

A serious technical problem facing the PCRT carriers is that of conforming to the technical standards prescribed in the FCC's decision in Docket No. 18577 for coastal stations. (Scheduled to be effective on January 1, 1973). These have the purpose of providing improved emission characteristics. They are prescribed by the FCC to reduce interference. All of the carriers are presently operating non-conforming equipment on the basis of waivers. Most of the equipments now in service range in age from 20 to 30 years. The transmitters have been modified many times. Replacement parts are becoming more difficult to obtain. Some equipments have been modified to substitute a new circuitry and components since replacements are not available.

V 39 154 MAR 19 74 XUM

Specifically, the transmitting equipments have been improved in the areas of frequency stability and spurious emission. Station operators state that most of the equipment either meets or can be modified to meet the technical standards for point-to-point equipment defined in Part 23 of the International Regulations. However, further improvement to meet the standards prescribed for coastal telegraph equipment in Docket 18577 will require a completely new engineering approach or new equipment.

In the opinion of the carriers such modification and improvement alone will not increase the efficiency of the operation of the public coast stations. They claim that replacement would entail an expenditure of approximately one million dollars for a station such as WCC or WSL. This is the figure for replacement with new equipment, and presumably involves the use of equipment that has additional operational features as well as technical improvement. Since it is desirable to incorporate certain new features in replacement equipment, the cost of such additional features should be attributed to the overall improvements in operations as well as to the technical requirements imposed by the FCC Docket.

Another area of concern that affects financial viability is the trend, discussed in section I, towards increased use of private shore stations by vessel operators. Private (Limited) Coastal Telephone stations are already in operation. Requests exist for licensing of Private Coastal Telegraph Stations. There is a serious question as to the desirability of permitting the operation of such stations and also a related question as to the advisability of effecting a deregulation of the services rendered by public coast stations. The common carriers generally agree with the statement by ITT, which states; "deregulation of the services rendered by radiotelegraph coastal stations would not, in our view assure any service improvements". They are also concerned that "authorizations for limited marine radiotelegraph coast stations could be expected to destroy the traffic base for common carrier coast stations, and would probably result in higher rates for the remaining customers of the general common carriers"; relative to satellites they feel that "pending further development of low-cost satellite or other facilities to serve ships at sea (each carrier) believes that service to and from ships can best be met by the radiotelegraph and marine telex services, or, where specialized services are required, through negotiations between interested carriers and customers".

The next section is an overview of the PCRT industry taking account of the status of operations and requirements discussed herein. It sets forth certain suggestions for improvement of operations and leads to an analysis of alternative system configurations carried out in section IV.

SECTION III

OVERVIEW—CONSIDERATIONS RELATING TO IMPROVEMENTS

A. *Improved viability is realizable—programmed improvements are warranted.* It is clear that the operations of the coastal telegraph service has been at a status quo for many years. While some exploration of teleprinter operation has been made, this has been on a limited operation basis—and has not had the benefit of a coordinated industry approach. There has been no industry coordinated approach to improvement in telegraph operations.

The recognition of a status quo situation is clearly indicated by the filings in response to the FCC Inquiry. In fact the shipboard operators claim a deterioration in service due to attrition in shore-based operating personnel. The carriers are not satisfied with the lack of response by the FCC to their requests to close stations. They claim that they operate on a marginal or loss basis. Some vessel operators would like to see new service offerings. They, like their operators, claim that the coast stations are poorly and/or inadequately manned.

The comments to the FCC, the observations by ATS of existing operations and its evaluation of the cost/revenue data presented by the carriers are indicative of an industry that is weary and sluggish. This is not to say that those who are responsible for maritime telegraph operations want this to be the situation nor to agree that it needs to continue. However, one should recognize that the condition does exist. There is evidence that the status quo will continue unless there is a coordinated program for improvement.

The specific actions that stimulated the FCC to sponsor an analysis of coastal telegraph operations are the requests for closure of several stations. The carriers claim that the subject stations are unnecessary and unprofitable. The FCC has recognized that these requests for closure are symptomatic of more serious problems—including the very basic and important question of industry viability—and the ability of the telegraph industry to effectively meet the needs of the maritime industry it serves.

ATS feels that the closure of one or more stations will not of itself serve the public interest. However, there is good reason to feel that the public interest can be served if such closure or closures are made a part of a positive program to improve both industry viability and service to the public. It is this latter question that must be examined and evaluated before there can be a proper basis for decision on the closure question.

Just as the FCC cannot reasonably decide the closure question without examining that question in the context of related improvements to the system as a whole, so also is it difficult or impossible for individual users, carriers or operators to justify or accomplish improvements unless the improvements are planned in consort with other interested parties.

The problem of coordinating improvements to coastal telegraph operations is complicated enough when one considers national interests alone. It is further complicated by the fact that this service is an international service. While other countries must face the same operational and technical problems as those faced by U.S. companies, the question of financial viability is quite different. In general, other maritime nations use stations that are operated or subsidized by the government—whereas U.S. companies are privately owned and operated. This is an important difference that explains why other countries can more easily maintain a service that is "begging" for financial relief in this country. This distinction between a government and a private enterprise mode of operation has led some to suggest that the U.S. should consider the conversion of the maritime telegraph system from a private enterprise operation to a public operation.

There are many factors that contribute to the complexity of the present coastal telegraph situation. These fall into two closely related categories, those that relate to operational matters and those that relate to financial mattera.

Operationally:

(1) The Coastal Telegraph service is highly dependent upon manual operation.

(2) It is inherently difficult to introduce system improvements into the maritime mobile service.

(3) The principal efforts toward improvement in maritime communications contemplate the use of techniques that are different from manual telegraphy.

(4) There will be a continuing need for manual telegraphy into the foreseeable future even though other forms of communication are made available.

(5) The collection and delivery of coastal telegraph messages involves practices that are not clearly covered in tariffs or regulations.

Financially:

(6) The cost of labor is increasing faster than revenue from telegraph traffic.

(7) Technological improvements required by national and international regulations necessitate substantial investments to continue existing manual telegraph service.

(8) Technological improvements to provide other modes of communication will require substantial investments in Coast Station and Shipboard equipment.

(9) Government support is being provided to finance the development of improvements that relate to selective calling, printer communications, and all modes of communications via satellite.

(10) No government support is provided for financing the development of an improved coastal telegraph system.

(11) There is growing competition from non-regulated operators who offer other services to the exclusion of manual telegraphy.

(12) The international point-to-point carriers treat coastal telegraphy as a service that must share the cost of radio sites and facilities with the point-to-point service. The allocation of costs for such facilities reflects an increasing burden on maritime that stems from a substantially reduced use of the facilities for point-to-point. Of significance, the reduced use of radio sites is caused by a shift of point-to-point operations to cable and satellite—not to a reduction in revenue from this service.

(13) There is no adequate basis for evaluating the costs and revenues associated with the use of non-radio facilities for collection and distribution of messages.

It is essential to a proper evaluation of the viability of the coastal telegraph service that the cost of its operation be separated out from the cost attributable to other services that share the same facilities. This is particularly true with respect to the sharing of radio facilities with the point-to-point service. There is good reason to conclude that the coastal telegraph service is being burdened with costs that result from its sharing of facilities that were built to serve the international fixed service. There is need for a careful examination of the allocation procedures used when the sharing of plant facilities involves sharing with a service that is retiring its use of the shared plant facilities and shifting revenue-providing operations from the use of those facilities to the use of substitute facilities that are non-radio and non-sharing.

There is also a need for evaluating the procedures used for allocating costs and revenues associated with the collection and delivery of messages when Western Union is not involved, and when Western Union is involved. There is also an important need for determining what the involvement of Western Union should be under present day requirements, and whether the present practices relative to the use of Western Union are either proper or in the public interest. There is a need for the establishment of regulations and/or tariffs that prescribe clearly the collection and delivery services that are available for handling coastal telegraph messages—and the cost of such service.

The problems cited above with respect to the use of financial data provided by the various carriers are complicated by the fact that the carriers have not used uniform procedures for reporting cost/revenue relationships.

It is the existence of these problems that led ATS to adopt the modelling technique described in section II for analyzing station costs for Maritime only operations. The modelling procedures are used in section IV to provide a common basis for evaluating alternative schemes for improving viability through closure and restructuring of station configurations.

The remainder of this section discusses certain improvements in operating procedures that are considered desirable in any restructured system.

B. *Improvements needed in message handling.* From an operational viewpoint, it appears that the practice, which prevails among all carriers, of excluding Western Union from the collection and delivery function has the purpose and the effect of expediting the handling of messages between customer and carriers. This conclusion is supported by the fact that many regular customers have standing instructions that request the carrier to make direct contact by some other means. Also terminal equipment is available at coastal telegraph stations to facilitate delivery by TWX, TELEX, carrier operated landline and/or by telephone.

It is significant that the collection and delivery of messages over carrier operated landlines involves a sharing of facilities that are designed for the highest degree of economy in transmission and message handling. The networks are automated. Printer and tape are used over these networks—not manual telegraphy. Computers replace people in handling and routing of messages. There can be no doubt that this use of modern technology makes it operationally and financially beneficial for carriers to prefer this method of handling collection and delivery. It is reasonable to conclude that the revenue derived from the allocation of a message charge on a per word basis ($.07) can and does provide an adequate rate of return for this service. However, the present accounting practices for the coastal telegraph service do not provide sufficient data to evaluate fully the cost/revenue relationship for this service.

Since much of the outgoing traffic arriving at Coastal Telegraph Stations arrives by printer, there is good reason to question why such traffic should not be sent over radio circuits by automatic tape conversion to morse code. This would eliminate the need for a completely manual operation and would lend itself to the use of transmission speeds that are optimum for circuit quality existing at the time of transmission. The use of tape and standardized speeds of transmission would also make feasible the use of automatic means for identification of call signs or other distinctive means of identification.

Similarly, the use of tape aboard ship would facilitate the transmission and reception of incoming messages, and the automatic handling of such messages.

An improved terminal at the coastal station would permit the receiving operator to type, edit, and cut-tape automatically so as to facilitate immediate dispatch of a message as soon as it is received. The use of conventional modern Cathode Ray Tube (CRT) terminals would permit the radio operator to exploit this mode of operation, thus eliminating the need for retyping of messages once received.

The introduction of improvements such as are suggested above involves a requirement for time and money. More important, it requires agreement among the interested parties. Those who serve and those who are served must cooperate in the improvement program. The suggestions which have been made above relate to the use of telegraphy, and do not necessarily require any regulatory changes. The U.S. carriers and U.S. vessel operators could realize these improvements by agreement alone, and without upsetting the accomplishment of traffic on a regular basis.

Since a substantial portion (about 50 percent) of traffic handled by U.S. carriers is with U.S. vessels, a program for improvement in handling of such traffic should be worth investigating. Presumably an improvement that serves the U.S. better would have sufficient attraction to encourage other countries to make similar provision.

Perhaps the most serious need that exists for improvement in present practice relates to the establishment of contact between coastal station and vessel. For handling traffic in either direction the burden is on the vessel to initiate a call when it is ready to handle traffic with a particular coast station. The burden is on the station to hear that call. The call should be made at a time when the coast station is prepared to handle traffic—as indicated by its transmission of a signal to that effect on its working channel or channels. The call should and generally is made by the vessel operator on one of several ship calling channels in the same portion of the spectrum as a working channel that can be clearly heard by the vessel operator. The vessel operator can determine the best band by monitoring the transmissions being made by coast stations, and choosing that band (and that station) which has the best signal.

One of the difficulties experienced in establishing contact results from the fact that a shipboard operator may choose any one of several specific calling channels (frequencies) within each calling band. The vessel selects the one it wants to use and the coast station must scan the entire band to detect those calls that are being made to it. Under this practice a vessel must continue to call for a period that is long enough to permit the desired coast station to hear it during its scanning process. If the coast station gets a call from a different vessel first, it may discontinue its scan for other calls. Thus the vessel that fails to get through on its first attempt must try again, repeating this procedure until contact is made.

C. Substantial improvement can derive from networking of an implemented system. The above procedure for making contact is complicated by the fact that vessels often call a particular station rather than the station that has the best circuit and best circuit availability at the time. This is despite the fact that the cost for the message under present regulations and coastal telegraph tariffs is not affected by routing. The message charge is the same irrespective of station used or location of contact within the U.S. The concept of a flat rate is based upon the use of Western Union for collection and delivery. The carriers do not use Western Union if a customer prefers other means of contact, such as TWX, TELEX, or other specified means. Thus in practice there may be a differential that occurs as a result of the use of special customer instructions and willingness to pay. This will vary depending upon the customer instructions and agreement as to the handling of messages by different stations—or by different carriers.

The best utilization of coastal telegraph stations and radio channels would occur if a message could be routed to utilize whatever channel and station is available with adequate quality when a vessel is ready to handle traffic. For ship originated traffic this would require only that the vessel operator select the most appropriate station and channel, provided it could be assured that the coastal station would route the message to its destination for delivery effectively, expeditiously, and at no extra cost. For coastal station originated traffic this would require that a vessel have the option of taking traffic from the station that transmits its call on its traffic list or if that station is busy to request another station to obtain and handle its message. For this procedure to work, it would be necessary that there be a means for any station to obtain and transmit traffic for any vessel that requests such traffic. It would be necessary that there be a landline network connecting stations and a system of centralized message store facilities. This practice would work best if all stations could have access to a common message store and if traffic lists were sent on a common "traffic list" channel (at least for each geographic area). The traffic list could be correlated alphabetically so that a vessel operator would be alerted to listen for its place in the list. Arrangement could be made for identification of a particular station as having first priority for handling the traffic. Only if the station holding the traffic is busy and cannot be reached would the vessel ask another station to retrieve and send its traffic. Other alternatives for use of a common traffic list channel(s) can be conceived. For example—a station may first list traffic designated for it (by message center or customer) to handle, thus treating this as its priority traffic. Following such listing of priority traffic, it might then broadcast traffic referred to it as available for delivery by any station. The system could prescribe that traffic not delivered within four hours be so designated. In this way, the users would be served in a manner that encourages fast delivery, using routine handling, with system back-up for traffic that experiences delays.

The problem of establishing contact between ship and shore is so critical as to justify special channels, special procedures, and/or special equipment. International plans are being made to facilitate the implementation of teleprinters. Special provisions are also required for improvement in the handling of telegraph traffic. Delays in receipt of calls aboard ship would be substantially reduced if the common traffic list channel, suggested above were assigned exclusively for this purpose plus the broadcast of important notices to mariners. Each station sharing a channel could have a time allotted to it. With such a procedure, vessels could listen on a single channel in each band and hear all calls from all stations. The traffic lists could be repeated continually and updated from the common message store facility using computer and modern data processing techniques. Selective-calling could employ the same channel when procedures for automatic calling are implemented.

Improved procedures for establishing contact should include improved practices relative to coast station monitoring of the calling bands. For example, it would seem reasonable as a minimum for a station to indicate on its working channel the particular channel that it is presently monitoring for calls and to continue to identify the channel as it searches across the calling band. WLO at Mobile has used this technique with much success. A vessel could establish contact immediately on hearing its call on the traffic list. Since its traffic would be available in central store, it could make its call first to the station having priority for handling the traffic. If it is unsuccessful, then it can call any station that indicates it is available for handling traffic. The present practice of searching all station working channels for calls would be eliminated.

It is felt that the development of improved procedures should consider the designation of certain (very few) ship-to-shore frequencies for calling only and others for working.

V 39 N 54 MAR 19 74 XUM

The procedure would involve the establishment of contact by a vessel on a calling channel—and a shift by it to a working channel for handling of traffic. The coast station should keep track of the traffic on ship-to-shore channels and designate one that is most appropriate for use at a given time. In this way it should be extremely simple to establish contact—traffic could be spread over working channels at the discretion of coastal stations. Conflict between the use of a channel for calling and working would be eliminated.

With a suitable landline network that interconnects message centers with stations and port areas on the Gulf, the East Coast and the West Coast, there would be no need for locating coastal telegraph radio stations at various centers of shipping activity so long as there is radio coverage of vessels in those areas and landline service to such centers of activity. That service should be at least as good as is provided today—and preferably better. It should ideally include a means for local coverage via radio telegraph and VHF data and voice. MF/HF radiotelephone should not be overlooked as an alternative means for contact. If VHF coverage is used, it should be on a wide-area coverage basis using channels that are dedicated to a wide-area service. Contact should be available through and with the same operations center that handles telegraph. Provisions should be available for patching a radio circuit into the public network by remote control from the area control center. This anticipates the time when the same center that provides telegraph service would also provide operator handling of service to vessels using printer, voice, or data over radiotelephone circuits. Ideally this common center would be the location of marine operators who would serve all the needs of vessels—at least of commercial vessels. Vessels should have available the services of a facility that is operated by persons that are skilled in serving all of the communication needs of vessel operators by whatever modes of transmission there are available to serve a particular need.

In summary what is suggested in this report is the establishment of a network of coastal telegraph stations with two degrees of centralized control. There would be a central control for each area, Gulf, East Coast, and West Coast. These would be tied together into a national network that ties together the maritime stations and the maritime public.

Each area communication center (message control center) would be the clearing house for exchange of calls between areas. The area centers and the national center would provide for collection and delivery of messages domestically by whatever means is best suited to the customers needs—and for interchange of messages among carriers for forwarding over international circuits. Intra-carrier exchanges of marine and international point-to-point traffic would be handled directly by the carrier unless it chooses to use the national message center for such exchange.

The present configuration of stations operated by the three major carriers lends itself to a division of responsibility and control that it quite attractive from a system planner's viewpoint. For example, the stations in the Gulf could be consolidated through a control center at TRT station WNU. This is the location of a major message center for international point-to-point traffic. TRT and WLO might be encouraged to form a consortium in which WLO would provide for operation of a combined system of facilities for voice and telegraph on MH, HF, VHF. TRT could provide a communication control center that utilizes a landline network for serving maritime centers in the Gulf area including Florida. It could be the means for tying coastal stations in this area into the message center at New Orleans and thence to maritime control centers for the East Coast and West Coast.

For the West Coast, it makes sense to encourage ITT and RCA to install new transmitting and receiving equipment at the sites now occupied by RCA. This would permit ITT to shut down its sites and make more effective use of the RCA sites. It would also permit RCA and ITT to compete for operations on the East and West Coasts. Since each of these companies has a landline system across the country—it would be reasonable to combine East and West Coast operations of each at its main message center in New York. Responsibility for the West Coast traffic should nonetheless be assigned to one company—ITT, and for the East Coast to a different company—RCA. Thus the two company centers in New York would continue to be used—a tie-in between these centers would be facilitated and result in improvements for both. The two area centers in New York and the one in New Orleans with their interconnecting landlines would comprise a common network. ITT, RCA and TRT would each be responsible for message control for one of three Coasts, and for serving the public in designated areas of the country.

The above concept would permit the three carriers to provide an international service—including store and forward—with full responsibility for service between vessels and shore locations. The principal benefit that would derive from the concept established above is an integrated maritime communications network that would require a sharing of responsibilities as connecting carriers while fostering competition for service over the radio channels. Full advantage could be derived from the use of efficient and effective means for handling both radio and landline portions of the service.

It should be recognized that the network described above revolves around the use of existing landline facilities that have been highly developed by ITT, RCA, and TRT for internal company handling of point-to-point and maritime traffic. What is suggested amounts to a recognition of the benefits that now derive from the use of such facilities to serve both types of operations, and an extension of this service to provide further benefits.

Section IV

Industry Profiles—Alternative Station Configurations

A. *Three alternative station reconfigurations.* This section analyzes three alternate configurations of PCRT stations as follows:

Alternate 1 assumes the closure of stations for which applications are presently on file; no other change in practices or procedures.

Alternate 2 assumes that ITT, RCA, and TRT each maintain their major stations on the East Coast, West Coast and Gulf—but reduce the coverage of the major carriers to one station in Florida and to one station in Texas. The independents, WMH at Baltimore, WLO at Mobile and WPD at Tampa will continue to compete against the three major carriers.

Alternate 3 assumes that the three major carriers reduce their operations to only their major stations on the East Coast, West Coast, and Gulf—and that the independents at Baltimore, Tampa and Mobile provide expanded coverage. This is the same as alternative 2 except that the major carriers would cease operations in Florida and Texas—thus placing the independents in a better position to compete for coverage in these areas.

For analysis purposes comparisons are made as though realignment of stations is carried out with no change in practices relating to use of landlines for receipt and delivery of messages. It is considered appropriate to separate out the problem of revenue from landline usage and to assume that the proposed common network can be supported from such revenue. This conclusion is based upon the data provided by ITT on its revenue from landlines. Using that data to estimate revenue for RCA and TRT, it is estimated that the present traffic handled by the PCRT carriers provides a landline revenue total in the order of $1.5 million on one million messages. This amounts to an average of $1.50 per message which is considered more than adequate to cover the costs of landline message that average 20–25 words. Thus, this portion of the service should be quite viable and add to any improvement in viability that derives from a restructuring of coastal stations.

The following comparisons also do not take account of any improvement in efficiency that should result from introduction of new equipment or improvements in operations.

B. *Traffic patterns under the alternatives.* It is assumed for purposes of analysis that any realignment of stations would require that the total message traffic currently handled by existing stations would still be handled by the realigned complement of stations (Great Lakes excluded). The restructuring of traffic for each alternative is shown in Figures 4, 5, and 6.

Traffic growth patterns by coastal areas indicate only a small percentage increase for the next few years. Unless improved services are provided the marine industry by the PCRT stations, one can expect this trend to continue until other modes and means for providing marine communications attract traffic away from the PCRT stations. Thus, it is assumed for this comparative analysis that the industry can expect to be handling slightly over a million messages a year for the next few years. This does not take into account increases due to new types of traffic that might be generated from the introduction of radiotelephone, printers or data. It is considered that the opportunities for expansion in these areas from within the PCRT system will follow—or at least be contingent upon—the establishment of a viable PCRT structure. This viability should obtain from an improvement in the effectiveness for handling telegraph traffic and thus provide a basis for further improvement through the offering of new services.

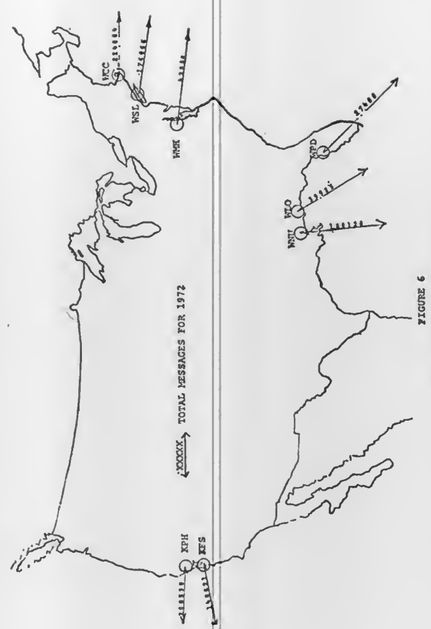

FIGURE 6
THIRD ALTERNATIVE TRAFFIC MODEL

C. *Cost/revenue considerations.* Under present industry operations the 18 PCRT stations compete for marine revenue which amounts to approximately $5,000,000. This revenue figure includes the landline revenue of ITT but not that of RCA and TRT. The latter amounts are estimated to total an additional $700,000. The column labelled "present" in Tables 10, 11, and 12 gives the breakdown in revenues, by stations, for the three coastal areas. The revenues by station are restated in columns labelled 1, 2 and 3 for the alternatives 1, 2 and 3 to be considered. The Florida stations WOE and WAX, although located on the Atlantic Coast, are considered in the Tables as Gulf Coast stations since the majority of their traffic is in the Gulf, Caribean, and South American Areas. For alternative 2 it is considered that the redistribution of traffic will tend to be among the remaining stations of the three major carriers—whereas under alternative 3 there will be a substantial increase in traffic carried by the independents at Baltimore, Tampa, and Mobile.

Realignment of revenues after closures. Included in Tables 10, 11, and 12 under separate columns are the revenues, by stations, which result from the closure of stations and the reassignment of their traffic to the remaining stations on a rational basis. It is assumed that the majority of revenue from a closed station will be gained by other stations within the same coastal area. Under alternative 2 the tendency would be for vessels to favor continued use of the three major carriers—whereas under alternative 3 there would be more opportunity for the independents to develop competition with the major carriers. WLO Mobile in particular would have a better environment in which to develop its concept of total communications services. Under all alternatives, the closure of WSC (Tuckerton) would have the effect of expanding the operations of WAH (Baltimore) as the principal station for the port of Baltimore and Philadelphia.

Results of station and revenue realignment —alternative 1. Tables 13, 14, and 15 give for alternative 1 the financial data resulting if all stations requesting closure, as reported in FCC Docket 19544, are allowed to close. The Tables show how the revenues for the closed stations were reallocated to the remaining stations.

Estimated changes in Net Book values are also included in the Tables. The resulting realignment of the stations for the three Coast regions, Atlantic, Gulf and Pacific is contained in Tables 13, 14, and 15, respectively.

The numbers entered in the three Tables result from applying the operating ratios and factors determined in the financial model described in section II. The model assumes that the surviving stations will be managed with operations dedicated to marine telegraph or other modes of marine communications.

Findings—alternative 1. 1. From Tables 13, 14, and 15, it is evident that the remaining stations, after closure of the six requesting closure, will provide adequate traffic coverage for all coasts. The ports at which stations have been closed will receive MF/HF coverage from other stations which would remain in service. Traffic at stations remaining after realignment according to alternative 1 is illustrated in figure 4. It is assumed that as a condition for closure of major carrier stations in Florida there will be a requirement for assurance from these carriers that traffic terminating in the Florida area will be served adequately from remaining stations through the provision of an effective landline communications network.

2. The financial viability of the remaining major stations and carriers is materially improved. No statement can be made relative to WLO, WPD and the Great Lakes stations WLC and WBL due to the lack of financial data on these operations. As the volume figures indicate, the revenue at these four stations presently represents a very small percentage of the total.

TABLE 13.—*First alternative combination Atlantic coast stations, financial data*

[In thousands of dollars]

Account name	Station combinations Chatham, WCC	Long Island, WSL	Tuckerton, WSC	Conditions on combinations
Station revenue	$1,089	$970	$190	WMH revenue is allocated: 50 percent to WSC, 50 percent to WSL.
Operating costs	652	582	133	
Allocated costs	185	164	32	
Net book value	233	760	40	All unused radio equipment at remaining stations written off books.
Rate base	317	940	56	
Gross return	91	151	10	Net book values of remaining stations are not changed.
Revenue requirement	873	897	175	
Excess (deficit) revenue	189	73	15	

TABLE 14.—*First alternative combination gulf coast stations, financial data*

[In thousands of dollars]

Account name	Station combinations New Orleans, WNU	Mobile, WLO	Tampa, WPD	Port Arthur, WPA	Conditions on combinations
Station revenue	$497	$68	$29	$411	WAX revenue is allocated 100 percent WNU.
Operating costs	348	(1)	(1)	288	
Allocated costs	85	(1)	(1)	70	WOE revenue is allocated 100 percent WPA.
Net book value	52	(1)	(1)	86	KLC revenue is allocated: 40
Rate base	96	(1)	(1)	123	percent to WPA, 10 percent to
Gross return	17	(1)	(1)	22	WPD, 30 percent to WNU, 20
Revenue requirement	450	(1)	(1)	380	percent to WLO.
Excess (deficit) revenue	47	(1)	(1)	31	Net book value increased: 100 percent at WNU, 150 percent at WPA.

[1] Insufficient data provided.

TABLE 15.—*First alternative combination Pacific coast stations, financial data*

[In thousands of dollars]

Account name	Station combinations San Francisco, KPH	Seattle, KLB	Los Angeles, KOK	Conditions on combinations
Station revenue	$1,153	$163	$375	KFS revenue is allocated: 75 percent to KPH, 10 percent to KLB, 15 percent to KOK.
Operating costs	690	114	263	
Allocated costs	196	28	64	
Net book value	311	45	103	
Rate base	400	60	137	100 percent net book value increase at KPH.
Gross return	72	11	25	
Revenue requirement	988	153	360	No change at KLB and KOK.
Excess (deficit) revenue	192	10	15	

3. Revenue in excess of that required for an adequate return on investment would be available for improvements in facilities, equipment and operations at all remaining major carrier stations.

4. The Net Book value at WSL is high relative to comparable size stations but does not significantly affect the operating results for WSL.

Results of station and revenue realignment —alternative 2. Tables 16, 17, and 18 summarize the financial statements of stations remaining after certain closures under alternative 2. Alternative 2 is suggested as a means to accomplish the following: (1) Retain at least a two company competition on the three coasts with a minimum of major stations remaining in operation, (2) provide coverage from at least one major carrier station location in Florida, and in Texas, (3) have the retained stations operate at higher traffic levels to effect economies resulting from increased revenue and (4) encourage cooperation in providing better service through an effective network connecting the smaller number of remaining stations.

The Tables include the conditions used in reallocating revenue from the closed stations to the remaining stations. The Net Book values of remaining stations are increased in proportion to the amount of increased traffic handled. It is assumed that these stations will expand as appropriate to operate at the higher traffic levels.

Station revenue	$760	$970	KLB and KOK combined revenue allocated: 50 percent to KFS, 50 percent to KPH.
Operating costs	494	582	
Allocated costs	129	155	Net book value increased 70 percent for both KFS and KPH.
Net book value	288	260	
Rate base	353	336	
Gross return	64	60	
Revenue requirement	687	797	
Excess (deficit) revenue	73	173	

Findings—alternative 2. 1. Tables 16, 17, and 18 show ten stations of the PCRT carriers remaining after closure of WSF (New York), KLB (Seattle), KOK (Los Angeles), WSC (Tuckerton), WAX (Hialeah), and WPA (Port Arthur). Traffic, at the remaining stations, after realignment according to alternative 2, is illustrated in figure 5.

It would be necessary to compensate for the loss of local connections to stations KLB (Seattle) and KOK (Los Angeles) by providing landline connections from these locations to the common system network that serves the remaining coastal stations at San Francisco. In this manner these locations would be connected to the message (communications) center serving the West Coast, making the entire coastal station structure available to these cities. Also, it is anticipated that the future will see an increased use of radiotelephony (either MF or VHF) which are available locally at both Seattle and Los Angeles.

All other maritime areas presently provided with coverage from a local station, Baltimore (WMH) would pick up substantial traffic from the closure of Tuckerton (WSC).

2. The financial viability of the remaining stations and carriers is improved in alternative 2 over the present situation but the improvement is not as good as for alternative 1. This is primarily due to the continued operation of major carrier stations in Texas and Florida. The financial condition of independent stations at Mobile (WLO) and Tampa (WPD) might be improved, but competition from the major carriers to these stations would continue to be substantial.

3. As stated in alternative 1, revenue in excess of that required for an adequate return on investment would be available to the major carriers. Use of this revenue to improve operations, equipment and facilities should be a condition imposed by the FCC for its acceptance of this alternative.

4. The moderate increases in traffic resulting at WNU (New Orleans), WOE (Lantana) and KLC (Arcadia) should not require a considerable increase in investment at these stations. These stations should be able to handle the additional traffic with their present physical plant or with a modest plant improvement program.

Results of station and revenue realignment—alternative 3. Tables 19, 20, and 21 summarize the financial statements of stations remaining after certain closures under

alternative 3. Alternative 3 is suggested as a means to accomplish the following:

(1) Retain only the principal stations of the three major carriers

(2) Provide an environment for expansion of operations by independents who wish to compete by remaining open. These are WLO (Mobile), WPD (Tampa), and WMH (Baltimore)

(3) Provide for the use of landline facilities of carriers as a means for establishing a common carrier maritime network that treats all coast station operations as connecting carriers in an integrated system. The system rather than individual stations or carriers would be the interface between ship and shore.

Alternative 3 differs from alternative 2 primarily in the reliance placed upon the independents to supplement major station coverage of the three major carriers. Of particular significance, it would encourage WLO to enhance its involvement in Coastal Telegraph and more important, it would permit WLO through its participation to provide for radiotelephone and radioprinter services as services integral to the common maritime network.

TABLE 19.—*Third alternative combination Atlantic coast stations, financial data*

[In thousands of dollars]

Account name	Station combinations: Chatham, WCC	Long Island, WSL	Baltimore, WMH	Conditions on combinations
Station revenue	$1,087	$970	$190	WSC revenue allocated: 25 percent to WSL, 75 percent to WMH.
Operating costs	652	582	(1)	
Allocated costs	185	164	(1)	WSF—no revenue.
Net book value	233	760	(1)	
Rate base	317	840	(1)	
Gross return	61	151	(1)	
Revenue requirement	573	897	(1)

[In thousands of dollars]

Account name	Station combinations: New Orleans, WNU	Mobile, WLO	Tampa, WPD	Conditions on combinations
Station revenue	752	152	100	WPA revenue allocated: 90 percent to WNU, 10 percent to WLO.
Operating costs	451	(1)	(1)	KLC revenue allocated: 90 percent to WNU, 10 percent to WLO.
Allocated costs	128	(1)	(1)	
Net book value	78	(1)	(1)	WAX and WOE revenue allocated: 60 percent to WNU, 20 percent to WLO, 20 percent to WPD.
Rate base	125	(1)	(1)	
Gross return	23	(1)	(1)	
Revenue requirement	602	(1)	(1)	Net book of WNU increased: 200 percent.
Excess (deficit) revenue	150	(1)	(1)	

[1] Insufficient data provided.

TABLE 21.—*Third alternative combination Pacific coast stations, financial data*

[In thousands of dollars]

Account name	Station combinations: San Francisco, KFS	San Francisco, KPH	Conditions on combinations
Station revenue	760	970	KLB and KOK combined revenue allocated: 50 percent to KFS, 50 percent TO KPH.
Operating costs	494	582	
Allocated costs	129	155	
Net book value	288	260	Net book value increased 70 percent for both KFS and KPH.
Rate base	353	336	
Gross return	64	60	
Revenue requirement	687	797	
Excess (deficit) revenue	73	173	

The three tables for the three coastal areas show the basis under which the revenue for the closed stations are reallocated to the stations remaining in operation. Net Book values of remaining stations are increased in proportions to the amount of increased traffic handled. Significant changes in revenue accruing to small stations on the Gulf Coast have been made in alternative 3 relative to alternative 2. The changes in financial data, as given in Tables 19, 20, and 21 will be significant. Excess revenue for WNU (New Orleans), WLO (Mobile), and WPD (Tampa) will be substantially increased for this alignment of Gulf Coast stations. The alternative cuts the number of stations remaining to eight from the ten remaining in alternative 2 thus yielding a further reduction of two stations.

Findings—alternative 3. 1. The station selection and distribution for alternative 3 insures that eight stations which remain after closure of all other coastal stations provides adequate coverage of all three coasts in spite of a loss of local stations at Seattle, Los Angeles, Houston, and Hialeah. As suggested under Alternative 2 these areas must be served through effective use of the proposed landline network.

2. Alternative 3 differs from alternative 2 only in that ITT and RCA would have no stations in the Gulf-Florida Area. TRT (WNU) and the independents (WMH, WLO, and WPD) should benefit from the realignment. The differences in revenue at these three stations, while small relative to the industry, are significant relative to their current revenues.

3. The financial viability of the alternative 3 alignment of stations is improved over that achieved in alternative 2. Thus, revenue in excess of that required for an adequate return on investment is available to the carriers. Use of this excess revenue (approximately $700,000) to improve operations, equipment and facilities is indicated. Increases in traffic at the smaller stations may require increases in investment in physical plant in order to handle the increased traffic. Capital derived from excess revenue should be sufficient to support the financing of such investment programs.

Comparison of alternatives. 1. The three alternatives to future alignments of the PCRT industry which are described above serve only as a guide to what can be done with the industry to improve its financial viability while providing more than adequate service.

2. The alternatives consider one PCRT industry structure which reflects the cloeures requested by the industry (alternative 1) and two structures considered reasonable from the point of view of financial viability, healthy competition, and adequate service.

3. The financial viability of the Gulf Coast stations is the main economic problem in the three alternatives. The larger number of stations competing for the lower levels of traffic in the Gulf area relative to the other two coast areas, results in marginal operations at the smallest stations.

4. Alternatives 2 and 3 have the greatest potential for providing the services desired by the users of PCRT services.

5. Alternative 2 provides minimal relief for stations on the Gulf and includes two stations one in Florida and one in Texas which the major carriers would like to close.

6. Alternative 3 yields the best financial structure for the industry.

7. An important need for any PCRT industry structure is a control network consisting of three control stations, one for each coast. The principal functions of the control centers are described in detail in section III. Basically, the control network will arrange for the reception and delivery of ship-to-shore traffic in the most expeditious manner. Shore-to-ship traffic will also be distributed to shore stations for delivery in a manner which will insure prompt and reliable service to the recipients at sea.

APPENDIX B

Twenty Marine Radiotelegraph Public and Limited Coast Stations are listed below. The stations are identified by area, call sign, location, and licensee. Included are two stations who have applications with the FCC for permits to construct new stations, and six stations who have applications for station closure pending with the FCC.

NOTICE OF GRANTING OF RELIEF

Notice is hereby given that pursuant to 18 U.S.C., section 925(c), the following named persons have been granted relief from disabilities imposed by Federal laws with respect to the acquisition, transfer, receipt, shipment, or possession of firearms incurred by reason of their convictions of crimes punishable by imprisonment for a term exceeding one year.

It has been established to my satisfaction that the circumstances regarding the convictions and each applicant's record and reputation are such that the applicants will not be likely to act in a manner dangerous to public safety, and that the granting of the relief will not be contrary to the public interest.

Ball, John Phillip, 4760 South Whitnal Avenue, Cudahy, Wisconsin, convicted on June 25, 1970, in the Circuit Court, Outagamie County, Wisconsin.

Beck, Elvis Ray, 5331 Quartz Road, Rockford, Illinois, convicted on August 12, 1964, in the Riverside County Superior Court, California.

Borchert, Michael D., Lot 64 Jackson Heights Tr. Ct., Shakopee, Minnesota, convicted on October 7, 1963, in the St. Croix County Court, St. Croix, Wisconsin, and on October 23, 1967, in the District Court, Second Judicial District, Ramsey County, Minnesota.

Clark, Jr., John W., R.D. 2, Frog Hollow Road, Painted Post, New York, convicted on September 26, 1950, in the Steuben County Court, New York.

Curtiss, Jr., Paul K., Route 1—Hidden Valley Road, Savage, Minnesota, convicted on May 22, 1961, in the Superior Court of the State of California in and for the County of San Diego.

Darkow, Larry A., 504th Military Police Co., Ft. Eustis, Virginia, convicted on August 11, 1963, in the Hennepin County District Court, Minneapolis, Minnesota.

Hicks, Charles E., Rt. 3, Box 300, Mineral, Virginia, convicted on January 28, 1972, in the Henrico County Circuit Court, Virginia.

Hunt, Ernest, Box 10, Kimper, Kentucky, convicted on May 9, 1941, in the Pike County Circuit Court, Kentucky.

Kaplan, Gary L., 902 East Clay, O'Neill, Nebraska, convicted on September 26, 1967, in the District Court of Holt County, Nebraska.

Klatt, Gary L., 5117 Bernard Avenue, North, Crystal, Minnesota, convicted on July 8, 1969, in the Circuit Court, Third Judicial Circuit, Clark County, South Dakota.

McClendon, Eddie F., 141 Valencia, El Paso, Texas, convicted on June 2, 1949, and January 14, 1950, in the District Court of Hale County, Texas, and on November 19, 1949, in the District Court of Randall County, Texas.

Madewell, Lon E., 8643 North Nebraska Avenue, Tampa, Florida, convicted on August 31, 1964, and on May 10, 1965, in the Criminal Court of Record, Hillsborough County, Florida.

Paetz, Richard C., 6845 Sonia Drive East, Tacoma, Washington, convicted on December 2, 1952, in the Superior Court, Pierce County, Washington.

Phillips, Mercer E., 1205 Aaron Court, Chesapeake, Virginia, convicted on June 13, 1963, in the Court of Hustings, Portsmouth, Virginia.

Reeves, Robert, 124 West 108th Place, Chicago, Illinois, convicted on or about October 16, 1933, in the Cuyahoga County Criminal Court, Ohio.

Schwabenbauer, Stephen M., R.D. 1, Box 69, Shippenville, Pennsylvania, convicted on October 12, 1972, in the Court of Common Pleas, Clarion, Pennsylvania.

Sherman, August R., 225 W. 16th Street, Maryville, Missouri, convicted on September 27, 1970, in the United States District Court, Western District of Missouri.

Stereiff, Dean L., Box 782, Pine Island, Minnesota, convicted on November 13, 1968, in the First Judicial District Court, Red Wing, Minnesota.

Valentine, Peter C., 113 East 17th Street, Olympia, Washington, convicted on July 27, 1970, Superior Court, Thurston County, Washington.

Wheat, James A., 12300 Valley Wood Drive, Wheaton, Maryland, convicted on December 23, 1964, in the Peoples Court, Montgomery County, Maryland.

Signed at Washington, D.C., this 8th day of March, 1974.

REX D. DAVIS,
Director, Bureau of Alcohol, Tobacco and Firearms.

SHIPPERS ADVISORY COMMITTEE

Postponement of Public Meeting

The meeting of the Shippers Advisory Committee established under Marketing Order No. 905 (7 CFR Part 905) originally scheduled for March 19, 1974, in the auditorium of the Florida Citrus Mutual Building, 302 South Massachusetts Avenue, Lakeland, Florida, at 10:30 a.m., local time, is postponed until March 27, 1974, and will be held in the Conference Room of the Florida Citrus Mutual Building at 10:30 a.m., local time. This notice is issued pursuant to the provisions of section 10(a)(2) of Public Law 92-463. Marketing Order No. 905 regulates the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida and is effective pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674). The need for postponement of the meeting of the Shippers Advisory Committee results from recent changes in the demand situation for citrus fruits produced in Florida.

The meeting will be open to the public and a brief period will be set aside for public comments and questions. The agenda of the committee includes the receipt and review of market supply and demand information incidental to consideration of the need for modification of current grade and size limitations applicable to domestic and export shipments of the named fruits.

The names of committee members, agenda, summary of the meeting and other information pertaining to the meeting may be obtained from Frank D. Trovillion, Manager, Growers Administrative Committee, P.O. Box R, Lakeland, Florida 33802; telephone 813-682-3103.

Dated: March 15, 1974.

JOHN C. BLUM,
Deputy Administrator, Regulatory Programs.

Forest Service

COOPERATIVE SPRUCE BUDWORM SUPPRESSION 1974 PROJECT

Notice of Availability of Draft Environmental Statement

Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a draft environmental statement for suppression of the spruce budworm in Minnesota in 1974. Forest Service Report Number USDA-FS-NA-DES(Adm.)-2.

The environmental statement concerns a proposed cooperative aerial spray project on approximately 3,500 acres of forest lands within Finland State Forest, in Lake County, Minnesota to prevent or minimize tree mortality and reduce high spruce budworm populations until the mature timber can be harvested. To accomplish these objectives, the insecticide mexacarbate (Zectran®) will be applied by aircraft. The impacts, both beneficial and adverse, available alternative actions, and the purposes and objectives of the cooperative spruce budworm suppression program are discussed in detail.

This draft environmental statement was filed with CEQ on March 12, 1974.

Copies are available for inspection during regular working hours at the following locations:

U.S.D.A., Forest Service
South Agriculture Bldg., Room 3230
12th St. & Independence Ave. SW.
Washington, D.C. 20250

U.S.D.A., Forest Service
Northeastern Area
State and Private Forestry
6816 Market Street, Room 207
Upper Darby, Pennsylvania 19082

A limited number of single copies are available upon request to:

Robert D. Raisch, Area Director
Northeastern Area
State and Private Forestry
6816 Market Street
Upper Darby, Pennsylvania 19082

Copies are also available from the National Technical Information Service, U.S. Department of Commerce, Springfield, Virginia 22151. Please refer to the name and number of the environmental statement above when ordering.

Copies of the environmental statement have been sent to various Federal, state and local agencies as outlined in the CEQ guidelines.

Comments are invited from the public, and from state and local agencies which are authorized to develop and enforce environmental standards, and from Federal agenices having jurisdiction by law or special expertise with respect to any environmental impact involved for which comments have not been requested specifically.

Comments concerning the proposed action and requests for additional information should be addressed to Robert D. Raisch, U.S. Forest Service, Northeastern Area, State and Private Forestry, 6816 Market Street, Upper Darby, PA 19082. Telephone 215/597-3760. Comments must be received by April 26, 1974 in order to be considered in preparation of the final environmental statement.

Dated March 7, 1974.

PHILIP L. ARCHIBALD,
Acting Director, Northeastern Area Statc and Private Forestry.

[FR Doc.74-6229 Filed 3-18-74;8:45 am]

ENTERPRISE PLANNING UNIT

Notice of Availability of Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a draft environmental statement for Enterprise Planning Unit, Dixie National Forest, Utah. The Forest Service report number is USDA-FS-DES (Adm) R4-74-3.

The environmental statement identifies and evaluates the probable effects of the Land Use Plan for the Enterprise Planning Unit on the Dixie National Forest in Utah. The purpose of the plan is to allocate National Forest lands within the unit to specific resource uses and activities; establish management objectives; document management direction, decisions, and necessary coordination between resource uses and activities; and provide for the protection, use, and development of the various resources within the planning unit. The plan provides for minimization of adverse effects and maximization of desirable effects.

This draft environmental statement was transmitted to CEQ on March 8, 1974.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service
South Agriculture Bldg., Room 3230
12th St. & Independence Ave., SW.
Washington, D.C. 20250

Regional Planning Office
USDA, Forest Service
Federal Building, Room 2025
324-25th Street
Ogden, Utah 84401

Forest Supervisor
Dixie National Forest
500 South Main
Cedar City, Utah 84720

District Forest Ranger
Pine Valley Ranger District
Federal Building
St. George, Utah 84770

A limited number of single copies are available upon request to Forest Supervisor Merlin I. Bishop, Dixie National Forest, 500 South Main, Cedar City, Utah 84720.

Copies are also available from the National Technical Information Service, U.S. Department of Commerce, Springfield, Virginia 22151. Please refer to the name and number of the environmental statement above when ordering.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ Guidelines.

Comments are invited from the public, and from State and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact involved for which comments have not been requested specifically.

Comments concerning the proposed action and requests for additional information should be addressed to Forest Supervisor, Dixie National Forest, 500 South Main, Cedar City, Utah 84720. Comments must be received by May 29, 1974, in order to be considered in the preparation of the final environmental statement.

Dated: March 8, 1974.

P. M. REES,
Acting Regional Forester.

[FR Doc.74-6301 Filed 3-18-74;8:45 am]

[1352-4]

UMATILLA NATIONAL FOREST GRAZING ADVISORY BOARD

Notice of Meeting

The Umatilla National Forest Grazing Advisory Board will meet at 1 p.m. at the Forest Supervisor's Office April 8, 1974.

The purpose of this meeting is to discuss permittee involvement and responsibility in planning and administration efforts on Forest Service allotments, and to explore long-range management objectives and goals. The Board will examine Regional commensurability standards and discuss whether there is a need to expand on these standards for the Umatilla National Forest.

The committee has established the following rules for public participation: A time period will be set up for the public to participate and time limits may be set on individual public participation.

Dated: March 11, 1974.

HERBERT B. RUDOLPH,
Forest Supervisor.

DEPARTMENT OF COMMERCE

Domestic and International Business Administration

FORDHAM UNIVERSITY

Notice of Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (37 FR 3892 et seq).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 74-00028-98-77065. Applicant: Fordham University, Physics Department, Bronx, New York 10458. Article: Mossbauer Spectrometer, Model AME-30. Manufacturer: Elscint, Ltd., Irsael. Intended use of article: The article will be used to study the magnetic fields, electric field gradients, isomer shifts, curie temperatures, and phase transitions of materials containing iron, tin, and other Mossbauer isotopes by means of high resolution Mossbauer transmission and scattering experiments.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article provides a velocity capability of at least 20 centimeters per second (cm/s). The most closely comparable domestic instrument is the Mossbauer spectrometer manufactured by Austin Science Associates. This domestic instrument does not provide velocities above the order of 5 cm/s. The National Bureau of Standards (NBS) advised in its memorandum dated February 19, 1974 that a velocity capability of at least 20 cm/s is pertinent to the purposes for which the article is intended to be used. NBS also advised that it knows of no domestic instrument of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

A. H. STUART,
Director,
Special Import Programs Division.

MILLARD FILLMORE HOSPITAL

Notice of Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. Law 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (37 FR 3892 et seq.).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 74-00188-33-90000. Applicant: Millard Fillmore Hospital, 3 Gates Circle, Buffalo, New York 14209. Article: Computerized Axial Tomography System (EMI-Scanner). Manufacturer: EMI Limited, United Kingdom. Intended Use of Article: The article is intended to be used for diagnosis of brain tumors, cerebral hemorrhages, subdural hematomas and traumatic injuries to the brain. Research will be conducted to develop the capability of the article to diagnose different types of tumors of all sizes in all areas of the central nervous system and to compare results with conventional techniques. Stroke patients will be evaluated with the equipment to develop improved diagnosis and prognostic capability through serial studies. Investigation will be conducted as to the capability of the article to identify the plaques in multiple sclerosis patients. The article will also be used to evaluate the role of hyper osmolar treatment of subdural hematomas and for the study of patients who have already undergone stereotaxi surgery for Parkinsonism.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, was being manufactured in the United States at the time the article was ordered (June 14, 1973).

Reasons: The foreign article is a newly developed system which is designed to provide precise transverse axial x-ray tomography. We find that the speed and accuracy of the article are pertinent to the applicant's use in neurological studies and in teaching wherein the article's potential is to be assessed through evaluations of patients with tumors, stroke, plaques of multiple sclerosis and those having undergone stereotaxic surgery. The Department of Health, Education, and Welfare (HEW) advised in its memorandum dated February 8, 1974 that it knows of no domestic instrument of equivalent scientific value to the article for the applicant's intended uses which was available at the time the article was ordered.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which was being manufactured in the United States at the time the article was ordered.

A. H. STUART,
Director,
Special Import Programs Division.

NATIONAL INSTITUTES OF HEALTH

Notice of Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (37 FR 3892 et seq.).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 73-00035-33-90000. Applicant: National Institutes of Health, Bethesda, Md. 20014. Article: X-ray diffraction equipment, Model GX6. Manufacturer: Elliott Automation Radar Systems, United Kingdom. Intended use of Article: The article is intended to be used to investigate filament spacings and crossbridge configurations in muscle cells to discover the mechanism of muscular contraction.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article provides an X-ray micro source with a power level of one kilowatt. The most closely comparable domestic instrument manufactured by Philips Electronic Instruments provides an X-ray micro source with a power level of 500 watts. The National Bureau of Standards (NBS) advised in its memorandum dated February 4, 1974 that the highest power level available is pertinent to the applicant's intended low angle scattering diffraction measurements of muscle tissue. NBS also advised that it knows of no domestic instrument of equivalent scientific value to the foreign article for the applicant's intended uses.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

A. H. STUART,
Director,
Special Import Programs Division.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

ST. LUKE'S HOSPITAL CENTER

Notice of Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural

V 39 154 MAR 1974 XUM

Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897) and the regulations issued thereunder as amended (37 FR 3892 et seq.).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 74–00187–33–43780. Applicant: St. Luke's Hospital Center, 114 Street & Amsterdam Avenue, New York, New York 10025. Article: Cannulating Duodenoscope. Manufacturer: Olympus Company, Japan. Intended Use of Article: The article is intended to be used for the following investigative purposes:

1. Visualization of the biliary duct—to evaluate its usefulness in the exclusion of extra-hepatic obstructive jaundice;
2. Visualization of the pancreatic ducts—to evaluate its usefulness in the exclusion of obstruction to pancreatic outflow;
3. Studies of the normal variation in biliary and pancreatic duct anatomy;
4. To evaluate whether collection of pancreatic secretions is useful in the diagnosis of pancreatic disease.

The article will also be used for the teaching of postgraduate Research Fellows of Columbia University in the advantages of duct cannulation.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The applicant's use of the article in teaching and study of hepatic and pancreatic structure and function will require a fiber optic device of small diameter and long length, that is guidable, flexible and has a means for collecting secretions underview. The Department of Health, Education, and Welfare (HEW) advised in its memorandum dated February 8, 1974 that the small diameter of the article (2 mm) is pertinent to the purposes for which the article is intended to be used. HEW also advises that it knows of no domestic instrument of equivalent scientific value to the foreign article for such purposes as this article is intended to be used. HEW cited as a precedent its prior recommendation relating to Docket Number 73–00510–33–02700 which conforms in certain particulars with this application.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

A. H. STUART,
Director,
Special Import Programs Division.

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897) and the regulations issued thereunder as amended (37 FR 3892 et seq.).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 74–00127–33–46040. Applicant: University of California, Davis Campus, Davis, California 95616. Article: Electron Microscope, Model EM 9S–2. Manufacturer: Carl Zeiss, West Germany. Intended Use of Article: The article is intended to be used for studies of insect tissues, plant and animal viruses and mycoplasma (in relation to the insects that transmit them) and viruses and other microorganisms affecting insects. The experiments to be undertaken are as follows:

(a) A morphological study of aphid symbiotes to determine their systematic status and physiological function.

(b) Study of the effect of plant virusfes, plant mycoplasma and insect pathogens on insect cells in a monolayer culture.

(c) Observation of certain plant viruses after purification procedure to determine the validity of the procedures.

(d) Study of insect mitochondria to observe the aging process on these organelles.

(e) Several projects involving the general observation of insect and mite ultrastructure.

The article will also be used for instructional purposes in the following courses:

A. Insect Morphology-Entomology 101.
B. Insect Physiology-Entomology 102.
C. Insect Vectors of Plant Pathogens-Entomology 125.
D. Medical Entomology-Entomology 153.
E. Electron Microscopy in Entomological Research-Entomology 298.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article for such purposes as this article is intended to be used, is being manufactured in the United States at the time the article was ordered (February 28, 1973).

Reasons: The applicant requires an electron microscope which is suitable for instruction in the basic principles of electron microscopy. The foreign article is a relatively simple, medium resolution electron microscope designed for confident use by beginning students with a minimum of detailed programming. The most closely comparable domestic instrument available at the time the article was ordered was the Model EMU–4C electron microscope which was formerly manufactured by the Forgflo Corporation and which is currently supplied by the Adam David Company. The Model EMU–4C electron microscope is a relatively complex instrument designed for research, which requires a skilled electron microscopist for its operation. We are advised by the Department of Health, Education, and Welfare (HEW) in its memorandum dated January 10, 1974 that the relative simplicity of design and ease of operation of the foreign article is pertinent to the applicant's educational purposes. We, therefore, find that the Model EMU–4C electron microscope is not of equivalent scientific value to the foreign article for such purposes as this article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which was being manufactured in the United States at the time the article was ordered.

A. H. STUART,
Director,
Special Import Programs Division.

UNIVERSITY OF CALIFORNIA—SAN FRANCISCO ET AL.

Notice of Applications for Duty-Free Entry of Scientific Articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651; 80 Stat. 897). Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Special Import Programs Division, Office of Import Programs, Washington, D.C. 20230, within 20 calendar days after the date on which this notice of application is published in the FEDERAL REGISTER.

Amended regulations issued under cited Act, as published in the February 24, 1972 issue of the FEDERAL REGISTER, prescribe the requirements applicable to comments.

A copy of each application is on file, and may be examined during ordinary Commerce Department business hours at the Special Import Programs Division, Department of Commerce, Washington, D.C. 20230.

Docket Number: 74–00319–33–90000. Applicant: University of California, San Francisco, 1438 South Tenth Street, Richmond, California 94804. Article: EMI Scanner System. Manufacturer: EMI Limited, United Kingdom. Intended Use of Article: The article is intended to be used to obtain cross sectional pictures of the brain using noninvasive techniques. Patients with suspected brain abnormalities will be studied with the article and the findings will be correlated with those of the standard neuroradiologic and isotopic diagnostic techniques. This technique will be of educational value in teaching the anatomical details of the normal and abnormal brains in the transaxial tomographic mode. Application Received by Commissioner of Customs: February 12, 1974.

Docket Number: 74–00320–85–43000. Applicant: Lamont-Doherty Geological Observatory of Columbia University, Palisades, New York 10964. Article: Magnetometer. Manufacturer: Digico Ltd., United Kingdom. Intended Use of Article: The article is intended to be used for the measurement of weakly magnetized rocks for paleomagnetic studies of general type in limestones, deep-sea sediments and lavas, and terrestrial rocks. Application Received by Commissioner of Customs: February 2, 1974.

Docket Number 74–00329–33–22400. Applicant: University of Rochester, School of Medicine and Dentistry, Division of Genetics, 260 Crittenden Blvd., Rochester, N.Y. 14642. Article: MSE 150 Watt Ultrasonic Disintegrator, PG–100 and Titanium Exponential Micro Probe, 34041. Manufacturer: Measuring & Scientific Equipment, United Kingdom. Intended Use of Article: The foreign article is to be used to reproducibly disrupt extremely small quantities of human white blood cells in order to determine inherited differences in PGM_3, a sensitive labile enzyme contained in such cells. Application Received by Commissioner of Customs: February 12, 1974.

Docket Number: 74–00305–33–46040. Applicant: Mount Sinai School of Medicine of the City University of New York, Fifth Avenue and 100th Street, New York, New York 10029. ARTICLE: Electron Microscope, Model JEM 100B. Manufacturer: JEOL Ltd., Japan. Intended Use of Article: The article is intended to be used in the following investigations:

1. A multifaceted approach concerning the differentiation, regulation of cell division and induction of cell proliferation; and an analysis of the interrelationship of these 3 processes.
2. A study of differentiation of epithelial cells in the mouse colon in normal animals and in experimental carcinogenesis and polypogenesis such as that induced by 1,2-dimethyl-hydrizine.
3. Comparison of the morphological aspects of development, growth, and repair of *striated muscle* of both normal and dystrophic mice, including precise measurements of microfilaments found in all cells of the myoblastic line.
4. The study of the hormonal control of spermatogenesis and particularly the roles of Sertoli cells and the "blood-testis barrier" in this process.
5. The study of a "Stertoli-only" tubule after partial dissociation.
6. The observation and interpretation of subtle alterations of the fibrillar and filamentous components of the neck, mid-piece and tail of the spermatozoa during maturation.
7. The determination of the role of (a) the tight junction between endothelial cells and (b) low frequency of pinocytotic vesicles in the "barrier" phenomenon (anatomical barriers to the movement of protein tracers from blood to cerebral parenchyma), and
8. The investigation of the possibility that connective tissue cells and smooth muscle cells are different modalities of the same type.

In addition, the article will be used for formal teaching to graduate students through "Advanced Study in Anatomy" courses and to medical students in "Basics of Electron Microscopy". These courses are intended to provide the student with a working knowledge of the principles and techniques employed in electron microscopy.

Application Received by Commissioner of Customs: January 24, 1974.

Docket Number: 74–00307–33–46040. Applicant: Lafayette College, Easton, Pa. 18042. Article: Electron Microscope, Model EM 201. Manufacturer: Philips Electronic Instruments, The Netherlands.

Intended Use of Article: The article is intended to be used in two major areas of research: host-parasite interrelationships and interactions; cytological effects of exposure to various agents, e.g., herbicides, in both animals and plants. Normal and pathological invertebrate tissues will be studied with particular emphasis upon developmental stages of parasites and upon the tissues of their host. Another area of study concerns the ultrastructural pathology of the gerbil testis and epididymis after administration of antifertility drugs. A botanical study concerns the fine structure of plant cell organelles treated with herbicides. The article will also be used for educational purposes in the following courses:

General physiology
Advanced Genetics
Microbiology
Biology of Vascular Plants
Parasitology
Developmental Biology
Independent Study
Thesis (Honors)

Application Received by Commissioner of Customs: January 21, 1974.

A. H. STUART,
Director,
Special Import Programs Division.

[FR Doc.74–6272 Filed 3–18–74;8:45 am]

UNIVERSITY OF MAINE

Notice of Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897) and the regulations issued thereunder as amended (37 FR 3892 et seq.).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 74–00158–33–46040. Applicant: University of Maine, Department of Zoology, Murray Hall, Orono, Maine 04473. Article: Electron Microscope, Model EM 201. Manufacturer: Philips Electronic Instruments NVD, The Netherlands. Intended Use of Article: The article is intended to be used for research in the following projects entitled:

(1) Study of chloroplast growth and inheritance, and control of cell division in *Euglena gracilis.*
(2) An ultrastructural and chemical evaluation of the effects of freezing on Atlantic Salmon Sperm,
(3) A comparative ultrastructural study of gamete morphology and fertilization in echinoderms,
(4) Influence of herbicides, chlorinated hydrocarbons, PCB's and growth rhythm phenomena on the fine structure of *Platymonas subcordiformis,*
(5) A fine structural investigation of growth and sexual maturation in gametophytes and young sporophytes of the bull kelp *Nereocystis cuetkeana* (Mertens) Postels and Ruprecht,
(6) Thin films Environmental Detector,
(7) Anatomy and fundamental properties of Maine Woods, and
(8) Electrical and optical properties of amorphous semiconductors.

In addition the article will be used in ten (10) courses at the University as a teaching tool or as a secondary teaching aid. Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, was being manufactured in the United States at the time the article was ordered (April 13, 1973).

Reasons: The foreign article is equipped with an eucentric goniometer stage (with 360° rotation and ±60° eucentric tilting plus heating and cooling capabilities). At the time the foreign article was ordered, the most closely comparable domestic instrument was the Model EMU–4C, formerly produced by Forgflo Corporation and currently supplied by Adam David Company. The Model EMU–4C provided only 30° of noneucentric tilt. The Department of Health, Education, and Welfare (HEW) advised in its memorandum dated January 31, 1974 that (1) the high degree of articulation of the article's goniometer stage is pertinent to the applicant's studies of a thin film environmental detector and properties of amorphous semoconductor and (2) the stages available in the EMU–4C did not match the articulation of the article's stage. HEW cited as a precedent its recommendation relating to Docket Number 73–00350–33–46040 which conforms in certain particulars with this application. For the foregoing reasons, we find that the EMU–4C is not of equivalent scientific value to the foreign article for such purposes as this article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article

V 39 54 MAR 19 74 XUM

is intended to be used, which was being manufactured in the United States at the time the article was ordered.

A. H. STUART,
Director,
Special Import Programs Division.

[FR Doc.74-6268 Filed 3-18-74;8:45 am]

UNIVERSITY OF MARYLAND

Notice of Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (37 FR 3892 et seq.).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 74-00190-75-77065. Applicant: University of Maryland, Baltimore County Campus, 5401 Wilkens Avenue, Baltimore, Maryland 21228. Article: Mossbauer Effect Analyser. Manufacturer: Elscint, Inc., Israel. Intended use of Article: The article is intended to be used in high resolution Mossbauer transmission and scattering experiments to study the dependence of hyperfine fields on external influences such as temperature surface condition and chemical environment.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: Rare-earth elements such as dysprosium emit gamma rays at frequencies that require velocities of source relative to absorber of the order of 20 centimeters/second (cm/s) and greater for study by Mossbauer analysis. The foreign article satisfies this requirement and permits the use of the Mossbauer technique with rare earth elements involving repetitive measurements at several hundred velocity points. The most closely comparable domestic instrument is the Mossbauer spectrometer manufactured by Austin Science Associates (Austin). The Austin spectrometer is not capable of velocities above the order of 5 cm/s, except possibly in the manual constant-velocity mode of operation. The manual constant-velocity mode is limited to measurements at only a relatively small number of velocities because not only is manual re-adjustment of the apparatus required for each velocity setting but long integration times are also required. We are advised by the National Bureau of Standards (NBS) in its memorandum dated February 19, 1974 that the ability to be used with rare earth elements and the velocity capability provided by the foreign article are pertinent to the applicant's intended purposes. We, therefore find that the Austin spectrometer is not of equivalent scientific value to the foreign article for such purposes as this article is intended to be used. NBS further advises that it knows of no instrument or apparatus of equivalent scientific value to the foreign article for such purposes as this article is intended to be used.

A. H. STUART,
Director,
Special Import Programs Division.

YALE-NEW HAVEN HOSPITAL

Notice of Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (37 FR 3892 et seq.).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 74-00221-33-00530. Applicant: Yale-New Haven Hospital, Inc., Department of Therapeutic Radiology, 789 Howard Avenue, New Haven, Conn. 06504. Article: Sagittaire Linear Electron Accelerator, Treatment Couch, Floor Elevator and Spare parts kit. Manufacturer: Thomson-CSF, France. Intended Use of Article: The article is intended to be used for a variety of radiotherapeutics, radiobiologic and radiological physics research projects. These will include the effects of tumor response of combined x-ray and electron beam therapy, and of different time-dose relations; the effect of ultra-high dose rates obtainable from the electron beam on tissue culture; optimization of x-ray target design; determination of high energy x-ray spectra; studies in electron beam dosimetry. The article will also be used in two courses namely, Therapeutic Radiology 101 and 102, which will involve medical students learning about radiation therapy and the operation and the of the article. The major role of the article in the teaching program will be accomplished through in-house training programs for technologists and residents in radiology, and other medical specialists.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article has an effective electron analyzer consisting of two bending magnets with slit and quadrupole magnetic slammer to provide a narrower range or maximum homogeneity of the electron or x-ray energy in the beam. The Department of Health, Education, and Welfare (HEW) advised in its memorandum dated February 2, 1974 that the comparable domestic instrument, the Clinac 35, does not provide an acceptably narrow range of electron or x-ray energy. HEW also advised that the maximum possible homogeniety of the energy beam is pertinent to the applicant's intended use as a source of high energy electron and x-ray beams for research and teaching programs in therapeutic radiology and radiobiology. For these reasons, we find that the Clinac 35 is not of equivalent scientific value to the foreign article for the purposes for which the article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

A. H. STUART,
Director,
Special Import Programs Division.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

National Oceanic and Atmospheric Administration

SKINS OF SOUTH AFRICAN CAPE FUR SEALS

Notice of Meeting and Preparation of an Environmental Impact Statement

The Marine Mammal Protection Act of 1972 authorizes and directs the Secretary of Commerce to waive the moratorium on the taking and importation of marine mammals and marine mammal products in accordance with the provisions of section 101(a)(3)(A) of the Act. The National Marine Fisheries Service has received two applications for the waiver of the moratorium so as to allow the importation of certain numbers of skins of South African fur seals for processing and sale in this country. The Service feels that the waiver of the moratorium for this purpose constitutes a major federal action the environmental impact of which is likely to be highly controversial within the meaning of § 1500.6 of the Council on Environmental Quality guidelines for the preparation of environmental impact statements (38 FR 20550, 20551, August 1, 1973). Therefore, the Service has determined to prepare an environmental impact statement to assist it in deciding whether the granting of waivers with regard to these two applications is environmentally sound; and to solicit comment from interested members of the public as to matters which should be considered in the preparation of such a statement.

Accordingly, a public meeting will be held for this purpose of soliciting comments at 9 a.m. on Monday, March 25, 1974, in the Penthouse Conference Room, Page 1 Building, 2001 Wisconsin Avenue, NW., Washington, D.C. Interested members of the public are invited to attend and to submit oral and/or written statements. Those who may wish only to submit written statements should address these to the Director, National Marine Fisheries Service, Washington, D.C. 20235, postmarked no later than March 25, 1974.

JACK W. GEHRINGER,
Acting Director, National Marine Fisheries Service.

MARCH 13, 1974.

CENSUS ADVISORY COMMITTEE ON AGRICULTURE STATISTICS

Notice of Public Meeting

The Census Advisory Committee on Agriculture Statistics will convene on March 28, 1974 at 9 a.m. The Committee will meet in Building 91, Bureau of the Census, 1201 East 10th Street, Jeffersonville, Indiana.

This Committee was established in 1962 to advise the Director, Bureau of the Census, concerning the kind of information that should be obtained from respondents; to prepare recommendations regarding the contents of reports and to present the views and needs for data of major agricultural organizations and their members.

The Committee is composed of 19 members appointed by the presidents of the non-profit organizations having representatives on the Committee, and two members from the U.S. Department of Agriculture.

The agenda for the meeting is: (1) Review of current Census Bureau activities, (2) Status of plans and operations for the 1974 Census of Agriculture, (3) Report on the Pretest for the Census, (4) Tour of the Jeffersonville facility, (5) Publicity program, (6) Publication proposals for the 1974 Census, and (7) Tabulation plans.

A limited number of seats—approximately 25—will be available to the public. A brief period will be set aside for public comment and questions. Extensive questions or statements must be submitted in writing to the Committee Guidance and Control Officer at least three days prior to the meeting.

Persons planning to attend and wishing additional information concerning this meeting should contact the Committee Guidance and Control Officer, Mr. J. Thomas Breen, Chief, Agriculture Division, Bureau of the Census, Room 2067, FB-3, Suitland, Maryland. (Mail address: Washington, D.C. 20233). Telephone 301-763-5230.

Dated: March 13, 1974.

EDWARD D. FAILOR,
Administrator, Social and Economic Statistics Administration.

List of Areas Designated for Practice as a Physician (M.D. or D.O.), Dentist, Optometrist, Pharmacist, Podiatrist, or Veterinarian; Correction

Federal Register Doc. 74-4336, published as a notice in the FEDERAL REGISTER of February 26, 1974 (39 FR 7446-7465), contained a list of areas designated under section 741(f) of the Public Health Service Act (42 U.S.C. 294a) for practice as a physician (M.D. or D.O.), dentist, optometrist, pharmacist, podiatrist, or veterinarian. Inadvertently, several areas were omitted from this list. Said notice is therefore amended as follows:

1. The following list of areas is inserted after the last entry under "Alabama" on page 7447:

*St. Clair
Shelby
*Sumter
Talladega
*Tallapaloosa
*Walker
*Washington
*Wilcox
*Winston

ALASKA

Aleutian Islands
Anchorage City
*Angoon
*Barrow
*Bethel
Bristol Bay *Borough*
*Bristol Bay

List of Areas Designated for Practice as a Physician (M.D. or D.O.), Dentist, Optometrist, Podiatrist, or Veterinarian

Correction

In FR Doc. 74-4336 appearing at page 7446 in the issue of Tuesday, February 26, 1974, the following changes should be made:

1. Under Physicians—Arkansas (page 7447, column 2), the entry reading "Chicot" should be marked with an asterisk.

2. Under Dentists—Colorado (page 7453, column 1), the entry "Conjoa" should read "Conjos".

3. Under Dentists—Nebraska (page 7454, column 3), the entry "City of Omaha—Census Trucks * * *" should

V 39 154 MAR 1974 XUM

read "City of Omaha—Census Tracks * * *"

4. Under Podiatrists—Louisiana (page 7461, column 3), the last entry, "York" should be transferred to appear as the last entry under Maine.

5. Under Podiatrists—Michigan (page 7461, column 3), the entry "Sanilao" should read "Sanilac".

6. Under Veterinarians—Connecticut, the fourth entry, reading "CHP Area—Meriden/Wallingford (Specific", should read "CHP Area—South Central (Specific Section)".

Office of Education

HEALTH AND NUTRITION PROGRAM

Notice of Closing Date for Receipt of Applications

Notice is hereby given that pursuant to the authority contained in section 808, Title VIII, of the Elementary and Secondary Education Act (20 U.S.C. 887a) applications are being accepted from local educational agencies and under exceptional circumstances from nonprofit educational organizations for grants for demonstration projects to improve school nutrition and health services for children from low-income families. Applications must be received by the U.S. Office of Education Application Control Center, Room 5673, Regional Office Building Three, 7th & D Streets, SW., Washington, D.C. 20202 (mailing address: U.S. Office of Education Application Control Center, 400 Maryland Avenue SW., Washington, D.C. 20202, Attention: 13.523), on or before April 24, 1974. A notice of closing date for applications for projects which were commenced under grant awards made in previous fiscal years is being published separately in the FEDERAL REGISTER.

The general fiscal and administrative provisions published in the FEDERAL REGISTER, 38 FR 30654, November 6, 1973, are applicable to these grants, and criteria for this program which have been published as part of the notice of proposed rulemaking (39 FR 10257) are proposed to be used in determining the selection and funding of grant awards. Due to time constraints, preapplications will not be invited for grants funded in FY 1974.

An application sent by mail will be considered to be received on time by the Application Control Center if:

(1) The application was sent by registered or certified mail not later than the fifth calendar day prior to the closing date (or if such fifth calendar day is a Saturday, Sunday, or Federal holiday, not later than the next following business day), as evidenced by the U.S. Postal Service postmark on the wrapper or envelope, or on the original receipt from the U.S. Postal Service; or

(2) The application is received on or before the closing date by either the Department of Health, Education, and Welfare, or the U.S. Office of Education mail rooms in Washington, D.C. (In establishing the date of receipt, the Commissioner will rely on the time-date stamp of such mail rooms or other documentary evidence of receipt maintained by the Department of Health, Education, and Welfare, or the U.S. Office of Education.)

Information and application forms may be obtained from the Office for Health and Nutrition Programs, 400 Maryland Avenue SW., Washington, D.C. 20202.

(20 U.S.C. 887a)

Dated: March 7, 1974.

JOHN OTTINA,
U.S. Commissioner of Education.

NATIONAL ADVISORY COUNCIL ON INDIAN EDUCATION

Notice of Meeting and Agenda

Notice is hereby given, pursuant to section 10(a)(2) of the Federal Advisory Committee Act (P.L. 92-463), that the next meeting of the National Advisory Council on Indian Education will be held on March 30 & 31, 1974, from 9 a.m. to 5 p.m., at Holiday Inn, 2020 Menaul Blvd., NE., Albuquerque, New Mexico.

The National Advisory Council on Indian Education is established under section 401 of the Indian Education Act (P.L. 92-318, Title IV). The Council is directed to:

Advise the Commissioner in the preparation of general regulations and with respect to policy matters arising in the administration of this title, including policies and procedures governing the approval of State plans under section 318 and policies to eliminate duplication, and to effectuate the coordination of programs under this title and other programs offering Indian Education activities and services.

The Council shall review the administration and effectiveness of programs under this title, make recommendations with respect thereto, and make annual reports to the President of its findings and recommendations (including recommendations for changes in this title and other federal laws relating to Indian Education activities and services). The President shall transmit each such report to the Congress together with his comments and recommendations.

The proposed agenda includes:

1. Planning for evaluation of program and projects carried out by the Department of Health, Education and Welfare in which Indian children or adults can participate.

2. Providing technical assistance to local educational agencies and to Indian educational agencies, institutions, and organizations to assist them in improving the education of Indian children.

Records shall be kept of all Council proceedings (and shall be available for public inspection at the Office of the National Advisory Council on Indian Education located at 425 13th St., NW., Rm. 326, Washington, D.C. 20004).

Signed at Washington, D.C. on March 12, 1974.

DWIGHT A. BILLEDEAUX,
Executive Director, National Advisory Council on Indian Education.

[FR Doc.74-6252 Filed 3-18-74;8:45 am]

NATIONAL ADVISORY COUNCIL ON INDIAN EDUCATION

Meeting of the Executive Committee

Notice is hereby given, pursuant to section 10(a)(2) of the Federal Advisory Committee Act (P.L. 92-463), that the next meeting of the National Advisory Council on Indian Education (Executive Committee) will be held on March 23 and 24, 1974, from 9 a.m. to 5 p.m., at St. Paul Hilton Hotel, Senate Suite, St. Paul, Minnesota.

The National Advisory Council on Indian Education is established under section 401 of the Indian Education Act (P.L. 92-318, Title IV). The Council is directed to:

Advise the Commissioner in the preparation of general regulations and with respect to policy matters arising in the administration of this title, including policies and procedures governing the approval of State plans under section 318 and policies to eliminate duplication, and to effectuate the coordination of programs under this title and other programs offering Indian Education activities and services.

The Council shall review the administration and effectiveness of programs under this title, make recommendations with respect thereto, and make annual reports to the President of its findings and recommendations (including recommendations for changes in this title and other Federal laws relating to Indian Education activities and services). The President shall transmit each such report to the Congress together with his comments and recommendations.

The proposed agenda includes:

A. Revision of 1974-1975 Budgets.

B. Reviewing and making recommendations for Part E Regulations.

C. Reviewing and planning for future Council business.

Records shall be kept of all Council proceedings (and shall be available for public inspection at the Office of the National Advisory Council on Indian Education located at 425 13th St., N.W., Rm. 326, Washington, D.C. 20004).

Signed at Washington, D.C. on March 12, 1974.

DWIGHT A. BILLEDEAUX,
Executive Director, National Advisory Council on Indian Education.

NATIONAL ADVISORY COUNCIL ON INDIAN EDUCATION

Meeting of Proposals, Rules and Regulations, and Evaluations Committee

Notice is hereby given, pursuant to section 10(a)(2) of the Federal Advisory Committee Act (P.L. 92-463), that the next meeting of the National Advisory Council on Indian Education (Proposals, Rules & Regulations and Evaluations Committee) will be held on March 28 & 29, 1974, from 9 a.m. to 5 p.m., at Hilton Hotel, 125 Copper, N.W., Albuquerque, New Mexico.

The National Advisory Council on Indian Education is established under section 401 of the Indian Education Act (P.L. 92-318, Title IV). The Council is directed to:

Advise the Commissioner in the preparation of general regulations and with respect to policy matters arising in the administration of this title, including policies and procedures governing the approval of State plans under section 318 and policies to eliminate duplication, and to effectuate the coordination of programs under this title and other programs offering Indian Education activities and services.

The Council shall review the administration and effectiveness of programs under this title, make recommendations with respect thereto, and make annual reports to the President of its findings and recommendations (including recommendations for changes in this title and other federal laws relating to Indian Education activities and services). The President shall transmit each such report to the Congress together with his comments and recommendations.

The proposed agenda includes:

1. Planning final logistics for Part A, and non-local educational agencies proposals.
2. Proposal review and recommendations.
3. Working on Title IV rules and regulations for fiscal year, 1975.

Records shall be kept of all Council proceedings (and shall be available for public inspection at the Office of the National Advisory Council on Indian Education, located at 425 13th St., NW., Rm. 326, Washington, D.C. 20004).

Signed at Washington, D.C. on March 12, 1974.

DWIGHT A. BILLEDEAUX,
Executive Director, National Advisory Council on Indian Education.

Social Security Administration

HOSPITAL COSTS UNDER THE HEALTH INSURANCE PROGRAM

Proposed Schedule of Limits

Notice is hereby given that a Schedule of Limits on Hospital Costs in the Medicare program for cost reporting periods beginning (1) on and after the effective date of final regulations implementing section 223 of P.L. 92-603, and (2) before January 1, 1975, is set forth in tentative form as proposed by the Commissioner of Social Security, with the approval of the Secretary of Health, Education, and Welfare. The proposed Schedule of Limits on Hospital Costs applies only to routine services. Section 1861(v)(1) of the Social Security Act as amended by section 223 (Limitations on Coverage of Costs Under Medicare) of P.L. 92-603 (the Social Security Amendments of 1972) permits the Secretary to set prospective limits on overall provider costs or provider costs for specific items or services based on estimates of the costs necessary in the efficient delivery of needed health services. A separate schedule of limits will be issued for skilled nursing facilities and home health agencies prior to the beginning of the cost reporting period to which such limits would be applied.

To provide adequate sized comparison bases and to permit reasonable comparisons between providers within a group, a classification system which takes into account hospital size and economic environment was developed. A provider's location in a Standard Metropolitan Statistical Area is used as a proxy for an urban location while providers not located in a Standard Metropolitan Statistical Area are considered nonurban. A Standard Metropolitan Statistical Area is defined as a county or group of contiguous counties which contains at least one city of 50,000 inhabitants, or "twin cities" with a combined population of at least 50,000. A complete list of Standard Metropolitan Statistical Areas can be found in the publication *Standard Metropolitan Statistical Areas: 1967* as revised, which is available from the United States Government Printing Office, Washington, D.C. 20402. These two overall classifications are each subdivided into five State groupings with the States classified according to per capital income as follows:

STATE GROUP I

Washington, D.C.	New Jersey
Connecticut	Hawaii
New York	Illinois
Alaska	California
Nevada	

STATE GROUP II

Massachusetts	Washington
Maryland	Ohio
Delaware	Rhode Island
Michigan	Pennsylvania

STATE GROUP III

Kansas	Oregon
Minnesota	Missouri
Indiana	New Hampshire
Colorado	Virginia
Wisconsin	Florida
Iowa	Arizona
Nebraska	

STATE GROUP IV

Texas	Maine
Vermont	Utah
Wyoming	Idaho
Montana	North Carolina
Georgia	South Dakota
Oklahoma	

STATE GROUP V

Louisiana	South Carolina
Kentucky	Alabama
Tennessee	Arkansas
New Mexico	Mississippi
North Dakota	Puerto Rico
West Virginia	

Providers in each of the five State groups have been divided between those located in SMSA's and those not in SMSA's. These 10 geographical classes have been further divided into 7 bed-size categories resulting in a total of 70 groups in the classification system.

Under the authority of section 1861(v) of the Social Security Act as amended by P.L. 92-603, the following Schedule of Limits on Hospital Costs for general routine services is proposed for cost reporting periods beginning on and after the effective date of final regulations implementing section 223 of P.L. 92-603, and before January 1, 1975. (These limits do not apply to the cost incurred for special care or ancillary services.) The schedule of limits will be revised and reissued annually.

SCHEDULE OF LIMITS ON HOSPITAL COSTS

HOSPITALS LOCATED WITHIN SMSA'S

The following dollar limitations on routine service costs for hospitals located in *Standard Metropolitan Statistical Areas*, are applicable to cost reporting periods beginning on and after the effective date of final regulations implementing section 223 of P.L. 92-603.

Adjustment for non-calendar year providers: Where a hospital has a cost reporting period beginning after January 1, 1974, the limit would be adjusted upward by 9/10th of one percent of the ceiling rate for each month of the reporting year ending in the succeeding calendar year. Adjustments for non-calendar year providers must be calculated in dollars and cents. (Example: $83 is the ceiling for Hospital A's class for 1974. Hospital A's year begins October 1 and ends September 30. For the year ending September 30, 1975, the ceiling would be $89.72, i.e., $83 plus 9 months @ 9/10th of one percent per month or 8.1 percent of $83.)

FUEL AND ELECTRICAL SYSTEMS PANEL, BOATING SAFETY ADVISORY COUNCIL

Notice of Meeting

A Technical Panel of the Boating Safety Advisory Council will hold its third meeting on Tuesday, March 26, 1974, in Room 4315, Buzzards Point Building, 2100 Second Street SW., Washington, D.C., beginning at 9 a.m.

The panel, as authorized by the Federal Boat Safety Act of 1971, was established to review proposed standards for fuel and electrical systems on recreational boats and to make technical recommendations to the Council. The panel will consist of both BSAC members and persons with expertise in the field. The meeting is open to the public.

Dated: March 13, 1974.

JOHN F. THOMPSON,
Rear Admiral, U.S. Coast Guard, Chief, Office of Boating Safety.

National Highway Traffic Safety Administration

[Docket No. EX 73–5; Notice 4]

INTERMECCANICA AUTOMOBILI

Petition for Temporary Exemption for Motor Vehicle Safety Standards

The National Highway Traffic Safety Administration has decided to grant Intermeccanica Automobili an exemption of its Indra model from four Federal motor vehicle safety standards, until January 1, 1977.

Notice of Intermeccanica's previous petition and its denial were published in the FEDERAL REGISTER on June 19, 1973 (38 FR 15989) and September 17, 1973 (38 FR 26014). The earlier petition was denied on the basis that insufficient information had been submitted for the agency to decide that compliance would cause the petitioner substantial economic hardship. Petitioner submitted no analysis of what it would cost to verify compliance with Standards Nos. 201, 212, and 301, nor did it provide information to support its belief in its compliance with these standards. Finally, the petition did not submit the chronological design history related to Standard No. 215 necessary to a determination whether it had in good faith attempted to comply with the standard.

In response to the denial Intermeccanica submitted information to supplement its original petition. A further notice was published on December 12, 1973 (38 FR 34222) and an opportunity provided for comment. No comments were received.

Information provided by the petitioner in support of its belief of compliance with Standard Nos. 201, 212, and 301 had been reviewed, and in the opinion of NHTSA does not provide an adequate basis for the manufacturer to certify compliance with these standards. The NHTSA has determined that the test costs ($12,000 estimated by petitioner), plus inventory disposal and new dashboard tooling ($79,000 est.) necessitated by compliance with Standard No. 201 would create substantial economic hardship. With respect to Standards Nos. 212 and 301, costs of testing including destruction of a test vehicle are found to constitute a hardship to this petitioner. Although it is likely that the Indra complies with present Standard No. 301, the design may be inadequate for the requirements effective September 1, 1975. Accordingly, NHTSA is granting a temporary exemption from Standards Nos. 201, 212, and 301. As for Standard No. 215, to require inventory disposal and compliance on an emergency basis would apparently cost petitioner at least $120,000, creating a hardship for a company whose total assets at the end of 1972 totaled only $275,000. Since the care was originally designed for the German market and intended for distribution through selected Opel dealers, the question of whether petitioner attempted in good faith to comply with the standard before its effective date is not central to the

V 39 154 MAR 19 74 XUM

decision. Intermeccanica assures NHTSA that it intends to comply with Standard No. 215 upon expiration of the exemption. Accordingly, an exemption is also granted from Standard No. 215.

In consideration of the foregoing, Intermeccania Automobili is hereby granted NHTSA Exemption No. EX 73–5 from Motor Vehicle Safety Standards Nos. 201, 212, 215, and 301, expiring January 1, 1977.

(Sec. 3, Pub. L. 92–548, 86 Stat. 1159, 15 U.S.C. 1410; delegation of authority at 49 CFR 1.51.)

Issued on March 14, 1974.

JAMES B. GREGORY,
Administrator.

ADVISORY COUNCIL ON HISTORIC PRESERVATION

Notice of Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act (P.L. 92–463) and § 800.6(g) of the Advisory Council's "Procedures for the Protection of Historic and Cultural Properties" (36 CFR 800) that a special meeting of the Advisory Council on Historic Preservation will be held on April 2 and 3, 1974 at 9:30 a.m. in Room 2008, New Executive Office Building, 726 Jackson Place NW., Washington, D.C.

The Advisory Council was established by the National Historic Preservation Act of 1966 (P.L. 89–665) to comment upon Federal, federally assisted and federally licensed undertakings having an effect upon properties listed in the National Register of Historic Places and to generally advise the President and Congress on matters relating to historic preservation. The Council's members are the Secretary of the Interior, the Secretary of Housing and Urban Development, the Secretary of the Treasury, the Secretary of Commerce, the Attorney General, the Secretary of Transportation, the Secretary of Agriculture, the Administrator of the General Services Administration, the Secretary of the Smithsonian Institution, the Chairman of the National Trust for Historic Preservation, and ten non-Federal members appointed by the President.

At its meeting, the Council will, in accordance with section 106 of the National Historic Preservation Act and sections 1(3) and 2(b) of Executive Order 11593, "Protection and Enhancement of the Cultural Environment" (36 FR 8921), consider the effect of the proposed construction of the Federal Home Loan Bank Board building by the General Services Administration in the 1700 Block of G Street NW., Washington, D.C., on properties included in and eligible for inclusion in the National Register of Historic Places. These properties include the Winder Building, the Old Executive Office Building, the Renwick Gallery, the Riggs National Bank and the Nichols Cafe. The Council will receive reports and statements on the undertaking in open session and then consider its comments in executive session. The executive session will be closed to the public, as it has been determined to fall within exemption 5 of 5 U.S.C. section 552(b) and to be essential to protect the free exchange of internal Council views. The remainder of the meeting will be open to the public and will involve reports of the Council staff on various matters relating to historic preservation.

Agenda and additional information concerning the meeting and the submission of oral and written statements to the Council are available from the Executive Secretary, Advisory Council on Historic Preservation, Suite 430, 1522 K Street NW., Washington, D.C. 20005, (202) 254–3974.

Dated: March 18, 1974.

ROBERT R. GARVEY, JR.,
Executive Director.

ATOMIC ENERGY COMMISSION

[Docket Nos. 50–329A, 50–330A]

CONSUMERS POWER CO.

Order Resuming Evidentiary Hearings

MARCH 13, 1974.

In the matter of Consumers Power Co. (Midland Plant Units 1 and 2).

Take notice, the evidentiary hearings in this proceeding will resume on April 2, 1974, and proceed through April 5, 1974. It will then resume on April 9, 1974, and continue through April 11, 1974.

All sessions will commence at 9:00 a.m., local time, and will be held in the Lobby Room, Holiday Inn—Chevy Chase, 5520 Wisconsin Avenue, Chevy Chase, Maryland 20015.

It is so ordered.

Dated at Washington, D.C., this 13th day of March 1974.

ATOMIC SAFETY AND LICENSING BOARD,
JEROME GARFINKEL,
Chairman.

[FR Doc.74–6227 Filed 3–18–74;8:45 am]

[Docket No. 50–331]

IOWA ELECTRIC LIGHT AND POWER CO., ET AL.

Notice of Issuance of Amendment to Facility Operating License

Notice is hereby given that the Atomic Energy Commission (the Commission) has issued Amendment No. 1 to the Facility Operating License No. DPR–49 to the Iowa Electric Light and Power Co., Central Iowa Power Cooperative and Corn Belt Power Cooperative (the licensees). This amendment authorizes the licensees to increase the amount of byproduct material they may receive, possess, and use in connection with operation of the Duane Arnold Energy Center located on the licensees' site near Palo in Linn County, Iowa. The amendment, effective as of the date of issuance, authorizes the receipt, possession and use of an additional four sources for a total of eight sources, each of 1200 curies of Antimony-124 in sealed sources.

The licensees stated in a letter to the Commission, dated March 13, 1974, that the existence and need for the additional four source pins was discovered subsequent to delivery of the sources to the site. Four source holders, each containing two (2) 1200 curie Antimony-124 source pins, are at the site and are necessary for startup of the Duane Arnold Energy Center. Therefore, Amendment No. 1 to Facility Operating License No. DPR–49 authorizing possession and use of eight (8) Antimony-124 source pins, each not to exceed 1200 curies is necessary.

The Staff's Safety Evaluation Report, upon the basis of which the original license was issued, is based upon the Final Safety Analysis Report which, on Page 3.3–14 of the text and in Figure 7.5.1 describes the correct number of sources for the Duane Arnold Energy Center. Accordingly, the Regulatory staff has determined that this amendment does not present a significant hazards consideration.

The Director of Regulation has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which are set forth in the license amendment.

The amendment is effective as of the date of issuance. The licensees' application for amendment, dated March 13, 1974, and a copy of Amendment No. 1 to Facility Operating Licensing No. DPR–49 are available for public inspection at the Commission's Public Document Room at 1717 H Street, NW., Washington, D.C. 20545, and at the Reference Service, Cedar Rapids Public Library, 426 Third Avenue, SE., Cedar Rapids, Iowa 52401. Single copies of the amendment may be obtained upon request addressed to the United States Atomic Energy Commission, Washington, D.C. 20545, Attention: Deputy Director for Reactor Projects, Directorate of Licensing.

Dated at Bethesda, Maryland, this 13th day of March, 1974.

For the Atomic Energy Commission.

WALTER R. BUTLER,
Chief, Light Water Reactors Project Branch 1–2, Directorate of Licensing.

[Docket No. STN 50–437]

OFFSHORE POWER SYSTEMS

Notice and Order for Prehearing Conference

In the matter of Offshore Power Systems (Floating Nuclear Power Plants).

Notice is hereby given that the special prehearing conference required by § 2.751a of the Atomic Energy Commission's rules of practice, 10 CFR Part 2, which was begun on February 11, 1974 will be reconvened on April 9, 1974 at 10:00 a.m., local time, in Courtroom Number 2, Room 2142, of the United States Tax Court, 1111 Constitution Avenue, NW., Washington, D.C. 20044. This prehearing conference will be conducted by the Atomic Safety and Licensing Board (the Board) and will consider the following matters:

1. The contentions raised in the outstanding petitions to intervene filed by the Atlantic County Citizens Council on Environment, the Atlantic County Board of Chosen Freeholders, and the City of Brigantine. In this connection the Board will entertain oral argument from the Applicant, the Staff, and the petitioners with regard to whether each contention meets the requirements of § 2.714(a) of the Commission's rules of practice, 10 CFR Part 2.

2. The Board will entertain oral argument on the petition to intervene filed by the State of New Jersey pursuant to § 2.715(c) of the Commission's rules of practice, 10 CFR Part 2.

3. The Board will also entertain oral argument from the petitioner for intervention National Resources Defense Council (NRDC), and from the Applicant and Staff regarding whether NRDC can properly be admitted as a party to this proceeding in view of the nature of the contention it is asserting in its petition. In particular, the Board wishes to be advised on whether the contention is premature.

Members of the public are invited to attend this prehearing conference as well as the evidentiary hearing to be held at a later date to be fixed by the Board. Members of the public wishing to make limited appearances pursuant to § 2.715 (a) of the Commission's rules of practice, 10 CFR Part 2, may identify themselves at this prehearing conference but oral or written statements to be presented by limited appearances will not be received at this conference. The Board will receive such statements at the aforementioned evidentiary hearing.

The attorneys for the respective parties and any petitioners for intervention are directed to confer in advance of this session of the special prehearing conference, in such manner as they may deem appropriate, and report to the Board at said conference on any stipulations regarding contentions and on any other mutually agreeable procedures to expedite this proceeding.

By Order of the Atomic Safety and Licensing Board.

Dated this 13th day of March, 1974 at Washington, D.C.

DANIEL M. HEAD,
Chairman.

[FR Doc.74–6228 Filed 3–18–74;8:45 am]

CIVIL AERONAUTICS BOARD

[Docket Nos. 26163 and 26164; Order No. 74–3–62]

HUGHES AIRWEST

Order To Show Cause and Granting Temporary Suspension

By application filed November 30, 1973, Hughes Airwest (Airwest) requests an amendment to its certificate of public convenience and necessity for route 76 so as to delete Aberdeen/Hoquiam, Washington, therefrom, and a temporary suspension of service at that point for a period of one year or until such time as the Board acts upon its application for deletion.

In support of its suspension application, Airwest alleges, *inter alia*, that Hoquiam averaged only 2.63 passengers per day and 1.94 per departure during the first nine months of 1973; that Hoquiam's entire history of traffic generation has been characterized by extremely low and declining local patronage because of its convenient access to the far superior services at the Seattle-Tacoma International Airport; that service to Hoquiam produces an estimated annual subsidy need of $42,872, or $25.34 per passenger served;[1] and that there is alternate transportation between Hoquiam and Seattle consisting of scheduled bus and commuter airline service.[2]

No answers to Airwest's application have been received.

Upon consideration of the pleadings and all the relevant facts, we have decided to grant Airwest the authority to suspend service temporarily at Aberdeen/Hoquiam, Washington. We find that the suspension will be in the public interest. We note, in this connection, that no person has objected to the temporary suspension and that such suspension will have a favorable impact on the carrier's subsidy need and will result in the conservation of scarce fuel supplies.

We have also decided to issue an order to show cause proposing to grant the requested deletion.[3] We tentatively find and conclude that the public convenience and necessity require the amendment of Airwest's certificate for route 76 so as to delete Aberdeen/Hoquiam therefrom.[4] The facts and circumstances which we have tentatively found to support our ultimate conclusion are as follows:

Hoquiam has never been a strong traffic generating point; since 1965 originations have exceeded six per day only twice, in 1968 and 1969. This low level of traffic indicates a depressed public need for certificated-type service and has resulted in uneconomic operations for Airwest. According to our estimate for the year 1973, deletion of Hoquiam would result in a subsidy need reduction of $31,000 or $18.25 per passenger.[5] There is no reason to believe that the traffic experience and the financial results of Airwest's Hoquiam service have any reasonable chance of meaningful improvement in the foreseeable future in light of the ample and convenient air and bus transportation alternatives available to Hoquiam travelers. The Seattle-Tacoma International Airport, a large air traffic hub, is approximately 105 surface miles (86 air miles) from Hoquiam, and travel time via Interstate 5 is approximately 126 minutes (after adjustment for the current speed limit of 55 miles per hour). Finally, the absence of civic opposition to Airwest's application lends support to our decision that the show cause procedure is appropriate.

Interested persons will be given twenty days following service of this order to show cause why the tentative findings and conclusions set forth herein should not be made final. We expect such persons to support their objections, if any, with detailed answers, specifically setting forth the tentative findings and conclusions to which objection is taken. Such objections should be accompanied by arguments of fact or law and should be supported by legal precedent or detailed economic analysis. If an evidentiary hearing is requested, the objector should state in detail why such a hearing is considered necessary and what relevant and material facts he would expect to establish through such a hearing that cannot be established in written pleadings. General, vague, and unsupported objections will not be entertained.

Accordingly, it is ordered, That:

1. All interested persons are directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated herein and amending the certificate of public convenience and necessity of Hughes Airwest for route 76 so as to delete Aberdeen/Hoquiam, Washington, therefrom;

2. Any interested persons having objections to the issuance of an order making final any of the proposed findings, conclusions or certificate amendments set forth herein shall, within 20 days after service of a copy of this order, file with the Board and serve upon all persons listed in paragraph 6 a statement of objections together with a summary of testimony, statistical data, and other evidence expected to be relied upon to support the stated objections;[6]

3. If timely and properly supported objections are filed, full consideration will be accorded the matters and issues raised by the objections before further action is taken by the Board;

4. In the event no objections are filed, all further procedural steps will be deemed to have been waived and the Board may proceed to enter an order in

[1] Airwest indicates that the subsidy need per passenger at Hoquiam is over five times greater than the average for its subsidy-eligible system.

[2] Gross Aviation provides four daily round trips between Hoquiam and Seattle (OAG, February 1, 1974) and Greyhound Bus Line operates four round trips in the market.

[3] The suspension authority granted herein will remain in effect until after finalization of this show cause order.

[4] We also tentatively find that Airwest is fit, willing, and able properly to perform the air transportation authorized by the certificate proposed to be issued herein and to conform to the provisions of the Act and the Board's rules, regulations, and requirements thereunder.

[5] In addition, Airwest estimates that there will be an annual fuel savings of 59,104 gallons if Hoquiam is deleted.

[6] All motions and/or petitions for reconsideration shall be filed within the period allowed for filing objections and no further such motions, requests or petitions for reconsideration of this order will be entertained.

V 39 54 MAR 19 74 XUM

accordance with the tentative findings and conclusions set forth herein;

5. Hughes Airwest be and it hereby is authorized to suspend service temporarily at Aberdeen/Hoquiam, Washington, until 60 days after final decision on its deletion application in Docket 26163;

6. A copy of this order shall be served upon Hughes Airwest; Governor, State of Washington; Mayor, City of Aberdeen; Mayor, City of Hoquiam; Airport Manager, Bowerman Field; Manager, Port of Gray's Harbor; Chairman, Utilities & Transportation Commission, State of Washington; and the U.S. Postal Service; and

7. The authority granted in paragraph 5 above may be amended or revoked at any time at the discretion of the Board without hearing.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND,
Secretary.

[FR Doc.74-6280 Filed 3-18-74;8:45 am]

FEDERAL POWER COMMISSION

[Docket No. CP 74-208]

HONEOYE STORAGE CORP.

Notice of Application

MARCH 12, 1974.

Take notice that on February 15, 1974, Honeoye Storage Corporation (Applicant), 35 Newbury Street, Boston, Massachusetts 02116, filed in Docket No. CP74-208 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Applicant to construct and operate certain facilities for the storage of natural gas in the Honeoye field located in Ontario County, New York, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to construct and operate certain pipeline and compressor facilities to convert the Honeoye field, a nearly depleted gas field, into a storage field which Applicant would manage and operate for three New York City area utilities, Consolidated Edison Company of New York, Inc., The Brooklyn Union Gas Company, and Long Island Lighting Company (the Utilities).

Applicant states it has acquired the working interest and storage rights in the Honeoye field, as well as an 8-mile 8-inch pipeline associated with it. Applicant proposes to buy from the Utilities 3,3000,000 Mcf of gas, at a price of 60 cents per Mcf, which will be used for the proposed storage field's cushion gas requirements. The application states that 3,000,000 Mcf of top storage capacity in said field will be made available to the Utilities for storage of their own gas. In this regard, Applicant states that each of the Utilities will be permitted to inject up to 1,000,000 Mcf of gas into the storage field and may withdraw up to a maximum of 6,677 Mcf of gas per day.

Applicant requests authorization to operate the subject storage field up to a maximum storage volume of 6,300,000 Mcf of gas in place at a maximum reservoir pressure to 660 psia. The application states that ultimate design withdrawal capacity is estimated to be 20,000 Mcf per day and 3,000,000 Mcf annually.

Applicant states that the Honeoye field includes 36 wells, of which 28 will be converted to injection-withdrawal wells and 8 to observation wells. As all these wells are currently producing small quantities of gas, applicant states that no additional drilling will be required. Applicant proposes, however, to construct 2.5 miles of 8-inch pipeline extending an existing 8-inch line to connect with Tennessee Gas Transmission Company's (Tennessee) pipeline east of Tennessee's main value 235 and to replace approximately 3 miles of the existing pipeline. Additional field facilities to be constructed at the Honeoye storage field site include a compressor station, not to exceed 2,500 horsepower, and an associated building; a central meter station; a small equipment and administration building; and modifications to the gathering system consisting of the replacement of approximately 6.5 miles of various sizes of lines.

Applicant states that Tennessee will transport a portion of the Utilities firm gas supplies whenever deemed available for injection, generally in the summer, to Applicant's point of connection with Tennessee's system near main value 235. Applicant will transport the subject gas from this point for injection and storage in the Honeoye storage field. During the winter heating season Applicant will redeliver volumes of top storage gas to Tennessee at this same point of interconnection. This gas will then be delivered to the Utilities by displacement on the Tennessee system at existing delivery points.

Applicant states that it proposes to manage and operate the proposed storage field on a gas storage service basis and that it will neither buy nor sell top storage gas. Applicant proposes to charge the Utilities on a monthly basis for said service with the rate to be the sum of a demand charge which shall be 4.184 cents per Mcf multiplied by the maximum quantity of gas stored during the month and a charge of 1.01 cents per Mcf for gas designated for injection into or withdrawal from Applicant's storage facility during the month. Applicant states that there will be an additional charge of 2.0 cents per Mcf of gas injected or withdraw in excess of authorized volumes. The application states that the cost to the Utilities for the proposed service will be approximately 52 cents per Mcf of 100 percent withdrawal load factor.

The application states further that gas from the Honeoye field is currently being used to supply 32 farm-residential customers and six commercial customers near the town of Honeoye and Bristol, New York. Applicant states that the requirements of these customers are approximately 50,000 Mcf per year and that service to said customers by the present owners of the Honeoye field will be phased out over a two-year period as such customers convert to another fuel.

The application states that the estimated cost of the proposed project is $5,570,000 and that funds required for the acquisition and construction of the proposed facilities will be obtained from the private sale of $900,000 of common stock and the issuance of twenty-year debt securities in the amount of $4,500,000.[1]

Any person desiring to be heard or to make any protest with reference to said application should on or before April 1, 1974, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.74-6212 Filed 3-18-74;8:45 am]

[1] Twenty-three and one-third percent of the issued and outstanding shares of the common stock of Applicant will be sold to each of the Utilities for a purchase price of $300,000. Each of the Utilities will acquire one-third of the total debt securities issued by Applicant for a purchase price equal to their original face value, or, in the alternative, each of the Utilities will arrange for the acquisition of its portion of such indebtedness by private investors. Neither the exact form of the debt securities nor the rate of interest that such securities will bear has been determined. Nevertheless, Applicant estimates that the rate of interest will not exceed 9.25 percent. Upon completion of the proposed financing, the ratio of long-term debt to total capitalization would be approximately 80.8 percent. The balance of the capitalization would consist of common equity.

[Docket Nos. CS 71-878 etc.]

HURLEY PETROLEUM CORP. ET AL.

Order Cancelling FPC Gas Rate Schedule

MARCH 12, 1974.

In the matter of Hurley Petroleum Corporation, Car-Tex Producing Company, Texas Eastern Transmission Corporation, Arkansas Louisiana Gas Company, *Docket Nos.* CS71-878, CI73-431, CI73-558, CI61-1379, CI73-578, CP74-15, and CI73-578.

On January 22, 1974, the Commission issued an order pursuant to the Natural Gas Act in the above-docketed proceeding approving a settlement submitted by the parties of the issues involved, permitting and approving abandonment, issuing a certificate of public convenience and necessity, and dismissing show cause proceedings.

As part of the approved settlement, the order (Paragraph 2) granted Car-Tex Producing Company (Car-Tex) Permission and approval to abandon service to Arkansas Louisiana Gas Company (Arkla), as requested by Car-Tex in its application filed in Docket No. CI73-578. Paragraph 4 of the order terminated the certificate issued in Docket No. CI61-1379 to Car-Tex originally authorizing said service to Arkla. Since the certificate was cancelled, it is now appropriate to cancel the related rate schedule.

The Commission's orders:

Car-Tex Producing Company's FPC Gas Rate Schedule No. 4 is cancelled.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

[FR Doc.74-6213 Filed 3-18-74;8:45 am]

[Docket No. CI74-272]

PENNZOIL PRODUCING CO.

Order Granting Interventions and Setting Hearing Date

MARCH 12, 1974.

Pennzoil Producing Company (Pennzoil) on December 26, 1973, filed an amendment to a October 19, 1973, application pursuant to sections 4 and 7 of the Natural Gas Act[1] and § 2.75[2] of the Commission's General Policy Statements, the Optional Procedure for Certificating New Producer Sales of Natural Gas set forth in Commission Order No. 455,[3] for a certificate of public convenience and necessity authorizing the sale and delivery of natural gas in interstate commerce to Trunkline Gas Company (Trunkline). The sale is to be made from lands and leaseholds dedicated under a contract dated February 9, 1955, designated FPC Gas Rate Schedule No. 70. The gas to be sold from this acreage is located in the East Edinburg and San Carlos Fields, Hidalgo County, Texas (Texas Gulf Coast Area).

Pennzoil proposes to sell the gas at an initial price of 45 cents per Mcf at 14.65 psia with 2.0 cent biennial escalations starting October 1, 1974. The contract provides for proportional downward adjustment if the Btu content falls below 1000 Btu per cubic foot, and 75 percent reimbursement of any new or additional taxes levied after January 1, 1965. The contract, which may be canceled if certification is not granted by the Commission, will expire under its own terms on January 1, 1981. Under the amendment the contract may be extended by the parties on a yearly basis thereafter. Finally, Pennzoil seeks pre-granted abandonment upon the termination of the contract.

Notice of Pennzoil's application was published November 9, 1973, and published in the FEDERAL REGISTER on November 16, 1973 (38 FR 31708). Petitions to intervene were due on or before December 4, 1973. A petition in support of the application was filed by Trunkline, and a petition in opposition to the application was filed by the American Public Gas Association (APGA). Neither party stated a request for hearing on this application in their respective late petitions.

The Commission has determined that a public hearing on this application is in the public interest in order to permit Pennzoil the opportunity to present evidence that a well has been drilled and that there is commercially reliable surface information as the result of production to establish the reservoir data in accordance with commonly accepted trade practices. It will also be necessary for Pennzoil to show that new production pursuant to certification under a § 2.75 proceeding will not impinge, diminish, or impair Pennzoil's ability to fulfill its contract obligations[4] to Trunkline under the 1955 contract which dedicated this acreage. The Commission has not granted abandonment of production pursuant to proceedings under section 7(b) of the Natural Gas Act.

The Commission finds:

(1) It is necessary and in the public interest that the above-docketed proceeding be set for hearing.

(2) It is desirable and in the public interest to allow the above named petitioners to intervene in this proceeding.

The Commission orders:

(A) Pursuant to the authority of the Natural Gas Act, particularly sections 4, 5, 7, 14, and 16 thereof, the Commission's rules of practice and procedure, and the Regulations under the Natural Gas Act (18 CFR Ch. I), Docket No. CI74-272 is set for the purpose of hearing and disposition.

(B) A public hearing on the issues presented by the application herein shall be held commencing on April 9, 1974, at 10 a.m., e.d.t., in a hearing room of the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426.

(C) A Presiding Law Judge to be designated by the Chief Law Judge for that purpose (See Delegation of Authority, 18 CFR 3.5(d)), shall preside at the hearing in this proceeding pursuant to the Commission's rules of practice and procedure.

(D) Pennzoil and the intervenor supporting the application shall file their direct testimony and evidence on or before March 22, 1974. All testimony and evidence shall be served upon the Presiding Judge, the Commission Staff, and all parties to this proceeding.

(E) The Commission Staff, and the intervenor opposing the applications, shall file their direct testimony and evidence on or before March 29, 1974. All testimony and evidence shall be served upon the Presiding Judge, and all other parties to this proceeding.

(F) All rebuttal testimony and evidence shall be served on or before April 5, 1974. All parties submitting rebuttal testimony and evidence shall serve such testimony upon the Presiding Judge, the Commission Staff, and all other parties to this proceeding.

(G) The above named petitioners are permitted to intervene in this proceeding subject to the rules and regulations of the Commission: *Provided, however,* That the participation of such intervenors shall be limited to matters affecting asserted rights and interests as specifically set forth in said petitions for leave to intervene; and *Provided, further,* That the admission of such interest shall not be construed as recognition by the Commission that they or any of them might be aggrieved because of any order or orders of the Commission entered in this proceeding.

(H) The amendment between Pennzoil and Trunkline dated September 6, 1973, is accepted for filing effective as of the date of initial delivery or the date of authorization, whichever is later, and designated as Supplement No. 26 to Pennzoil Producing Company (Operator) *et al.* F.P.C. Gas Rate Schedule No. 70.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

CONSUMER PRODUCT SAFETY COMMISSION

GLASS CONTAINERS FOR CARBONATED BEVERAGES AND OTHER PRESSURIZED CONSUMER PRODUCTS

Notice of Public Hearing

Notice is given that a public hearing will be held on Wednesday and Thursday, April 17 and 18, 1974, at 10 a.m. in the Department of Commerce Auditorium, 14th and E Streets NW., Washington, D.C., to discuss the safety of glass containers (and their closures) for pressur-

V 39 N 54 MAR 19 74 XUM

ized products, particularly bottles for carbonated soft drinks and malt beverages but also including other containers such as bottles for champagne and sparkling wines and glass containers for aerosol products.

The hearing will be held pursuant to sections 10(a) and 27(a) of the Consumer Product Safety Act (Public Law 92–573, 86 Stat. 1217, 1227; 15 U.S.C. 2059(a), 2076(a)).

1. *Carbonated soft drink bottles.* The Commission has received information relating to the safety hazards of carbonated soft drink bottles. The information has been obtained principally from the following sources:

a. *National Commission on Product Safety (NCPS).* The NCPS stated that glass bottles for carbonated soft drinks present large risks of injury to consumers. Although the proportion of bottle failures is small relative to the total number of filled containers distributed, the great number of containers filled (about 25 billion in 1972) can result in a large number of accidents and injuries. The NCPS suggested that quality assurance programs should be improved and that nonreturnable glass containers should be made with thicker walls (Final Report of the National Commission on Product Safety, pp. 17–18 (1970); NCPS Supplemental Studies, vol. II, pp. 397–438; and NCPS Hearings, vol. 6B, pp. 439–587, vol. 7, pp. 109–129).

b. *National Electronic Injury Surveillance System (NEISS).* During the period July 1, 1972, through June 30, 1973, an estimated 111,000 injuries associated with glass containers were treated in hospital emergency rooms throughout the United States. Of these, an estimated 52,000 were associated with carbonated soft drink bottles. In-depth investigations of a sampling of NEISS-reported cases and investigations made by independent contractors suggest that half of the latter injuries may have been associated with exploding bottles.

c. *Consumer complaint letters.* The figures in the table below summarize bottle-failure cases reported to the Bureau of Product Safety, Food and Drug Administration, from January 1970 through April 1973. The variability from year to year in the number of reports received may be a result of intermittent publicity on this subject in newspapers and magazines. For example, a March 1973 article in *Consumer Reports* that directed consumers to send bottle-failure reports to FDA's Bureau of Product Safety resulted in the high number of such reports shown in the table for the first third of 1973.

About one-third of the reports failed to include any pertinent description of the product involved; however, 62 reports (39 percent) specifically mentioned nonreturnable bottles. Only 14 cases (9 percent) cited returnable bottles. Accordingly, nonreturnable bottles are apparently more susceptible to failure than returnable bottles.

The 60 injury cases reported include a range of injuries from minor cuts and bruises to permanent blindness in one eye (four cases). Most of the reports cited bottles that exploded after being at rest for some period of time or while being subjected to normal and expected handling.

Eight instances of cap or crown failures were reported. Six of these involved caps that blew off the bottle during opening. Seven of the eight complaints in this category cited some degree of injury ranging from a minor cut to permanent blindness in one eye.

Bottle explosions were reported by consumers as follows:

Year	Cases reported	Injuries reported	Cases specifying nonreturnable bottles
1970	53	27	25
1971	13	7	5
1972	21	8	8
1973 (4 months)	71	18	24
Totals	158	60	62

2. *Malt beverage bottles.* The Commission has received information relating to the safety hazards of malt beverage bottles. The information has been obtained principally from the following sources:

a. *Adolph Coors Company.* On October 23, 1973, the Commission received a petition from the Adolph Coors Co. (set forth at the end of this notice) expressing concern about the hazards inherent in malt beverage bottles that require the petitioner to undertake unusually close inspection of bottles in order to maintain container quality standards. The petitioner therefore requests the Commission to develop a consumer product safety standard on malt beverage bottles or ban such containers entirely. The petition and correspondence related to it are available for public inspection at the Office of the Secretary, Consumer Product Safety Commission, Room 1025, 1750 K Street NW., Washington, D.C. 20207 (phone (202) 634–7700).

b. *NEISS.* NEISS does not have a product report category specifically for malt beverage bottles. Injuries from such bottles reported to NEISS-participating hospitals were probably entered in the category reserved for glass bottles other than carbonated soft drinks. Two of the in-depth investigations out of the 28 on file in this category referred to malt beverage bottles, but were associated with already broken bottles.

3. *Other pressurized glass containers.* The Commission has received some information on hazards associated with other glass containers with contents under pressure. The small amount of information came from the following sources:

a. *NEISS.* One of the 48 in-depth investigations in the carbonated soft drink bottle category (referred to in 1–b above) deals with an injury from a seltzer bottle. The bottle exploded, lacerating the victim on her calf and arm.

b. *Consumer complaint letters.* One of the consumer complaint letters referred to in 1–c above (but not included in the table) cited a sparkling wine bottle. The victim suffered a detached retina when the stopper blew off at the time the bottle was opened.

The scheduled hearing will assist the Commission in determining (1) whether glass containers for carbonated beverages and other pressurized consumer products present an unreasonable risk of injury to the public and thus warrant promulgation of a consumer product safety standard and (2) whether the petitioner's request for a safety standard on malt beverage bottles should be granted. The Commission would like to receive further information on these topics as well as all viewpoints and arguments on these matters from individuals, consumer groups, beverage bottlers, distributors, glass container manufacturers, marketers, retailers, trade associations, and other interested parties, all of whom are encouraged to attend.

The Commission is particularly interested in information relevant to the following topics:

1. Accidents or injuries associated with the sale to or use by consumers of such bottles. Sources of information could include injury information, consumer complaints, and reports of accidents or injuries during production and distribution that might suggest a potential hazard to consumers.

2. Manufacturing practices and standards relevant to glass container safety for consumers. This could include information about existing standards and quality control practices and information about the relative safety of different types of containers.

3. Technological innovations that have potential for increased glass container safety in the applications under discussion. This could include discussion of new packaging systems and changes in quality control practices.

The Commission is interested in obtaining any other information which could assist in its determining whether an unreasonable risk of injury exists and to what extent regulation may be necessary.

Persons who wish to submit views on these as well as more general aspects of glass container safety are invited to do so. All interested persons are invited to observe the hearing. Persons interested in presenting testimony or in attending the hearing as observers are requested to write or call Mr. Russell Smith, Office of Standards Coordination and Appraisal, Consumer Product Safety Commission, Washington, D.C. 20207 (phone (301) 496–7197). The hearing will be conducted by a member or representative of the Commission and transcribed by a stenographer. Witnesses will not be questioned by other participants.

Those wishing to make an oral presentation must submit a copy or outline of their presentation and request a specific amount of time for such presentation by April 10, 1974. The Commission invites anyone, including persons unable to attend the hearing, to present written comments for the Commission's consideration. Such written material must be accompanied by a summary of not more than 250 words. All comments submitted for the hearing record must be received by close of business April 10, 1974.

In the event that space available for the hearing cannot accommodate all who wish to attend, attendance will be determined according to the order in which requests for attendance are received.

Dated: March 14, 1974.

SADYE E. DUNN,
Secretary, Consumer Product Safety Commission.

The petition from Adolph Coors Co. reads as follows:

OCTOBER 11, 1973.

MR. RICHARD SIMPSON,
Chairman, Consumer Product Safety Commission,
1750 K Street,
Washington, D.C. 20004.

DEAR MR. SIMPSON: One of the primary concerns of our company has always been the safety aspects of the glass container and its use in the packaging of our malt beverage product. It is felt that we are facing up to this concern and our responsibility to assure product safety in the market place through the use of a comprehensive total quality control program. This program has been in existence for the past several years with the objective of obtaining a pressurized glass container with "adequate" internal pressure and impact resistance characteristics to achieve our desired standard of product safety.

With the advent of the Consumer Product Safety Act (Public Law 92–573, 86 Stat. 1221; 15 U.S.C. 2064b), additional quality control techniques and procedures were incorporated into our program to further reduce and eliminate the risks of consumer injury associated with our glass containers. Top priority has always been given to the glass container because by its very nature it presents a high risk of consumer injury if not properly recognized and dealt with.

Providing ourselves with a quantity of glass bottles that we feel to be safe is getting to be more of a nightmare with each passing day. The arbitrary quality standards and specification guidelines established by the glass container manufacturing industry are wholly inadequate from our standpoint, and we have been forced to establish our own standards of acceptance. As a consequence, the glass container manufacturers have refused to meet our specifications and have continually threatened to discontinue shipment of bottles to us. Many glass container manufacturers have bluntly expressed that they would not supply bottles to us because the demand for "commercially acceptable" containers exceeds the supply and they can sell them elsewhere without placing undue hardships and controls upon their manufacturing operations.

Extreme emphasis in glass container quality and safety has been placed upon all our remaining suppliers through the stringent adherence to material specifications and incoming inspection enforcement procedures. Each shipment or lot of glass containers either upon receipt or within the suppliers manufacturing facility prior to shipment is randomly sampled by us in accordance with recognized sampling plans (MIL–STD 105D and/or 414). Lot disposition is made in accordance with critical defect criterion (which relates directly to the substantial hazard definition of PL 92–573 and the hazard category, level III or IV per MIL–STD 882). When a single defect is found which falls in this critical category, the lot from which the sample is drawn is either 100% sorted or screened for additional critical defects prior to its use on our bottle filling lines, or a "return to supplier" disposition is executed. To-date, we have determined that approximately 26% of the total lots inspected by the above procedure require 100% sorting or return to the supplier because of the critical type defects found.

Substantial costs are being incurred by our company to inspect the safety into both empty and full glass containers. In the past two years, millions of dollars have been spent in our continuing effort to achieve this goal. As a matter of competitive survival, we will be required to submit a justification for a price increase on our glass container packages to the Cost of Living Council for their consideration. Presently, we have over forty people on our payroll who perform nothing but the sorting requirements described. Our difficulties in obtaining satisfactory glass bottles have caused us to be critically short in our market place. It is our experience that each bottle must be inspected and tested to verify its structural integrity prior to each use, and even then the bottle cannot be designated as a safe unit in the marketplace due to forseeable misuse in handling by the retailer and/or consumer. Due to the state of the art in glass container manufacture, there is no way of assuring a 100% safe product when a carbonated product is packaged in glass. I am sure that if carbonated beverages were invented today, glass would be the last material that anyone would package in because of the consumer safety aspects. The only reason we continue to package in glass is for hedging against the Oregon Bill-type legislation which is being considered in every state that we distribute our product.

The definition of substantial hazard and the requirements associated with it as delineated in the Federal Register, Vol. 38, No. 149, would place carbonated bottlers in a daily situation of notification to your Director of the Bureau of Compliance and product recall. Based upon the results of our incoming and resident inspection techniques in conjunction with 100% inspection and test of empty and full glass container in-process, it is felt that we are probably releasing a significant quantity of defective filled bottles to our consumers which could be defined as substantial product hazards under the Act.

We strongly feel that compatible manufacturing and performance safety standards on malt beverage glass containers are desperately needed from the agency to assist in establishing a unified system for controlling bottle manufacture and "as used" bottle integrity to meet the requirements and purposes of the Act; otherwise, the use of such containers should be banned entirely. Several attempts have been made to initiate voluntary standards through our trade association membership without success.

We have the above experience and the related test, inspection, and performance data for dissemination to you and your staff if you so desire, to assist in the establishment of such standards. We would also welcome the opportunity to discuss this subject with you or your designated representatives at your earliest convenience.

Your assistance and guidance on this situation will be appreciated.

Cordially,

GARAY VEBER,
Vice President,
Quality Control and Assurance.

COST OF LIVING COUNCIL

FOOD INDUSTRY WAGE AND SALARY COMMITTEE

Notice of Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92–463, 86 Stat. 770) notice is hereby given that the Food Industry Wage and Salary Committee, established under the authority of section 212(f) of the Economic Stabilization Act, as amended, section 4(a)(iv) of Executive Order 11695, and Cost of Living Council Order No. 14, will meet on Thursday, March 21, 1974. The meeting will be open to the public on a first-come, first-served basis at 10 a.m., in Conference Room 8202, 2025 M Street NW., Washington, D.C.

The agenda will consist of a discussion of policy questions involving food industry wage matters, and if circumstances permit, of food industry wage cases pending before the Cost of Living Council.

The Chairman of the Committee is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business.

Issued in Washington, D.C., on March 15, 1974.

HENRY H. PERRITT, Jr.,
Executive Secretary,
Cost of Living Council.

[FR Doc.74–6453 Filed 3–15–74;5:00 pm]

[Cost of Living Council Order No. 51]

DEPUTY EXECUTIVE SECRETARY

Delegation of Authority

Pursuant to the authority vested in me as Executive Secretary by Cost of Living Council Order No. 25, there is hereby delegated to the Deputy Executive Secretary authority to determine, in accordance with the provisions of the Federal Advisory Committee Act (P.L. 92–463, 86 Stat. 770), that advisory committee meetings shall be closed and to sign notices with respect to advisory committee meetings for publication in the FEDERAL REGISTER.

This order is effective March 18, 1974.

HENRY H. PERRITT, Jr.,
Executive Secretary
Cost of Living Council.

ENVIRONMENTAL PROTECTION AGENCY

[OPP–32000/25]

RECEIPT OF APPLICATIONS FOR PESTICIDE REGISTRATION

Data To Be Considered in Support of Applications

On November 19, 1973, the Environmental Protection Agency published in the FEDERAL REGISTER (38 FR 31862) its interim policy with respect to the administration of section 3(c)(1)(D) of the Federal Insecticide, Fungicide, and Ro-

V 39 154 MAR 19 74 XUM

denticide Act (FIFRA), as amended (86 Stat. 979), and its procedures for implementation. This policy provides that EPA will, upon receipt of every application, publish in the FEDERAL REGISTER a notice containing the information shown below. The labeling furnished by the applicant will be available for examination at the Environmental Protection Agency, Room EB–37, East Tower, 401 M Street, SW, Washington, D.C. 20460.

On or before May 20, 1974, any person who (a) is or has been an applicant, (b) desires to assert a claim for compensation under section 3(c)(1)(D) against another applicant proposing to use supportive data previously submitted and approved, and (c) wishes to preserve his opportunity for determination of reasonable compensation by the Administrator must notify the Administrator and the applicant named in the FEDERAL REGISTER of his claim by certified mail. Every such claimant must include, at a minimum, the information listed in this interim policy published on November 19, 1973.

Applications submitted under 2(a) or 2(b) of the interim policy in regard to usage of existing supportive data for registration will be processed in accordance with existing procedures. Applications submitted under 2(c) will be held until May 20, 1974, before commencing processing. If claims are not received, the application will be processed in normal procedure. However, if claims are received within 60 days, the applicants against whom the particular claims are asserted will be advised of the alternatives available under the Act. No claims will be accepted for possible EPA adjudication which are received after May 20, 1974.

APPLICATIONS RECEIVED

EPA File Symbol 241–EGG. American Cyanamid Company, Agricultural Division, P.O. Box 400, Princeton, New Jersey 08540. *Cygon 400 Systemic Insecticide*. Active Ingredients: Dimethoate (O,O-dimethyl S-(N-methylcarbamoylmethyl) phosphorodithioate) 43.5%. Method of Support: Application proceeds under 2(b) of interim policy.

EPA File Symbol 5481-RAT. Amvac Chemical Corporation, 4100 E. Washington Blvd., Los Angeles, California 90023. *Wettable Sulfur Agricultural Insecticide—Fungicide*. Active Ingredients: Sulfur 97.0%. Method of Support: Application proceeds under 2(c) of interim policy.

EPA Reg. No. 9232–1. Federal International Chemicals, 2451 South Ashland Avenue, Chicago, Illinois 60608. *Conquest*. Active Ingredients: Methylodecylbenzyl Trimethyl Ammonium Chlorides 3.2%; Potassium Carbonate 1.5%; n-alkyl (50% C12, 30% C14, 17% C16, 3% C18) Dimethyl Ethylbenzyl Ammonium Chlorides 1%; n-alkyl (60% C14, 30% C16, 5% C12, 5% C18) Dimethyl Benzyl Ammonium Chlorides 1%; Didecyl Dimethyl Ammonium Chloride 1%; Tetrasodium Ethylenediaminetetraacetate 1%; Methyldodecylxylylene Bis (Trimethyl Ammonium Chloride) 0.8%; Essential Oil 0.2%. Method of Support: Application proceeds under 2(a) of interim policy.

EPA File Symbol 3288–L. Murphy Chemical Company, 1530 Locust Street, Philadelphia, Pennsylvania 19102. *Mur-Sanex Disinfectant-Deodorizer-Sanitizer*. Active Ingredients: n-Alkyl (60% C14, 30% C16, 5% C12, 5% C18) dimethyl benzyl ammonium chlorides 5%; n-Alkyl (68% C12, 32% C14) dimethyl ethylbenzyl ammonium chlorides 5%. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 33799–R. Stratford-Cookson Company, 2000 Sullivan Road, College Park, Georgia 30337. *Straticide Germicidal Concentrate*. Director,
Registration Division.

[FR Doc.74–6054 Filed 3–18–74;8:45 am]

DDT TO CONTROL THE PEA LEAF WEEVIL

Action on Application for Limited Use Registration

Notice is hereby given that the Environmental Protection Agency (EPA) will register Crop King Colloidal DDT–400 for use on dry peas to control the pea leaf weevil, *Sitona Lineata* (L), in the States of Washington and Idaho during the 1974 growing season. This registration will be formally approved upon submittal of finished labelling meeting EPA's requirements. It will expire June 30, 1974.

BACKGROUND

On January 25, 1974, EPA received an application to register Crop King Colloidal DDT–400 for use on dry peas to control the pea leaf weevil, *Sitona Lineata* (L.), in the States of Washington, Idaho, and Oregon during the 1974 growing season. This product previously had been registered for the same use in the States of Washington and Idaho during the 1973 growing season; this previous registration expired August 1, 1973.

Notice of the receipt of this application was published February 12, 1974, in the FEDERAL REGISTER (FR 5338). In addition, a public hearing was held February 15, 1974, in Spokane, Washington, to give interested parties an opportunity to provide relevant information and present their views. Testimony was received from State officials, pea growers' groups and individual pea growers, representatives of Crop King Chemicals and the Environmental Defense Fund, and research entomologists affiliated with the State universities.

SUMMARY

Crop King Colloidal DDT–400 is being registered for limited use. The applicable limitations are described below and will be set forth in the labelling accompanying this product. Pursuant to section 12(a)(2)(G) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, use of this product in a manner inconsistent with its labelling is unlawful.

This registration is being approved under section 3 of FIFRA, as amended, which, by regulation published April 10, 1973, was made immediately effective with respect to all uses of DDT products.

In an order dated June 14, 1972, the EPA Administrator cancelled registrations of most uses of DDT. EPA's decision to register DDT to control the pea leaf weevil is based on consideration of all available information pertinent to this matter, examined in light of the terms of the June 1972 order. The basis of this decision is more fully explained below.

It should be noted that this product is being registered for use only in the States of Washington and Idaho. Though the application was accompanied by labels for use in Oregon, as well, neither the State of Oregon nor any representative of pea growers in Oregon has requested that the registration be made effective for Oregon. It is EPA's understanding that the pea leaf weevil has not been a significant agricultural or economic problem in Oregon and is not expected to pose such problems during the 1974 growing season.

As explained more fully below, testing of other pesticides will be undertaken during the 1974 growing season. This testing will be designed to identify other pesticides that can be registered, prior to the 1975 growing season, for use in controlling the pea leaf weevil.

DESCRIPTION AND BIOLOGY OF THE PEA LEAF WEEVIL

The pea leaf weevil is an introduced pest of peas, first detected at economically damaging levels in the dry pea-producing areas of eastern Washington and northern Idaho in 1970. The pea leaf weevil continued to cause damage to pea seedlings grown in this region in the succeeding three growing seasons. The mixture of perennial legumes (e.g., dry peas) and annual legumes (e.g., dry peas) grown in this region favor recurrent infestations by providing a constantly available food source for pea leaf weevil development.

The pea leaf weevil has a single generation per year. It overwinters in the adult stage, hibernating in areas of vegetation, debris, fence rows, field stubble, etc. In early spring (mid-March), the adults become active and begin feeding on alfalfa and winter peas. As the spring pea crop develops, adult weevils leave the winter peas and perennial legumes to feed

on the more succulent plant tissue of the dry pea seedlings. At some time during mid to late May, large numbers of adult weevils commonly migrate into mid-season pea fields through active flight. It is during this period that infestation usually is most serious. Under severe infestation pressures (i.e., three or more weevils per seedling), the pea seedling, including the terminal buds of the plant, may be completely defoliated, resulting in total loss of the seedling. There are indications that 60 to 75 percent of pea plants in infested fields may be destroyed by adult pea leaf weevil feeding.

Since the pea leaf weevil is a recently introduced pest in this region, relatively little is known about the relationship of the weevil to its environment. Studies are being conducted, principally at the University of Idaho, to determine, among other things: (1) The impact of climatic and biotic factors on weevil survival and the predictive value of these factors as they relate to weevil abundance; (2) the economic threshold of weevil infestation; and (3) the impact of the weevil on dry pea yields.

Available data indicate that pea leaf weevil populations have been reduced in the past by severe cold, low precipitation, and short-duration high and low temperatures. In this regard, it should be noted that the pea growing region, while relatively small in terms of land area, encompasses areas of widely varying altitude and climatic conditions. Thus, factors affecting dry pea culture and the occurrence and control of weevil infestation are not uniform throughout the region. Survival of pea leaf weevil larvae appears to be adversely affected by high temperature and low relative humidity. Thus, hot dry weather during the period of larval development may cause significant mortality. Extremely moist soil conditions have prevailed during the 1973–74 winter season. These conditions have favored the development of a fungal parasite, *Beauveria bassiana*, of the adult pea leaf weevil. This parasite has been isolated from a number of weevils collected during the 1973–74 winter season. The significance of all these factors and their predictive value for decisions on chemical treatment or integrated pest management programs remain to be determined.

Though it is clear that pea leaf weevils can cause substantial damage to dry pea crops, the impact of weevil defoliation in terms of crop yields has not been adequately documented. Normal yields range from 1200 to 1600 pounds per acre. Growers' estimates indicate a potential loss of 600 to 800 pounds per acre in the absence of pest control. Research entomologists at the University of Idaho have tentatively established an economic injury threshold level for pea leaf weevil damage at one weevil per plant. But this is not an absolute figure. When favorable growing conditions exist, i.e., a warm, dry spring, with good seedbed preparation, pea seedlings are capable of outgrowing the defoliation damage caused by weevil feeding. Further research is planned to evaluate the impact of factors such as plant resistance, climate, and plant growth vigor on the validity of this threshold level.

POSSIBLE CONTROL METHODS

1. *Chemical controls.* The pea leaf weevil has been long established in the pea growing areas of Europe. It has required chemical control for a number of years. Dieldrin and heptachlor have been used to control the pest in Europe. These pesticides have not been tested in the eastern Washington-northern Idaho region. Furthermore, both are at least as persistent as DDT and appear to be more acutely toxic to more forms of life than is DDT.

Because DDT was known to be a broad-spectrum pesticide toxic to many types of pests, it was quickly adopted as a control agent once the pea leaf weevil became established in the dry pea producing area. Pea growers developed a high degree of reliance on DDT when weevil infestations assumed serious proportions in the region in 1971 and 1972. Some control failures were experienced in the spring of 1972, when cold wet weather prevailed and poor seedbed preparation was commonplace.

Evaluation of chemical compounds against the pea leaf weevil began in 1971 at the U.S. Department of Agriculture laboratory at Yakima, Washington. DDT, methoxychlor, parathion, and malathion ULV were tested. A rather superficial knowledge of the biology and habits of the insect caused many problems in this early experimentation. Meaningful sampling methods had to be devised, and appropriate timing and methods of application had to be developed. As a result, it was not until 1973 that a meaningful testing program got underway.

In 1973, there was a rather warm, dry spring. These conditions favored the rapid development of germinating pea seedlings and thus minimized the exposure of the seedlings to pea leaf weevil injury. Under these rather optimum conditions of seedling development, several chemical compounds appeared to provide control of the pea leaf weevil. These chemical compounds included methoxychlor, Imidan, malathion ULV, and DDT. The 1973 test results give promise that an alternative to DDT can be found, but one year's results under the rather atypical growing conditions experienced in the spring of 1973 do not form an adequate basis for the registration of a product. The results of the 1973 research program are summarized below:

a. *Methoxychlor.* This insecticide was evaluated in limited field tests as a wettable powder and as an emulsifiable concentrate. Applications of 1.5 pounds actual insecticide per acre gave adequate control under 1973 growing conditions, but tests under the 1972 growing conditions resulted in some control failures. There is a 14 ppm tolerance for methoxychlor on peas.

b. *Imidan.* This pesticide was not extensively tested prior to 1973. Applications of one pound actual insecticide per acre gave good control in small plot tests during the 1973 growing season. The manufacturer has petitioned for establishment of a tolerance for Imidan on peas. This petition currently is being processed.

c. *Malathion ULV.* There was very limited field testing of this compound during the 1973 growing season. Under the conditions that prevailed during these tests, malathion ULV performed in a satisfactory manner. Attempts to control the pea leaf weevil in commercial plantings in 1971 and 1972 did not prove to be satisfactory, however. It is not clear why the compound failed during attempts at commercial control. Indications are that timing of applications may be a critical factor in successful use of malathion ULV. There is an 8 ppm tolerance for malathion on peas.

d. *Temik (Aldicarb).* This systemic insecticide in small plot tests appeared to give satisfactory control of the pea leaf weevil. Additional tests are required to determine the appropriate dosage for this compound. Preliminary evaluation of residue samples has been completed, but a petition for establishment of tolerances has not been submitted as yet.

e. *Methyl Parathion.* An encapsulated product containing methyl parathion received a preliminary evaluation in the 1972 growing season. These tests merely indicated that the product is capable of killing pea leaf weevils but did not indicate whether it would work under actual field conditions. The encapsulated product is not yet registered for any uses. There is a 1 ppm tolerance for methyl parathion (not encapsulated) on peas.

f. *DDT.* This compound is the only chemical that has been widely used by pea growers. Though there were instances of control failure with DDT during the 1972 growing season, it was used successfully the following year. It was also included in the field tests conducted during the 1973 growing season and performed satisfactorily in these tests. Among the chemicals that could be considered candidates for use in the 1974 growing season, DDT is the only one now known to have sufficient residual activity to protect the pea crop during the entire two- to three-week period of maximum susceptibility to injury from the pea leaf weevil. There is a 7 ppm tolerance for DDT on peas.

2. *Biological controls.* Research during the 1973 growing season identified a fungus disease of the adult pea leaf weevil. There are preliminary indications that this disease could contribute to a collapse in the population of the pea leaf weevil. Additional evaluations of the impact of this disease on the pea leaf weevil will be made in 1974.

3. *Crop resistance.* During the 1973 growing season, preliminary tests of pea breeding stocks for resistance against the pea leaf weevil were conducted. These tests gave little indication of resistance in any of the breeding stock. Additional observations will be made during the 1974 growing season. Plant tolerance and other approaches will be investigated.

V 39 54 MAR 1974 XUM

RISK/BENEFIT ASSESSMENT

In June 1972, the EPA Administrator found that there were substantial risks associated with the use of DDT. Specifically, he found that DDT has acute and subacute effects on aquatic and avian species and that it can have adverse effects on reproduction of certain birds. He also found that laboratory tests had indicated that DDT produces tumors in test animals and, therefore, is a potential human carcinogen. DDT's tendency to persist in the environment was—and still is—a cause for particular concern about its adverse effects.

Based on the findings set forth in the June 1972 Order, the Administrator concluded that the use of DDT on cotton and most other crops should be cancelled in order to eliminate the great bulk of the U.S. contribution to DDT contamination of the global environment. In his order, however, it was recognized that there would have to be exceptions to this general policy.

Such exceptions can be made for those situations in which the benefits outweigh the risks because of factors such as the unavailability of practical alternatives; the possibility of a food shortage if DDT were not used; the implications of shifting to an alternative crop; the temporary nature of the proposed use of DDT; and the possibility of minimizing environmental impact through restrictions on the proposed use. With reference to these criteria, EPA's findings as to the proposed use of DDT to control the pea leaf weevil are as follows:

1. There is no reason to depart from the findings of the June 1972 order regarding the potential risks of using DDT. Ecologically, the pea-producing region is one in which the potential risks appear to be relatively small. It is a semi-arid region with rainfall of about 15–20 inches per year, most of which occurs in winter and early spring. It is not a major watershed. There is just one major stream, the Palouse River, which is not significant as a fishery. Most others are intermittent streams which are dry through much of the year. Thus, there is relatively little potential for significant DDT contamination of aquatic ecosystems. The region is intensively farmed. There are few trees and little vegetation that might serve as wildlife habitat. No endangered wildlife species are known to live in the region, although some minimal foraging by peregrine falcons has been reported.

2. All the chemicals that have been used or tested appear to be toxic to the pea leaf weevil. There are, unfortunately, few statistical data correlating the use of any chemical control method with dry pea yields. With the exception of DDT, no other chemical has been widely used under the various growing conditions commonly occurring in the pea-producing region. Furthermore, DDT is the only one which, based on currently available data, is known to have sufficient residual activity to provide assurance of protection against the pea leaf weevil for more than 7–10 days after application. In addition, it is clear that knowledge of non-chemical control methods is insufficient to warrant reliance on them at this time.

3. The acreage planted in the eastern Washington-northern Idaho region generally accounts for about 95 percent of total U.S. producton of dry peas, and, during the past two years, about 13 to 15 percent of worldwide production. Thus, the crop grown in this region meets practically the entire U.S. demand for dry peas. In addition, as much as 70 percent of the crop ultimately is exported. Dry peas are an important source of high-quality vegetable protein and, in this regard, are particularly important in countries that do not produce sufficient quantities of animal protein to meet their own needs or where the price of animal protein severely limits its consumption. Several such countries, including Great Britain, Venezuela, Japan, and Netherlands, and Brazil, are among the principal importers of dry peas grown in the United States. It is estimated that as many as 200,000 acres of dry peas will be planted in the eastern Washington-northern Idaho region this year. Testimony at EPA's hearing suggested that actual acreage will depend on the availability of means of protecting the crop against an infestation of the pea leaf weevil.

4. In addition to their significance as a food crop, dry peas are economically and agriculturally important in the region. Two cash crops can be grown each year. One is winter wheat; the other can be either dry peas or spring barley. From an economic standpoint, spring barley is far less valuable than dry peas. At February 1974 prices, the comparative values were $101 per acre for spring barley and $380 per acre for dry peas. From an agricultural standpoint, dry peas are far more effective than spring barley as a cover crop to prevent soil erosion, which is a chronic problem in the rolling terrain of the region. In addition, dry peas provide nitrogen to the soil, thus reducing the fertilizer requirements of the winter wheat crop; in contrast, spring barley is nitrogen-depleting.

5. The proposed use is temporary. Registration of DDT for use in controlling the pea leaf weevil will expire June 30, 1974. Possible alternative chemical control methods will be tested during this year's growing season. This testing program is being designed specifically for the purpose of identifying other chemicals that can be registered for this use prior to next year's growing season. Since several chemicals appear promising based on previous testing, it is EPA's expectation that adequate data to register one or more of them will be available later this year.

6. Environmental risks in this case can be minimized through the limitations which EPA is imposing on this use of DDT. Among other things, these limitations are designed to ensure, insofar as possible, that DDT is used only where it is actually needed, i.e., in those fields where the existence of an economically significant infestation is verified by a trained field scout in accordance with sampling procedures and treatment criteria specified by EPA. Exceptions to this requirement will be allowed only if an infestation resulting from an in-flight of pea leaf weevils in a particular area exceeds the field scouts' capacity to check individual fields; even in such cases, however, the field scouts will have to verify the existence of an areawide infestation and obtain permission from the appropriate State regulatory agency to operate under area-wide verification procedures before DDT applications can be authorized or made. It is estimated that such a field scouting program has the potential for reducing the use of DDT by 20 percent or more below the amount that otherwise would be used. Only individuals knowledgeable in dry pea culture will be eligible to serve as field scouts; in addition, all field scouts will have to complete a field survey training program to be conducted by Dr. L. E. O'Keeffe, Associate Research Entomologist, University of Idaho, and director of research relating to pests of edible legumes. EPA expects to have three professional personnel on full-time duty as field survey officers in the pea-producing region, primarily to oversee the activities of the field scouts but also to monitor other aspects of the use of DDT. Field representatives of fertilizer and chemical companies and seed producers and processors will be eligible (after completion of the training program) to serve as field scouts. EPA recognizes the potential conflict of interest associated with this arrangement. It is EPA's position, however, that the field scouting system, which includes specific requirements as to field sampling and treatment criteria (see appendix), coupled with the activities of EPA's field survey officers, provides sufficient safeguards against needless or excessive use of DDT. In this regard, it should be noted that field scouts who authorize DDT treatment under conditions inconsistent with the limitations imposed by EPA (see appendix) will be barred from further participation in the field scouting program.

ENVIRONMENTAL MONITORING

Environmental monitoring in the pea-producing region will be conducted under the auspices of EPA. Emphasis will be placed on determining DDT levels in soil, stream sediment, and small mammals. Samples will be taken before treatment, two weeks after treatment, and 3–4 months after treatment.

RESEARCH

As indicated above, a testing program aimed at identifying alternatives to DDT will be conducted during the 1974 growing season. This program will be designed specifically to gather sufficient data to support the registration of one or more alternative pesticides prior to the 1975 growing season. Dr. L. E. O'Keeffe, Associate Research Entomologist, University of Idaho, will direct the program. Financial support is being provided by the University of Idaho, the U.S. Department of Agriculture, the Washington and Idaho Pea and Lentil Commissions, and

EPA. The following is an outline of the anticipated testing program:

a. The following insecticides will be tested:

i. methoxychlor
ii. Imidan
iii. malathion ULV
iv. DDT

b. Small plot testing will encompass comparative tests of all 4 insecticides plus untreated check plots. A minimum of 3 aerial application and 3 ground application tests will be conducted. Aerial application plots will be a minimum size of 1 acre each. Ground plots will be a minimum size of 200 sq. ft. each. Each insecticide, plus the untreated check plot, will be replicated 3 times in a randomized pattern, within any individual test.

c. Commercial plot testing will consist of tests in which the alternative insecticide is compared to DDT. A minimum of 3 aerial application and 3 ground application tests will be conducted for each of the alternative insecticides. Aerial and ground plots will not be replicated. Aerial plots will be a minimum size of 10 acres each. Ground plots will be a minimum size of 5 acres each.

d. Plot location will be selected to represent the geographically diverse areas of pea production; the range of the planting season; and the stand age or susceptibility.

e. Pea leaf weevil control will be determined by making pre-treatment counts and post-treatment counts at 3, 7, and 14 days to reflect the percentage reduction of adult weevils and period of residual effectiveness fir every insecticide tested.

f. Sampling will be completely randomized. The number of samples will be commensurate with plot size, so that statistical analysis is possible. Sampling data for small plot testing will attempt to correlate pea leaf weevil control to leaf damage and crop yield. Commercial plot sampling need relate only insecticide treatment to pea leaf weevil control.

g. Phytotoxicity readings will be made for all insecticides tested to determine the impact of the insecticide on pea stand count, stunting of plant growth, and leaf burn or chlorosis.

h. Crop yield sampling will be taken to determine the impact of the insecticides on the quantity and quality or appearance of the peas produced.

i. Taste evaluations will be made for Imidan treatments to insure that no adverse flavor has been imparted to the peas treated with this compound.

In addition, chemicals regarded as possible long-range alternatives to DDT for adult pea leaf weevil control will also be tested during the 1974 growing season. They include encapsulated methyl parathion, Temik, Thimet, Furadan, Diazinon, endosulfan, and Guthion. Testing of these chemicals will be designed to determine their pesticidal activity, appropriate dosage, and phytotoxic effects.

CONCLUSION

Based on all of the foregoing considerations, EPA has concluded that it is appropriate to allow the use of DDT to control the pea leaf weevil under the conditions, and subject to the limitations, specified herein. DDT labelling will be required to show all the applicable limitations. Registration will be formally approved only after submittal of finished labelling meeting this requirement.

Dated: March 14, 1974.

RUSSELL TRAIN,
Administrator.

APPENDIX

LIMITATIONS ON THE USE AND DISTRIBUTION OF DDT

1. Registration of Colloidal DDT–400 is valid only for the States of Washington and Idaho and only for control of the dry pea leaf weevil on dry peas, including seed peas.

2. Registration is valid for use of DDT only in the following counties: In the State of Washington: Adams, Asotin, Benton, Columbia, Franklin, Grant, Spokane, Walla Walla, and Whitman; in the State of Idaho: Benewah, Clearwater, Idaho, Kootenai, Latah, Lewis, and Nez Perce. Additional counties may be included upon the presentation to the Regional Administrator, EPA Region X, of information showing, to his satisfaction, the presence of pea leaf weevil infestation and the existence of an economic threat to dry pea culture.

3. Registration is valid only through June 30, 1974. Sale or use of DDT after this date is prohibited.

4. There shall not be more than a single application of DDT to any portion of a field regardless of weather and growing conditions.

5. Application rate is limited to one quart (one pound actual DDT) per acre.

6. All applications of DDT shall be made by pesticide applicators licensed by the States of Washington or Idaho or holders of use permits issued by one of these States.

7. Colloidal DDT–400 is formulated specifically for aerial application. Aerial applications shall be made only under the following conditions:

a. Use 5–10 gallons of water per acre.

b. Do not apply when temperature is over 85 degrees F. or when wind velocity is over 7 miles per hour.

c. Minimum nozzle orifice size shall be 0.094 inches. Nobles shall be directed downward and backward 135 degrees or more from the direction of flight.

d. Do not apply within one swath width of fish-bearing streams.

8. All DDT applications shall be made in accordance with all applicable State laws and regulations.

9. DDT shall be applied only after permission to do so has been given by an authorized field scout. Such permission shall be granted only if the field to be treated meets the following minimum treatment criteria:

a. To determine the extent of pea leaf weevil infestation, a minimum of 5 samples must be taken in any field of 50 acres or less. In fields larger than 50 acres, the number of samples must be proportionate to field size but shall be at least six samples.

b. There must be an average of at least 0.5 weevils per plants based on all samples taken in the field, or portion of the field, to be authorized for treatment.

c. General feeding damage, as manifested by leaf notching or terminal growth injury, must be evident over the majority of the area to be authorized for treatment.

d. If the majority of the plants have reached the 8-leaf stage, and if terminal growth points are not seriously damaged, treatment with DDT would be considered unnecessary and therefore prohibited.

e. It is anticipated that, prior to the weevil fly-in period (usually mid-to-late May), fields may only be marginally infested. Permission to apply DDT therefore shall be limited to those portions in which an infestation meeting these criteria has been detected.

f. Depending on the number of authorized field scouts, the need for individual field inspections, at some point during the growing season, may exceed the field scouts' capacity to perform such inspections in a timely manner. This could occur when peak weevil in-flight periods during mid-to-late May results in epidemic-level infestations in a particular area. Under these conditions, the requirement for individual field inspections may be suspended in favor of an area-wide inspection and authorization procedure. This procedure would require inspection of representative fields within the area where an epidemic-level infestion is said to exist. When field scouts verify that such conditions exist in a particular area, they shall obtain permission from the appropriate State Department of Agriculture to operate under area-wide inspection and authorization procedures. The State agency shall promptly notify Dr. L. E. O'Keeffe, Associate Research Entomologist, University of Idaho, and the EPA Regional Office that epidemic levels of infestation have been identified and that area-wide inspection and authorization procedures have been implemented. Such suspension of the requirement for individual field inspections shall remain in effect only until it is possible to resume individual field inspections. EPA field scouting officers shall determine when any such suspension shall be terminated.

Scouting

1. Individual field inspections shall be conducted at the grower's request by field scouts bearing credentials issued by the States of Washington or Idaho and attesting that the bearer has satisfactorily completed a training program conducted by Dr. L. E. O'Keeffe, Associate Research Entomologist, University of Idaho. Only persons knowledgeable in dry pea culture shall be eligible to act as field scouts.

2. EPA expects to have three field scouting officers on duty in the dry pea-producing region to oversee field scouting activities. These individuals will be responsible for checking at random the treatment decisions and authorizations made by field scouts, monitoring compliance with the treatment criteria set forth herein, and generally overseeing the distribution and use of DDT. EPA's field scouting officers shall have access to any field in which DDT treatment has been authorized and/or applied.

3. EPA field scouting officers will notify licensed DDT applicators of the names of any field scouts found to have issued authorizations to use DDT under conditions inconsistent with the minimum treatment criteria. Applying DDT upon authorization from any field scout who has been the subject of such notification shall constitute misuse of the product and shall make the applicator liable to civil penalty under section 14(a)(1) of FIFRA, as amended.

4. Each field scout shall complete, in duplicate, a field inspection record for each field, or portion thereof, inspected. This record shall contain the following information:

a. Name and signature of the field scout.
b. Name and signature of the farm owner or operator.
c. Date of the inspection.
d. Description of the field location.
e. Total number of samples.
f. Number of weevils recovered in each sample.
g. Number of acres requiring treatment.
h. Field diagram showing the location of

V 39 154 MAR 19 74 XUM

the samples and area to be treated.

1. A statement as to whether or not DDT treatment was authorized.

5. For each field, or portion thereof, for which DDT treatment is authorized, the field scout shall issue the farm owner or operator written authorization to apply DDT. This authorization shall be effective for a maximum period of four days and shall specify the location of the field and the number and location of the acres to be treated. This written authorization must be signed by both the field scout and farm owner or operator to be valid.

6. Each field scout shall maintain a list of all fields inspected each day. This list and the corresponding field inspection records shall be immediately provided to any EPA field scouting officer upon request.

Distribution

1. No technical DDT shall be sold or otherwise made available to growers, dealers, applicators, or other persons. Aside from the Crop King Chemical Company, no person shall be authorized to purchase or otherwise obtain technical DDT from any source whatsoever.

2. DDT applicators shall be required to sign a register attesting that they have read the labelling and understand it and that they will use DDT in compliance with all applicable limitations. They shall be required to make reports to the appropriate State Department of Agriculture regarding date, location, rate and total amount of each application.

3. Crop King shall maintain records showing amount and date of each purchase of technical DDT; amounts of formulated DDT produced; and amount and date of each sale of formulated DDT and name and location of the purchaser.

4. Dealers shall maintain similar records accounting for all DDT received and sold.

5. Crop King and all dealers shall provide one copy of each such record to the appropriate State Agriculture Department and one copy to the EPA Regional Office on a biweekly basis. These records will be available for public inspection in the EPA Regional Office.

6. All unused technical DDT shall be returned to the manufacturer (Montrose Chemical Company).

7. All formulated DDT not used will be returned to Crop King, where it will be held until such time as a disposal plan acceptable to EPA is developed. Crop King shall maintain records of all formulated DDT returned.

[FR Doc.74-6378 Filed 3-18-74;8:45 am]

FEDERAL MARITIME COMMISSION

CERTIFICATES OF FINANCIAL RESPONSIBILITY (OIL POLLUTION)

Notice of Certificates Revoked

Notice of voluntary revocation is hereby given with respect to Certificates of Financial Responsibility (Oil Pollution) which had been issued by the Federal Maritime Commission, covering the below-indicated vessels, pursuant to Part 542 of Title 46 CFR and section 311(p)(1) of the Federal Water Pollution Control Act, as amended.

Certificate No.	Owner/operator and vessels
01004---	Aktieselskabet Dux: *Skaga.*

FEDERAL POWER COMMISSION

[Docket No. G-12094, et al.]

MOBIL OIL CORP., ET AL.

Applications for Certificates, Abandonment of Service and Petitions To Amend Certificates [1]

MARCH 8, 1974.

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before April 3, 1974, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates or the authorization for the proposed abandonment is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

GENERAL SERVICES ADMINISTRATION

[Temporary Reg. G-16]

INTERAGENCY MOTOR POOL SYSTEM

Reduction in Fuel Consumed by Certain Types of Motor Vehicles

1. *Purpose.* This regulation provides revised policies and procedures to be followed to achieve and maintain a 20 percent reduction in fuel consumed by sedans, station wagons, and trucks in the interagency Motor Pool System previously established by FPMR Temporary Regulation G-13, as amended, dated November 28, 1973.

2. *Effective date.* This regulation is effective March 19, 1974.

3. *Expiration date.* This regulation expires December 31, 1974, unless sooner revised or superseded.

4. *Applicability.* The provisions of this regulation apply to all executive agencies. Other Federal agencies are encouraged to conform so that maximum benefits may be realized in reducing fuel consumption by Government-owned and operated motor vehicles.

5. *Background.* In consonance with the President's program to reduce energy consumption by all Federal agencies, GSA promulgated FPMR Temporary Regulation G-13, restricting use of certain types of motor vehicles in the Interagency Motor Pool System. Subsequently, further reductions in energy consumption were imposed which resulted in the issuance of Supplement 1 to Temporary Regulation G-13 on December 27, 1973. This regulation consolidates into a single issuance the basic policies in the above regulation, as amended, and incorporates the requirements established by FMC 74-1, dated January 21, 1974. Also included are appropriate changes resulting from consideration of agency comments.

6. *Procedure modifications.* Certain modifications are incorporated in this regulation among which are:

a. Addition of an appeals procedure,

b. Elimination of the semimonthly reporting requirement, and

c. Establishment of quarterly mileage goals at the agency national headquarters level.
